If any payment provided for above becomes more than thirty days overdue, then the entire balance of the settlement amount with interest to the date of payment shall become immediately due and payable at DOE's option. Between the time that any payment or portion thereof is required to be paid under this Consent Order and the time the full payment is completed, interest shall accrue at the rate prescribed in this Order. Such interest shall be paid to DOE with such overdue payment(s).

406

In the attribution of payments made pursuant to paragraph 402, interest shall be deemed earned before reduction of principal.

407

Concurrent with each payment made pursuant to this Consent Order, Diamond shall send a verification of the payment to: Jay Thompson, Director, Office of Administrator & Financial Management, Economic Regulatory Administration, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585.

V. Issues Resolved

501

All pending and potential civil and administrative claims, whether or not known, demands, liabilities, causes of action or other proceedings by the DOE against Diamond regarding Diamond's compliance with and obligations under the Federal petroleum price and allocation regulations during the period covered by this Consent Order, whether or not heretofore raised by an issue letter, Notice of Probable Violation, Notice of Proposed Disallowance, Proposed Remedial Order, Remedial Order, action in court or otherwise are resolved and extinguished as to Diamond by this Consent Order, except that this Consent Order does not cover or affect Diamond's rights in all regards concerning claims under 10 CFR Part 205, Subpart V, or its claims arising from violations or settlements of alleged violations of the Federal petroleum price and allocation regulations by third parties.

502(a)

Except as otherwise provided herein, compliance by Diamond with this Consent Order shall be deemed by the DOE to constitute full compliance for administrative and civil purposes with all Federal petroleum price and allocation regulations for the matters covered by this Consent Order. In consideration for Diamond's performance as required under this Consent Order, except as to those matters excluded by paragraph 501, the DOE hereby releases Diamond completely and for all purposes from all administrative and civil judicial claims, demands, liabilities or causes of action, including without limitation claims for civil penalties, that the DOE has

asserted or might otherwise be able to assert against Diamond before or after the date of this Consent Order for alleged violations of the Federal petroleum price and allocation regulations with respect to matters covered by this Consent Order. The DOE will not initiate or prosecute any such administrative or civil matter against Diamond or cause or refer any such matter to be initiated or prosecuted, nor will the DOE or its successors directly or indirectly aid in the initiation of any such administrative or civil matter against Diamond or participate voluntarily in the prosecution of such actions. The DOE will not assert voluntarily in any administrative or civil judicial proceeding that Diamond has violated the Federal petroleum price and allocation regulations with respect to the matters covered by this Consent Order or otherwise take any action with respect to Diamond in derogation of this Consent Order. However, nothing contained herein shall preclude the DOE from defending the validity of the Federal petroleum price and allocation regulations.

502(b)

Except for the matters excluded by this paragraph and paragraph 501, the DOE agrees that this Consent Order settles and finally resolves all aspects of Diamond's liability to the DOE under the Federal petroleum price and allocation regulations including but not limited to its capacity as an operator or working interest or royalty interest owner of a crude oil producing property. However, if Diamond was the operator of a property that produced crude oil for all or part of the period covered by this Consent Order, the DOE shall not initiate or prosecute any enforcement action against any person for noncompliance with the Federal petroleum price and allocation regulations during such period relative to such property, except to the extent such person received its interest from such property in kind. The DOE also reserves the right to initiate and prosecute enforcement actions against any person other than Diamond for noncompliance with the Federal petroleum price and allocation regulations, including, for example, suits against operators for overcharges for crude oil when Diamond is a working interest or royalty interest owner in such crude oil production. Diamond and the DOE agree that the amount paid to the DOE pursuant to this Consent Order is not attributable to Diamond's activities as a working interest or royalty interest owner on properties on which it is not the operator. Furthermore, Diamond and the DOE agree that the Consent Order and the payments hereunder do not resolve, reduce or release the liability of any other person for violations on properties of which (but only for the times during which) Diamond is or was a working interest or royalty interest owner (and not the operator) or affect any rights or obligations between Diamond and such working interest or royalty interest owners.

502(c)

The DOE will not seek or recommend any criminal fines or penalties based on information or evidence presently in its possession for the matters covered by this Consent Order, provided, however, that nothing in this Consent Order precludes the DOE from (1) seeking or recommending such criminal fines or penalties if information subsequently coming to its attention indicates, either by itself or in combination with information or evidence presently known to the DOE, that a criminal violation may have occurred or (2) otherwise complying with its obligations under law with regard to forwarding information of possible criminal violations of law to appropriate authorities. Nothing contained herein may be construed as a bar, estoppel, or defense against any criminal or civil action brought by an agency of the United States other than the DOE under (i) section 210 of the Economic Stabilization Act of 1970 or (ii) any statute or regulation other than the Federal petroleum price and allocation regulations. Finally, this Consent Order does not prejudice the rights of any third party or Diamond in any private action, including an action for contribution by or against Diamond.

502(d)

With respect to matters not excluded from this Consent Order, Diamond releases the DOE completely and for all purposes from all administrative and civil judicial claims, liabilities, or causes of action that Diamond has asserted or may otherwise be able to assert against the DOE relating to the DOE's administration of the Federal petroleum price and allocation regulations. This release, however, does not preclude Diamond from asserting any factual or legal position or argument as a defense against any action, claim, or proceeding brought by the DOE, the United States, or any agency of the United States.

503

Execution of this Consent Order constitutes neither an admission by Diamond nor a finding by the DOE of any violation by Diamond of any statute or regulation. The DOE has determined that it is not appropriate to seek to impose civil penalties for the matters covered by this Consent Order, and the DOE will not seek any such civil penalties.

None of the payments or expenditures made by Diamond pursuant to this Consent Order are to be considered for any purpose as penalties, fines, or forfeitures or as settlement of any potential liability for penalties, fines or forfeitures.

504

Notwithstanding any other provision herein, with respect to the matters covered by this Consent Order, the DOE reserves the right to initiate an enforcement proceeding or to seek appropriate penalties for any newly discovered regulatory violations committed by Diamond, but only if Diamond has concealed facts relating to such violations. The DOE and Diamond also reserve the right to seek appropriate judicial remedies, other than full rescission of this Consent Order, for any misrepresentation of fact material to this Consent Order during the course of the audit or the negotiations that preceded this Consent Order.

VI. Recordkeeping, Reporting, and Confidentiality

601

Diamond shall maintain such records as are necessary to demonstrate compliance with the terms of this Consent Order. To assist the DOE in the distribution of the funds paid pursuant to this Consent Order, Diamond also shall maintain, until thirty (30) days after the DOE's final distribution of those funds, sales volume data and customers' names and addresses regarding its sales of crude oil for the period from January 1, 1979, through January 27, 1981. If requested, Diamond shall make such information available to DOE. Except as otherwise provided in this paragraph, upon Diamond's completion of payment to DOE of the amount set forth in paragraph 401 of this Consent Order, Diamond is relieved of its obligation to comply with the recordkeeping requirements of the Federal petroleum price and allocation regulations relating to the matters covered by this Consent Order.

602

Except for formal requests for information regarding other firms subject to the DOE's information gathering and reporting authority, Diamond will not be subject to any audit

VOL
52
ISS
192
OC
5
1987
UMI

requests, report orders, subpoenas, or other administrative discovery by DOE relating to Diamond's compliance with the Federal petroleum price and allocation regulations relating to the matters settled by this Consent Order.

603

The DOE will treat the sensitive commercial and financial information provided by Diamond pursuant to negotiations which were conducted with respect to this Consent Order or obtained by the DOE in its audit of Diamond and related to matters covered by this Consent Order as confidential and proprietary and will not disclose such information unless required to do so by law, including a request by a duly authorized committee or subcommittee of Congress. If a request or demand for release of any such information is made pursuant to law, the DOE will claim any privilege or exemption reasonably available to it. The DOE will provide Diamond with ten (10) days actual notice, if possible, of any pending disclosure of such information, unless prohibited or precluded from doing so by law or request of Congress. The DOE will retain the audit information which it has acquired during its review of Diamond's compliance with the Federal petroleum price and allocation regulations in accordance with the DOE's established records retention procedures. Notwithstanding the otherwise confidential treatment afforded such information by the terms of this Consent Order, the DOE will make such information available to the Department of Justice ("DOJ") in response to a request pursuant to the DOJ's statutory authority by a duly authorized representative of the DOJ. If requested by the DOJ, the DOE shall not disclose that such a request has been made. Nothing in this paragraph shall be deemed to waive or prejudice any right Diamond may have independent of this Consent Order regarding the disclosure of sensitive commercial and financial information.

VII. Contractual Undertaking

701

It is the understanding and express intention of Diamond and the DOE that this Consent Order constitutes a legally enforceable contractual undertaking that is binding on the parties and their successors and assigns. Notwithstanding any other provision herein, Diamond (and its successors and assigns) and the DOE each reserves the right to institute a civil action in an appropriate United States district court, if necessary, to secure enforcement of the terms of this Consent Order, and the DOE also reserves the right to seek appropriate penalties and interest for any failure to comply with the terms of this Consent Order. The DOE will undertake the defense of the Consent Order, as made effective, in response to any litigation challenging the Consent Order's validity in which the DOE is named a party. Diamond agrees to cooperate with the DOE in the defense of any such challenge.

VIII. Final Order

801

Upon becoming effective, this Consent Order shall be a final order of DOE having the same force and effect as a remedial order issued pursuant to section 503 of the DOE Act, 42 U.S.C. 7139, and 10 CFR 205.199B. Diamond hereby waives its right to administrative or judicial review of this Order, but Diamond reserves the right to participate in any such review initiated by a third party.

IX. Effective Date

901

This Consent Order shall become effective as a final order of the DOE upon notice to that effect being published in the **Federal Register.** Prior to that date, the DOE will publish notice in the **Federal Register** that it proposes to make this Consent Order final and, in that notice, will provide not less than thirty (30) days for members of the public to submit written comments. The DOE will consider all written comments in determining whether to adopt the Consent Order as a final order, to withdraw agreement to the Consent Order, or to attempt to renegotiate the terms of the Consent Order.

902

Until the effective date, the DOE reserves the right to withdraw consent to this Consent Order by written notice to Diamond, in which event this Consent Order shall be null and void. If this Consent Order is not made effective on or before the one hundred twentieth (120th) day following execution by Diamond, Diamond may, at any time thereafter until the effective date, withdraw its agreement to this Consent Order by written notice to the DOE in which event this Consent Order shall be null and void.

I, the undersigned, a duly authorized representative of Diamond Shamrock R & M, Inc., hereby agree to and accept the foregoing Consent Order on its behalf.

Roger R. Hemminghaus,

President, Diamond Shamrock R & M, Inc.

Dated: September 18, 1987.

I, the undersigned, a duly authorized representative of the Department of Energy hereby agree to and accept the foregoing Consent Order on its behalf.

Milton C. Lorenz,

Special Counsel, Economic Regulatory Administration, Department of Energy.

Dated: August 19, 1987.

[FR Doc. 87-22890 Filed 10-02-87; 8:45 am]

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. CP87-545-000 et al.]

Natural Gas Certificate Filings; Trunkline Gas Co. et al.

Take notice that the following filings have been made with the Commission:

1. Trunkline Gas Co.

[Docket No. CP87-545-000]

September 25, 1987.

Take notice that on September 17, 1987, Trunkline Gas Company (Trunkline), P.O. Box 1642, Houston, Texas 77001 filed in Docket No. CP87-545-000 an application pursuant to section 7(b) of the Natural Gas Act and the regulations thereunder for an order permitting and approving abandonment of service provided pursuant to a certificate of public convenience and necessity which authorized the receipt, transportation and redelivery of natural gas on behalf of Amoco Production Company (Amoco), all as more fully set forth in the application which is on file with the Federal Energy Regulatory Commission (Commission) and open for public inspection.

Trunkline states that it was authorized in Docket No. CP77-651, dated January 9, 1978, to receive, transport and redeliver natural gas on behalf of Amoco pursuant to, and in accordance with a transportation agreement between Trunkline and Amoco dated August 11, 1977.

Trunkline also states that the authorization in Docket No. CP77-651 provided for the transportation of up to 2,900 Mcf of gas per day for Amoco's account from a portion of receipt in the North Bon Air Field, Jefferson Davis Parish, Louisiana to the interconnection between the facilities of Florida Gas Transmission Corporation and Trunkline in Calcasieu Parish, Louisiana. Trunkline states that it

constructed 50 feet of pipeline and appurtenant facilities to facilitate the receipt of that gas.

Trunkline further states that Amoco has advised that the reserves transported under Docket No. CP77–651 have been depleted, and the transportation service is no longer required by Amoco.

It is stated that Trunkline specifically requests Commission authorization to abandon service provided under Trunkline's Rate Schedule T–39 and to cancel such Rate Schedule effective December 1, 1987, pursuant to a termination letter dated August 7, 1987.

Comment date: October 16, 1987, in accordance with Standard Paragraph F at the end of this notice.

2. United Gas Pipe Line Co.

[Docket No. CP87–552–000]

September 28, 1987.

Take notice that on September 22, 1987, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251–1478, filed in Docket No. CP87–552–000 an application pursuant to sections 7 (b) and (c) of the Natural Gas Act to abandon firm direct sales service and substitute new firm and interruptible sales services to various customers, as more fully set forth in the application which is on file with the Commission and open to public inspection.

United seeks authority to provide continued service to various direct sales customers as listed below:

Customer	Old firm CDQ (Mcf)	New CDQ
New Firm Contract:		
Stauffer Chemical Co.[1]	8,000	100 MMBtu
New Interruptible Contracts:		
Stauffer Chemical Co.[1]	8,000	7,000 Mcf
E.P. Operating Co. (formerly Enserch Exp.).	3,000	3,000 Mcf
MOEPSI	500	500 Mcf
Texaco Inc	300	300 Mcf

[1] Stauffer previously had one contract for 8,000 MMBtu which has been replaced with new firm and interruptible contracts.

United States that it would use existing facilities to provide these services.

Comment date: October 20, 1987, in accordance with Standard Paragraph F at the end of this notice.

3. Bayou Interstate Pipeline System Pelican Interstate Gas System

[Docket No. CP87–534–000]

September 25, 1987.

Take notice that on September 10, 1987, Bayou Interstate Pipeline System (Bayou) and Pelican Interstate Gas System (Pelican), (Applicants), 1600 Smith Street Suite 3075, Houston, Texas 77002, filed in Docket No. CP87–534–000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing interruptible transportation of natural gas for the account of Pontchartrain Natural Gas System (Pontchartrain) and the construction and operation of facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Specifically, Bayou seeks authorization to utilize 3.3 miles of existing offshore pipeline to transport up to 100,000 MMBtu of natural gas per day, on an interruptible basis, for the account of Pontchartrain pursuant to its December 1, 1986 gas transportation agreement for a primary term of one year and then month to month thereafter. Bayou states that it would have to construct metering, tap, and appurtenant facilities, estimated to cost $569,000, in order to provide the proposed transportation. Pelican seeks authorization to transport up to 140,000 MMBtu of natural gas per day on an interruptible basis for system supply of Pontchartrain pursuant to its December 1, 1986 gas transportation agreement for a primary term of one year and then month to month thereafter.

Bayou states that it would receive volumes of gas for the account of Pontchartrain at the proposed interconnection of its facilities and those of Amoco Production Company in West Cameron Block 294, offshore Louisiana and redeliver the gas to the proposed interconnection of its facilities and those of Pelican in West Cameron Block 289, offshore Louisiana. Pelican states that it would receive volumes of gas for the account of Pontchartrain at the existing interconnection of its facilities and those of Atlantic Richfield Company in West Cameron Block 211 offshore Louisiana, and at the proposed interconnections of its facilities and (1) those of Santa Fe Mineral's Inc. in High Island Block 129, offshore Texas, (2) those of Bayou in West Cameron Block 289, offshore Louisiana, and (3) those of Samedan Oil Corporation in West Cameron Block 290, offshore Louisiana. Pelican states that it would deliver this gas for the account of Pontchartrain to Natural Gas Pipeline Company of America at the Mobile Cameron Meadows plant located in Cameron Parish, Louisiana.

Bayou proposes to charge Pontchartrain a transportation fee of $0.0955 per MMBtu of gas received. Pelican proposes to charge Pontchartrain a transportation fee of $0.033 per MMBtu of gas received.

Comment date: October 16, 1987, in accordance with Standard Paragraph F at the end of this notice.

4. Granite State Gas Transmission, Inc.

[Docket No. CP87–550–000]

September 28, 1987.

Take notice that on September 21, 1987, Granite State Gas Transmission, Inc. (Applicant), 120 Royal Street, Canton, Massachusetts 02021, filed in Docket No. CP87–550–000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) for authority to construct and operate a new delivery point in Plaistow, New Hampshire to its affiliated distributor, Northern Utilities, Inc. (Northern) under the certificate issued in Docket No. CP82–515–000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public insepction.

Applicant proposes to add a new delivery point to Northern at its Plaistow, New Hampshire, compressor station through which Northern would serve a new customer with an estimated annual consumption of 2,378 Mcf of natural gas. Applicant states that the new customer could not be economically served from Northern's current distribution system. Applicant indicates that the total volumes delivered to Northern would not exceed the presently authorized volumes.

The total estimated cost of the proposed facilities is $6,440 which would be reimbursed to Applicant by Northern, it is explained.

Comment date: November 12, 1987, in accordance with Standard Paragraph G at the end of this notice.

5. Northern Natural Gas Co. Division of Enron Corp.

[Docket No. CP87–533–000]

September 28, 1987

Take notice that on September 9, 1987, Northern Natural Gas Company, Division of Enron Corp. (Northern) 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP87–533–000, a request pursuant to section 157.211 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 157.211) for authorization to construct and operate one small volume

measurement station to accommodate gas sales deliveries for residential use to the Hiview Acres Subdivision (Hiview Acres), a non-right-of-way grantor in Finney County, Kansas, who would be served through K N Energy, Inc. (K N Energy), a local distributor, under the certificate issued in Docket No. CP82–401–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

The volumes proposed to be delivered to K N Energy would be within its currently authorized firm entitlement and are estimated to be 8,640 Mcf annually, it is stated. It is further stated that sales to be made at the proposed station would be under Rate Schedule PL–1.

The total estimated cost to construct and operate the sales tap is $4,500, and K N Engergy would not be required to contribute any aid to the construction, it is asserted.

Comment date: November 12, 1987, in accordance with Standard Paragraph G at the end of this notice.

6. Tennessee Gas Pipeline Co., a Division of Tenneco Inc.

[Docket No. CP87–103–001]

September 25, 1987.

Take notice that on September 15, 1987, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Applicant), P.O. Box 2511, Houston, Texas 7701, filed in Docket No. CP87–103–001 an amendment to its application filed in Docket No. CP87–103–000 pursuant to section 7(c) of the National Gas Act so as to clarify and update the original application, all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

In Docket No. CP87–103–000, Applicant requested authority to permit its Rate Schedule SS–E and SS–NE customers to use up to one-third of its total authorized winter storage quantity for gas purchased from third-parties. Applicant proposes in Docket No. CP87–103–001 to clarify that the opportunity provided to Rate Schedule SS–E and SS–NE customers to inject third-party gas into Storage is solely at the customer's option. Applicant also proposes to eliminate certain dates in the original application that are now obsolete and modify the pro forma SS–E and SS–NE Rate Schedules in response to various technical questions raised in discussion with Applicant's customers. Applicant states that copies of the filing have been mailed to all parties in Docket No. CP87–103–000.

Comment date: October 16, 1987, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

7. Tennessee Gas Pipeline Co., a Division of Tenneco Inc.

[Docket No. CP87–543–000]

September 25, 1987.

Take notice that on September 17, 1987, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed an application pursuant to section 7(b) of the Natural Gas Act for authorization to abandon 1.95 miles of 10-inch pipeline located in the South Timbalier Block 54 Field, offshore Louisiana (Tennessee's Line No. 524–C–1100), as more fully set forth in the application which is on file with the Commission and open to public inspection.

Tennessee states that line No. 524–C–1100 was installed in 1976 under budget-type certificate authorization at Docket No. CP76–151–000 and connects the South Timbalier 54–F and 54–D Platforms. The line would be transferred to Exxon Company USA (Exxon) to assist Exxon in the consolidation of facilities and operational revisions in its production operations in the South Timbalier Block 54 Field. Tennessee would continue to purchase natural gas from the South Timbalier Block 54 Field via its 12-inch line which runs from the South Timbalier E platform to the onshore Shell-owned Yscloskey Processing Plant in St. Bernard Parish, Louisiana.

Comment date: October 16, 1987, in accordance with Standard Paragraph F at the end of this notice.

8. United Gas Pipe Line Co.

[Docket No. CP87–548–000]

September 28, 1987.

Take notice that on September 21, 1987, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251–1478, filed in Docket No. CP87–548–000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon a direct industrial sale of gas to Atlas Processing Company (Atlas), at a point near Shreveport, Caddo Parish, Louisiana, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

United states that it notified Atlas by letter dated August 4, 1986, that the 1981 operating agreement between United and Atlas was cancelled effective September 4, 1986. It is stated that Atlas acknowledged receipt of the notice of cancellation by letter dated December 19, 1986. United further states that continuation of the present service is not in the public interest and it requests that the Commission permit the termination of direct sale service to the extent required.

United is not requesting abandonment authority of any facilities. United states that the subject delivery facilities would be left in place to accommodate either future transportation service or new sales service if appropriate contractual arrangements can be made. United states that if such new arrangements are not made, it will file to abandon such facilities.

Comment date: October 16, 1987, in accordance with Standard Paragraph F at the end of this notice.

9. Arkla Energy Resources a Division of Arkla, Inc.

[Docket No. CP87–551–000]

September 28, 1987.

Take notice that on September 22, 1987, Arkla Energy Resources (AER), a division of Arkla, Inc., P.O. Box 21734, Shreveport, Louisiana 71151, filed in Docket No. CP87–551–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to undertake certain actions and activities necessary to effect the abandonment and transfer to Arkansas Louisiana Gas Company (ALG), also a division of Arkla, Inc., of certain certificated facilities in Oklahoma and Kansas, under the certificate issued in Docket Nos. CP82–384–000 and CP82–384–001 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the application that is on file with the Commission and open to public inspection.

It is stated that AER has concluded that in the area of Hominy and Altus, Oklahoma, and Sterling, Kansas, it is operating facilities under a certificate issued in Docket No. CP60–79 which are used exclusively for retail sales of natural gas, rather than for transmission functions. AER states that at Hominy, Oklahoma, the facilities in question are used solely for ALG's receipt of gas from another pipeline supplier. AER further states that, in the other two locations, the facilities in question are lines from which service is provided to rural domestic customers of ALG. AER requests authority to abandon these facilities and, in one instance, it requests a certificate to construct at an estimated cost of $4,612 a new 1-inch tap and appurtenant facilities in Jackson County, Oklahoma, to serve Lines 8–G–2 and 8–G–3 which are proposed to be

abandoned. AER represents that granting its application will have no effect on the level of its deliveries or on service to existing customers.

Comment date: November 12, 1987, in accordance with Standard Paragraph G at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Kenneth F. Plumb,

Secretary.

[FR Doc. 87-22887 Filed 10-2-87; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP87-150-000]

Change in Sale Rates and Adoption of ACA Clause; Pacific Interstate Offshore Co.

September 29, 1987.

Take notice that on September 25, 1987, Pacific Interstate Offshore Company ("PIOC") submitted for filing, to be a part of its FERC Gas Tariff, Original Volume No. 1, the following tariff sheets:

Original Volume No. 1

Sixth Revised Sheet No. 4
First Revised Sheet No. 5
First Revised Sheet No. 20
First Revised Sheet No. 35

PIOC states the purpose of this filing is to establish an Annual Charge Adjustment Clause ("ACA" Clause) in PIOC's tariff as appropriate and to set forth the applicable surcharge in its sales rate schedule as required by Order No. 472.

PIOC requests an effective date of October 1, 1987.

A copy of the filing has been served on PIOC's sole customer, Southern California Gas Company and the Public Utilities Commission of the State of California.

Any persons desiring to be heard or protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capital Street NE. Washington DC 20426, in accordance with Rule 211 or 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before October 6, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP87-148-000]

Change in Rates and Tariff Revisions; Sea Robin Pipeline Co.

September 29, 1987.

Take notice that on September 25, 1987, Sea Robin Pipeline Company (Sea Robin), tendered for filing with the Commission to be effective October 1, 1987 the following tariff sheets to be included in Sea Robin's FERC Gas Tariff:

Original Volume No. 1

Forty-Eighth Revised Sheet No. 4
Twenty-Sixth Revised Sheet No. 4-A
Third Revised Sheet No. 4-A1
Third Revised Sheet No. 4-A2
Original Sheet No. 22-A
Original Revised Sheet No. 22-B

Original Volume No. 2

Thirty-First Revised Sheet No. 127-D
Thirty-First Revised Sheet No. 135-C

Sea Robin states that the Commission by Order No. 472 issued May 29, 1987 implemented procedures providing of the assessment and collection from interstate pipelines, of annual charges as required by the Omnibus Budget Reconciliation Act of 1986. Pursuant to Order No. 472, the Commission authorized the tracking for automatic pass through to pipeline customers fo the annual charges under an Annual Charge Adjustment ("ACA") clause. Sea Robin states that it is making this filing pursuant to § 154.38 (d)(6) of the Commission's Regulations in order to include in its FERC Gas Tariff the procedure for collecting its assessed amount from its customers.

To the extent required, if any, Sea Robin requests that the Commission grant such waivers as may be necessary for acceptance of the tariff sheets submitted herewith, to become effective October 1, 1987.

Copies of this letter and enclosures are being served on jurisdictional customers and applicable state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before October 6, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party

must file a motion to intervene. Copies of this filing are on file with the Commission and are avaialble for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP87-149-000]

Change in Rates and Tariff Revisions; United Gas Pipe Line Co.

September 29, 1987.

Take notice that on September 25, 1987, United Gas Pipe Line Company (United), tendered for filing with the Commission to be effective October 1, 1987 the following tariff sheets to be included in United's First Revised Volume No. 1 of United's FERC Gas Tariff:

Seventy-Eighth Revised Sheet No. 4
Twenty-Second Revised Sheet No. 4-C
Eight Revised Sheet No. 4-D
Seventh Revised Sheet No. 4-E
Original Sheet No. 74-K1
Original Sheet No. 74-K2

Seventyz/Eighth Revised Sheet No. 4Twentyz/Second Revised Sheet No. 4-CEighth Revised Sheet No. 4-DSeventh Revised Sheet No. 4-EOriginal Sheet No. 74-K1Original Sheet No. 74-K2

United states that the Commission by Order No. 472 issued May 29, 1987, implemented procedures providing for the assessment and collection from interstate pipelines, of annual charges as required by the Omnibus Budget Reconciliation Act of 1986. Pursuant to Order No. 472, the Commission authorized the tracking for automatic pass through to pipeline customers of the annual charges under an Annual Charge Adjustment ("ACA") clause. United states that it is making this filing pursuant to § 154.38 (d)(6) of the Commission's Regulations in order to include in its FERC Gas Tariff the procedure for collecting its asessed amount from its customers.

To the extent required, if any, United requests that the Commission grant such waivers as may be necessary for acceptance of the tariff sheets submitted herewith, to become effective October 1, 1987.

Copies of this letter and enclosures are being served on jurisdictional customers and applicable state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before October 6, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. QF87-644-000]

Small Power Production; Application for Commission Certification of Qualifying Status of a Cogeneration Facility; Arrowhead Cogeneration Co. Limited Partnership

September 25, 1987.

On September 8, 1987, Arrowhead Cogeneration Company Limited Partnership (Applicant), of 3003 Summer Street, Stamford, Connecticut 06905, submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration will be located in Milton, Vermont and will consist of a combustion turbine generator, a heat recovery steam generator equipped with a supplementary firing burner, and an extraction/condensing steam turbine generator. Thermal energy recovered from the facility in the form of steam will be utilized by the Wyeth Nutritionals Inc. Plant. The electric power production capacity of the facility will be 27,880 KW. The primary source of energy will be natural gas. Construction of the facility is expected to begin in October, 1988.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[AMS-FRL-3272-7]

Air Pollution Control; Motor Vehicle Emission Factors; Public Workshop

AGENCY: Environmental Protection Agency.

ACTION: Notice of public workshop.

SUMMARY: This notice announces a public workshop which the Environmental Protection Agency will hold regarding the Agency's motor vehicle emission factors. The emission factors are used by States in preparing State Implementation Plan revisions and by others engaged in determining the air quality impact of motor vehicles. The Agency's purpose in holding this workshop is to meet with those parties potentially possessing information which would be of use in evaluating the emission factors and to allow all interested parties to participate informally in the review of the EPA information.

DATE: The workshop is being held on Tuesday, November 10, 1987, at 9:00 a.m.

ADDRESS: The workshop will be held at EPA's Motor Vehicle Emission Laboratory, 2565 Plymouth Road, Ann Arbor, Michigan 48105.

FOR FURTHER INFORMATION CONTACT: Lois Platte (313) 668-4306, Emission Control Technology Division, U.S. Environmental Protection Agency, 2565 Plymouth Road, Ann Arbor, Michigan 38105.

SUPPLEMENTARY INFORMATION: EPA's current estimates of emission factors are contained in the computer program MOBILE3, and have been published in the report entitled, "Compilation of Air Pollutant Emission Factors: Mobile Sources", Vol. II, Fourth Edition. MOBILE3 was released in mid-1984, and since that time much additional in-use vehicle emission data have been collected and evaluated. EPA believes that incorporating this data into a new model, MOBILE4, would be beneficial to

States and local agencies using the model for long term attainment plannning.

The current timetable calls for release of MOBILE4 by December 30, 1987. EPA held the first public workshop on the subject of MOBILE4 in April 1987. At that workshop, EPA presented various proposals for the MOBILE4 emission factors. The purpose of the October 14 workshop is to provide information on the development and results of the draft version of MOBILE4. Following the October workshop, a brief comment period will be scheduled. It will be the last opportunity for comment prior to release of the final version of MOBILE4.

Specific topics that will be discussed in the October 14 workshop include:

Registration and vehicle miles traveled distributions
Heavy-duty vehicle emission factors
Inspection and maintenance credits
Tampering rates
Emission rates for 1981 and newer cars

Information on items for which there is not sufficient time to make a formal presentation will be disseminated through handouts made available at the workshop.

Because of the technical nature of the agenda, participants should be familiar with the existing emission factors and MOBILE3 to most fully contribute to the discussions.

This workshop will not discuss the programming aspects of the MOBILE3 computer program, such as its interface with other programs used in preparing emission inventories and air quality plans, and the language and equipment requirements of the program.

The workshop is intended to be a forum for exchange of information and has no direct connection to any rulemaking action. Consequently, the workshop will be very informal. There will be no opportunity for prepared statements in general, although prepared remarks will be welcome on specific issues as those are brought up for discussion. Although no public docket will be kept, written submissions are welcome at any time and may be brought to the workshop or mailed to Lois Platte, at the address set out above.

Date: September 14, 1987.

Don R. Clay,

Acting Assistant Administrator for Air and Radiation.

[FRL-3272-6]

Science Advisory Board, Environmental Engineering Committee; Open Meeting October 22 and 23, 1987

Under Pub. L. 92-463, notice is hereby given that the Environmental Engineering Committee's Mine Waste Risk Screening Subcommittee of the Science Advisory Board will meet from 9:00 a.m. to 12:00 noon on Thursday, October 22, 1987 in the Administrator's Conference Room 1101 West Tower, 401 M Street SW., Washington, DC. The Subcommittee will complete the preparation of its report on the Office of Solid Waste's technical support document entitled: "Draft Risk Screening Analysis of Mining Wastes," dated September 21, 1987.

The Environmental Engineering Committee will meet at 1:30 p.m. till 5:00 p.m. on Thursday, October 22nd and from 9:00 a.m. till 4:00 p.m. on Friday, October 23rd at the same location. The Committee will hear the report of the Mine Waste Risk Screening Subcommittee and be briefed by the Agency on a variety of Environmental Protection Agency's engineering activities.

The meeting is open to the public. Any member of the public wishing to attend or submit written comments should notify Mrs. Kathleen Conway, Deputy Director, Science Advisory Board, at 202-382-2552 or Joanna Foellmer at 202-382-4126 by October 16, 1987.

Date: September 28, 1987.

Kathleen Conway,

Acting Director, Science Advisory Board.

BILLING CODE 6560-50-M

[FRL-3272-4]

Walter Pollution Control; Highlands Aquifer System in Passaic, Morris and Sussex Counties, and Orange County NY, Sole Aquifer Final Determination

AGENCY: U.S. Environmental Protection Agency.

ACTION: Notice.

SUMMARY: Notice is hereby given that, pursuant to section 1424(e) of the Safe Drinking Water Act, the Regional Adminstrator of the U.S. Environmental Protection Agency (EPA) Region II has determined that the Highlands Aquifer System, underlying portions of Passaic, Morris and Sussex Counties, New Jersey and Orange County, New York, is the sole or principal source of drinking water for portions of the Town ships of West Milford, Jefferson, Rockaway, Vernon, and Hardyston, and a portion of the Borough of Pampton Lakes, the entire Boroughs of Bloomingdale, Ringwood, Wanaque, Butler and Riverdale, New Jersey; and portions of the Townships of Warwick and Tuxedo, and the entire Village of Greenwood Lake, New York. This aquifer, if contaminated, would create a significant hazard to public health. As a result of this action, all Federal financially assisted projects constructed in the designated Highlands Aquifer Area will be subject to EPA review to ensure that these projects are designed and constructed such that they do not create a significant hazard to public health.

DATE: This determination shall be promulgated for purposes of judicial review at 1:00 p.m. Eastern Daylight time on October 19, 1987.

ADDRESSES: The data on which these findings are based are available to the public and may be inspected during normal business hours at the U.S. Environmental Protection Agency, Office of Ground Water Management, Room 805, 26 Federal Plaza, New York, New York 10278.

FOR FURTHER INFORMATION CONTACT: John S. Malleck, Chief, Office of Ground Water Management, Room 805, Environmental Protection Agency, Region II at (212) 264-5635.

SUPPLEMENTARY INFORMATION:

I. Background

Section 1424(e) of the Safe Drinking Water Act (42 U.S.C., 300f, 300h-3(e), Pub. L. 93-523) states:

(e) If the Administrator determines on his own initiative or upon petition, that an area has an aquifer which is the sole or principal drinking water source for the area and which, if contaminated, would create a significant hazard to public health, he shall publish notice of that determination in the FEDERAL REGISTER. After the publication of any such notice, no commitment for Federal financial assistance (through) a grant, contract, loan guarantee, or otherwise) may be entered into for any project which the Administrator determines may contaminate such aquifer through a recharge zone so as to create a significant hazard to public health, but a commitment for Federal financial assistance may, if authorized under another provision of law, be entered into to plan or design the project to assure that it will not so contaminate the aquifer.

On March 9, 1987, the Administrator duly delegated to the Regional Administrator the authority to determine, under section 1424(e) of the Safe Drinking Water Act, 42 U.S.C. 300h-3(e), that an area has an aquifer which is the sole or principal source of drinking water for the area and which, if

VOL
52
ISS
192
OC
5
1987
UMI

contaminated, would create a significant hazard to public health.

On March 14, 1985, EPA received a petition from Mr. Charles Slawinski, Mayor of the Township of West Milford and Dr. Ella F. Filippone, Executive Administrator of the Passaic River Coalition, which asked EPA to designate the Highlands Aquifer System as a sole or principal source aquifer. A public hearing was conducted on December 9, 1986 and the public was permitted to submit written comments on the petition request until January 9, 1987.

The petition submitted to EPA encompassed the Pochuck, Wanaque and Pequannock River drainage basins. However, based on EPA's review of the hydrogeologic information, the Pochuck River drainage basin has been deleted from the final sole source designation area. A major basin divide exists between the Pochuck River which runs west and north, and the Pequannock and Wanaque Rivers which run south and east. This basin divide, in conjunction with the lack of evidence to support a statement to the contrary, lead EPA to conclude that the Pochuck River drainage basin is not part of the same aquifer system as the Wanaque and Pequannock. Available information indicates that the Pochuck could meet Sole Source Aquifer criteria; however, more information is needed.

II. Basis for Determination

Among the factors to be considered by the Agency in connection with the designation of a sole source aquifer area under section 1424(e) are: (1) Whether the Highlands Aquifer System is the area's sole or principal source of drinking water and (2) whether contamination of the aquifer would create a significant hazard to public health. On the basis of technical information available to this Agency, the following are the findings, which are the basis for the determination noted above:

1. The Highlands Aquifer System as defined by the EPA currently serves as the "Sole or Principal Source" of drinking water for approximately 89,121 persons in the service area, representing 85 percent of the population.

2. There is no existing or potential alternative drinking water source or combination of sources capable of replacing the Highlands Aquifer System should it become contaminated.

3. The Highlands Aquifer System consists of Quaternary glacial drift, Paleozoic sedimentary formations, and Pre-cambrian permeable soil characteristics. This aquifer system is susceptible to contamination through its recharge zone from a number of sources, including, but not limited to, chemical spills, high way and urban area runoff, septic systems, leaking storage tanks (above and underground), and landfill leachate. Since ground water contamination can be difficult or sometimes impossible to remediate and since the aforementioned communities rely on the Highlands Aquifer System for drinking water purposes, contamination of the aquifer would pose a significant hazard to public health.

III. Description of the Highlands Aquifer System of Passaic, Morris and Sussex Counties, New Jersey, and Orange County, New York Area, its Recharge Zone and Streamflow Source Zone

The Highlands Aquifer System is composed of permeable glacial drift overlying permeable sedimentary and fractured igneous and metamorphic formations.

For the purpose of this designation, the Highlands Aquifer System is considered to include the entirety of the Wanaque and Pequannock River basins in New Jersey and New York. The aquifer system covers approximately 195 square miles and includes portions of the Townships of West Milford, Jefferson, Rockaway, Vernon and Hardyston, and portions of the Borough of Pompton Lakes, the entire Boroughs of Bloomingdale, Ringwood, Wanaque, Butler and Riverdale, New Jersey; portions of the Townships of Warwick and Tuxedo, and the entire Village of Greenwood Lake, New York.

Because the Wanaque and Pequannock River basins are covered with permeable sediments, the recharge zone, where water percolates directly to the aquifer, includes the entire areal extent of the Highlands Aquifer Area. Since no streams flow into the Wanaque and Pequannock River basins, there is no streamflow source zone for the aquifer.

The boundary of both the designated area and aquifer service area are the boundaries of the Wanaque and Pequannock River basins. Thus, the designated area in which Federal financially assisted projects will be subject to review is the Wanaque and Pequannock River basins which include portions of Passaic, Morris and Sussex, Counties New Jersey, and Orange County, New York.

IV. Information Utilized in Determination

The information utilized in this determination includes the petition, written and verbal comments submitted by the public, various technical publications and verbal communication with various departments in the affected municipalities. The above data are available to the public and may be inspected during normal business hours at the U.S. Environmental Protection Agency, Region II, Office of Ground Water Management, Room 805, 26 Federal Plaza, New York, New York 10278.

V. Project Review

EPA Region II is working with the Federal agencies that may provide financial assistance to projects in the area of concern. Interagency procedures and Memoranda of Understanding have been developed through which EPA will be notified of proposed commitments by Federal agencies for projects which could potentially contaminate the Highlands Aquifer System, upon which portions of the Townships of West Milford, Jefferson, Rockaway, Vernon, Hardyston, and a portion of the Borough of Pompton Lakes, the entire Boroughs of Bloomingdale, Ringwood, Wanaque, Butler and Riverdale, New Jersey; portions of the Townships of Warwick and Tuxedo, and the entire Village of Greenwood Lake, New York are dependent for their sole or principal source water supply. EPA will evaluate such projects and, where necessary, conduct an in-depth review, including soliciting public comments where appropriate.

In many cases, these Federally assisted projects may also be analyzed in an "Environmental Impact Statement" (EIS) under the National Environmental Policy Act (NEPA), 42 U.S.C. 4332(2)(C). All EIS, as well as any other proposed Federal actions affecting an EPA program or responsibility, are required by Federal law (under the "NEPA/309" process) to be reviewed and commented upon by the EPA Administrator (42 U.S.C. 7609 requires EPA to conduct this review). The "309" in a "NEPA/309" derives from the original source of this general requirement, section 309 of the Clean Air Act.

Therefore, in order to streamline EPA's review of the possible environmental impacts on designated aquifers, when an action is analyzed in an EIS, the two reviews will be consolidated and both authorities will be cited. The EPA review (under the Safe Drinking Water Act) of Federally-assisted projects potentially affecting sole or principal source aquifers will be included in the EPA review (under the "NEPA/309" process) of any EIS accompanying the same Federally-assisted project. The letter transmitting EPA's comments on the final EIS to the lead agency will be the vehicle for

informing the lead agency of EPA's actions under section 1424(e)

Should the Regional Administrator determine that a project may contaminate the aquifer through its recharge zone so as to create a significant hazard to public health, no commitment for Federal financial assistance may be entered. However, a commitment for Federal financial assistance may, if authorized under another provision of law, be entered into to plan or design the project to assure that it will not so contaminate the aquifer.

The U.S. Environmental Protection Agency will rely to the maximum extent possible on any existing or future State and local control mechanisms in protecting the ground water quality of the Highlands Aquifer System. EPA review of any Federally financially assisted project will be coordinated with the State and local agencies and their comments will be given full consideraton. The Federal review process will attempt to complement and support State and local ground water protection mechanisms.

IV. Summary and Discussion of Public Comments.

The majority of verbal and written comments received on the petition were in favor of designating the Highlands Aquifer System as a sole or principal source aquifer. A public hearing was held on December 9, 1986. The New Jersey Department of Environmental Protection (NJDEP) presented the only statement in opposition to the designation at the hearing. The only letter received in opposition was from the New York State Department of Environmental Conservation (NYSDEC).

The NJDEP questioned the boundaries of the aquifer. They also urged EPA to act on New Jersey's statewide petition in lieu of designating the Highlands Aquifer System which is only a small portion of the State.

The boundaries of the Highlands Aquifer System are based on a USGS report (Carswell and Rooney, 1976), which state that the aquifer boundaries in this area follow the surface water divides. It is EPA's general policy to act on petitions in the order in which they are submitted. The statewide petition is currently being revised; therefore, EPA is not in a position to make a determination on it.

NYSDEC contends that the Highlands Aquifer System is not of national or statewide significance for public water supply. They believe sole source designation of this area would require the diversion of limited program funds away from "primary public water supply aquifers" which have been targeted in the New York Upstate Ground Water Management Program as priority management areas.

NYSDEC did not give their definition of "national or statewide significance". The sole source aquifer program criteria requires that the aquifer be needed to supply 50 percent or more of the drinking water in the aquifer service area. The Region has found that the Highlands Aquifer System meets this criteria, and, therefore, it is of national and statewide significance. This criteria differs from that of NYSDEC's primary public water supply aquifer program, and it does not require consideration of individual state priorities basins.

NYSDEC also questioned the petitions population statistics for people in the New York Area served by ground water. None of the areas in which NYSDEC questioned is included in the designated area.

VII. Economic and Regulatory Impact

Pursuant to the provisions of the Regulatory Flexibility Act (RFA), 5 U.S.C. 605(b), I hereby certify that the attached rule will not have a significant impact on a substantial number of small entities. For purposes of this Certification, the "small entity" shall have the same meaning as given in section 601 of the RFA. This action is only applicable to portions of Passaic, Morris, and Sussex Counties, New Jersey, and Orange County, New York. The only affected entities will be those area-based businesses, organizations or governmental jurisdictions that request Federal financial assistance for projects which have the potential for contaminating the aquifer so as to create a significant hazard to public health. EPA does not expect to be reviewing small isolated commitments of financial assistance on an individual basis, because their potential for contaminating the aquifer is remote. Accordingly, the number of affected small entities will be minimal. However, if the Region anticipates that a cumulative impact on the aquifer will occur, small isolated commitments will be reviewed.

For those small entities which are subject to review, the impact from today's action will not be significant. Most projects subject to this review will be preceded by a ground water impact assessment required pursuant to other Federal laws, such as the National Environmental Policy Act (NEPA) as amended 42 U.S.C. 4321, *et seq.* Integration of those related review procedures will allow EPA and other Federal agencies to avoid delay or duplication of effort in approving financial assistance, thus minimizing any adverse effect on those small entities which are affected. Finally, today's action does not prevent grants of Federal financial assistance which may be available to any affected small entity in order to pay for the redesign of the project to assure protection of the aquifer.

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. This regulation is not major because it will not have an annual effect of $100 million or more on the economy, will not cause any major increase in costs or prices and will not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States enterprises to compete in domestic or export markets. Today's action only affects the Highlands Aquifer System which underlies portions of Passaic, Morris, and Sussex Counties, New Jersey, and a portion of Orange County, New York.

It provides an additional review of ground water protection measures, incorporating state and local measures whenever possible, for only those projects which request Federal financial assistance.

Dated: September 25, 1987.

Christopher J. Daggett

Regional Administrator.

[FR Doc. 87-22920 Filed 10-2-87; 8:45 am]

BILLING CODE 6560-50-M

[FRL-3272-5]

Sole Source Designation of the Newberg Area Aquifer; Snohomish County, WA

AGENCY: U.S. Environmental Protection Agency.

ACTION: Final determination.

SUMMARY: Pursuant to section 1424(e) of the Safe Drinking Water Act, the Administrator of the U.S. Environmental Protection Agency has determined that the Newberg Area Aquifer in Snohomish County, Washington is the sole source of drinking water for the Newberg Road-Lake Bosworth area and that the aquifer, if contaminated, would create a significant hazard to public health. As a result of this action, federal financially assisted projects constructed in the designated area will be subject to EPA review to ensure that these projects are designed and constructed so that they do not create a significant hazard to public health.

EFFECTIVE DATE: This determination shall be promulgated for purposes of judicial review at 1:00 p.m. Eastern time on October 19, 1987.

ADDRESSES: The data upon which these findings are based are available to the public and may be inspected during normal business hours at the EPA Region 10 Library, 1200 Sixth Avenue, Seattle, Washington or any of the following city libraries: Granite Falls, Washington; Lake Stevens, Washington; Everett, Washington; Marysville, Washington.

FOR FURTHER INFORMATION CONTACT: Jonathan Williams at (206) 442–1541 or FTS 399–1541.

SUPPLEMENTARY INFORMATION: Notice is hereby given that pursuant to Section 1424(e) of the Safe Drinking Water Act (42 U.S.C., 300f, 300–3(e), Pub. L. 93–523) the Administrator of the U.S. Environmental Protection Agency has determined that the Newberg Area Aquifer located in Snohomish County, Washington is a sole or principal source of drinking water for much of the aquifer service area. Pursuant to section 1424(e), federal financially assisted projects constructed in this designated area will be subject to EPA review.

I. Background

Section 1424(e) of the Safe Drinking Water Act states: "If the Administrator determines, on his own initiative or upon petition, that an area has an aquifer which is the sole or principal drinking water source for the area and which, if contaminated, would create a significant hazard to public health, he shall publish notice of that determination in the **Federal Register**. After the publication of such notice, no commitment for federal financial assistance [through a grant, contract, loan guarantee, or otherwise] may be entered into for any project which the Administrator determines may contaminate such aquifer through a recharge zone so as to create a significant hazard to public health, but a commitment for federal financial assistance may, if authorized under another provision of the law, be entered into to plan or designate the project to assure that it will not so contaminate the aquifer."

On January, 16, 1984, the Region 10 Office of the Environmental Protection Agency (EPA) received a petition from the Newberg Organization, Inc., a group composed mostly of property owners in the Lake Bosworth area of Snohomish County, Washington. The petitioners requested that the EPA designate an area traversed by Newberg Road and including Lake Bosworth (the Newberg Road—Lake Bosworth Area) as a sole source aquifer and recharge area. A **Federal Register** notice announcing receipt of the petition and requesting public comment was published on March 8, 1984 (Vl. 49, No. 47). The petitioners submitted additional data to the EPA in support of their petition in October 1985 and June 1987.

After analyzing additional information, the EPA regional office adjusted the boundary of the designated area to coincide with the aquifer and recharge area boundaries. A resource document which delineated the aquifer and recharge area boundaries and summarized available information about the geology and hydrology of the area was distributed on July 23, 1987. On that same date, EPA issued a press release announcing the availability of the resource document and requesting public comment. In addition to the press release, information was made available through a legal notice which was printed in the "Everett Herald" on July 26, 1987 and sent to area post offices the week before. The public meeting scheduled for August 20, 1987 was cancelled due to a lack of public interest. No written comments were received before the public comment period expired on September 4, 1987.

II. Basis For Determination

Among the determinations which the Administrator must make in connection with the designation of an area under Section 1424(e) are: (1) Whether the aquifer is the sole or principal source of drinking water in the area, and (2) whether, if contaminated, a significant hazard to public health would result.

Based on the information available to this Agency, the Administrator has made the following findings, which are the bases for the determination noted above:

1. The Newberg Area Aquifer is the principal source of drinking water for of the Newberg Road-Lake Bosworth area in Snohomish County, Washington. The aquifer supplies about 84 percent of the drinking water used by the 2,700 residents of the area. No feasible alternative drinking water source or combination of sources could repalce the aquifer should it become contaminated.

2. Because ground-water contamination can be difficult or impossible to reverse and because the aquifer in this area is the principal source of drinking water for the area's residents, contamination of the aquifer could pose a significant hazard to public health.

III. Description of The Newberg Area Aquifer

[Information in this section represents an unfootnoted summary of material from: *Resource Document for the Consideration of the Newberg Area Aquifer as a Sole Source Aquifer,* published in July of 1987 by the Region 10 Office of Ground Water.]

The Newberg Road-Lake Bosworth Area, hereafter referred to as the "Newberg Area," is located in west-central Snohomish County, Washington. The designated area is approximately 37 square miles in area and is located approximately 15 miles east of the cities of Everett and Marysville, and immediately south of the Town of Granite Falls. It is an area of high ground bounded by the valley of the Pilchuck River on the east, north and west sides. The downstream segment of Dubuque Creek and the upstream segment of Carpenter Creek form the southern boundary. Land surface elevations range from 120 feet at the junction of the Pilchuck River and Dubuque Creek to a maximum of 800 feet near the center of the designated area.

The geology of the sole source aquifer area is described on four recently produced geologic maps. These maps depict the nature and distribution of surficial materials and bedrock within and near the area, and provide a synopsis of regional stratigraphic relationships. Copies of these maps are available for perusal by the public at the library of the U.S. Environmental Protection Agency Region 10 office, Seattle, Washington. These maps can also be purchased directly from the U.S. Geological Survey.

The designated area is characterized by a thick accumulation of heterogeneous, unconsolidated glacial sediments overlying assorted bedrock units of varied origins. Only isolated bedrock outcrops occur within or immediately adjacent to the petitioned area; areally extensive bedrock exposures occur only in the more rugged areas to the east and southeast.

Unconsolidated glacial and other surficial deposits cover the surface of the Newberg area to a thickness of more than 300 feet in places. Glacial sediments were deposited approximately 15,000 years ago during what has been termed the Vashon Stade of the Fraser Glaciation. These unconsolidated materials, when saturated, provide the primary source of ground water used for drinking water purposes in the Newberg area and vicinity.

The surficial deposits in the Newberg area include, in order of deposition, pre-Vashon or early Vashon deposits, glacial advance outwash sediments, glacial till, and recessional outwash material of the vashon age glaciation. More recent alluvial deposits are found along river and stream courses.

Wells in the Newberg area and vicinity tap all of the types of unconsolidated (glacial) materials and, at some localities, two types of bedrock: Teritary volcanic and Tertiary sediment rocks. Bedrock wells provide only small quantities of water, nominally sufficient for domestic consumption. Wells installed in unconsolidated glacial deposits provide most of the ground water used in the area.

The majority of ground water users in the proposed sole source aquifer area utilize deeper ground water in unconsolidated deposits. About 200 wells tap ground water occurring under apparently semi-confined conditions at depths of approximately 50 to 400 feet below the land surface. (Because of the relief of the area, actual well bottom or screen elevations range from 32 to 610 feet above sea level). These wells are completed in various glacial units. Many wells are completed in sand lenses occurring within the Vashon till. Yields are somewhat limited but sufficient for domestic consumption. Wells are also completed in advance outwash deposits. which provide high yields to wells. In the areas where recessional outwash overlies till, such as near the Town of Granite Falls, wells are generally drilled no deeper than the bottom of the recessional outwash, not into underlying till. Recessional outwash deposits typically provide high yields to wells.

In general, there is no single continuous aquifer unit that supplies all ground water users in the proposed sole source aquifer area. Wells are usually completed in the first water producing zone encountered during drilling. All of the different types of glacial materials appear to contain at least some ground-water producing zones, and can supply water in varying quantities to varying numbers of wells. The occurrence of water-bearing zones is unsystematic, laterally and vertically, but there is no evidence that lower-permeability materials provide complete hydrologic separation between water bearing zones. Therefore, the entire thickness of unconsolidated glacial materials must be considered as a complex regional aquifer system.

Water obtained from the unconsolidated materials tends to be of satisfactory quality. In some instances, iron and manganese are found in elevated levels. Recently, naturally occurring arsenic in the drinking water has shown up at elevated levels in several private wells completed in Tertiary volcanic bedrock, just west of Granite Falls. Wells that are completed in bedrock have probably drilled into a mineralized vein contining arsenic-bearing minerals, thereby showing elevated arsenic levels in the water.

Recharge of the proposed sole source aquifer area occurs largely through downward percolation of precipitation on the surface. Therefore, contamination from any source can enter the aquifer by the same route. Ground water is vulnerable to contamination from a wide variety of sources, such as pesticide application, leaking fuel or chemical storage tanks, agricultural runoff, animal wastes, septic systems, landfill leachate, and accidental spills of hazardous materials. Once the ground water becomes contaminated, its usefulness as a source of drinking water could be impaired or destroyed. Assuming that the technology to remove the contaminant, or contaminants, exists and is readily available, an increased expenditure of energy and funds could still be required to make the water useable again. If the technology is not available, or if the expense for decontamination is too high, the contaminated aquifer could become practically useless as a drinking water supply, and its usefulness for other purposes could be greatly impaired.

Should contamination of ground water of the Newberg Area occur, the only feasible water supply for about 2,450 people using ground water in the area would be lost. Existing wells could not be relocated because of probable interconnection between the ground-water producing zones in the various types of unconsolidated deposits. Deepening the wells would not provide an alternative source as the underlying bedrock yields limited quantities of usable water. Financial and institutional factors render development of all potential surface water sources of drinking water infeasible. Therefore, if ground water of the Newberg Area were to become contaminated, there would be no feasible alternative sources of drinking water available that could provide sufficient quantities of drinking water to all residents.

IV. Project Review

When the EPA Administrator published this determination for a sole or principal drinking water source, the consequence is that no commitment for federal financial assistance may be made if the Administrator finds that the federal financially assisted project may contaminate the aquifer through a recharge zone so as to create a significant hazard to public health (Safe Drinking Water Act Section 1424(e), 42 U.S.C. 300h–3(e)). In many cases, these federal financially assisted projects may also be analyzed in a National Environmental Policy Act (NEPA) document, 42 U.S.C. 4332 (2)(c). All NEPA documents, as well as any other proposed Federal actions affecting an EPA program or responsibility, are required by Federal law to be reviewed and commented upon by the EPA Administrator.

To streamline EPA's review of the possible environmental impacts upon designated aquifers, when an action is analyzed in a NEPA document, the two reviews will be consolidated, and both authorities will be cited. The EPA review under the Safe Drinking Water Act of Federal financially assisted projects potentially affecting sole or principal source aquifers will be included in the EPA review of any NEPA document accompanying the same federally-assisted project Statement to the lead agency will be the vehicle for informing the lead agency of EPA's actions under section 1424(e).

V. Discussion of Public Comments

During the initial comment period, the Environmental Health Division of the Snohomish County Health District objected to sole source aquifer designation on technical grounds. The county agency charged that the original boundaries, as submitted by the petitioners, had no hydrogeological basis. Accordingly, the Environmental Health Division recommended that EPA conduct additional study to delineate the boundaries on a hydrogeological basis before taking further steps toward sole source designation. Shortly afterward, the Snohomish County Department of Public Works submitted a report on landfill siting criteria in an attempt to help EPA with its technical review process.

The EPA Region 10 Office of Ground Water agreed with Snohomish County that the designated area boundaries needed to coincide with the actual aquifer and recharge area boundaries. Accordingly, additional information was analyzed to detemine the nature and extent of ground water resources within the Newberg area. This effort resulted in publishing a resource document which delineated the aquifer and recharge area boundaries based upon available hydrogeological information.

Upon distribution of the resource document, another public comment period was opened to provide an opportunity for comments on the revised

VOL

1987
UMI

boundaries between July 23, 1987, and September 4, 1987. However, no public comments were received and a scheduled public meeting was cancelled due to a lack of interest.

VI. Summary

Today's action only affects the Newberg Area Aquifer in Snohomish County, Washington. This action provides a review process to insure that necessary ground-water protection measures are incorporated into federal financially-assisted projects.

Dated: September 21, 1987.

Ron Kreizenbeck,

Acting

BILLING CODE 6560-50-M

FEDERAL RESERVE SYSTEM

Federal Open Market Committee; Domestic Policy Directive of August 18, 1987

In accordance with § 217.5 of its rules regarding availability of information, there is set forth below the domestic policy directive issued by the Federal Open Market Committee at its meeting held on August 18, 1987.[1] The directive was issued to the Federal Reserve Bank of New York as follows:

The information reviewed at this meeting suggests on balance that economic activity is expanding at a moderate pace in the current quarter. In July, total nonfarm payroll employment rose considerable further; the increase included continuing large gains in the service-producing sector and a sizable advance in manufacturing. The civilian unemployment rate fell slightly further to 6.0 percent. Industrial production increased strongly in July after rising moderately on balance in the first half of the year. Consumer spending grew at a reduced pace earlier in the year but retail sales posted large increases in June and July. Housing starts were unchanged in July and remained at their reduced second-quarter level. Recent indicators of business capital spending point to some strength, particularly in equipment outlays. The rise in consumer and producer prices has been moderate in recent months, but for the year to date prices generally have risen more rapidly than in 1986, primarily reflecting sizable increases in prices of energy and non-oil imports. Wage increases have remained relatively moderate in recent months.

In foreign exchange markets, the trade-weighed value of the dollar in terms of the other G–10 currencies was unchanged on balance since the meeting of the Committee on July 7. In the second quarter the merchandise trade deficit in current dollars was about the same as in the first quarter.

The monetary aggregates grew slowly in July. For 1987 through July, expansion of both M2 and M3 has been below the lower ends of the ranges established by the Committee for the year, while growth in M1 has been well below its pace in 1986. Expansion in total domestic nonfinancial debt has moderated this year. Most long-term interest rates have risen somewhat since that July meeting; in short-term markets, Treasury bill rates also have increased somewhat while private rates are little changed. Stock prices have risen substantially since the latest meeting.

The Federal Open Market Committee seeks monetary and financial conditions that will foster reasonable price stability over time, promot growth in output on a sustainable basis, and contribute to an imporved pattern of international transactions. In furtherance of these objectives the Committee agreed at its meeting in July ro reaffirm the ranges established in February for growth of 5½ to 8½ percent for both M2 and M3, measured from the fourth quarter of 1986 to the fourth quarter of 1987. The Committee agreed that growth in these aggregates around the lower ends of their ranges may be appropriate in light of developments with respect to velocity and signs of the potential for some strengthening in underlying inflationary pressures, provided that economic activity is expanding at an acceptable pace. The monitoring range for growth in total domestic nonfinancial debt set in February for the year was left unchanged at 8 to 11 percent.

For 1988, the Committee agreed on tentative ranges of monetary growth, measured from the fourth quarter of 1987 to the fourth quarter of 1988, of 5 to 8 percent for both M2 and M3. The Committee provisionally set the associated range for growth in total domestic nonfinancial debt at 7½ to 10½ percent.

With respect to M1, the Committee recognized that, based on experience, the behavior of that aggregate must be judged in the light of other evidence relating to economic activity and prices; fluctuations in M1 have become much more sensitive in recent years to changes in interest rates, among other factors. Because of this sensitivity, which has been reflected in a sharp slowing of the decline in M1 velocity over the first half of the year, the Committee again decided at the July meeting not to establish a specifid target for growth in M1 over the remainder of 1987 and no tentative range was set for 1988. The appropriateness of changes in M1 this year will continue to be evaluated in the light of the behavior of its velocity, developments in the economy and financial markets, and the nature of emerging price pressures. the Committee welcomes substantially slower growth of M1 in 1987 than in 1986 in the context of continuing economic expansion and some evidence of greater inflationary pressures. The Committe in reaching operational decision over the balance of the year will take account of growth in M1 in the light of circumstances then prevailing. The issues involved with establishing a target for M1 will be carefully reappraised at the beginning of 1988.

In the implementation of policy for the immediate future, the Committee seeks to maintain the existing degree of pressure on reserve positions. Somewhat greater reserve restraint would, or slightly lesser reserve restraint might, be accepatable depending on indications of inflationary pressures, the strength of the business expansion, developments in foreign exchange markets, as well as the behavior of the aggregates. This approach is expected to be consistent with growth in M2 and M3 over the period from June through September at annual rates of around 5 percent. Growth in M1, while picking up from recent levels, is expected to remain well below its pace during 1986. The Chairman may call for Committee consultation if it appears to the Manager for Domestic Operations that reserve conditions during the period before the next meeting are likely to be associated with a federal funds rate persistently outside a range of 4 to 8 percent.

By order of the Federal Open Market Committee, September 28, 1987.

Normand Bernard,

Assistant Secretary, Federal Open Market Committee.

BILLING CODE 6210-01-M

Formation of; Acquisitions by; and Mergers of Bank Holding Companies; AmeriTrust Corp., et al.

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12

[1] Copies of the Record of policy actions of the Committee for the meeting of August 18, 1987, are available upon request to The Board of Governors of the Federal Reserve System, Washington, DC 20551.

CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than October 22, 1987.

A. **Federal Reserve Bank of Cleveland** (John J. Wixted, Jr., Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. *AmeriTrust Corporation,* Cleveland, Ohio; to acquire 100 percent of the voting shares of Midwest National Bank, Indianapolis, Indiana. In connection with this application, A T Acquisition Corporation, Cleveland, Ohio, has applied to become a bank holding company by merging with AmeriTrust Indiana Corporation, Indianapolis, Indiana, and thereby indirectly acquiring Midwest National Bank, Indianapolis, Indiana.

2. *Cardinal Bancshares, Inc.,* Lexington, Kentucky; to become a bank holding company by acquiring 100 percent of the voting shares of Union Bank and Trust Company, Irvine, Kentucky.

3. *Fifth Third Bancorp,* Cincinnati, Ohio; to merge with First Bancorporation of Batesville, Batesville, Indiana.

B. **Federal Reserve Bank of Richmond** (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *First Sun Capital Corporation,* Columbia, South Carolina; to become a bank holding company by acquiring 100 percent of the voting shares of Columbia Bancorp, Inc., Columbia, South Carolina, and thereby indirectly acquire Republic National Bank, Columbia, South Carolina.

C. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President) 104 Marietta Street NW., Atlanta, Georgia 30303:

1. *Alabama National Bancorporation,* Ashland, Alabama; to acquire 100 percent of the voting shares of Gulf National Bank, Orange Beach, Alabama, a *de novo* bank.

D. **Federal Reserve Bank of Chicago** (David S. Epstein, Assistant Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Lincoln Financial Corporation,* Fort Wayne, Indiana; to acquire 100 percent of the voting shares of Harbor County Banking Corporation, Three Oakes, Michigan, and thereby indirectly acquire Heritage Bank, Oronko Township, Michigan, and Bank of Three Oakes, Three Oakes, Michigan.

Board of Governors of the Federal Reserve System, September 28, 1987.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Applications to Engage de Novo in Permissible Nonbanking Activities; Beverly Bancorporation, Inc., et al.

The companies listed in this notice have filed an application under § 225.33(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to comment or to engage *de novo,* either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than October 23, 1987.

A. **Federal Reserve Bank of Chicago** (David S. Epstein, Assistant Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Beverly Bancorporation, Inc.,* Chicago, Illinois; to engage *de novo* in making and servicing of loans pursuant to § 225.25(b)(1) of the Board's Regulation Y.

B. **Federal Reserve Bank of Minneapolis** (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Dunn County Bankshares, Inc.,* Menomonie, Wisconsin; to engage *de novo* through its subsidiary, Premium Finance Corporation, Eau Claire, Wisconsin, in providing funds to persons, organizations and businesses in the form of loans to pay their insurance premiums pursuant to § 225.25(b)(1) of the Board's Regulation Y. These activities will be conducted in State of Wisconsin.

Board of Governors of the Federal Reserve System, September 29, 1987.

James McAfee,

Associate Secretary of the Board.

Family Support Administration

Reallotment of Funds for FY 1986; Low Income Energy Assistance Program (LIHEAP)

AGENCY: Family Support Administration, HHS.

ACTION: Notice.

SUMMARY: Notice of Determination of Funds Available for Reallotment. In accordance with section 2607(b)(1) of the Omnibus Budget Reconciliation Act of 1981, (42 U.S.C. 8621), as amended, a notice was published in the **Federal Register** on July 1, 1987 announcing the Secretary's preliminary determination that $16,706, in FY 1986 LIHEAP funds may be reallotted. After further evaluation, the Secretary has determined that no funds from FY 1986 would be reallotted. This determination was based on the fact that a large number of grantees would receive grant awards of less than one dollar ($1.00). Other grantees would receive grant awards of less than one hundred dollars ($100.00). It would not be cost effective to reallot these small amounts of funds.

FOR FURTHER INFORMATION CONTACT: H. Gray Mounts, Deputy Associate Administrator for Grants Management, Family Support Administration, Mary E. Switzer Building, Room 2220, 330 C Street SW, Washington, DC 20201; telephone (202) 245-0906.

Public Health Service

Intent To Grant an Exclusive Patent License Extension; Medpacific Corp.

Pursuant to § 6.3 of 45 CFR Part 6 and 37 CFR Part 404, the Assistant Secretary for Health of the Department of Health and Human Services hereby gives notice of intent to grant an extension of an exclusive license for the life of the patent issued to Medpacific Corporation to make, use, and sell an invention of Drs. Michael D. Stern and Donald L. Lappe entitled, "Method of and Apparatus for Measurement of Blood Flow Using Coherent Light," for which United States Patent No. 4,109,647 issued August 9, 1978. A copy of the patent may be obtained upon written request submitted to Mr. Leroy B. Randall, Chief, Patent Branch, Department of Health and Human Services, c/o National Institutes of Health, Room 5A03, Westwood Building, Bethesda, Maryland 20892.

The Department of Health and Human Services will grant an extension of the exclusive license on the basis of information already submitted to the Department, unless information submitted by interested parties to the above address within sixty (60) days of this Notice indicates that the grant is not in the public interest. Any such submittals may include license applications and development plans indicating how the submitter proposes to develop and market the product should it be granted a nonexclusive license.

The Assistant Secretary for Health of the Department of Health and Human Services will review all written responses to this Notice.

Authority: 45 CFR 6.3 and 37 CFR 404.7

Robert E. Windom,

Assistant Secretary for Health.

President's Council on Physical Fitness and Sports; Meeting

AGENCY: Office of the Assistant Secretary for Health, HHS.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the President's Council on Physical Fitness and Sports. This notice also describes the functions of the Council. Notice of this meeting is required under the National Advisory Committee Act.

DATE: October 15, 1987, 9:00 a.m. to 2:00 p.m.

ADDRESS: Rayburn House Office Building, Room 2253, Independence Avenue & South Capitol Street, SE., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Ash Hayes, Ed.D., Executive Director, President's Council on Physical Fitness and Sports, 450 Fifth Street, NW., Suite 7103, Washington, DC 20001, Telephone: (202) 272-3421.

SUPPLEMENTARY INFORMATION: The President's Council on Physical Fitness and Sports operates under Executive Order #12345, as amended, extended by Executive Order #12534 dated September 30, 1985, further amended by Executive Order #12539 dated December 3, 1985. The functions of the Council are: (1) To advise the President and Secretary concerning progress made in carrying out the provision of the Executive Order and recommending to the President and Secretary, as necessary actions to accelerate progress; (2) advise the Secretary on matters pertaining to the ways and means of enhancing opportunities for participation in physical fitness and sports activities; (3) advise the Secretary on State, local, and private actions to extend and improve physical activity programs and services.

The Council will hold this meeting to apprise the Council members of the national program of physical fitness and sports, to report on on-going Council programs, and to plan for future directions.

Date: September 29, 1987.

Ash Hayes,

Executive Director, President's Council on Physical Fitness and Sports.

[FR Doc. 87-22922 Filed 10-2-87; 8:45 am]

BILLING CODE 4160-17-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Marine Mammal Permits; Receipt of Application

The public is invited to comment on the following application for renewal of a permit to conduct certain activities with marine mammals. The application was submitted to satisfy requirements of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*) and the regulations governing marine mammals and endangered species (50 CFR Parts 17 and 18).

Applicant Name: Chief, Marine Mammal Section, U.S. Fish & Wildlife Service, National Ecology Center, San Simeon, California 93452.

File No. PRT-684532.

Type of Permit: Scientific Research.

Name of Animals: West Indian manatee (Trichechus manatus) about 100 from the wild and about 15 in captivity annually.

Type of Activity to be Authorized: (a) Radio tag, using either VHF or PTT tags, and/or tetracycline mark; (b) attach peduncle tags or free-floating tether tags; (c) tail-notch free ranging, human-accustomed manatees; (d) freeze-brand injured and rescued manatees; (e) carry out nonharmful studies on rehabilitation; (f) collect dead and injured animals; and (g) export parts of salvaged dead mamatees.

The purpose of this application is to continue to conduct research to secure information on manatee movements and reproductive biology. This information is important in developing sound management plans necessary to help recover the species. The permittee has been conducting the discribed research activities since October of 1981, and all techniques have proven safe for the manatee.

Location of Activity: Southeastern U.S. and Puerto Rico.

Period of Activity: November 1987 through November 1990.

Concurrent with the publication of this notice in the **Federal Register**, the Federal Wildlife Permit Office is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors for their review.

Written data or comments, requests for copies of the complete application, or requests for a public hearing on this application should be submitted to the Director, U.S. Fish and Wildlife Service (FWPO), 1000 North Glebe Road, Room 611, Arlington, Virginia 22201, within 30 days of the publication of this notice. Anyone requesting a hearing should give specific reasons why a hearing would be appropriate. The holding of such hearing is at the discretion of the Director.

Documents submitted in connections with the above application are available for review during normal business hours (7:45 am to 4:15 pm) in Room 601 N. Glebe Road, Arlington, Virginia.

Dated: September 30, 1987.

R.K. Robinson,

Chief, Branch of Permits, Federal Wildlife Permit Office.

BILLING CODE 4310-55-M

Bureau of Land Management

[AK-919-08-4213-02]

General Meeting of the Northern Alaska Advisory Council; Fairbanks Support Center

A general meeting of the Northern Alaska Advisory Council, open to the public, will be held to discuss the following topics:

1. Utility Corridor Draft Resource Management Plan/Enrivonmental Impact Statement.

2. Cumulative environmental impact statements on the effects of placer mining on the watersheds of the Fortymile, Tolovana and Chatanika Rivers and Birch, Beaver and Goldstream Creeks.

3. Briefings on current local BLM programs.

The meeting will be from 8:30 a.m to 5 p.m. on Thursday, November 5, 1987, at BLM's Fairbanks Support Center, 1541 Gaffney Road, on Fort Wainwright.

Public comments on the agenda items will be received by the Council from 3 to 4 p.m. Oral comments may be limited by time and it is recommended that public comments be submitted in writing at the meeting.

For further information contact the Public Affairs Office, Bureau of Land Management, 1541 Gaffney Road, Fairbanks, Alaska 99703, telephone (907) 356-2345.

John R. Barnes,

Acting Designated District Manager, Northern Alaska/Kobuk District.

Utah Vernal District Advisory Council; Meeting

AGENCY: Bureau of Land Management.

ACTION: Notice.

SUMMARY: Notice is hereby given in accordance with Pub. L. 92-463, that a meeting of the Vernal District Advisory Council will be held on Thursday, November 5, 1987.

The meeting will begin at 6:30 p.m. and will be held in the conference room of the BLM Office located at 170 South 500 East, Vernal, Utah.

Agenda items shall include:

—Update on Brown's Park/Little Hole Road
—Proposed Cooperative Horse Management Plan with the Ute Tribe
—Inspection & Enforcement Oil & Gas Cooperative Agreement with the Ute Tribe
—Potential Resource Management Plan for the Diamond Mountain Resource Area
—Feedback on Draft Off-Road Vehicle Environmental Assessment
—Update on Jarvie Site Plan
—Brown's Park Deer Study Surprises
—Feedback on the District's Demonstration Riparian Management Plan
—Agricultural Trespass
—Items At Large From Council Members
—Public Comments or Reading of Public Comments, if any.

Advisory Board Meetings are open to the public. Interested persons desiring to make comments must notify the District Manager no later than close of business Tuesday, November 3rd. In the event of several commenters, the District Manager or Council Chairperson may establish a per person comment time limit.

Date: September 24, 1987.

David E. Little,

Vernal District Manager.

Information Collection Submitted for OMB Review Under the Paperwork Reduction Act

The proposal for the collection of information listed below has been submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Copies of the proposed information collection requirement and related forms and explanatory material may be obtained by contracting the Bureau's clearance officer at the phone number listed below. Comment and suggestions on the requirement should be made directly to the Bureau clearance officer and the Office of Management and Budget reviewing official, Washington, DC 20503, Telephone 202–395–7340.

Title: Land and Water Conservation Fund-On-Site Inspection Report.

Abstract: These reports are used to determine project eligibility for funding and insure compliance by grantees with all applicable laws and regulations.

Bureau Form Number: None.

Frequency: On Occasion.

Description of Respondents: State and local governments.

Annual Responses: 940.

Annual Burden Hours: 470.

Bureau Clearance Officer: Russell K. Olsen, 523–5133.

Russell K. Olsen,

Information Collection Clearance Officer.

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

Board for International Food and Agricultural Development; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act, notice is hereby given of the Eighty-Fourth Meeting of the Board for International Food and Agricultural Development (BIFAD) on October 8 and 9, 1987.

The purposes of the Meeting are: (1) To discuss the trends and issues that affect Participant Training; (2) to hear a report based on a survey of project records maintained by universities; (3) to receive a Budget Panel report; (4) to hear an overview on the status of Title XII Support Grants Programs, including responses from Title XII representatives on universities' perceptions and concerns.

The October 8, 1987 portion of the Meeting will be held from 1:15 p.m. until 4:30 p.m. and October 9 continuation of the Meeting will be held from 8:30 a.m. until 11:45 a.m. The October 8th portion of the Meeting will be held in Room 1205 New State and the October 9th portion of the Meeting will be held in Room 1406 New State, 2201 C Street, Washington, DC 20523. Any interested person may attend, and may present oral statements in accordance with procedures established by the Board, and the extent the time available for the meeting permits.

Curtis Jackson, Bureau of Science and Technology, Office of University Relations, Agency for International Development is designated as A.I.D. Advisory Committee Representative at this Meeting. It is suggested that those desiring further information write to Dr. Jackson, in care of the Agency for International Development, Room 309, Washington, DC 20523, or telephone him on (703) 235–8929.

Date: September 28, 1987

Charles D. Ward,

Deputy Director, BIFAD.

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 31113]

Acquisition and Operation Exemption; Certain Lines of the Atchison, Topeka and Santa Fe Railway Co. and TP&W Acquisition Corp.

TP&W Acquisition Corporation, a noncarrier, has filed a notice of exemption to acquire and operate certain properties of The Atchison, Topeka and Santa Fe Railway Company (ATSF). The properties consist of ATSF's line between Lomax, IL (milepost 206.1L), and Logansport, IN (milepost 0.0), including ATSF's connecting line between East Peoria, IL (NW milepost 410.5), and Morton, IL (milepost 48.30), a total distance of 281.5 miles, together with ancillary overhead trackage rights over ATSF's connecting line between Lomax, IL (milepost 218.5), and Fort Madison, IA (milepost 234.0), a total distance of 15.5 miles. Any comments must be filed with the Commission and served on Frank H. Blatz, Jr., Abrams Blatz, Dalto, Gran, Kendricks and Reina, 1550 Park Avenue, Post Office Drawer D, South Plainfield, NJ 07080, and Dennis W. Wilson, the Atchison, Topeak and Santa Fe Railway Company, 80 E. Jackson Blvd., Chicago, IL 60604.

The notice is filed under 49 CFR 1150.31. If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.[1]

Decided: September 18, 1987.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

BILLING CODE 7035–01–M

[Finance Docket No. 31088]

Purchase; Illinois Central Gulf Railroad Co. Line—Between Fulton, KY and Haleyville, AL; Southern Railway Co. and Norfolk Southern Corp.

AGENCY: Interstate Commerce Commission.

ACTION: Request for comments.

SUMMARY: Southern Railway Company (Southern), Norfolk Southern Corporation (NS), and Illinois Central Gulf Railroad Company (ICG) have notified the Commission of their intent to file an application seeking Commission approval and authorization, under 49 U.S.C. 11343 *et seq.*, for Southern to acquire ICG's line of railroad between Fulton, KY and Haleyville, AL, a distance of approximately 199 miles. A related application will be filed seeking approval and authorization for Southern to acquire trackage rights over ICG between Fulton, KY, and Centralia, IL, a distance of approximately 154 miles. We acknowledged their notice of intent in our decision served August 25, 1987 and published in the **Federal Register** on August 26, 1987, at 52 FR 32184. Applicants plan to file their applications on or about October 1, 1987.

Applicants have requested the Commission to adopt an expedited schedule in this proceeding. Under that schedule, any and all responsive evidence and verified statements would be filed within 45 days of acceptance of the primary application, applicants' reply evidence and supporting verified statements would be filed 15 days thereafter (at which time the evidentiary proceeding is completed), and a final decision will be issued by the 45th day after the evidentiary proceeding is completed.

Applicants' proposed schedule contains substantially shorter time periods than those provided in the Commission's rules at 49 CFR 1180.4 (d) and (e). The rules provide, among other things, after the Commission accepts the primary application in a significant transaction, (1) all responsive applications must be filed within 60 days of that acceptance, (2) the evidentiary proceeding must be completed within 180 days of acceptance, and (3) a final decision must be issued 90 days after conclusion of the evidentiary phase. In support of their proposal, applicants assert that the expeditious filing of evidence is encouraged by 49 U.S.C. 11345(c) and that their "case in chief" approach where all parties would file evidence at the close of the comment period has been adopted by the Commission in its motor carrier consolidation rules and has received judicial approval.

As yet, we have no indication of the response to this procedural request. Moreover, respondents should be able to review the application before taking a position on a schedule. Therefore, we will invite interested parties to comment on the merits of applicants' proposal.

DATES: Comments on applicants' proposed schedule must be submitted by

[1] By decision entered September 16, 1987, the Commission denied a petition, filed by Local 1815 of the United Transportation Union, requesting a stay of the effective date of the notice of exemption.

VOL 52 ISS 192 OC 5 1987 UMI

15 days after filing of the application. Applicants' comments are due 10 days thereafter.

ADDRESSES: An original and 15 copies of comments must refer to Finance Docket No. 31088 and should be sent to: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT:

Paul Nishimoto, (202) 275–7888

or

Joseph H. Detttmar, (202) 275–7245

TDD for hearing imparied: (202) 275–1721.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to Dynamic Concepts, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423, or call (202) 289–4357 (assistance for the hearing imparied is available through TDD services (202) 275–1721) or by pickup from Dynamic Concepts in Room 2229 at Commission headquarters.

Decided: September 21, 1987.

By the Commission, Chairman Gradison, Vice Chairman Lamboley, Commissioners Sterrett, Andre, and Simons. Vice Chairman Lamboley, joined by Commissioner Simmons, concurred with a separate expression.

BILLING CODE 7035–01–M

[Amdt. No. 9]

Section 5a Application No. 45;[1] Niagara Frontier Tariff Bureau, Inc. Agreement

AGENCY: Interstate Commerce Commission.

ACTION: Notice of decision and request for comment.

SUMMARY: Niagara Frontier Tariff Bureau, Inc. (Niagara), has filed, pursuant to section 14(e) of the Motor Carrier Act of 1980 (MCA), an application for approval of its ratemaking agreement[2] under 49 U.S.C. 10706(b). Since several modifications are required before the agreement receives final approval, and because of the new and complex questions involved in determining whether the agreement is consistent with the 1980 Act and the devision implementing it, the Commission has decided to solicit public comment on its interpretation and application of specific rate bureau provisions. Copies of Niagara's proposed amended agreements are available for public inspection and copying at the Office of the Secretary, Interstate Commerce Commission, Washington, DC, 20423, and from Niagara's representative: Robert G. Gawley, Attorney, P.O. Box 184, Buffalo, NY 14221.

Additional information is in the Commission decision. Copies may be obtained from Office of the Secretary, Room 2215, Interstate Commerce Commission, Washington, DC 20423, or call (202) 275–7428 (assistance for the hearing impared is available through TDD services (202) 275–1721) or by pickup from Dynamic Concepts, Inc. in Room 2229 at Commission headquarters.

DATE: Comments from interested persons are due November 4, 1987. Replies are due 15 days thereafter.

ADDRESS: An original and 10 copies, if possible, of comments referring to Section 5a Application No. 45 should be sent to: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Paul Grossman, (202) 275–7976, or Andrew Lyon, (202) 275–7691, (TDD for hearing impaired: (202) 275–1721).

SUPPLEMENTARY INFORMATION: We have provisionally approved Niagara's agreement as consistent with 49 U.S.C. 10706(b) and *Motor Carrier Rate Bureaus—Implementation of Pub. L. 96–296*, 364 I.C.C. 464 (1980) and 364 I.C.C. 921 (1981) (*Rate Bureau*), subject to certain conditions and modifications in the following subject areas: Identification and description of member-carriers; right of independent action; employee docketing; open meetings; quorum standards; final disposition of cases; single-line rates; general increases and decreases; and zone of rate freedom and released rates. We have also offered comments and imposed requirements concerning the agreement generally. Niagara has been directed to file a revised agreement conforming to the imposed conditions within 120 days of service of the decision.

In light of the complexity of interpretation involved in determining whether the agreement is consistent with the MAC and the *Rate Bureau* case, *supra*, we request applicant and other interested parties to comment on our interpretation of the controlling statutory and administrative criteria and their application to Niagara's agreement. In addition, comments may be filed on our previous determination that the interbureau agreement between Niagara and Southern Motor Carriers Rate Conference, Inc., contained in the agreement is not a separate collective ratemaking agreement subject to the terms of the *Rate Bureau* case, *supra*.

A copy of any comments filed with the Commission must also be served on Niagara, which will have 15 days from the expiration of the comment period to reply. These comments will be considered in conjunction with our review of the modifications that Niagara must submit to the Commission as a condition to final approval of its agreement.

This action will not significantly affect either the quality of the human environment or the conservation of energy resources.

Authority: 49 U.S.C. 10321 and 10706 and 5 U.S.C. 553.

Decided: September 25, 1987.

By the Commission. Chairman Gradison, Vice Chairman Lamboley, Commissioners Sterrett, Andre, and Simmons. Commissioner Andre concurred with a separate expression.

Noreta R. McGee,

Secretary.

[FR Doc. 87–22925 Filed 10–2–87; 8:45 am]

BILLING CODE 7035–01–M

---

[1] Section 5 was recodified as Section 10706.

[2] Niagara's agreement contains a separate agreement between Niagara and Southern Motor Carriers Rate Conference, Inc. (SMCRC) which contains provisions corresponding to those in Niagara's main amended agreement. In Section 5a Application No. 46 (Amendment No. 15), *Southern Motor Carriers Rate Conference, Inc., Agreement* (not printed), served February 12, 1985, and May 27, 1987, the Commission concluded that an identical interbureau agreement submitted by SMCRC as part of its application was not a separate collective ratemaking agreement subject to the terms of Ex Parte No. 297 (Sub-No. 5), *Motor Carrier Rate Bureaus—Implementation of Pub. L. 96–296*, 364 I.C.C. 464 (1980).

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. 86–91]

Revocation of Registration; Cumberland Prescription Center, Inc.

On November 7, 1986, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA) issued an Order to Show Cause to Cumberland Prescription Center, Inc. (Respondent) of 1000 Mendon Road, Cumberland, Rhode Island 02864 proposing to revoke the pharmacy's DEA Certificate of Registration AC6283193 and to deny any pending applications for the renewal of such registration. The Order to Show Cause alleged that the continued

registration of the pharmacy would be inconsistent with the public interest as that term is used in 21 U.S.C. 823(f) and 824(a)(4). Subsequent to the initiation of proceedings to revoke the pharmacy's DEA Certificate of Registration, Respondent pharmacy submitted a new application for registration on March 27, 1987. The Order to Show Cause was amended to include the proposed denial of this application.

By letter dated December 8, 1986, Responsent's counsel requested a hearing on the issues raised by the Order to Show Cause and the matter was docketed before Administrative Law Judge Mary Ellen Bittner. Following prehearing proceedings, a hearing was held in Boston, Massachusetts on April 30, 1987. On July 8, 1987, Judge Bittner issued her opinion and recommended ruling, findings of fact, conclusions of law and decision. Pursuant to 21 CFR 1316.66, Government counsel filed exceptions to the Administrative Law Judge's recommended ruling. On August 17, 1987, Judge Bittner transmitted the record in this proceeding, including the Government's exceptions, to the Administrator. The Administrator has considered the record in its entirety, and pursuant to 21 CFR 1316.67, hereby issues his final order in this matter based upon findings of fact and conclusions of Law as hereinafter set forth.

The Administrative Law Judge found that Respondent pharmacy has been in existence since about 1975. Until March of 1987, Michael Arouth was the president, 50% shareholder and managing pharmacist of Respondent pharmacy. His wife, Phyllis has been a 50% shareholder of the pharmacy since its inception.

In 1964, while working as a pharmacist at another pharmacy, Michael Arouth pled guilty in a Rhode Island court to two counts of delivery of barbiturates. As a result of this conviction, the Rhode Island Board of Pharmacy placed Michael Arouth's pharmacist license on probation for a period of five years.

Beginning in 1985, the Cumberland Police Department received information that individuals, including drug addicts, were obtaining drugs from Respondent pharmacy without presenting a prescription to the pharmacist. On August 5, 1986, a cooperating individual contacted a detective of the Cumberland Policy Department and indicated that for 10 years, beginning when she was 16 or 17, Michael Arouth provided her with controlled substances, in exchange for sexual favors, including posing nude for photographs. She never presented Michael Arouth with a prescription for these drugs. The cooperating individual told the detective that Michael Arouth had similar arrangements with other women. She further stated that Arouth told her that in order to account for the drugs he was illegitimately dispensing, he received more controlled substances than he ordered from salesmen of drug distributors and then recorded only the amounts he had ordered. In addition, when filling orders for nursing homes, Michael Arouth would take some of the medication from the vials and replace it with water.

On August 5, 1986, the cooperating individual telephoned Michael Arouth from the Cumberland Police Department and indicated to him that she wanted some controlled substances, needles and syringes. She then went to Respondent pharmacy, at which time Michael Arouth gave her various controlled substances in an unmarked vial and an envelope, two needles and syringes. She did not present Michael Arouth with a prescription for the controlled substances nor did she pay him for the drugs. The Administrative Law Judge concluded that these substances were not dispensed for a legitimate medical purpose.

The next day, August 6, 1986, the cooperating individual again telephone Michael Arouth to arrange another meeting at the pharmacy. During the conversation, Michael Arouth told the cooperating individual that the "heat was on" and therefore, he would not give her any more drugs, but would give here money so she could obtain drugs elsewhere. The cooperating individual then went to Respondent pharmacy and Michael Arouth gave her $20.00 or $25.00, but did not give her any controlled substances on this occasion.

On August 8, 1986, officers of the Cumberland Police Department executed a serach warrant at Respondent pharmacy. During the course of the search, the officers seized a large quantity of assorted controlled substances located throughout the pharmacy. These drugs were in unlabelled vials with three or four different types of drugs in one vial. In addition, the officers found large quantities of drugs obtained from various nursing homes and pharmacies in Rhode Island, as shown by the labels on the vials containing the drugs and by documents accompanying them. The officers also seized photographs of women posing nude throughout the pharmacy. One of the women appearing in the photographs was the cooperating individual. During a subsequent search of the pharmacy, officers seized the contents of a safe located in the pharmacy. Among other things, there was a tablet of Quaalude, a Schedule I controlled substance.

During the search, the officers looked at Respondent's prescription files, but were unable to locate any prescriptions written for the cooperating individual. The prescriptions revealed that certain individuals were regularly having prescriptions for controlled substances filled at Respondent pharmacy.

On August 8, 1986, Michael Arouth was arrested by the Cumberland Police Department and charged with four felony counts of delivery of phentermine, diazepam, oxycodone, and delivery of needles and syringes in violation of the laws of the State of Rohode Island.

On October 22, 1987, DEA investigators conducted an inspection of Respondent to insure that required records relating to controlled substances were being maintained and to conduct an accountability audit. Two audits were conducted of selected Schedule II controlled substances, one covering the period February 6, 1985, through October 22, 1986, and the other covering the period October 2, 1984, through October 22, 1986. These audits revealed coverages of the majority of the substances auditied; in other words, Respondent could account for more of the controlled substances than it was held accountable for.

DEA investigators also conducted an audit of selected Schedules III, IV and V controlled substances for the period October 22, 1985, through October 22, 1986, which revealed significant shortages of all but one of the substances audited. It is likely that the shortages of the Schedules III, IV, and V substances were even greater than the audit reflected since a zero inventory balance, which assumes that no drugs were on hand at the beginning of the audit period, was used. Respondent was not held accountable for any substances in stock on October 22, 1985. The shortages and overages revealed by the adults indicate a violation of 21 U.S.C. 842(a)(5).

On March 9, 1987, the State of Rhode Island Board of Pharmacy entered into a Consent Agreement with Michael Arouth pursuant to which, the latter agreed not to practice pharmacy pending the disposition of the criminal charges against him. The Consent Agreement specifically stated that the pharmacy could remain open under a new registrant, required to be registered as a pharmacist in Rhode Island and approved by the Pharmacy Board to serve as store registrant. The agreement further required that Michael Arouth disassociate himself from the daily

operation of the pharmacy, and provided that if he engaged in the practice of pharmacy during the term of the agreement, his registration as a pharmacist would be automatically suspended. The agreement does not, however, provide any sanctions against Respondent pharmacy should Michael Arouth fail to comply with its terms.

On March 13, 1987, Michael Arouth transferred his fifty percent share of the corporation to his daughter, with no consideration being given for such shares. His daughter is not a registered pharmacist and she rarely goes into the pharmacy.

The Administrative Law Judge found that Michael Arouth still works as a clerk in the store and has no other employment. In addition, the new managing pharmacist was hired by Michael Arouth.

The Administrative Law Judge concluded that the continued registration of Respondent pharmacy would be inconsistent with the public interest. Michael Arouth's conduct in dispensing controlled substances in exchange for sexual favors and the pharmacy's failure to keep accurate records clearly support such a conclusion.

The Administrator of the Drug Enforcement Administration has consistently, revoked, suspended or denied the registration of pharmacies based upon the controlled substance handling practices of the pharmacy's owner, majority shareholder, officer, managing pharmacist or other key employee. See *Unarex of Plymouth Road, d.b.a. Motor City Prescription and Unarex of Dearborn, d.b.a. Motor City Prescription Center*, Docket Nos. 84–1 and 84–2, 50 Fed. Reg. 7077 (1985); *Bourne Pharmacy, Inc.*, Docket No. 83–22, 49 FR 32816 (1984); *Big T Pharmacy*, Docket No. 80–34, 48 FR 51830 (1982), and cases cited therein.

Respondent contends that Michael Arouth is no longer a corporate owner of the pharmacy and no longer has anything to do with the handling of controlled substances at the pharmacy; therefore, Respondent's DEA Certificate of Registration should not be revoked. As stated in *Big T Pharmacy*, supra, "[t]he law will not be read so as to permit corporate registrants to evade a congressionally mandated sanction by permitting convicted felons to shed their various interests and offices * * * thus leaving the pharmacy to escape its responsibility." The Administrative Law Judge concluded that Michael Arouth is still very much a part of the operation of Respondent. He continues to work on Respondent's premises and has no other employment. Neither of the two current owners of the corporation works in the Pharmacy full-time. Further, Michael Arouth continues to benefit financially from any profits from the business through his wife's ownership interest.

The Administrative Law Judge further concluded that the loss of Respondent's DEA registration will work a hardship on Michael Arouth's family. However, his wife owned fifth percent of the stock of the corporation during the period when Michael Arouth was diverting controlled substances from the pharmacy. Judge Bittner was not convinced that Mrs. Arouth would be able to prevent a recurrence of her husband's behavior. Accordingly Judge Bittner recommended that Respondent's DEA Certificate of Registration be revoked. The Administrative Law Judge further recommended that such revocation be effective 90 days from the issuance of the Administrator's order to enable Michael Arouth's wife and daughter to sell the pharmacy. The Government filed exceptions to this recommendation stating that the Arouths have had ample opportunity to sell Respondent pharmacy and therefore the order should be effective 60 days after its issuance.

The Administrator adopts the findings of fact and conclusions of law of the Administrative Law Judge in their entirety. The Administrator further adopts the recommendation of Judge Bittner to revoke Respondent's DEA Certificate of Registration.

The Administrator concludes that the actions of Michael Arouth were so egregious, that Respondent pharmacy, as it presently exists, cannot be entrusted with a DEA Certificate of Registration.

Accordingly, the Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823 and 824 and 28 CFR 0.100(b), hereby orders that DEA Certificate or Registration AC6283193, previously issued to Cumberland Prescription Center, be, and it hereby is, revoked, and any pending applications for the renewal of such registration, be, and they hereby are, denied. In addition, the Administrator orders that the application for a new DEA Certificate of Registration, submitted on behalf of Respondent on March 27, 1987, be, and it hereby is, denied. This order is effective December 4, 1987.

Date: September 29, 1987.

John C. Lawn,

Administrator.

BILLING CODE 4410–09–M

DEPARTMENT OF LABOR

Bureau of Labor Statistics

Business Research Advisory Board and Committees; Meetings and Agenda

The regular fall meetings of the Board and Committees of the Business Research Advisory Council will be held on October 20 and 21, and November 19, 1987. All of the meetings will be held in the Frances Perkins Department of Labor Building, 200 Constitution Avenue, NW., Washington, DC.

The Business Research Advisory Board and its committees advise the Bureau of Labor Statistics with respect to technical matters associated with the Bureau's programs. Membership consists of technical officers from American business and industry.

The schedule and agenda for the meetings are as follows:

Tuesday, October 20, 1987

10:00 a.m.—Committee on Economic Growth; Room S4215 A & B

1. New Projections
2. Increases in Defense Spending and the Impact on Production and Employment
3. The Rapid Growth in Producer Services
4. Other Business

2 p.m.—Committee on Price Indexes; Room S4215 A & B

1. Status Reports:
   a. Consumer Price Index
   b. Producer Price Index
   c. International Price Indexes
   d. Consumer Expenditure Surveys
2. Other Business

2 p.m.—Committee on Employment and Unemployment Statistics; Room C5315 (Seminar Room #6)

1. CPS Issues
   a. Long-Range Plans
   b. Proposed Supplements
2. LAUS Regression Research
   a. Current Status
   b. ICESA Recommendations
3. 790 Survey Issues
   a. Service Sector Initiatives
   b. CATI Operational Tests
   c. Sampling and Estimation Work
4. Report on International Conferences on Business Survey Frames
5. Other business

Wednesday, October 21, 1987

9:30 a.m.—Committee on Wages and Industrial Relations; Room S4215 A, B & C

1. Review of Wages and Industrial Relations 1988 Budget
2. Temporary Help Survey Update
3. Progress on the White-Collar Pay and Benefits Survey and the Professional, Administrative, Technical and Clerical Pay Survey
4. New Developments in the Area Wage Program
5. Introduction of Cost Level Data from the Employment Cost Index
6. Chairman's Summary of the Joint BRAC and LRAC Subcommittee Meetings
7. Other Business

1:30 p.m.—BRAC Board; Room S4215 A, B, & C

1. Chairperson's Opening Remarks
2. Commissioner's Remarks—Janet L. Norwood
3. Committee Reports:
   a. Economic Growth
   b. Price Indexes
   c. Employment and Unemployment Statistics
   d. Wages and Industrial Relations
4. Other Business
5. Chairperson's Closing Remarks

Thursday, November 19, 1987

10 a.m.—Committee on Occupational Safety and Health Statistics; Room N3437 A & B

1. 1986 Annual Survey Results
2. Report of the Committee on National Statistics, National Academy of Sciences
3. Keystone Recordkeeping Project
4. On-site Records Check Pilot Project
5. Work Injury Reports—Inhalation Study
6. Supplementary Data System (SDS) Update
7. BLS-State Health Department Committee Activities
8. Investigating Alternative Fatality Data Sources
9. Other Business

The meetings are open to the public. It is suggested that persons planning to attend these meetings as observers contact Janice D. Murphey, Liaison, Business Research Advisory Council on Area Code (202) 523–1347.

Signed at Washington, DC this 25th day of September 1987.

Janet L. Norwood,

Commissioner of Labor Statistics.

[FR Doc. 87–22891 Filed 10–2–87; 8:45 am]

BILLING CODE 4510–24–M

NATIONAL SCIENCE FOUNDATION

Committee Management; Establishments; Advisory Panels for Archaeology and Physical Anthropology

The Assistant Director for Biological, Behavioral, and Social Sciences has determined that the establishment of the Advisory Panels listed below are necessary and in the public interest in connection with the performance of duties imposed upon the Director, National Science Foundation (NSF) and other applicable law. This determination follows consultation with the Committee Management Secretariat, general Services Administration.

Name of Committee: Advisory Panel for Archaeology

Purpose: Primarily, to advise on the merit of proposals for research-related purposes submitted to the NSF for financial support. Additionally, the Panel provides oversight, general advice, and policy guidance in the area of Archaeology.

Name of Committee: Advisory Panel for Physical Anthropology

Purpose: Primarily, to advise on the merit of proposals for research-related purposes submitted to the NSF for financial support. Additionally, the Panel provides oversight, general advice, and policy guidance in the area of Physical Anthropology.

M. Rebecca Winkler,

Committee Management Officer.

September 30, 1987.

[FR Doc. 87–22875 Filed 10–2–87; 8:45 am]

BILLING CODE 7555–01–M

Committee Management; Renewals; Advisory Committee for Engineering Science in Mechanics, Structures, and Materials Engineering, et al.

The Advisory Committees listed below are being renewed until September 30, 1989.

The Assistant Director for Engineering has determined that the renewal of these Committees is necessary and in the public interest. This determination follows consultation with the Committee Management Secretariat. General Services Administration:

—Advisory Committee for Engineering Science in Mechanics, Structures, and Materials Engineering
—Advisory Committee for Engineering Science in Electrical, Communications, and Systems Engineering
—Advisory Committee for Engineering Science in Chemical, Biochemical, and Thermal Engineering
—Advisory Committee for Critical Engineering Systems (formerly called the Advisory Committee for Critical Engineering Systems Section)
—Advisory Committee for Emerging Engineering Technologies (formerly called the Advisory Committee for Emerging Engineering Systems Section)

M. Rebecca Winker,

Committee Management Officer.

September 30, 1987.

BILLING CODE 7555–01–M

NUCLEAR REGULATORY COMMISSION

[Docket No. 030–12910 Licensee No. 24–17529–01 EA 87–84]

Order Imposing Civil Monetary Penalty; Aztec Laboratories

I

Aztec Laboratories Post Office Box 31044, Kansas City, MO 64129, is the holder of Byproduct Materials License No. 24–17529–01 issued by the Nuclear Regulatory Commission (Commission or NRC) on June 22, 1977. The license authorizes the licensee to possess and use nickel-63 gas chromatographs for sample analysis in accordance with the conditions specified therein.

II

An inspection of the licensee's activities was conducted during the period March 25 through May 15, 1987. The results of this inspection indicated that the licensee had not conducted its activities in full compliance with NRC requirements. A written Notice of Violation and Proposed Imposition of Civil Penalty (Notice) was served upon the licensee by letter dated June 30, 1987. The Notice stated the nature of the violations, the provisions of the NRC's requirements that the Licensee had violated, and the amount of the civil penalty proposed for the violations. The licensee responded to the Notice of Violation and Proposed Imposition of Civil Penalty by letter dated July 21, 1987.

III

After consideration of the licensee's response and the statements of fact, explanation, and argument for mitigation contained therein, the NRC staff has determined, as set forth in the Appendix to this Order, that the violations occurred as stated and that the penalty proposed for the violations designated in the Notice of Violation

and Proposed Imposition of Civil Penalty should be imposed.

IV

In view of the foregoing and pursuant to Section 234 of the Atomic Energy Act of 1954, as amended (Act), 42 U.S.C. 2282, and 10 CFR 2.205, It Is Hereby Ordered That:

The licensee pay a civil penalty in the amount of Five Hundred Dollars ($500) within 30 days of the date of this Order, by check, draft, or money order, payable to the Treasurer of the United States and mailed to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

The licensee may request a hearing within 30 days of the date of this Order. A request for a hearing shall be addressed to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, Washington, DC 20555. A copy of the hearing request also shall be sent to the Assistant General Counsel for Enforcement, Office of General Counsel. If a hearing is requested, the Commission will issue an Order designating the time and place of the hearing. If the licensee fails to request a hearing within 30 days of the date of this Order, the provisions of this Order shall be effective without further proceedings. If payment has not been made by that time, the matter may be referred to the Attorney General for collection.

In the event the licensee requests a hearing as provided above, the issues to be considered at such hearing shall be:

(a) Whether the licensee was in violation of the Commission's requirements as set forth in Violation I.A of the Notice of Violation and Proposed Imposition of Civil Penalty referenced in Section II above and

(b) Whether, on the basis of such violation, this Order should be sustained.

For The Nuclear Regulatory Commission.

James Lieberman,

Director, Office of Enforcement.

Dated at Bethesda, Maryland this 28th day of September 1987.

Appendix—Evaluations and Conclusions

On June 30, 1987, a Notice of Violation and Proposed Imposition of Civil Penalty (Notice) was issued for violations identified during an NRC inspection. By letters dated July 21, 1987, Aztec Laboratories (licensee) responded to the Notice. In its response, the licensee admits certain violations occurred as described in the Notice, denies other violations, and provides reasons why it believes that mitigation of the proposed civil penalty is appropriate. Provided below are: (1) A restatement of each violation; (2) a summary of the licensee's response regarding each violation; (3) NRC's evaluation of the licensee's response; (4) the licensee's arguments in support of mitigation of the proposed civil penalty, and (5) NRC's conclusions regarding the violations and the proposed civil penalty.

I. Licensee's Arguments Regarding Violations Assessed Civil Penalty

A. Violation IA

Restatement of Violation. 10 CFR 20.403(b)(4) requires each licensee to, within 24 hours of discovery of the event, report any event involving licensed material possessed by the licensee that may have caused or threatens to cause damage to property in excess of $2.000.00.

Contrary to the above, from March 1984 until the date of inspection, the licensee failed to notify the NRC of a March 1984 fire which involved a gas chromatograph unit containing a nominal 14.5 millicuries of nickel-63, and which caused in excess of $40,000 damage to both the facility and licensed material. Further decontamination costs including consultant fees, decontamination, and waste disposal exceeded $2,000.

Summary of Licensee's Response. The licensee argues that a violation did not occur since the initial cost of the chromatograph device was less than $2,000 and the damage to the building was caused primarily by the fire of March 1984 and not from the contamination resulting from the chromatograph device.

NRC Evaluation of Licensee's Response. 10 CFR 20.403(b)(4) explicitly requires the reporting of "*any event involving licensed material*" that may have caused or threatens to cause damage to property in excess of $2.000. The event in this case was the fire which involved the chromatograph device containing licensed material. The cost of the chromatograph device is not determinative. The intent of the reporting requirement described in 10 CFR 20.403(b)(4) is to afford the NRC the opportunity to review all circumstances surrounding incidents similar to the 1984 fire and perform radiological assessments of hazards that may be present. In this case, if the NRC had been notified of the 1984 event, involving licensed material an adequate evaluation of the device would have been performed and contamination would not have gone undetected for three years. A license amendment describing the approved location for storage of devices would also have been required.

B. Violation IB

Restatement of Violation. 10 CFR 20.201(b) requires each licensee to make or cause to be made such surveys as are reasonable under the circumstances to evaluate the extent of radiation hazards that may be present. As defined by 10 CFR 20.201(a), "survey" means an evaluation of the radiation hazards incident to the production, use, release, disposal, or presence of radioactive materials. When appropriate, such evaluation includes a physical survey of the location of materials and equipment, and measurements of levels of radiation or concentrations of radioactive material present.

Contrary to the above, from March 1984 until the date of the inspection, the licensee failed to make a reasonable survey to evaluate the extent of radiation hazards present as a result of the March 1984 fire. Although a visual check of the source holder was made after the fire, radiation surveys and wipe tests for leakage were not performed. As a result between March 1984 and March 26, 1987, leakage from the nickel-63 source went undetected.

Summary of Licensee's Response. The licensee argues that surveys and wipe tests were not required because the nickel-63 source was in storage and never used.

NRC Evaluation of Licensee's Response. NRC expects licensees to perform wipe tests and surveys of sources whenever sources may be damaged. Since the licensee's source was in a fire, wipe tests and surveys should have been performed. This is evident since the nickel-63 source was severely damaged and was leaking radioactive material.

II. Licensee's Arguments Regarding Violations Not Assessed Civil Penalty

A. Violation IIA

Restatement of the Violation. 10 CFR 20.207(a) states that licensed materials stored in an unrestricted area shall be secured from unauthorized removal from the place of storage.

Contrary to the above, from March 1984 until the date of inspection, a nickel-63 source containing 14.5 millicuries was stored at the licensee's Arlington Street facility and was not secured from unauthorized removal.

This is a Severity Level IV violation (Supplement IV).

Summary of Licensee's Response. Although the licensee admits that the actual structure was open, the licensee

argues that the location of the building, partial fencing, and large size of the property effectively secured the device and prevented unauthorized removal.

NRC Evaluation of Licensee's Response. On March 26, 1987, the inspector went to the licensee's residence and found no one at home. The inspector then walked over to the burned facility and immediately viewed the device on the porch. The inspector found the nickel-63 source housing laying loose on top of the chromatograph device. While it is true that the licensee's property is large and partially fenced, the burned building was visible from the street and the entrance to the property was not fenced.

There were no caution signs, ropes or any other obstructions to keep an individual from becoming contaminated or even removing the source. During the inspection, the licensee admitted that the facility was not restricted for the purpose of radiation protection.

B. Violation IIB

Restatement of Violation. License Condition No. 17 requires each chromatograph detector cell containing nickel-63 to be tested for leakage and/or contamination at intervals not to exceed six (6) months. In the absence of a certificate from a transferor indicating that a test has been made within six (6) months prior to the transfer, a detector cell received from another person shall not be put into use until tested.

Contrary to the above, each chromatograph detector cell containing nickel-63 has not been tested for leakage and/or contamination every six (6) months as required. Specifically, as of the day of this inspection, one detector cell at the Arlington facility had not been tested for leakage since at least September 1982 and two detector cells, located at the Stadium Drive facility, had not been tested since at least February 1986. Furthermore, the two detector cells at the Stadium Drive facility were received in February 1986 in the absence of a certificate from the transferor indicating that a test had been made within six (6) months prior to transfer and one detector was put into use.

This is a Severity Level IV violation (Supplement VI).

Summary of Licensee's Response. The licensee does not contest the violation.

C. Violation IIC

Restatement of Violation. License Condition No. 18 requires the licensee to conduct a physical inventory every six (6) months to account for all files received and possessed under the license. The records of the inventories shall be maintained for two (2) years from the date of the inventory for inspection by the Commission, and shall include the quantities and kinds of byproduct material, location of files, and the date of the inventory.

Contrary to the above, as of the date of inspection, records of inventories have not been maintained as required since September 1982.

This is a Severity Level V violation (Supplement VI).

Summary of Licensee's Response. The licensee states that all records were lost in the fire and while filed inventories were not available, the licensee was able at the time of the inspection to immediately point out to the inspector where the detectors were in the stadium drive location.

NRC Evaluation of Licensee's Response. At the time of the inspection, the licensee stated that visual inventories were performed more often than six months; however, records of inventories were not made. Since records of inventories, even after the fire in 1984, were not maintained as required, the violation remains as stated in the Notice of Violation.

D. Violation IID

Restatement of Violation. License Condition No. 10 states licensed material shall be used only at the licensee's facilities located at 3933 Arlington Street, Kansas City, Missouri.

Contrary to the above, in February 1986, two detector cells containing licensed material were received at a facility not authorized by this license where one detector cell was placed in storage and one detector cell was put into use.

This is a Severity Level IV violation (Supplement VI).

Summary of Licensee's Response. The licensee does not contest the violation.

III. Licensee's Arguments for Mitigation of Civil Penalty

In requesting mitigation of the proposed civil penalty, the licensee points out three reasons why the civil penalty should not be imposed. The licensee states that once it became aware of the errors, actions were taken in an expeditious manner to correct the problem. The licensee also states that it does not have a prior history of similar events and that imposition of a civil penalty at this time would present a financial hardship on the licensee.

NRC's Evaluation of Licensee's Arguments for Mitigation of Civil Penalty. It is important to establish that the event was discovered by the NRC. As a result, a Confirmatory Action Letter was issued on April 10, 1987 to the licensee outlining several actions which needed immediate attention. The NRC agrees that the licensee dealt with those actions within the timeframe specified in the letter. NRC Enforcement Policy 10, CFR Part 2, Appendix C, Section V.B.2 states, "Unusually prompt and extensive corrective action may result in reducing the proposed civil penalty as much as 50 percent of the base value." The fire occurred in March 1984 and contamination of the facility went undetected until the March 26, 1987 inspection by the NRC. Once the problem was identified, the NRC provided guidance to the licensee on what actions were needed to assure the contamination was not widespread and how to properly decontaminate the facility and properly dispose of the radioactive waste. While the NRC agrees that the licensee complied with the actions contained in the Confirmatory Action Letter, NRC does not consider these actions unusually prompt or extensive.

Since the licensee had never been inspected prior to the March 25 through May 15, 1987 inspection, no basis to determine the licensee's inspection history exists. The violations identified during the inspection would indicate that the violations have been ongoing for a number of years.

In reviewing the licensee's argument that the proposed civil penalty of Five Hundred Dollars ($500) would impose a significant financial hardship on the larboratory, the licensee has not provided sufficient information to warrant mitigation of the proposed civil penalty.

NRC Conclusion. The NRC staff has concluded that all violations did occur as originally stated in the June 30, 1987 Notice of Violation and Proposed Imposition of Civil Penalties. These violations collectively show the licensee's failure to fully understand NRC requirements and the significance of the March 1984 event. A sufficient basis was not provided for mitigation of the proposed civil penalty. Therefore, the NRC staff has concluded that a $500 civil penalty should be imposed.

[FR Doc. 87-22940 Filed 10-2-87; 8:45 am]
BILLING CODE 7590-01-M

[Docket Nos. 50-237 and 50-249]

Exemption; Commonwealth Edison Co., Dresden Nuclear Power Station Units 2 and 3

I

The Commonwealth Edison Company (CECo, the licensee) is the holder of

VOL
52
ISS
192
OC
5
1987
UMI

Provisional Operating License No. DPR-19, which authorizes operation of Dresden Station Unit 2, and Facility Operating License No. DPR-25, which authorizes operation of Unit 3. These licenses provide, among other things, that Dresden Units 2 and 3 are subject to all rules, regulations, and Orders of the Commission now or hereafter in effect.

The station comprises two boiling water reactors at the licensee's site located in Grundy County, Illinois.

II

On November 19, 1980, the Commission published a revised § 50.48 and a new Appendix R to 10 CFR Part 50 regarding fire protection features of nuclear power plants. The revised § 50.48 and Appendix R became effective on February 17, 1981. Section III of Appendix R contains 15 subsections, lettered A through O, each of which specified requirements for a particular aspect of the fire protection features at a nuclear power plant. One of these subsections, III.G, is the subject of the licensee's exemption request.

Subsection III.G.2 of Appendix R requires that one train of cables and equipment necessary to achieve and maintain safe shutdown be maintained free of fire damage by one of the following means:

a. Separation of cables and equipment and associated nonsafety circuits of redundant trains by a fire barrier having a 3-hour rating. Structural steel forming a part of or supporting such fire barriers shall be protected to provide fire resistance equivalent to that required of the barrier.

b. Separation of cables and equipment and associated nonsafety circuits of redundant trains by a horizontal distance of more than 20 feet with no intervening combustibles or fire hazards. In addition, fire detectors and an automatic fire suppression system shall be installed in the fire area.

c. Enclosure of cable and equipment and associated nonsafety circuits of one redundant train in a fire barrier having a 1-hour rating. In addition, fire detectors and an automatic fire suppression system shall be installed in the fire area

Subsection III.G.3 of Appendix R requires that where Subsection III.G.2 cannot be met, alternative or dedicated shutdown capability should be provided. Also, for areas, rooms, or zones where alternative or dedicated shutdown is provided, fire detection and a fixed-fire suppression system shall be installed.

III

By letter dated June 5, 1986, the licensee requested an exemption from Section III.G.3 of Appendix R to the extent that it requires the installation of automatic fire detection and fixed-fire suppression systems in the drywell expansion gap.

The drywell is constructed of a steel containment shell that is surrounded by a concrete shield structure. The steel containment shell is spherical on the bottom and cylindrical at the top. The normal operation of the reactor (or accidents) will cause the steel shell to expand in all directions. This expansion is accommodated by providing a 2-inch gap. During construction, polyurethane foam sheets were installed over the exterior of the steel shell. An epoxy impregnated fiberglass tape was used over the joints and then ¼- and ⅜-inch thick fiberglass-epoxy prefabricated cover panels were installed over the foam sheets. Concrete was placed over this material and, when hardened, the sandwiched materials provide the 2-inch gap because they are crushable as the steel containment shell expands. The foam materials serve no other purpose.

No fire protection is provided within the 2-inch gap. However, fire detectors are located in the reactor building fire zones adjacent to the electrical and mechanical drywell penetrations. Manual fire fighting equipment is available throughout the reactor building.

The only safe shutdown components located in the expansion gap are electrical conductors inside the electrical penetration assembly canisters and instrumentation taps in mechanical penetrations. These electrical conductors are associated with valves required for hot and cold shutdown and associated cables for automatic RHR system functions. The taps for reactor level indicating switches and pressure indicators are routed in mechanical penetrations.

The fire load in the 2-inch gap is composed of the polyurethane sheets and fiberglass cover panels, both combustible. The 2-inch gap is bounded on one side by the steel shell and on the other side by a 4-foot thick reinforced concrete shield/wall.

The electrical penetrations all have the same basic configuration. An electrical assembly is sized so that it can be inserted into the electrical penetration nozzle. The nozzles are 12-inch, schedule 80 steel pipe, with wall thickness of 0.688 inches. Each assembly is in conformance with the ASME Boiler and Pressure Code, Section III, for Class B Vessels. The penetrations extend 1 foot beyond the drywell wall on both sides. The drywell wall in the vacinity of the penetrations is about 6 feet thick.

The machanical penetrations are of two types, viz., hot and cold., The hot ones are designed to accommodate thermal expansion and have guard pipes between the line and the penetration nozzle. The machanical penetrations are also constructed of thick walled steel pipes and plates. The penetration nozzles conform to the ASME Pressure Vessel Code, Section VIII. The nozzle walls are welded to the steel shell containment structure.

The fire protection in the drywell expansion gap does not comply with the technical requirements of Section III.G.3 of Appendix R because a fixed-fire suppression system and a fire detection system have not been installed in an area for which an alternative shutdown system has been provided.

There was a concern that a fire within the drywell expansion gap could damage safe shutdown related penetrations (electrical and/or machanical). Because of the combustible material sandwiched within the 2-inch expansion gap, it is possible that a fire could develop and spread through the gap.

There are two fire protection concerns for the drywell expansion gap. The first concern is whether or not a fire in the gap can spread out of the gap and into other fire ares of fire zones. The second concern revolves around whether or not a fire in the 2-inch gap proper can affect the safe shutdown capability by damaging the penetrations directly.

With respect to a fire in the drywell expansion gap spreading into other areas, the concern is mitigated by the fact that the 2-inch gap is sandwiched between the steel shell containment structure and the 4 to 6 foot thick reinforced concrete shield wall. The total mass of these two boundaries would serve as a heat sink and dissipate most of the energy of a fire in the drywell gap. The penetrations consist of steel penetration nozzles that are welded firmly in place and surrounded by the concrete wall. This forms a complete enclosure of the gap except for a 2-inch annulus around each penetration. The drywell is inerted and the spread of fire into the drywell is, therefore, not possible during operation Should a fire in the drywell gap spread into the reactor building, it would effect only one fire area of one unit and, therefore, an independent safe shutdown path would be available.

With respect to the effects of a drywell gap fire on the penetrations and the possible degradation of safe shutdown capability, it is unlikely that the electrical and mechanical penetrations would be damaged by an

expansion gap fire to the extent that their function would be impaired, because of the schedule 80 steel pipe, heavy metal plates, and their weld attachment to the steel containment shell. However, the licensee did consider this possibility. In Table 11.2–3 and 11.2–4 of their June 5, 1986 submittal, the licensee listed all of the safe shutdown functions that they had identified as being contained within the penetrations. As a result of that evaluation, the licensee concluded that a fire in the drywell gap would not result in any impairment of safe shutdown capability in either unit for the following reasons:

1. Some electrical penetrations contain power cables to individual safe shutdown valves that are normally open and that must remain open for hot shutdown. A fault in, or loss of, these cables will not change the position of the valves.

2. Other penetrations contain cables which could disable the Target Rock valve if they were damaged. However, the mechanical function of the Target Rock and other safety relief valves will not be affected by a fire in the expansion gap, thus assuring availability of Reactor Pressure Vessel pressure control capability.

3. Instruments are available to monitor reactor vessel level that have their essential and associated circuits routed independent of the expansion gap, and

4. Munual actions can be performed to open valves required for cold shutdown or to close valves in lines that are not used as fluid paths for hot shutdown.

A fire could cause a spurious readout of reactor water level indicator instruments located in the expension gap. Correct readings could still be obtained from other redundant division instruments because the spacing between the redundant divisions routed through the gap is 45 feet. The amount of urethane is limited and a fire would involve only one division at a time. Once the material burned away from a penetration, the temperature would return to ambient level quickly. In the Dersden Unit 3 gap fire investigative report dated May 6, 1986, this was found to be the case, and, further, it was also concluded that plant safe shutdown capability is still maintained given a drywell expansion gap fire.

A final reason that a fire detection and a fixed-fire suppression system should not be required for the drywell expansion gap space is that it would be physicially impossible to remove the existing foam and install the fire protection systems. In any event, the installation of a fire detection system and a fixed-fire suppression would not significantly upgrade the level of fire protection for either Unit 2 or Unit 3.

Based on the above evaluation, the staff concluded that the existing fire protection features and physical characteristics of the drywell expansion gap and its boundaries provide a level of fire protection equivalent to the technical requirements of Section III.G.3 of Appendix R.

The licensee provided information relevant to the "special circumstances" finding required by revised 10 CFR 50.12(a). The licensee stated that existing and proposed fire protection features at Dresden Nuclear Power Station Units 2 and 3 accomplish the underlying purpose of the rule. Implementing modifications to provide additional suppression systems and detection systems would require the expenditure of engineering and construction resources, as well as the associated capital costs, which would represent an unwarranted burden on the licensee's resources.

The licensee also stated that these costs are significantly in excess of those required to meet the underlying purpose of the rule. The staff concludes that "special circumstances" exist for the licensee's requested exemptions in that application of the regulation in these particular circumstances is not necessary to achieve the underlying purposes of Appendix R to 10 CFR Part 50. See 10 CFR 50.12(a)(2)(ii).

IV

Accordingly, the Commission has determined, pursuant to 10 CFR 50.12(a), that (1) these exemptions as described in Section III are authorized by law and will not present an undue risk to the public health and safety and are consistent with common defense and security, and (2) special circumstances are present for the exemptions in that application of the regulation in these particular circumstances is not necessary to achieve the underlying purposes of Appendix R to 10 CFR Part 50. Therefore, the Commission hereby grants the aforementioned exemptions from the requirements of Section III.G of Appendix R to 10 CFR Part 50 as described in Section III above.

Pursuant to 10 CFR 51.32, the Commission has determined that the granting of these exemptions will have no significant impact on the environment (52 FR 35978 dated September 24, 1987).

This Exemption is effective upon issuance.

For The Nuclear Regulatory Commission.

Dennis M. Crutchfield,

Director, Division of Reactor Projects—III, IV, V and Special Projects Office of Nuclear Reactor Regulation.

Dated at Bethesda, Maryland, this 28th day of September 1987.

BILLING CODE 8010-01-M

[Rel. No. IC-16008; 812-6859]

Application; AIG Life Insurance Co. et al.

September 28, 1987.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 (the "1940 Act").

Applicants: AIG Insurance Company (the "Company"); Variable Account I (the "Separate Account"); American International Fund Distributors, Inc. ("Distributors").

Relevant 1940 Act Sections: Exemption requested under Section 6(c) from sections 26(a) and 27(c)(2).

Summary of Application: Applicants seek an order to permit them to issue deferred annuity contracts (the "Contracts") which will permit a deduction of Mortality and Expense Risk Charges.

Filing Date: The Application was filed on August 31, 1987.

Hearing or Notification of Hearings: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on October 23, 1987. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicants with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit, or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. The Company and the Seperate Account One Alico Plaza, Wilmington, Delaware 19894 and the Distributors, 70 Pine Street, New York, New York 10270.

FOR FURTHER INFORMATION CONTACT: Jeffrey M. Ulness, Attorney (202) 272-2026 or Lewis B. Reich, Special Counsel, (202) 272-2061 (Division of Investment Management).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier (800) 231-3282 (in Maryland (301) 258-4300).

Applicant's Representations

1. The Company is a stock life insurance company organized under the

laws of the State of Pennsylvania in 1962. The ultimate parent of the company is American International Group, Inc.

2. The Company established the Separate Account on June 5, 1986, pursuant to the provisions of Pennsylvania Insurance law, to act as the funding entity for the Contracts to be issued by the Company. The Separate Account is a segregated investment account of the Company and is registered with the SEC as a unit investment trust.

3. The net purchase payments under the Contracts are allocated to the Separate Account. (Net purchase payments are the purchase payments less any premium tax). The Separate Account is divided into Sub-accounts, with the assets of each Sub-account invested in one Series of Delaware Group Premium Fund, Inc. (the "Fund").

4. The Fund is a Maryland Corporation registered under the Act as a diversified open-end management investment company of the series type. It currently comprises four portfolios: Equity-Income Series, High Yield Series, Capital Reserves Series and Multiple Strategy Series. The Company may, from time to time, add additional Series to the Fund, and, when appropriate, additional mutual funds to act as funding vehicles for the Contracts. Delaware Management Company, Inc., manages the Fund. The Contracts will be distributed through American International Fund Distributors, Inc.

5. The Contracts are individual single purchase payment deferred variable annuity contracts which provide for accumulation of contract values on a variable basis and payment of monthly annuity payments on a fixed and/or variable basis. The Contracts are designed for use by individuals for retirement planning. The Contracts may or may not qualify for any special tax treatment afforded qualified plans under the Internal Revenue Code. The minimum purchase payment the Company will accept is $10,000.

6. The Company assumes mortality and expense risks under the Contracts. The mortality risks assumed by the Company arise from its contractual obligations to make annuity payments after the Annuity Date for the life of Annuitant, to waive the Deferred Sales Charge in the event of the death of the Annuitant and to provide the death benefit prior to the Annuity Date. The expense risk assumed by the Company is that the costs of administering the Contracts and the Separate Account will exceed the amount received from the Administrative Charge.

7. The Company will assess the Separate Account with a daily asset charge for mortality and expense risks which amounts to an aggregate, on an annual basis, of 1.25% of the average daily net asset value of the Separate Account (consisting of approximately .90% for mortality risks and approximately .35% for expense risks). This charge is guaranteed by the Company and cannot be increased. If the Mortality and Expense Risk Charge is insufficient to cover the actual costs, the loss will be borne by the Company. Conversely, if the amount deducted proves more than sufficient, the excess will be profit to the Company. The Company expects a profit from this charge. Applicants represent that the 1.25% total for these charges, which it currently proposes to charge, is reasonable in relation to the risks assumed and guarantees provided in the Contract. This representation is based upon a analysis of the mortality risks, taking into consideration such factors as any contractual right to increase charges above current levels, the guaranteed annuity purchase rates, the expense risks taking into account the existence of charges for other than mortality and expense risks and the estimated costs, now and in the future, for certain product features. The Company will maintain at its principal office, available to the Commission, a memorandum setting forth in detail this analysis.

8. In the event that a contractowner withdraws all or a portion of the contract value in excess of the Free Withdrawal Amount for the first withdrawal in a contract year, a Deferred Sales Charge may be imposed. The Free Withdrawal Amount is equal to ten percent (10%) of the contract value at the time of withdrawal. The Deferred Sales Charge, which will vary in amount depending upon when the Purchase Payment was made, is calculated against the amount withdrawn. The amount of any withdrawal which exceeds the Free Withdrawal Amount will be subject to the following charge:

Contract year	Applicable deferred sales charge percentage
1	■
2	5
3	■
4	3
5	■
6	1
7 and thereafter	■

The Deferred Sales Charge will not exceed 9% of purchase payments. In the event that the contractowner selects an annuity date within six (6) years from the date of issue, the Company will assess a Deferred Sales Charge, on the annuity date, as if a withdrawal had taken place. The Deferred Sales Charge is intended to reimburse the Company for expenses incurred which are related to Contract sales such as sales commissions, promotional expenses associated with the marketing of the Contracts, including costs associated with the printing and distribution of the prospectus, the Contracts, sales materials and any other relevant information concerning the Contracts. To the extent the charge is insufficient to cover all distribution costs, the Company may use any of its corporate assets, to make up any differences. The corporate assets may include potential profit which may arise from the Mortality and Expense Risk Charge. Applicants acknowledge that the Deferred Sales Charge may be insufficient to cover all costs relating to the distribution of the Contracts and that if a profit is realized from the Mortality and Expense Risk Charge, all or a portion of such profit may be offset by distribution expenses not reimbursed by the Deferred Sales Charge. In such circumstances a portion of the Mortality and Expense Risk Charge might be viewed as providing for a portion of the costs relating to distribution of the Contracts. Notwithstanding the foregoing, the Company has concluded that there is a reasonable likelihood that the proposed distribution financing arrangements made with respect to the Contracts will benefit the Separate Account and the contractowners. The basis for such conclusion is set forth in a memorandum which will be maintained by the Company as its principal office and will be available to the Commission. Moreover, the Company represents that the Separate Account will invest only in an underlying mutual fund which undertakes, in the event it should adopt any plan under Rule 12b–1 to finance distribution expenses, to have such plan formulated and approved by a board of directors, a majority of the members which are not "interested persons" of such fund within the meaning of section 2(a)(19) of the Act.

9. The Company deducts an annual Administrative Charge, which is currently $30 per year, from the contract value to reimburse it for administrative expenses relating to maintenance of the Contract and the Separate Account. The Company may increase this charge to an amount not to exceed $100 per year. Prior to the annuity date, the Administrative Charge is deducted from the contract value on each contract

anniversary. If the annuity date is a date other than a contract anniversary, the Company will also deduct a pro-rata portion of the Administrative Charge from the contract value for the fraction of the contract year preceding the annuity date. This charge is also deducted on the date of any total withdrawal. After the annuity date, this charge is deducted on a pro-rata basis from each annuity payment.

For the Commission, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[File No. 1-6000]

Issuer Delisting; Application to Withdraw From Listing and Registration; CJI Industries, Inc. (Class A Common Stock)

September 29, 1987.

CJI Industries, Inc. ("Company"), has filed an application with the Securities and Exchange Commission pursuant to section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2-2(d) promulgated thereunder, to withdraw the above specified security from listing and registration on the Philadelphia Stock Exchange, Inc. ("Phlx").

The reasons alleged in the application for withdrawing this security from listing and registration on the Phlx include the following:

On March 16, 1987, the Company requested delisting of the Class A Common Stock from the Phlx because (i) dual trading of the Class A Common Stock on the Phlx and in the National Market System of NASDAQ had resulted in confusion and complaints by security holders and (ii) national over-the-counter market listing provided more competitive brokers and therefore more competitive stock prices and liquidity to stockholders.

Any interested person may, on or before October 20, 1987 submit by letter to the Secretary of the Securities and Exchange Commission, Washington, DC 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

[FR Doc. 87-22882 Filed 10-2-87; 8:45 am]

BILLING CODE 8010-01-M

[Rel. No. IC—16009; 812-6809]

Application, Criterion Special Series, Inc., et al.

September 28, 1987.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 ("1940 Act").

Applicants: Criterion Special Series, Inc. ("CSS"), Criterion Bond Fund, Criterion Income Trust, Criterion Special Equity Portfolios, Criterion Technology Fund, Current Interest, Inc., Pilot Fund, Inc., Sunbelt Growth Fund, Inc., The Tax Free Fund, Inc. ("Funds"), and Criterion Distributors, Inc. ("CDI" collectively with the Funds, "Applicants").

Relevant 1940 Act Sections: Exemption requested under section 6(c) from the provisions of sections 2(a)(32), 2(a)(35), 22(c) and 22(d) of the 1940 Act and Rule 22c-1 thereunder. Approval of exchange offers requested under section 11(a).

Summary of Application: Applicants seek an order to permit CSS and CDI to impose a contingent deferred sales charge ("CDSC") on certain redemptions of CSS's shares and to permit the waiver of such charge in certain circumstances described in the application. Applicants also seek an order which will permit certain exchanges of shares among registered investment companies for which CDI or an affiliated person of Criterion Group, Inc. may serve as principal underwriter.

Filing Date: The application was filed on August 4, 1987. An amendment, the substance of which has been set forth in a letter to the staff of the Commission dated September 25, 1987, and thus is included herein, will be filed during the notice period.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on October 21, 1987. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Applicant, 1000 Louisiana, Houston, Texas 77002 (Attention: Thomas J. Press, Esq.)

FOR FURTHER INFORMATION CONTACT: Cecilia Cantrill, Staff Attorney (202) 272-3037, or Curtis R. Hilliard, Special Counsel (202) 272-3030 (Division of Investment Management).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier who can be contacted at (800) 231-3282 (in Maryland (301) 258-4300).

Applicant's Representations

1. CSS, a series company which is a Maryland corporation, and each of the other Funds, are or will be registered under the 1940 Act as open-end, management investment companies. CDI is a registered broker-dealer and presently serves as principal underwriter of each of the Funds. Criterion Funds, Inc. ("CFI"), the parent of CDI, is the investment adviser of each of the Funds.

2. Shares of each series of CSS ("Portfolios") may currently be sold to the public at their current net asset value per share plus a front-end sales charge ("FESC"). CSS and CDI propose to offer shares of each portfolio of CSS to the public with a CDSC under which the CDSC will be deducted from the proceeds of certain redemptions of shares. The aggregate amount of the CDSC to a shareholder will not exceed 6% of the original value of shares in the share-holder's account. The CDSC would be imposed on any redemption of shares, the dollar amount of which exceeds the aggregate of: (a) The value at the time of purchase of all shares in the account purchased more than six years prior to the redemption (with shares outstanding on the date of implementation of the CDSC arrangement being treated as having been held for more than six years and having been purchased at the net asset value in effect on such date), plus (b) the value at the time of reinvestment of all shares in the account acquired through reinvestment of all shares in the account acquired through reinvestment of dividends or capital gains distributions, plus (c) the increase, if any, in the value

of all shares in the account (including those acquired through reinvestment) over the purchase price (or deemed purchase price, in the case of shares held on the date the CDSC is implemented) of all such shares. Redemptions will be processed in a manner so as to maximize the dollar amount of the redemption proceeds which will not be subject to a CDSC. Accordingly, each redemption of shares will be assumed to have been made first from the exempt amounts referred to in clauses (a), (b) and (c) above, and second through liquidation of those shares in the account purchased within the six years preceding the redemption on a first-in-first-out basis.

3. Where a CDSC is imposed, the amount of charge will depend upon the number of years since the investor purchased the shares which are being redeemed. The CDSC imposed will be 6% during the first year following the purchase and will decrease 1% per year through the sixth year with no charge imposed in the seventh and subsequent years. For purposes of computing the number of years during which shares were held prior to redemption, all purchases during a month will be aggregated and deemed to have been made on the first day of the month. On each succeeding anniversary of such date, the shares so purchased will be treated as having been held an additional year prior to redemption.

4. It is proposed that the CDSC will be waived with respect to certain types of redemptions of shares, pursuant to waivers adopted and applied in accordance with Rule 22d–1. Presently proposed waivers would include, and be applicable to redemptions of shares: (a) By persons and companies affiliated with any of the Funds, Criterion Group, Inc. and its subsidiaries, and broker-dealers which distribute shares of the Funds, clients of any investment advisory subsidiary of Criterion Group, Inc. (or by affiliated persons or the sponsoring companies of such clients) and clients of nationally recognized consulting firms which provide consulting services to pension funds or major corporations, state and local governments, Taft-Hartley Plans and foundations and endowments, which have contacted the Fund, the Investment Advisor, the Fund's principal underwriter or any other operating subsidiary of Criterion Group, Inc. with respect to furnishing advice to such client of such consulting firm or with respect to distribution of securities of a Fund by or purchase of securities of a Fund by such client (the "Criterion Redemption"); (b) resulting from the mandatory redemption of shares of accounts of $500 or less; and (c) which represent the proceeds of a prior redemption pursuant to a one-time reinstatement privilege (the "Reinstatement Privilege").

5. CSS proposes to finance distribution expenses pursuant to a plan of distribution adopted pursuant to Rule 12b–1 (the "Plan"). The Plan provides that each portfolio of CSS will pay compensation to CDI for its distribution services consisting of up to 5% of the amount received by the portfolio for each share sold on or after the effective date of the Plan (excluding reinvestment shares and shares eligible for the Criterion Redemption), plus a separate distribution fee approximately calculated by applying the rate of 1% over the prevailing prime rate to the outstanding balance of uncovered distribution charges. CDI will use its own funds to pay to each authorized dealer selling shares up to 5% of the purchase price of shares sold through such dealer. Payments of such compensation will be spread over time so that the aggregate amount of such payments during any fiscal year shall not exceed .90% of the portfolio's average daily net assets represented by shares issued after implementation of the CDSC arrangement. Such compensation payments by each portfolio ("Dealer Compensation Payments") will be payable monthly, but will be automatically discontinued during any period in which there are no outstanding uncovered distribution charges under such Plan. Uncovered distribution charges are approximately equivalent to all amounts due to CDI under the above formula less payments made with respect thereto under the Plan and CDSC received by CDI. Although CDI will normally receive the CDSC, the CDSC will be retained by the portfolio during any period in which there are no uncovered distribution charges.

6. It is expected that whenever there is an exchange of shares from one portfolio of CSS to another portfolio (or an exchange among CDSC Funds), as described below, CDI will waive a portion of the Dealer Compensation Payments payable by the first portfolio by reducing that portfolio's uncovered distribution charges to reflect the fact that such charges of the first portfolio will not be offset in the future by 12b–1 payments or CDSC on those shares. The uncovered distribution charges of the second portfolio will be increased by the amount of such reduction.

7. The Plan also authorizes each portfolio of CSS to make monthly payments to reimburse CDI for, or to bear directly the costs of, actual distribution-related or administrative expenditures incurred in the distribution of shares, including: Incentive compensation to organizations which sell shares; advertising costs; the costs of preparing and distributing sales literature, prospectuses and statements of additional information for prospectuses and statements of additional information for prospective investors; and the costs of implementing and operating the Plan. The total of payments by a portfolio to CDI for reimbursement for the above and direct costs of the portfolio for such sales literature, prospectuses and statements of additional information may not exceed an amount computed at the annual rate of .35% of the portfolio's average daily net assets during the preceding month. These payments are distinct from the Dealer Compensation Payments described above and, as such, are not subject to automatic discontinuance when there are no outstanding uncovered distribution charges under the Plan.

8. The Funds also propose to make available certain exchange privileges to shareholders of the CDSC Funds, FESC Funds and the Funds which are sold without any sales charges ("NL Funds"). Under this proposal, shareholders of any CDSC Fund (or portfolio thereof) could exchange shares for another CDSC Fund or CDSC portfolio without imposition of any CDSC on such exchanges. In the absence of an applicable waiver, the CDSC would be determined upon the ultimate redemption of shares, using the date of original purchase of the shares that were exchanged to measure the holding period of the redeemed shares. Of the shares being exchanged in such an exchange a pro-rata portion of the original purchase amount of the investor's shares purchased (or deemed purchased): (a) More than six years prior to the exchange; (b) through dividend reinvestment; and (c) less than six years prior to the exchange, would be deemed to be the shares exchanged in the transaction. In this way any CDSC liability will be spread ratably among the shares of the CDSC Fund originally purchased and the CDSC shares acquired in the exchange.

9. It is also proposed that shareholders of a CDSC Fund be given the opportunity to exchange their shares for shares of any NL Fund without imposition of any CDSC on such exchange and to exchange the shares so acquired for shares of any NL Fund or CDSC Fund. Any applicable CDSC would be imposed only upon the

redemption of shares for cash, using only the periods in which shares of a CDSC Fund were held for purposes of computing the holding period of the redeemed shares. On an exchange from a CDSC Fund to an NL Fund, of the dollar amount being exchanged, the amount which represents the current net asset value of the investor's shares which (a) were originally purchased (regardless of intervening exchanges among CDSC Funds) more than six years prior to the exchange (and, as a result, on which no CDSC is payable) or (b) represent reinvestment shares (despite intervening exchanges) (and, as a result, on which no CDSC is payable) (all such shares described in clauses (i) and (ii) hereof and elsewhere are hereinafter referred to as "Free Shares") would be deemed exchanged first. If the dollar amount of the shares exchanged exceeds the value of the investor's Free Shares, the exchange will next be deemed to have been made of shares held (or deemed to have been held, if there were prior exchanges) by the investor for the longest period of time within the applicable six-year period. The amount of the investor's deemed purchase value for the shares acquired in exchange for the non-Free Shares will thereafter be deemed to be equal to the actual (or, if there have been prior exchanges, the deemed) purchase value of the exchanged non-Free Shares.

10. It is further proposed that shares of an NL Fund acquired through reinvestment after an exchange into such NL Fund or through reinvestment of distributions received from a direct investment in an NL Fund would also be treated as Free Shares and would, in each case, be eligible for exchange into a CDSC Fund or into an FESC Fund without any sales charge or into an NL Fund. Shares of an NL Fund purchased directly will be eligible for exchange only for shares of another NL Fund.

11. Applicants propose to permit shareholders of any FESC Fund to exchange their shares for shares of any CDSC Fund or FESC Fund, either directly or with one or more intervening exchanges through an NL Fund, CDSC Fund or FESC Fund. Because an FESC will already have been paid with respect to these shares or such shares will be reinvestment shares, no CDSC would be payable on the ultimate redemption of amounts acquired in exchange for FESC shares, regardless of the Fund redeemed from. (Upon their exchange, FESC Fund shares would thus be included within the definition of "Free Shares").

12. Finally, it is proposed that shareholders of a CDSC Fund be offered the privilege of exchanging their shares for shares of any FESC Fund, either directly or with one or more intervening exchanges through an NL Fund. Any applicable CDSC (but not an FESC) will be imposed at the time of exchange. In computing such charge, amounts will be deemed exchanged in the same sequence and priority utilized for redemptions of shares of an NL Fund acquired in exchange for shares of a CDSC Fund. Shares of an FESC Fund acquired in this manner will be treated as Free Shares.

13. The exchange offers proposed may be subject to various conditions described in the application. Although an administrative fee may be imposed on exchanges, in no event will such fee exceed the amount of such fee as would be permitted under proposed Rule 11a–3 when adopted. Applicants reserve the right to commence, suspend or otherwise restrict operation of any or all of the foregoing exchange privileges.

Applicants' Legal Conclusions

Applicants submit that the requested exemptions and orders are appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act. The CDSC permits shareholders to have the advantage of more investment dollars working for them at the time of their purchase than with a traditional front-end sales charge of comparable amount. The CDSC and the Plan are fair to CSS and its shareholders, and would similarly be fair to the shareholders of any of the Funds which may in the future impose a CDSC, because they are designed to achieve parity between those shareholders electing to hold their shares and continue as shareholders and those shareholders electing early redemption of their shares. In each situation in which the CDSC is presently proposed to be waived or deferred, the redeeming shareholder (a) would have purchased shares under circumstances that did not require the principal underwriter to incur substantial additional distribution expenses, or (b) have had no control over the timing of such redemption. In addition, because all waivers would be affected in accordance with Rule 22d–1 under the 1940 Act, any waivers of the CDSC would by definition have to be consistent with Rule 22d–1, which permits scheduled variations in or eliminations of sales charges for particular classes of investors and requires appropriate disclosure. In addition, Applicants submit that the proposed exchange offers are fair and in the best interests of shareholders of the Funds because of the manner in which they will operate and because they afford shareholders flexibility in their financial planning.

Applicants' Conditions

If the requested orders are issued, Applicants have agreed to the imposition of the following conditions:

1. In connection with any waivers or deferrals of the CDSC, each CDSC Fund and principal underwriter of such fund will comply with all of the conditions set forth in Rule 22–1 (or any successor rule) under the 1940 Act.

2. Each CDSC Fund, NL Fund and FESC Fund, and the principal underwriters thereof, in connection with any offers of exchange of shares, will comply with the provisions of proposed Rule 11a–3 (or any similar rule) under the 1940 Act when and if such rule is adopted by the SEC.

3. Each CDSC Fund and its principal underwriter will comply with the provisions of Rule 12b–1 (or any successor rule) under the 1940 Act, as such Rule may be amended from time to time.

4. To the extent that the CSS or CDI has imposed any CDSC, waived such sales charges or made offers of exchange, as described herein, prior to the date of receiving the order requested in the application, each is relying upon its own interpretation of the 1940 Act and the Rules thereunder, and understands that any such order will be effective and apply prospectively on and after the date of such order.

5. In evaluating the continued appropriateness of the 12b–1 plan adopted by any CDSC Fund and in making a determination of whether to continue or modify the plan, the Board of Directors (or Trustees) of each CDSC Fund will consider, among other things, the direct and indirect expenses that CFI and the fund's principal underwriter have incurred in promoting sales of shares and, in this regard, will review the extent to which such expenses have, in effect, been offset through the payment of compensation under such plan and receipt of CDSC.

6. The CDSC Funds will fully disclose the CDSC, and such funds and the NL Funds and FESC Funds will fully disclose the terms and conditions of any applicable exchange privileges, in their respective prospectuses and statements of additional information.

7. No CDSC Fund which is not a party to the application nor its principal underwriter shall rely upon any order granted upon the application permitting imposition of the CDSC and waivers thereof unless shares of such funds are offered and sold on substantially the

same basis as shares of CSS are proposed to be sold.

For the Commission, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Rel. No. IC-16010; 812-6860]

Application; Empire Life Insurance Co. et al.

September 28, 1987.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 (the "1940 Act").

Applicants: Empire Life Insurance Company (facilities Empire"); Composit Deferred Variable Account (the "Variable Account"); and Murphey Favre, Inc. ("MFI")

Relevant 1940 Act Sections: Exemption requested under sections 6(c) from sections 26(a)(2) and 27(c)(2).

Summary of Application: Applicants seek an order to permit them to issue flexible premium deferred variable annuity contracts (the"Contracts") that permit a deduction of mortality and expense risk charges.

Filing Date: September 2, 1987.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask ot be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on October 23, 1987. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant(s) with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit, or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street NW., Washington, DC 20549. Applicants' addresses: Empire and the Variable Account, 1000 Second Avenue, Seattle, Washington 98104, MFI, 601 Riverside Avenue Spokane, Washington 99201.

FOR FURTHER INFORMATION CONTACT: Jeffery M. Ulness, Attorney, (202) 272-2026 or Lewis B. Reich, Special Counsel (202) 272-2061 (Division of Investment Management).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier (800) 231-3282 (in Maryland (301) 258-4300).

Applicant's Representations

1. Empire is a stock life insurance company that was incorporated under the laws of Nebraska in 1962. It is principally engaged in the sale of individual annuities and individual life insurance. Empire is a wholly-owned subsidiary of WM Life Insurance Company, which is as wholly-owned subsidiary of WM Financial, Inc., which in turn is wholly-owned by Washington Mutual Savings Bank.

2. The Variable Account was established by Empire as a separate account under the laws of Nebraska on July 23, 1987 and registered under the 1940 Act as a unit investment trust. The Variable Account was established in connection with the proposed issuance of certain individual flexable premium deferred variable annuity contracts ("Contracts").

3. The Variable Account will invest in shares of one or more of the investment portfolios of the Composite Deferred Series, Inc. (the "Fund"). The Fund, a diversified open-end management investment company, organized as a Washington corporation on December 8, 1986, has three portfolios: the Money Market portfolio, the Growth Portfolio, and the Income Portfolio. The Variable Account has three subaccounts, each of which invests in a corresponding portfolio of the Fund, MIF will serve as the distributor and Principal underwriter of the Contracts.

4. The Contracts are individual flexible premium deferred variable annuity contracts. The Contracts may be purchased with a first purchase payment of at least $1,000. Subsequent purchase payments must be at least $100. The contract owner can allocate purchase payments to one or more sub-accounts of the Variable Account, each of which will invest in a corresponding portfolio of the Fund. Purchase payments will be credited with the investment experience of the selected sub-account(s). Empire may establish new sub-accounts at its discretion. Each additional sub-account(s). Empire may establish new sub-accounts at its discretion, each additional sub-account will purchase shares in a portfolio of the Fund or in another mutual fund. Any new sub-account would be made available to existing contract owners on a basis to be determined by Empire. Empire may eliminate one or more sub-accounts if, in its sole discretion, conditions so warrant. Prior to the income starting date, a contract holder may surrender the Contract in its entirety or withdraw a portion of the contract value. Transfers between sub-accounts of the Variable Account generally are permitted both prior to and subsequent to the income starting date

5. An amount will be deducted from the daily net asset value of the Variable Account to reimburse Empire for certain mortality and expense risks assumed under the Contracts. The mortality risk born by Empire under the Contracts is the guarantee that the variable annuity payments made to contract owners will not be affected by the mortality experience (life span) of persons receiving such payments or of the general population. The expense risk undertaken by Empire is that the deductions for actual maintenance and distribution costs under the Contracts may be insufficient to cover the actual future costs incurred by Empire. This asset charge will be deducted from the contract value of each Contract daily in an amount equal to an effective annual rate of 1.20%. Of that amount, approximately .80 is allocable to the mortality risks, and .40 is allocable to the administrative and distribution expense risks. The rate of this charge is guaranteed and will not change.

6. Empire represents that the mortality and expense risk charge is a reasonable charge to compensate Empire for the risk that annuitants under the Contracts will live longer as group that has been anticipated in setting the annuity rates guranteed in the Contracts for the risk that administrative expenses will be greater than the amounts derived from the administration charges and for the risk that the amounts realized from the surrender charge will be insufficient to cover actual sales and distribution expenses. Empire further represents that the charge of 1.20% for mortality and expense risks assumed by Empire is within the range of industry practice with respect to comparable annuity products. This representation is based upon Empire's analysis of publicly available information about similiar industry products, taking into consideration such factors as current charge levels, existence of charge level guarantees, and guaranteed annuity rates. Empire represents that it will maintain at its administrative offices, and make available to the SEC, a memorandum setting forth in detail the products analyzed in the course of, and the methodology and results of, its comparative survey made to support this representation.

VOL 52 ISS 192 OC 5 1987 UMI

7. In certain cases a contingent deferred sales charge will be assessed upon surrender of a Contract or withdrawal of part of the contract value prior to the income starting date. The charge will be based on the elapsed time between the date of the purchase payment and the date of the surrender or partial withdrawal. For purposes of calculating the charge, Empire assumes that the purchase payments are withdrawn on a first-in, first-out basis, and that all purchase payments are withdrawn before any earnings are withdrawn.

The following surrender charges apply:

Elapsed time since date of purchase payment	Applicable surrender charge percentage
Less than 1 year	6
1 year, but less than 2 years	5
2 years, but less than 3 years	4
3 years, but less than 4 years	3
4 years, but less than 5 years	2
5 years, but less than 6 years	1
6 years or more	0

In no event, however, will the total sales charges for a particular Contract exceed 9% of the purchase payments for that Contract. Surrender charges will be used to pay sales commissions and other promotional or distribution expenses associated with the marketing of the Contracts. Applicants acknowledge that the surrender charge may be insufficient to cover all distribution expenses in connection with the Contract. Applicants also acknowledge that if a profit is realized from the mortality and expense risks charge, any such profit, as well as any of the profit realized by Empire and held in its general account, would be a variable for any proper Corporate purpose, including, but not limited to payment of distribution expenses.

8. In the event that a portion of the mortality and expense risk charge might be viewed as providing for a protion of the costs relating to the distribution of the Contracts. Empire has concluded that there is a reasonable likelihood that the proposed distribution financing arrangement will benefit the Variable Account and the contract owners. A memorandum setting forth the basis for this representation will be maintained by Empire at its administrative offices and will be available to the SEC. Furthermore, applicants also represent that the Variable Account will invest only in management investment companies which undertake, in the event that it should adopt any plan under Rule 12b–l to finance distribution expenses, to have their board of directors (or trustees), a majority of whom are not "interested persons" of the company, approve any plan under Rule 12b–l to finance distribution expenses.

9. Empire will deduct a contract maintenance charge of $2.50 per month. Prior to the income starting date, this charge will be deducted from the contract value on each contract monthly anniversary to compensate Empire for the administrative services provided to contract owners. After the income starting date, a contract maintenance charge of $2.50 will be deducted from each income payment. Empire does not intend to profit from the contract maintenance charge.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[Rel. No. IC–16007; 812–6716]

Application; Shearson Lehman Special Equity Portfolios

September 28, 1987.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 ("1940 Act").

Applicant: Shearson Lehman Special Equity Portfolios.

Relevant 1940 Act Sections: Amended Exemptive Order requested under section 6(c) exempting Applicant from the provisions of section 22(d) and Rule 22d–1.

Summary of Application: Applicant seeks an amended exemptive order to permit it to waive a contingent deferred sales charge currently assessed pursuant to an order granted to Applicant on March 18, 1986 (Investment Company Act Release No. 14999, the "1986 Order").

Filing Date: The application was filed on May 11, 1987 and amended on July 22, 1987.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on October 23, 1987. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street NW., Washington, DC 20549. Applicant(s), Two World Trade Center, New York, NY 10048.

FOR FURTHER INFOMATION CONTACT: Joyce M. Pickholz, Staff Attorney, (202) 272–3046, or Curtis R. Hilliard, Special Counsel, (202) 272–3030 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier who can be contacted at (800) 231–3282 (in Maryland (301) 258–4300).

Applicant's Representations

1. Applicant is an open-end, diversified, management investment company that was organized as a business trust under the laws of the Commonwealth of Massachusetts on January 8, 1986. Applicant is a series company that is currently offering shares of four portfolios (the "Portfolios"). Shares of all of the Portfolios are distributed by Shearson Lehman Brothers Inc. ("Shearson Lehman"), and affiliates of Shearson Lehman serve as the investment advisors to the various Portfolios.

2. The 1986 Order exempted Applicant from (1) the provisions of sections 2(a)(32), 2(a)(35), 22(c) and 22(d) of the Act and Rules 22c–1 and 22d–1 under the Act to the extent necessary to permit Applicant to assess a contingent deferred sales charge (the "CDSC") on redemptions of the initial and future series of its shares to permit Applicant under certain circumstances to waive or apply credits against the CDSC, and (2) the provisions of section 11(a) of the Act of permit Applicant to offer to exchange shares of each of Applicant's series for shares of any other of Applicant's series or shares of any series of Shearson Lehman Special Income Portfolios, on the basis of relative net asset values per share of the relevant series at the time of the exchange, subject to a $5.00 service charge on each exchange, which service charge is no longer assessed.

3. Applicant now proposes to waive the CDSC on redemptions affected by any shareholder who is a client of a Shearson Lehman Financial Consultant ("Financial Consultant") and who purchased shares of Applicant with the

redemption proceeds of shares of a registered investment company sponsored by the Financial Consultant's previous employer. Under Applicant's proposal, the CDSC would be waived only if (1) the shareholder's purchase of shares of a Portfolio was made within 90 days of the commencement of the Financial Consultant's employment with Shearson Lehman; (2) the purchase was made with proceeds of a redemption of shares of an investment company registered under the Act that was sponsored by the Financial Consultant's previous employer (the "Previous Fund"); (3) the Financial Consultant served as the shareholder's broker on the purchase of the shares of the Previous Fund; and (4) the shares of the Previous Fund were subject to a sales or redemption charge. To ensure that the shares of a Portfolio are purchased with the proceeds of a redemption of shares of a Previous Fund, the shareholder would be required to provide Shearson Lehman with a copy of a confirmation slip or customer statement evidencing the redemption.

4. Applicant requests that any exemption the Commission may grant cover not only Portfolios, but also any additional series or classes of shares Applicant may offer in the future on substantially the same basis as Applicant offers the shares of the Portfolios.

5. Shearson Lehman believes that the purchase of shares of a Shearson Lehman fund by a client of a Financial Consultant with the redemption proceeds of a fund sponsored by the Financial Consultant's previous employer typically involves little or no selling effort by the Financial Consultant, and as a result, under Shearson Lehman's internal policies, the Financial Consultant receives no compensation with respect to the purchase.

Applicant's Legal Conclusions

1. Applicant submits that the waiver of the CDSC is consistent with the policies underlying section 22(d) of the Act, which prohibits an investment company registered under the Act from selling its redeemable securities other than at a current public offering price described in the company's prospectus. Applicant also believes that the waivers from the CDSC will not harm Applicant or its shareholders or unfairly discriminate among shareholders or purchasers. In light of the lack of selling effort involved, Applicant believes it appropriate to waive the CDSC on a redemption by a client of a Shearson Lehman Financial Consultant of shares of a Portfolio purchased with the redemption proceeds of a fund sponsored by the Financial Consultant's previous employer.

Applicant's Conditions

Applicant expressly agrees that the proposed transactions will conform to the following conditions.

1. Applicant will implement the waiver of the CDSC in accordance with the terms of Rule 22d–1 under the 1940 Act.

2. Applicant will comply with the provisions of proposed Rule 11a–3 under the 1940 Act if and when it is adopted by the Commission.

3. Applicant will comply with the provisions of Rule 12b–1 under the 1940 Act in its present form and as it may be revised in the future.

For the Commission, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary.

[FR Doc. 87–228 Filed 10–2–87; 8:45 am]

BILLING CODE 8010–01–M

[File No. 1–6761]

Issuer Delisting; Application To Withdraw From Listing and Registration; Wickes Companies, Inc. (Common Stock, Par Value $0.10 Per Share, $2.50 Convertible Preferred Stock, Series A, Par Value $0.10 per Share, and Warrants To Purchase Common Stock, Par Value $0.10 Per Warrant)

September 29, 1987.

Wickes Companies, Inc. ("Company"), has filed an application with the Securities and Exchange Commission pursuant to section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2–2(d) promulgated thereunder, to withdraw the above specified securities from listing and registration on the American Stock Exchange, Inc. ("Amex").

The reasons alleged in the application for withdrawing these securities from listing and registration include the following:

The $.10 par value common stock, $.10 par value preferred stock and common stock purchase warrants of the Company (the "Equity Securities") have been listed for trading on the Amex and, pursuant to a Registration Statement on Form 8–A which became effective on August 11, 1987, the NYSE. Trading in the Company's Equity Securities on the NYSE commenced at the opening of business on August 12, 1987, and concurrently therewith the Equity Securities were suspended from trading on the Amex.

In making the decision to withdraw its Equity Securities from listing on the Amex, the Company considered the direct and indirect costs and expenses attendant on maintaining the dual listing of said securities on the NYSE and Amex. The Company does not see any particular advantage in the dual trading of its stock and believes that dual listing would fragment the market for its Equity Securities.

Any interested person may, on or before October 20, 1987, submit by letter to the Secretary of the Securities and Exchange Commission, Washington, DC 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

SMALL BUSINESS ADMINISTRATION

Action Subject to Intergovernmental Review

AGENCY: Small Business Administration.

ACTION: Notice of action subject to Intergovernmental Review Under Executive Order 12372.

SUMMARY: This notice provides for public awareness of SBA's intention to fund for the first time five additional Small Business Development Centers (SBDCs) during fiscal year 1988, subject to availability of funds. Currenily, there are 49 SBDCs operating in the SBDC program. The following SBDCs are intended to be funded: Arizona, Colorado, Maryland, Montana, and New Mexico. This notice also provides a description of the SBDC program by setting forth a condensed version of the program announcement which has been furnished to each of the proposal developers for the SBDCs expected to be funded. This publication is being made to provide the State single points of contact, designated pursuant to Executive Order 12372, and other

interested State and local entities, the opportunity to comment on the proposed funding in accord with the Executive Order and SBA's regulations found at 13 CFR Part 135.

DATE: Comments will be accepted through December 4, 1987.

ADDRESS: Comments should be addressed to Ms. Janice E. Wolfe, Deputy Associate Administrator for Business Development for SBDC Programs, U.S. Small Business Administration, 1441 L Street NW., Washington, DC 20416.

FOR FURTHER INFORMATION CONTACT: Ms. Janice E. Wolfe, (202) 634–1805. C.T

SBA is bound by the provisions of Executive Order 12372, "Intergovernmental Review of Federal Programs." SBA has promulgated regulations spelling out its obligations under that Executive Order. See 13 CFR Part 135, effective September 30, 1983.

In accord with these regulations, specifically § 135.4, SBA is publishing this notice to provide public awareness of the pending applications for funding of five proposed Small Business Development Centers (SBDCs). Also, published herewith is an annotated program announcement describing the SBDC program in detail.

The proposed SBDCs will be funded at the earliest practicable date following the 60-day comment period. However, no funding will occur unless all comments have been considered. Relevant information identifying the five proposed SBDCs and providing the mailing address of the proposal developers is provided below. In addition to this publication, a copy of this notice is being simultaneously furnished to each of the affected State single points of contact which have been established under the Executive Order.

The State single points of contact and other interested State and local entities are expected to advise the relevant proposal developer of their comments regarding the proposed funding in writing as soon as possible. An SBDC proposal cannot be inconsistent with an area-wide plan to provide assistance to small business, if there is one, which has been adopted by an agency recognized by the State government as authorized to do so. Copies of such written comments should also be furnished to Ms. Janice E. Wolfe, Deputy Associate Administrator for Business Development for SBDC Programs, U.S. Small Business Administration, 1441 L Street NW., Washington, DC 20416. Comments will be accepted by the proposal developer and SBA for a period of two months (60 days) from the date of publication of this notice. The proposal developer will make every effort to accommodate these comments during the 60-day period. If the comments cannot be accommodated by the proposal developer, SBA will, prior to funding the proposed SBDC, either attain accommodation of any comments or furnish an explanation to the commenter of why accommodation cannot be attained to the commentor prior to funding the proposed SBDC.

Description of the SBDC Program

The Small Business Development Center Program is a major management assistance delivery program of the U.S. Small Business Administration. SBDCs are authorized under section 21 of the Small Business Act (15 U.S.C. 648). SBDCs operate pursuant to the provisions of section 21, a Notice of Award (Cooperative Agreement) issued by SBA, and a Program Announcement. The Program represents a partnership between SBA and the State-endorsed organization receiving Federal assistance for its operation. SBDCs operate on the basis of a State plan which provides small business assistance throughout the State. As a condition to any financial award made to an applicant, an additional amount equal to the amount of assistance provided by SBA must be provided to the SBDC from sources other than the Federal Government.

Purpose and Scope

The SBDC Program has been designed to meet the specialized and complex management and technical assistance needs of the small business community. SBDCs focus on providing indepth quality assistance to small businesses in all areas which promote growth, expansion, innovation, increased productivity and management improvement. SBDCs act in an advocacy role to promote local small business interests. SBDCs concentrate on developing the unique resources of the university system, the private sector, and State and local governments to provide services to the small business community which are not available elsewhere. SBDCs coordinate with other SBA programs of management assistance and utilize the expertise of these affiliated resources to expand services and avoid duplication of effort.

Program Objectives

The overall objective of the SBDC Program is to leverage Federal dollars and resources with those of the State academic community and private sector to:

(a) Strengthen the small business community;

(b) Contribute to the growth of the communities served;

(c) Make assistance available to more small businesses than is now possible with present Federal resources; and

(d) Create a broader based delivery system to the small business community.

SBDC Program Organization

SBDCs are organized to provide maximum services to the local small business community. The lead SBDC receives financial assistance from the SBA to operate a statewide SBDC Program. In States where more than one organization receives SBA financial assistance to operate an SBDC, each lead SBDC is responsible for Program operations throughout a specific regional area to be served by the SBDC. The lead SBDC is responsible for establishing a network of SBDC subcenters to offer service coverage to the small business community. The SBDC network is managed and directed by a single full-time Director. SBDCs must ensure that at least 80 percent of Federal funds provided are used to provide services to small businesses. To the extent possible, SBDCs provide services by enlisting volunteer and other low cost resources on a statewide basis.

SBDC Services

The specific types of services to be offered are developed in coordination with the SBA district office which has jurisdiction over a given SBDC. SBDCs emphasize the provision of indepth, high-quality assistance to small business owners or prospective small business owners in complex areas that require specialized expertise. These areas may include, but are not limited to: Management, marketing, financing, accounting, strategic planning, regulation and taxation, capital formation, procurement assistance, human resource management, production, operations, economic and business data analysis, engineering, technology transfer, innovation and research, new product development, product analysis, plant layout and design, agri-business, computer application, business law information, and referral (any legal services beyond basic legal information and referral require the endorsement of the State Bar Association), exporting, office automation, site selection, or any other areas of assistance required to promote small business growth, expansion, and productivity within the State.

The degree to which SBDC resources are directed toward specific areas of assistance is determined by local community needs, SBA priorities, and

SBDC Program objectives and agreed upon by the SBA district office and the SBDC.

The SBDC must offer quality training to improve the skills and knowledge of existing and prospective small business owners. As a general guideline, SBDCs should emphasize the provision of training in specialized areas other than basic small business management subjects. SBDCs should also emphasize training designed to reach particular audiences such as members of SBA priority and special emphasis groups.

SBDC Program Requirements

The SBDC is responsible to the SBA for ensuring that all programmatic and financial requirements imposed upon them by statute or agreement are met. The SBDC must assure that quality assistance and training in management and technical areas is provided to the State small business community through the State SBDC network. As a condition of this agreement, the SBDC must perform, but not be limited to, the following activities.

(a) The SBDC ensures that services are provided as close as possible to small business population centers. this is accomplished through the establishment of SBDC subcenters.

(b) The SBDC ensures that lists of local and regional private consultants are maintained at the lead SBDC and each SBDC subcenter. The SBDC utilizes and provides compensation to qualified small business vendors such as private management consultants, private consulting engineers, and private testing laboratories.

(c) The SBDC is responsible for the development and expansion of resources within the State, particularly the development of new resources to assist small businesses that are not presently associated with the SBA district office.

(d) The SBDC ensures that working relationships and open communications exist within the financial and investment communities, and with legal associations, private consultants, as well as small business groups and associations to help address the needs of the small business community.

(e) The SBDC ensures that assistance is provided to SBA special emphasis groups throughout the SBDC network. This assistance shall be provided to veterans, women, exporters, the handicapped, and minorities as well as any other groups designated a priority by SBA. Services provided to special emphasis groups shall be performed as part of the Cooperative Agreement.

Advance Understandings.

(a) Lead SBDCs shall operate on a 40-hour week basis, or during normal State business hours, with National holidays or State holidays as applicable excluded.

(b) SBDC subcenters shall be operated on a full-time basis. The lead SBDC shall ensure that staffing is adequate to meet the needs of the small business community.

(c) All counseling assistance offered through the Small Business Development Center network shall be provided at no cost to the client.

Date: September 21, 1987.

James Abdnor,

Administrator.

BILLING CODE 8025–01–M

Application No. 02/02/0510

Application for a License to Operate as a Small Business Investment Company; Diamond Capital Corp.

Notice is hereby given of the filing of an application with the Small Business Administration (SBA), pursuant to § 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1987)), by Diamond Capital Corporation (the Applicant), 805 Third Avenue, Suite 1100, New York, New York 10017, for a license to operate as a small business investment company (SBIC) under the provisions of the Small Business Investment Act of 1958, as amended (the Act), (15 U.S.C. 661 *et seq.*), and the Rules and Regulations promulgated thereunder.

The proposed officers and directors and principle stockholders of the Applicant are as follows:

Name	Title or relationship	(Percent)
Lawrence M. Goodman, 219 East 69th Street, New York, New York 10021.	Chairman of the Board, Director.	25.5

Name	Title or relationship	(Percent)
Martin S. Levine, 1365 York Avenue, New York, New York 10021.	Vice Chairman Director.	12.75
Cynthia G. Levine, 1365 York Avenue, New York, New York 10021.	Vice Chairman, Director.	12.75
Steven D. Kravitz, 353 East 83rd Street, New York, New York 10028.	President, Treasurer, and Director.	12.25
Diana T. Ortado, 2686 Ocean Avenue, Brooklyn, New York 11229.	Executive Vice President, Secretary, and Director.	12.25
Jeffery C. Stern, 171 East 84th Street, New York, New York 10028.	Director	6.125
Henry F. Hewes, 1601 Third Avenue, New York, New York 10128	Director	6.125
Pietro Ferrara, 2064 West 6th Street, Brooklyn, New York 11223.	Director	6.125
Gregory G. Brown, 345 East 80th Street, New York, New York 10021.	Director	6.125

The Applicant, a corporation organized under the laws of the State of New York, will begin operations with approximately $2,000,000 of paid-in capital and paid-in surplus to be obtained through a private placement.

The applicant will conduct its activities in the State of New York and will consider investments in businesses in other areas of the United States.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the Applicant under their management including adequate profitability and financial soundness, in accordance with the Act and the SBA Rules and Regulations.

Notice is further given that any person may, no later than 30 days from the date of publication of this Notice, submit written comments on the proposed SBIC to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street NW., Washington, DC 20416.

A copy of this Notice will be published in a newspaper of general circulation in the New York City area.

Maximum Annual Cost of Money to Small Business Concerns; Debenture Rate

13 CFR 107.302 (a) and (b) limit maximum annual Cost of Money (as defined in 13 CFR 107.3) that may be imposed upon a Small Concern in connection with Financing by means of Loans or through the purchase of Debt Securities. The cited regulation incorporates the term "Debenture Rate" which is defined elsewhere in 13 CFR 107.3 in terms that require SBA to publish, from time to time, the rate charged on ten-year debentures sold by Licensees to the public. Notice of this rate will be published upon change in the Debenture Rate.

Accordingly, Licensees are hereby notified that effective the date of publication of this Notice, and until further notice, the Debenture Rate to be used for computation of maximum cost of money pursuant to 13 CFR 107.302 (a) and (b) is 10.35% per annum.

13 CFR 107.302 does not supersede or preempt any applicable law imposing an interest ceiling lower than the ceiling imposed by its own terms. Attention is directed to section 308(i) of the Small Business Investiment Act, as further amended by section 1 of Pub. L. 99–226, December 28, 1985 (99 Stat. 1744), to that law's Federal override of State usury ceilings, and to its forfeiture and penalty provisions.

Dated: September 29, 1987.

BILLING CODE 8025–01–M

UNITED STATES TRADE REPRESENTATIVE

Request for Public Comments in Connection With Presidential Review of Exclusion Order Under Section 337

AGENCY: Office of the United States Trade Representative.

ACTION: Request for public comments on a limited exclusion order issued by the U.S. International Trade Commission (ITC) in *Certain Dynamic Random Access Memories, Components Thereof and Products Containing Same*, Inv. No. 337–TA–242.

SUMMARY: On September 28, 1987, the Commission referred to the President for review its determination in the above-referenced investigation that there is a violation of section 337 of the Tariff Act of 1930, in the unauthorized importation into the United States, and in their sale, of dynamic random access memories (DRAMs) which infringe patents owned by Texas Instruments, Inc. (TI) of Dallas, Texas.

The ITC has issued a limited exclusion order prohibiting the unauthorized entry of infringing DRAMs of 64 and 256 kilobits (and any combination thereof such as 128 kilobits) manufactured by Samsung Co., Ltd., and/or Samsung Semiconductor & Telecommunications Co., Ltd., (Samsung) whether assembled or unassembled. The exclusion order also prohibits the entry, except under license, of the specified DRAMs incorporated into a carrier of any form, including Single-Inline-Packages and Single-Inline-Modules, or assembled onto circuit boards of any configuration including memory expansion boards.

Computers such as mainframe, personal, and small business computers, facsimile machines, telecommunications switching equipment, and printers containing any 64 or 256 kilobit (or any combination thereof such as 128 kilobits) DRAMs manufactured by

Samsung are excluded from entry into the United States except under license from TI.

Finally, the ITC order provides that the U.S. Customs Service may specify procedures to be used by persons seeking to import products identified in the order to certify that importers "have made appropriate inquiry and thereupon state that to the best of their knowledge and belief any DRAMs incorporated into, assembled onto, or contained in such products are not covered by this Order." For example, importers of personal computers must certify that the imported computer does not to the best of their knowledge and belief contain any DRAMs manufactured by Samsung.

Under section 337(g), the President, for policy reasons, may disapprove the ITC's determination within 60 days following receipt of the determination and record. If disapproved by the President, the determination, and any order issued under its authority, would be without force or effect. The President also may approve the ITC's determination rendering the determination and order final on the date that the ITC receives notice of the approval. If the President takes no action to approve or disapprove the determination and order, they become final automatically following the 60-day review period.

Interested parties may submit comments concerning foreign or domestic policy issues that should be considered by the President in making his decision regarding the ITC order. In particular, we invite parties to address the scope and enforceability of the order and the effect of the order on legitimate trade. Parties commenting on domestic policy issues should specifically refer to the portion of the Commission's record related to that issue. If the domestic policy issue was not raised before the Commission, parties should provide a rationale for that omission.

Comments may not exceed 15 letter-sized pages, including attachments. Parties must provide twenty copies of the submission to the Secretary, Trade Policy Staff Committee, Room 521, 600 17th Street, NW., Washington, DC 20506. All submissions must be received by close of business, October 14, 1987.

FOR FURTHER INFORMATION CONTACT: Catherine R. Field, Assistant General Counsel, Office of the U.S. Trade Representative, (202) 395–3432.

Donald M. Phillips,

Chairman, Trade Policy Staff Committee.

BILLING CODE 3190–01–M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Environmental Impact Statement, Philadelphia County, PA

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an Environmental Impact Statement will be prepared for a proposed highway project in Philadelphia County, Pennsylvania.

FOR FURTHER INFORMATION CONTACT:

Philibert A. Ouellet, District Engineer, Federal Highway Administration, 228 Walnut Street, P.O. Box 1086, Harrisburg, Pennsylvania 17108, Telephone: (717) 782–4422,

or

Timothy R. O'Brien, Project Manager, Pennsylvania Department of Transportation, 200 Radnor-Chester Road, St. Davids, Pennsylvania 19087, Telephone: (215) 964–6611.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Pennsylvania Department of Transportation, will prepare an Environmental Impact Statement on a proposal to extend Woodhaven Road (Legislative Route 1029, State Route 0063) from its present terminus at an intersection with Roosevelt Boulevard (Legislative Route 67009, State Route 0001) to an intersection with Philmont Avenue (Legislative Route 198, State Route 2013). The proposed 1.5 mile extension project involves studying a three staged construction: (I) Byberry Road Bridge replacement and relocated Byberry Road; (II) Woodhaven Road from Roosevelt Boulevard to Bustleton Avenue; and (III) Woodhaven Road from Bustleton Avenue to Philmont Avenue. This proposed project will reduce congestion as well as provide better access for the surrounding businesses.

There will be three (3) alternatives studied: (1) No Build; (2) Limited Access Facility; and (3) At-Grade Arterial.

The various alternatives and their impacts to the environment will be assessed in detail as they relate to the areas of air quality, noise pollution, historical and archaeological resources, traffic/transportation/energy, water resources, social and economic considerations, land use, and terrestrial ecology. In addition, the E.I.S. will contain a cost analysis of the various alternatives, preliminary engineering information and documentation of the public and agency consultation and coordination process.

Letters describing the proposed action and soliciting comments will be sent to appropriate Federal, State and Local agencies, and to private organizations and citizens who express interest in the proposal. Scoping meetings are planned with the agencies between October 1987 and December 1987. Public meetings will be held in the project area during the fall of 1987 and spring of 1988. Public notices of the time and place of these meetings, and any required public hearings, will be given. Public involvement and interagency coordination will be maintained throughout the development of the Environmental Impact Statement.

To ensure that the full range of issues related to this proposed action are addressed and that all significant issues are identified, comments or questions concerning this action and the EIS should be directed to the FHWA or PennDOT at the address provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning and Construction. The provisions of Executive Order 12372, Intergovernmental Review of Federal Programs, regarding State and local review of Federal and Federally assisted programs and projects apply to this program.)

Issued on: September 28, 1987.

Manuel A. Marks,

Division Administrator, Harrisburg, Pennsylvania.

COUNCIL ON ENVIRONMENTAL QUALITY

DATE, TIME, PLACE: Thursday, October 22, 1987, 2:00 pm, Council on Environmental Quality Conference Room, First Floor, 722 Jackson Place, NW., Washington, DC 20503.

STATUS: Open.

MATTERS TO BE CONSIDERED: 1. The Council on Environmental Quality has held a series of public meetings on the issues of stratospheric ozone depletion and global warming. The Council has heard and will hear from experts concerning the scientific aspects of the problem and the human health impacts.

At this meeting, the Council will be hearing a presentation by Dr. Alan Teramura, Department of Botany, University of Maryland. Dr. Teramura will address the biological and terrestrial impacts of stratospheric ozone depletion.

The discussion will be limited to Dr. Teramura, the Council, and Council staff. Questions from the public will not be entertained.

2. Other matters may be discussed.

FOR FURTHER INFORMATION CONTACT: Lucinda Low Swartz, Deputy General Counsel, Council on Environmental Quality, 722 Jackson Place, NW., Washington, DC 20503. Telephone: (202) 395–5754.

Date: September 28, 1987.

ENVIRONMENTAL PROTECTION AGENCY

[OPP-30000/55; FRL-3273-1]

Initiation of Special Review; Oxydemeton-Methyl

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of initiation of special review.

SUMMARY: This Notice announces that EPA is initiating a Special Review on all pesticide products containing oxydemeton-methyl (ODM). Oxydemeton-methyl is the common, chemical name for S-[2-(ethylsulfinyl)ethyl] o,o-dimethyl phosphorothioate, an insecticide and acaricide of the organophosphate class, commonly used on alfalfa (seed), citrus, cole crops, cotton, and sugar beets. EPA has concluded that ODM has the potential to adversely affect reproduction and has determined that exposure to ODM may pose risks of concern to applicators and mixers/loaders who use products containing ODM. Accordingly, the Agency has concluded that products containing ODM meet or exceed the criteria for initiation of Special Review set forth in 40 CFR 154.7(a)(2) and that a Special Review of these products is appropriate to determine whether additional regulatory actions are required.

DATE: Comments, evidence to rebut the presumptions in this Notice, and other relevant information must be received on or before January 4, 1987.

ADDRESS: Submit three copies of written comments, bearing the document control number "OPP *30000/55*," by mail to: Information Services Section, Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

In person, bring comments to: Room 236, CM #2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted in any comment concerning this Notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public docket. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. All non-CBI written comments, will be available for public inspection in Room 236 at the Virginia address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Joanna J. Dizikes, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

Office location and telephone number: Room 1006, CM #2 1921 Jefferson Davis Highway, Arlington, VA, (703-557-5096).

SUPPLEMENTARY INFORMATION:

This Notice is organized into the following units. Unit I is a description of the Agency's Special Review process. Unit II sets forth the regulatory history, to date, of pesticide products containing ODM and describes the basis of the Agency's decision to initiate this Special Review. Unit III provides a use profile and solicits benefit information for products containing ODM. Unit IV sets forth the duty to submit information on adverse effects. Unit V describes the public comment opportunity and the procedures for submission of public comments to the Agency. Unit VI describes the contents of the public docket for this Notice. Unit VII lists the references in support of this action.

During the Special Review, EPA will carefully examine the risks and benefits of using pesticides containing ODM as compared to the risks from alternative pesticides and will determine whether such uses should be cancelled or otherwise regulated. The documents cited as references to Unit VII of this Notice constitute the technical documents in support of this action.

I. Background

A. Special Review Process

This Special Review process provides a mechanism to permit public participation in EPA's deliberations prior to issuance of any Notice of Final Determination describing the regulatory action which the Administrator has selected. The Special Review process is described in 40 CFR Part 154, published in the **Federal Register** of November 27, 1985 (50 FR 49015). During the Special Review process the Agency: (1) Announces and describes the basis for the Agency's finding that use of the pesticide meets one or more of the risk criteria set forth in § 154.7; (2) establishes a public docket; (3) solicits comments from the public regarding whether the use of a pesticide product, as currently registered or as it is proposed to be registered, satisfies any of the risk criteria for initiation of Special Review set forth at 40 CFR 154.7, whether any risks posed by the use of proposed use of the product that satisfy the risk criteria at 40 CFR 154.7 are unreasonable, taking into account the economic, social, and environmental costs and benefits of the use of the product, and what regulatory action, if any, the Agency should take with respect to the use of the product; and (4) solicits comment from the Secretary of Agriculture and the Scientific Advisory Panel if the Administrator proposes to cancel, deny, or change the classification of the registration of a pesticide product which is the subject of Special Review, or to hold a hearing under FIFRA section 6(b)(2) on whether to take any of those actions. Issuance of this Notice means that potential adverse effects, associated with the use of pesticide products containing ODM, have been identified and will be examined further to determine their extent and whether, when considered together with the benefits of these pesticides, such risks are unreasonable.

B. Legal Standard and Description

A pesticide product may be sold or distributed in the United States only if it is registered or exempt from registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (7 U.S.C. 136 *et seq.*). Before a product can be registered it must be shown that it can be used without "unreasonable adverse effects on the environment" [FIFRA section 3(c)(5)], that is, without causing "any unreasonable risk to man or the environment, taking into account the economic, social, and environmental costs and benefits of the use of the pesticide" [FIFRA section 2(bb)]. The burden of proving that a pesticide meets this standard for registration is, at all times, on the proponent of initial or continued registration. If at any time the Agency determines that a pesticide no longer meets this standard, the Administrator may cancel this registration under section 6 of FIFRA.

C. Preliminary Notification

Prior to the public announcement of initiation of a Special Review, pursuant to 40 CFR 154.21, registrants of the affected pesticide are given preliminary notification that the Agency is considering initiating a Special Review. Registrants are given 30 days to respond in writing to dispute the validity of the Agency's conclusions or to present any information in response to the Agency's

risk concerns included in this notification.

Registrants of pesticide products containing ODM were notified by letter, dated July 21, 1987, under 40 CFR 154.21(a), that the Agency was considering initiation of a Special Review on these pesticides (Ref. 1).

II. Determination to Initiate a Special Review

A. Regulatory Background of ODM Pesticides

ODM was first registered by Mobay Chemical Corporation in 1961 under the trade name of Metasystox-R. There are 30 registrants of products containing ODM, either as a sole active ingredient or in combination with other chemicals. Currently, there are approximately 38 federally registered products.

1. *Data Call-In Requirements.*

The Agency has issued five Data Call-In (DCI) Notices on ODM. The first notice was issued in July 1984 to Mobay and Aceto Chemical Company, Inc. and required additional information on existing rat and rabbit teratology and rat reproduction studies (Ref. 2). In response, the Agency received the additional information from Mobay.

The second DCI Notice was issued in February 1985 and required reentry data (Ref. 3). Prior to 1985, a 48-hour reentry interval had been imposed for ODM use, under 40 CFR 170.3(b). Reentry data have been required to determine whether a 48-hour reentry interval is adequate. A protocol for gathering new reentry data has been submitted to the Agency and approved. The reentry data are due in December 1987.

The third DCI Notice, dated April 1986, was sent to Mobay and Aceto. That DCI Notice required exposure data to assess potential exposure to mixers, loaders, and applicators from current, registered ornamental (non-injection) uses (Ref. 4). In that DCI, the Agency also required most of the section 158 data requirements for product, residue, and environmental chemistry, and ecological effects. Mutagenicity and dermal penetration data were also required. In response to the DCI, Mobay chose to delete the ornamental uses from its registrations and conduct the rest of the studies. These data are due from January 1987 (acute LC_{50} fresh water invertebrates, submitted) to June 1990. Subsequently, Aceto's ODM registrations were suspended for failure to comply to the DCI.

A dominant lethal mutagenicity test which had been required through the April 1986 DCI Notice was due in April 1987. Mobay did not submit the required data, and on May 26, 1987, the Agency issued a Notice of Intent To Suspend for non-compliance with the requirements presented in the April 1986 DCI Notice (Ref. 5). Mobay requested a hearing on the suspension notice (Ref. 6). At the time of preparation of this document, the hearing had been stayed, pending settlement negotiations between Mobay and EPA.

The fourth DCI Notice, dated September 1986, was sent to all end-use registrants other than Mobay, requiring the exposure data for ornamental uses (Ref. 7). No end-use registrants have agreed to submit the exposure data. All end-use registrants have either voluntarily cancelled their registrations for non-injection ornamental uses or have allowed them to be suspended for not responding to the DCI Notice.

The fifth DCI Notice, dated June 1987, was sent to all ODM registrants (Ref. 8). Two animal studies on toxicity to the male reproductive system were required by that DCI Notice, one using short-term (acute) dosing and the other using longterm (chronic) dosing. According to that DCI Notice, these data are due October 1988 and December 1987 or October 1988,[1] respectively.

2. Interim Risk Reduction Measures

The Agency is issuing a Registration Standard for all pesticide products containing ODM concurrent with this Notice (Ref. 15). In that Registration Standard, the Agency is announcing that in order to comply with the statutory standard for registration all ODM labels must contain language requiring, among other things, the use of maximum, full body protective methods and that all products containing ODM must be classified for Restricted Use. ODM is being classified for Restricted Use to provide greater assurance that the required label language to mitigate risks is followed. Under the Registration Standard, all ODM product labels must be amended by April 15, 1988, to incorporate these risk reduction measures in order for the registrations to be in compliance with the statutory standard.

3. Regulatory Action by the State of California

A. two-generation reproduction study was submitted by the Agency in December 1985 (Ref. 9). In the Spring of 1986, the California Department of Food and Agriculture (CDFA) notified EPA of its concerns and that it was considering taking further regulatory action on ODM. EPA has questions regarding that reproduction study, and decided not to take any action at that time. (Afterwards, the Agency's questions were resolved, and the study was upgraded to Core Minimum Data in December 1986; see the discussion in Unit II. B. of this Notice.)

CDFA then took action to regulate ODM in the State of California (Ref. 10). On December 16, 1986, CDFA imposed a number of restrictions on the agricultural uses of ODM, and on December 23, 1986, CDFA suspended all home use products. Restrictions imposed by CDFA for the agricultural uses include: (a) Use only pursuant to a use permit; (b) use only by licensed pest control operators; (c) closed systems; (d) full body protection; (e) enclosed vehicles required for flaggers or, if outside an enclosed vehicle, must have full body protection; (f) no aerial application within 100 ft of flaggers; (g) no greenhouse use; (h) required distribution of an information document to users; and (i) requirements for cleaning or discarding protective equipment.

In addition, CDFA required Mobay to develop four additional studies. These studies and the dates they are due to be submitted to CDFA are: (i) A male rat reproductive system toxicity study,[2] due December 1987 (Ref. 11); (ii) a repeat two-generation rat reproduction study, due Fall 1988 (Ref. 12); (iii) a comparison between oral and dermal cholinesterase dose responses, due December 1987 (Ref. 13); and (iv) a monkey dermal absorption study, due September 1987 (Ref. 14).

The risk reduction measures included in EPA's Registration Standard are similar to those imposed by California, and the classification of ODM as a Restricted Use pesticide will make ODM products unavailable for home use by applicators who have not received training in the proper handling of pesticides.

B. Initiation of Special Review on ODM Pesticides

Based on a review and evaluation of the available data, the Agency is initiating a Special Review on all uses of pesticide products containing ODM, primarily based on concerns regarding reproductive effects. The Agency has

[1] The male reproductive system toxicity study was already being conducted by Mobay for CDFA when the Agency required that study in its June 1987 DCI Notice. If that on-going study is used to fulfill the requirement, the final report must be submitted to the Agency by December 1987. If a new study is undertaken, the final report must be submitted to the Agency by October 1988.

[2] This long-term dosing study can be used to fulfill the requirement imposed by the Agency in its June 1987 Data Call-In Notice.

determined that exposure to ODM may result in adverse reproductive effects in humans, and that these effects are of concern because of the potential exposures to applicators, mixers, loaders, and fieldworkers, resulting from the use of products containing ODM.

The Agency believes that currently registered uses of ODM may result in human exposure at levels equating to risks that meet or exceed the criteria for initiation of Special Review set forth in 40 CFR 154.7(a)(2). That criterion states, in part, that "The Administrator may conduct a Special Review of a pesticide use if he determines, based on a validated test or other significant evidence, that the use of the pesticide * * * may pose a risk of inducing in humans * * * heritable genetic, * * * fetotoxic, reproductive effect, or a chronic or delayed toxic effect, which risk is of concern in terms of either the degree of risk to individual humans or the number of humans at some risk * * *."

1. Toxicity—a. Reproductive Effects

The Agency reviewed data primarily from two studies that raised substantial concerns regarding potential reproductive effects resulting from exposure to ODM. The data, submitted by Mobay Chemical Corporation, include the two-generation rat reproduction study, received in December 1985 and later classified by the Agency as Core Minimum (Ref. 9), and interim progress reports of the on-going male rat reproductive toxicity study originally required by CDFA (Ref. 11). The observed effects include decreases in the female fertility index, testicular weight, litter size, pup weight, and pup survivability. Also, histopathologic changes in the epididymis and alterations in sperm morphology and motility have been found.

i. *Two-Generation Reproduction Study (Ref. 9).* In this two-generation (2 litters in each generation) reproduction study, rats were fed with 0, 1, 10, or 50 parts per million (ppm) of ODM in the diet. At the 50 ppm dosage level, decreases were noted in parental body weight, fertility index, litter size, parental testis weights, and pup weight, as well as increased pup mortality. Further, vacuolization of the epithelial cells in the corpus area of the epididymis was noted in 10/10 males examined.

At the 10 ppm dosage level, decreased parental body weights and testis weight, and increased pup mortality were demostrated. Vacuolization of the epithelial cells in the corpus area of the epididymis were observed in 1/10 males exmained.

At the 1 ppm dosage level, no effects or fertility, pup body weight, and pup survivability were found. A significant decrease in absolute testis weight was noted in F_1 parental animals. The biological significance of that finding is not known because the testis weight in this group was higher than that of the historical control range and approximated that of the F_0 parental control group. Histopathologic changes of the epididymis were not found.

Based upon these findings, a reproductive no-observed-effect-level (NOEL) was established at 1 ppm, and the lowest-observed-effect-level (LOEL) was established at 10 ppm. However, after 2 days in the diet, approximately 20 percent of the ODM degraded; therefore, the NOEL and LOEL may be somewhat lower.

ii. *Male Reproductive System Toxicity Study (Ref. 11).* Mobay has submitted three of four progress reports on the male reproductive system toxicity study (male fertility study) in rats exposed to 3, 9, and 50 ppm of ODM in the diet. The Agency has reviewed three reports (exposure to ODM for 2, 4, and 6 months.

In the 2-month interim report, vacuolization of the epididymis was reported in 10/10 males exposed to 50 ppm of ODM in the diet. After 4 months of exposure, vacuolization of the epididymis was still evident in all animals of the 50 ppm dose group with a higher grading of severity. Further, 5/9 animals in the 9 ppm group were described with minimal or slight vacuolization in the body of the epididymis after being treated for 4 months. Some animals in the 50 ppm dose group were put on the control diet after being treated for 4 months. In that recovery group, vacuolization was still present in all animals, but the investigators reported that "the severity of the vacuolization was decreased in the mid and distal portion of the body of the epididymis".

After being exposed to ODM in the diet for 2 months, male rats in all dosage groups showed significant increases in the percent of sperm with bent flagella. Significant differences were not found after 4 months, but a higher incidence was still evident in the 3 ppm, 9 ppm, and recovery group.

Vacuolization of the corpus epididymis was previously observed in the two-generation rat reproduction study (Ref. 9), affecting 1/10 and 10/10 animals fed with 10 and 50 ppm, respectively. The same finding was observed in the male reproductive study at the 2-month interval and affecting 10/10 animals in the 50 ppm group. After 4 months of exposure, there was an increase in the severity of the vacuolization in all 50 ppm males. Further, vacuolization was also observed in 5/9 males in the 9 ppm group. These findings confirmed that vacuolization of the epididymis was compound-related and the severity of the lesion was a function of the length of exposure. In the recovery group, vacuolization was still evident in all animals. The latter suggested that, at least at the 50 ppm dosage level, the epididymal lesion induced by ODM did not reverse completely after 2 weeks of recovery.

The 6-month progress report also confirmed that vacuolization of the corpus epididymis was treatment-related. The severity of the lesion may be a function of the length of exposure, as evidenced by the presence of unilateral or bilateral fine vacuolization in the epididymal head observed in 7/9 animals in the 50 ppm dose group. One animal in the 9 ppm dose group had epididymal lesion after 6 months of exposure to ODM, a finding similar to that found in the 50 ppm dose group. The 6-month recovery group (aninmals treated with ODM for 4 months at 50 ppm, followed by 2 months on the control diet) still exhibited lesions in the proximal epididymes. Thus, complete reversibility of the epididymal lesions has not been demonstrated in any of the recovery groups (4 and 6-months interim reports).

iii. *Response to the preliminary notification (Ref. 19).* The only comments received by the Agency in response to its preliminary notification of possible Special Review action, were from Mobay Chemical Corporation, presently the sole manufacturer in the United States. Mobay indicated that, based on a new, ongoing, two generation rat reproduction study, the NOEL should be 9 ppm, instead of 1 ppm. [The NOEL of 1 ppm was previously established by the Agency, based on the two-generation rat reproduction study (Core Minimum) completed in 1985, Ref. 9.] The decision to establish a new NOEL, however, must await the completion of this two-generation rat reproduction study currently in progress. Moreover, histopathologic changes in the epididymis, which were found at 10 and 50 ppm in the 1985 two-generation study, have been confirmed at 9 and 50 ppm by interim results from the ongoing, male rat reproductive system toxicity study (Ref. 11).

b. Other Toxicological Effects of Concern—i. Oncogenicity and Mutagenicity

The submitted oncogenicity data are inadequate and preclude assessment of the oncogenic potential of ODM. However, the possible mutagenic potential of ODM may contribute to the observed reproductive effects because there may be a relationship between mutagenicity and adverse reproductive effects. The Agency emphasizes that the potential for mutagenesis in the male reproductive system to produce reproductive effects may range from reduced normal sperm production to paternally-mediated effects on offspring. A positive mutagenic effect of ODM has been demonstrated in gene mutation assays; sufficient data are available to indicate that ODM produces a dose-dependent increase in mutation frequency in Salmonella in the presence and absence of metabolic activation. In the mouse lymphoma forward mutation assay, a concentration-dependent increase in mutation frequency is also observed in both the presence and absence of metabolic activation. The effects of ODM on chromosomal aberration and DNA damage are inconclusive.

ii. *Toxicity and poisoning incidents.* ODM is a potent cholinesterase inhibitor. The effects of ODM on human cholinesterase activity were investigated by the University of Kansas (Ref. 16). Human volunteers were exposed to either a single, oral dose or repeated oral doses for 60 days. The dosage levels for the single oral dose ranged from 0.0125 to 1.5 mg/kg (one volunteer per dose level), and the dosage levels for repeated exposure were from 0.05 to 0.4 mg/kg (one volunteer per dose level).

Single, oral doses of ODM up to and including 0.5 mg/kg did not produce any change in either the plasma or red blood cell (RBC) cholinesterase activity. At 1.0 and 1.5 mg/kg, plasma and RBC cholinesterase activities were decreased.

Oral administration of a dosage level of 0.05 mg/kg/day for up to 60 days were without noticeable effects on human blood cholinesterase activities. Inhibition of plasma and RBC cholinesterase activities were found in individuals administered any dose higher than 0.05 mg/kg/day.

In humans, the cholinesterase NOEL's after single and repeated oral administration were established at 0.5 mg/kg/day and 0.05 mg/kg/day, respectively.

In a 90-day feeding study in rats, the cholinesterase and systemic NOELs were found to be 1 ppm (0.05 mg/kg/day) (Ref. 17). Administration of 10 ppm (0.5 mg/kg/day) in the diet resulted in a significant decrease in the mean corpuscular volume (females) and a significant increased incidence of histopathologic changes in the lungs of males. At the 100 ppm dosage level, significant alterations in hemnatology, clinical chemistry parameters, absolute and relative organ weights, as well as histopathologic changes in the lungs of both males and females were found. Plasma, erythrocyte, and brain cholinesterase activities were significantly and biologically decreased at the 10 and 100 ppm dosage levels.

The Pesticide Incident Monitoring System (PIMS) files show 67 incident reports involving ODM from 1966 to August 1978, the period for which records are available (Ref 18). The effects include fifteen reports that cite the involvement of ODM alone. Fifty-two reports cite ODM in combination with other pesticides.

Based on data obtained from California, the only State which enforces mandatory reporting of occupational pesticide incidents, 14 illnesses involving ODM were reported for the period 1981 through 1985. During that time, physicians treated an average of 1.8 ODM poisonings per year, and an additional one case per year was reported from either skin or eye injury. Of these 14 illnesses, 7 occurred to applicators, 3 were from exposure to residues or drift, 2 occurred to mixer/loaders, and 2 were from "other causes." In addition, between 1981 and 1985 four people were reported hospitalized for occupational ODM poisoning for a total of 10 days, and 11 workers were off work for a total of 54 days. No accidental deaths from ODM were reported in California from 1965 to 1977 or from 1981 to 1985 when all accidental deaths from pesticides were reported.

2. Worker Exposure—a. Surrogate Data

The Agency estimated the exposure to individuals using ODM with various application equipment. These estimates were based on surrogate exposure data where "normal" work attire was worn (short or long sleeved shirt and long pants) and the only protective clothes/equipment used were protective gloves during mixing and loading. However, it should be noted that the Registration Standard now being issued lists as a requirement for compliance with the statutory standard the use of full body protective clothing. ODM labels have not, up to now, required specific protective clothing or equipment to be worn. Currently, the labels only require "appropriate" protective clothing for early reentry.

Using that surrogate exposure data, daily dermal exposure estimates are highest for combined mixing, loading, and applying ODM by airblast to citrus 2.6 mg/kg/day. It was assumed that ODM is applied to citrus for 8.5 hours/day, one application/year over 2 consecutive days.

Ground boom applications to representative vegetable, field crops, and grapes result in generally the same estimated daily exposures, about 0.5 to 2.0 mg/kg/day, when the surrogate exposure data are used. For these calculations, it was assumed that ODM is applied to:

i. Broccoli and cauliflower for 6.7 hours/day, one day/application, usually two applications/yr.

ii. Cabbage for 3.7 hours/day, one application/yr. for one day outside CA (average of 2 applications/yr. in CA).

iii. Sugar beets for 8 hours/day, one day/application, usually two applications/yr.

iv. Grapes for 6.2 hours/day, one day/application, usually two applications/yr

v. Cotton for 6.6 hours/day, four days/application, usually two applications/yr (i.e. 8 days/yr.).

For those crops where an average of two applications are made per year, the label permits these applications to occur as necessary or in some cases the intervals are specified as 10 to 14 days apart; however, these applications may occur at greater intervals.

Exposure estimates for pilots from aerial application to some of these same representative crops are lower, about 0.02 to 0.09 mg/kg/day (assuming approx. 2 to 2.3 hours/day, two applications/yr.).

The ornamental uses may result in exposure estimates from about 0.04 to 0.6 mg/kg/day (commercial: 1 hour/day, 2 applications/yr., 1 day/application; domestic: 10 to 30 min./day, six applications/yr.).

b. ODM-Specific Data.

The CDFA (California Department of Food and Agriculture) provided the Agency with exposure estimates, specific for use of ODM in California on cole crops (broccoli, cauliflower, cabbage, and Brussels sprouts) (Ref. 18). CDFA has conducted an exposure study to determine the effectiveness of the measures taken independently by California to regulate ODM [requiring the use of full body protection ("rainsuits") and closed mixing/loading systems]. According to CDFA, these measures may result in dermal exposure of 1 to 2 mg per tractor driver per seven-

hour shift, for treatment to cole crops. However, these dermal exposure estimates may apply only to California because the climate in the ODM use areas of California is conducive to such protective measures, and California has a more comprehensive surveillance program, compared to other states.

Although most users are probably exposed to ODM a few days per year, CDFA cites that in California, professional applicators may perform repeated applications of ODM. Therefore, those users could have very frequent exposures to ODM.

3. Dietary Exposure

There are 38 tolerances for ODM, ranging from 0.01 to 12.5 ppm, as shown in the following Table 1:

TABLE 1.—TOLERANCES FOR OXYDEMETON-METHYL

Crop	Tolerance (ppm)
Apples	1.00
Apricots	0.50
Beans, lima	0.50
Beans, snap	0.50
Blackberries	2.00
Broccoli	1.00
Brussels sprouts	1.00
Cabbage, sauerkraut	1.00
Cauliflower	1.00
Corn, all types	0.50
Cottonseed (oil)	0.10
Cucumbers, including pickles	1.00
Filberts	0.05
Grapefruit	1.00
Grapes, including raisins	0.10
Lemons	1.00
Lettuce	2.00
Meat, red	0.01
Melons	0.30
Milk and dairy products	0.01
Onions, dry bulb	0.05
Oranges	1.00
Pears	0.30
Peas	0.30
Peppers	0.75
Plums, including prunes	1.00
Potatoes	0.10
Pumpkin, including squash	0.30
Raspberries	2.00
Safflower	1.00
Sorghum	0.75
Strawberries	2.00
Sugar, cane and beet	0.30
Summer squash	1.00
Turnips	0.30
Turnip greens	2.00
Walnuts	0.30
Mint	12.50

A comparison of published tolerances to the Reference Dose (RfD) was conducted using the TAS Routine Chronic Analysis. Based on a reproductive NOEL of 1 ppm (0.05 mg/kg/day), from the rat two-generation reproduction study, the RfD is calculated to be 0.0005 mg/kg/day with a safety factor of 100. The Theoretical Maximum Residue Contribution (TMRC) for the U.S. population is 0.005 mg/kg/day. Therefore, existing published tolerances occupy 1010 percent of the RfD. The majority of the TMRC was contributed by fresh apples and juice, orange juice, stone fruits, cereal grains, legume vegetables, and milk.

Because the TMRC was calculated on the basis of tolerance levels, the exposure estimates provided by the TMRC may greatly overestimate dietary exposure. Data reflecting actual residues may result in a lower estimate of dietary exposure.

Furthermore, the residue data submitted to support the tolerances may not reflect registered use. For apples, apricots, grapes, and plums, ODM is registered for use only on trees that will not bear fruit within the following 12 months. However, residue data submitted to support the tolerance for apples does not reflect that restriction on use. Therefore, the residue data used for apples, a great contributor to the TMRC, does not reflect the fact that ODM is not used on apples in a way that would result in such high residues. (Tolerance data are insufficient for apricots and plums/prunes.) Data are not available on any carryover of residues in trees to its fruit.

In addition, the percentage of the commodity that is treated is not factored into the TMRC, and the effect of processing on residues is not considered. Processing may further reduce estimated residue levels.

Actual crop residue data and processing studies for potatoes, sugar beets, grapes, corn, and cottonseed are required to be submitted by April 1988. Also, metabolism studies in plants, ruminants, and poultry are required (due October 1987).

4. Mixer/Loader and Applicator Risks

Margins-of-safety (MOSs) were calculated for worker exposure using both the Agency's surrogate exposure estimates and the ODM exposure estimates given to the Agency by CDFA. All MOSs resulting from both the surrogate exposure data and the ODM exposure data assume a reproductive effects NOEL = 0.05 mg/kg/day, a 70 kg person, and 50 percent dermal absorption. (Dermal absorption data indicate that absorption of ODM is approximately 50 percent.)

The surrogate exposure data were used to calculate MOSs two different ways under the following Table 2:

TABLE 2.—WORKER DERMAL EXPOSURE TO ODM AND MARGIN-OF-SAFETY (MOS) [1] USING BOTH DAILY SURROGATE EXPOSURE ESTIMATES AND AVERAGING SURROGATE EXPOSURE ESTIMATES OVER A YEAR

Method of application	Crop	Daily exposure [2] (mg/kg/day)	MOS [3]	Ave. exposure [2] (mg/kg/day)	MOS [4]

[1] All MOS reflect the NOEL=0.05 mg/kg/day for reproductive effects and a dermal absorption rate of approximately 50 percent (These MOSs might increase, roughly 10-fold, if maximum, full body protective clothing and/or equipment could be used.)

[2] All surrogate exposure estimates assume the use of protective gloves only during mixing/loading (normal work attire) and, approximately, a 70 kg body weight.

[3] These MOSs were calculated by comparing the exposure from a single day to the NOEL.

[4] These MOSs were calculated by comparing the average daily exposure over a year to the NOEL.

[5] Daily exposures from aerial applications to broccoli, cauliflower, and cotton were combined and averaged over a year, and that number was compared to the NOEL to give the resulting MOSs.

Daily exposure, expressed as mean or range, was compared directly to the NOEL (in mg/kg/day) observed in the two-generation rat reproduction study to derive MOSs, and average exposure was calculated by multiplying daily exposure by the number of days per year of use and then dividing that number by 365. This number was then compared to the NOEL from the two-generation rat reproduction study to calculate the MOSs. The MOSs given in Table 2 might increase, roughly 10-fold, if maximum, full body protective clothing and/or equipment is used to reduce exposure.

Two methods for calculating MOSs were used because the two-generation rat reproduction study (from which the NOEL=0.05 mg/kg/day was derived) used a longer term dosing regimen, and ODM is applied only a few times per year in the majority of cases. Therefore, most users of ODM have acute, not chronic, exposures. As a result, the MOSs given in Tables 2 and 3 for daily exposures (which result when the daily exposure is compared directly to the NOEL) may overestimate risks for acute exposures. However, the MOSs which result when exposure is averaged over a year do not necessarily represent the MOSs that might result from actual studies of short-term exposure. Both sets of MOSs are presented here in order to give a general picture of the uncertainty involved in comparing short-term exposures to results of longer term studies. The Agency recognizes that neither set of MOSs may actually represent the risks being encountered by mixers, loaders, and applicators.

At this time, the Agency does not have appropriate data to characterize the risks associates with short-term exposure. In its June 1987 DCI Notice, the Agency required a study to be generated and submitted to the Agency which is designed to evaluate the toxic effects resulting from short-term exposure to ODM. That study is required to be submitted to the Agency by October 1988.

As cited in Unit II. A. 2. of this Notice, the ODM Registration Standard states that in order for a product to comply with the statutory standard for registerability, its label must require that maximum, full body protective methods be employed when using ODM. Use of such methods may reduce risks up to 10-fold. Adoption of these measures is prudent given the potentially low MOSs which may be inherent in the use of this chemical. These measures provide the maximum practical amount of protection while information addressing the uncertainties in the risk characterization is being developed. Analysis following receipt of the additional required data may indicate that the MOSs resulting from the adoption of these risk reduction measures are acceptable and that no further regulatory action is warranted. However, because data needed to refine the risk assessment are currently being developed, the Agency may not be able to issue a preliminary regulatory decision on ODM before June 1989.

The Agency is concerned that multiple exposures to ODM do occur to some mixers/loaders/applicators, as has been reported to occur in California. However, the Agency needs more definitive information on the length of time each day and the number of days per year that mixers/loaders/applicators are exposed. Assuming the exposure is best modelled by chronic toxicity studies, the MOSs given in the first column (daily exposure) of Table 2 and those shown in Table 3 may best reflect the risks posed to these applicators.

VOL 52 ISS 192 OCT 5 1987 UMI

TABLE 3.—WORKER DERMAL EXPOSURE TO ODM AND MARGIN-OF-SAFETY (MOS) [1] USING ODM-SPECIFIC EXPOSURE ESTIMATES FROM CALIFORNIA FOR APPLICATION TO COLE CROPS

Method of Application	Crop	Daily exposure [2] mg/kg/day	MOS [3]
Ground Boom—Mixer/Loader Applicator	Cole crops	0.014 to .028	4–8

[1] MOSs reflect the NOEL=0.05 mg/kg/day for reproductive effects and a dermal absorption rate of 50 percent.
[2] Assuming CDFA's dermal exposure estimate of 1 to 2 mg/tractor driver/seven-hour shift, resulting from those restrictions which are currently required by California (maximum, full body protection, including closed loading systems), and a 70 kg body weight, daily exposure would be 0.014 to 0.028 mg/kg/day.
[3] MOSs were calculated by comparing the exposure from a single day to the NOEL.

The Agency is seeking better information on these exposure patterns in order to better characterize the risks to this group of workers.

Potential reversibility of the reproductive effects is an issue in assessing the risk from toxic effects of ODM. Pertinent aspects include whether or not the effects observed are fully reversible and the time required for complete reversal of effects.

Reversibility of effects on the male reproductive system depends on whether the affected cell type(s) are replaceable. Effects on spermatogenesis or epididymal function may be reversible, but damage to spermatogonial stem cells or Sertoli cells may prolong or preclude recovery. Also, with a mutagenic agent, a paternally-mediated effect on offspring is possible. Demonstration of full reversibility should not be a factor with longer-term exposures or with intermittent exposures when the interval between exposures is insufficient for full recovery.

The question of whether any adverse effects to the male reproductive system are reversible may be answered when the completed male reproductive system toxicity study (male fertility study, Ref. 11) is submitted. That study is also required through the June 1987 DCI Notice, and it is due to be submitted to the Agency by either December 1987 or October 1988. (The male reproductive system toxicity study was already being conducted by Mobay for CDFA when the Agency required that study in its June 1987 DCI Notice. If that on-going study is used to fulfill the requirement, the final report must be submitted to the Agency by December 1987. If a new study is undertaken, the final report must be submitted to the Agency by October 1988.)

III. Use Profile and Benefits Information

The benefits which may result from the use of a pesticide are not considered when the Agency is determining whether to initiate a Special Review on a pesticide. The criteria for initiating a Special Review, set forth in 40 CFR 154.7, are based on the determination of possible risk to health and/or the environment, resulting from the use of a pesticide. However, in the Special Review, the Agency conducts a thorough assessment of both risks and benefits. The following use profile was prepared for ODM pesticides to aid the Agency in conducting any necessary benefits analysis and to give commenters an overview of the ODM use patterns under review.

A. Use Profile of ODM Pesticides

Approximately two-thirds of all the ODM used in the United States, about 165,500 lbs. active ingredient (a.i.), were used in California in 1985 (the first year that reporting was mandatory), and about 132,000 lbs. a.i. were used in California in 1984. CDFA reported that ODM was applied to 46 crops in California in 1984. Major uses of ODM in California are on broccoli, cauliflower, and sugar beets. Outside California, the major uses include cotton, citrus, and alfalfa (seed crop). The following Table 4 shows the estimated acre treatments in the United States by site in 1984, both in California and outside California.

TABLE 4.—ESTIMATED ACRES TREATED BY CROP WITH OXYDEMETON-METHYL IN CALIFORNIA AND ALL OTHER STATES (1984)

Site	Acre treatments
	California (1984)
Alfalfa	906
Apples	615
Beans	4,509
Beets	474

Strawberries	2,429
Sugar beets	21,813
Turf	4,343
Walnut	1,167
Watermelons	5,616
Other	NA
Total California	277,835
All other states (1984)	
Sorghum	5,000–8,000
Corn	5,000–10,000
Cotton	10,000–12,000
Alfalfa	5,000–10,000
Sugar beets	2,000–4,000
Citrus	10,000–25,000
Ornamentals	NA
Tree fruits	2,000–4,000
Nuts	2,000–4,000
Strawberries	2,000–4,000
Assorted vegetables	2,000
Home & Garden	NA
	45,000–83,000
Grand total of acre treatments in the U.S.	322,835–360,835

The Agency briefly reviewed the seven major agricultural crops treated with ODM: Broccoli, cauliflower; Brussels sprouts; cabbage, sugar beets;

grapes; and cottom. The percentage of the crop treated was calculated for these seven crops and for the commodities which contribute the most to the TMRC. (See Unit II.B.3 of this Notice.) That information is presented in the following Table 5:

TABLE 5.—SELECTED CROP SITES TREATED WITH OXYDEMETON-METHYL (1983/1984)

	lb ai	Acre treatments	Number of application	Acres treated	Acres grown	Percent crop treated
Broccoli:						
CA	34,826	69,698	2(1–3)	34,849	95,700	36

Apples—Information not available.						
Sugarcane—Not Registered.						

[1] 1982 Census data of acreage grown.

NOTE (1): Numbers in ( ) indicate ranges.

NOTE (2): The symbol .... indicates that the information is not available.

The figures given in Tables 4 and 5 reflect usage prior to 1985 and, therefore, do not reflect effects from any regulatory actions that have been taken on ODM since then.

For broccoli, Brussels sprouts, cabbage, and cauliflower, ODM is registered to control aphids. For all four crops, state recommendations included multiple alternative insecticides, including mevinphos (an alternative which is more acutely toxic than ODM). These four crops require extensive hand labor.

Of the fourteen major cotton producing states, only one, Arizona, lists ODM for use on cotton for aphid control. Arizona also lists five alternative insecticides.

Seven states produce 99 percent of the grape harvest. ODM is registered to control aphids and mites on grapes with a one year pre-harvest interval. None of these seven states recommends ODM use on grapes.

ODM is registered for aphid, leafhopper, and mite control on sugarbeets. Eight states produce 97 percent of the Nation's sugarbeets. Three states make no recommendations for the control of aphids, leafhoppers, or mites. Of those states which recommend a pesticide to control aphids and

leafhoppers on sugarbeets, ODM is recommended most frequently, followed by the alternatives phorate, aldicarb, parathion, diazinon, carbaryl, and naled (in descending order of frequency). None of the states recommends ODM for mite control.

B. Benefits/Use Information

The Agency is soliciting the information described below to support its assessment of the benefits of ODM and the economic impact of regulatory action on ODM. The Agency also encourages the submission of benefits data on all registered agricultural and non-agricultural uses. However, the Agency especially encourages the submission of benefits data on those selected crop sites presented in Table 5. In the absence of benefits information for a use site, the Agency may conclude that the benefits are negligible for that site.

The user community, other government agencies, and the interested public are encouraged to submit data to support any benefits claims on all registered uses. Persons who desire to submit benefits information should provide any or all of the following kinds of information for each use addressed, along with any other information they believe relevant and desire to include.

1. Repeated Annual Use Information

The Agency is particularly soliciting any information regarding the repeated use of ODM (i.e. users who may use ODM more than a few days a year, either on a single crop or multiple crops). The following data should be included for each applicator: (a) The range of days and average number of days per year spraying ODM (include mixing and loading time); (b) the range of days and average number of days per year applying ODM; and (c) the largest, smallest, and average interval between applications of ODM.

2. Comparative Efficacy Reports

The Agency is requesting all relevant field test results comparing ODM with possible chemical and nonchemical alternatives at recommended or reduced dosage rates and methods of application or implementation. All data will be accepted. However, field tests, in order to be useful, should preferably not be over ten years old and include:

a. In the case of agricultural uses, data relating to evaluation of pest population reduction, reduction of damage or injury, and impact on yield and/or quality (using current agricultural practices, plot designs, and statistical analyses) that compare ODM with possible alternatives.

b. Growing conditions and other pertinent factors that impact on the results of agricultural use.

c. Data on nontarget organisms (e.g., predators, parasites, pathogens, etc., including introduced or endemic species) that are affected by ODM and other pesticides or pest management programs being tested (e.g., integrated pest management data [IPM]).

d. Information on the development of resistance by target pests to ODM or its alternatives.

e. Information of the pest spectrum controlled by ODM and its alternatives, including identification of primary and secondary pests. Also, information is needed on pest biology, ecology, and relationship to crop development and relationship to the spray schedule, as well as information on survey and detection methods and economic threshold.

f. Data on methods and equipment used for pesticide application.

3. Pesticide Profile and Economics Information

The Agency is requesting additional information concerning pesticide use practices, including the following:

a. Data on pesticide or pest management program characteristics that determine the choice of pesticides or other control strategies including their restrictions, limitations, and benefits in agricultural and industrial uses.

b. Pest management programs currently used by growers (or other users) and any other research programs which could modify pest management practices within the next several years.

c. For each use site addressed, discuss representative use patterns of ODM and any alternatives, preferably by target pest(s). Relate this to the particular use pattern or site in terms of acres treated, number of applications per season, formulations, pounds of active ingredient (quantities expressed by State or region are preferable to national totals). Indicate application intervals and any State re-entry intervals which differ from the label.

d. Actual application rate(s) (individual amount or a range where appropriate) in terms of active ingredient per acre or unit in agricultural or industrial uses.

e. Retail cost of ODM and alternatives in terms of dollars per pound of active ingredient or dollars per unit of formulated product.

f. Economic profile of current users of ODM and of "downstream" processors potentially affected by price or supply shifts of the crop or manufactured product or commodity in question.

g. Enterprise or crop budget data (costs and returns) for the typical user.

h. Price elasticity of demand (raw commodity and at the retail/consumer level) for the crop or manufactured product or commodity in question.

i. Information on crop or manufactured product or commodity exports and imports that has a bearing on the regulatory decision.

IV. Duty to Submit Information on Adverse Effects

Registrants are required by section 6(a)(2) of FIFRA to submit any additional information regarding unreasonable adverse effects on man or the environment which comes to their attention at any time. For further information on this requirement consult the Agency's enforcement policy for section 6(a)(2), published in the **Federal Register** of July 12, 1979 (44 FR 40716). The registrants of ODM pesticide products must submit immediately published or unpublished information, studies, reports, analyses, or reanalyses regarding adverse effects associated with these pesticides, their impurities, metabolites and degradation products in humans or animal species, and claimed or verified accidents to humans, domestic animals, or wildlife which have not been previously submitted to EPA. These data must be submitted with a cover letter specifically identifying the information as being submitted under section 6(a)(2) of FIFRA. In light of this Special Review and the requirements of FIFRA section 6(a)(2), the registrants must notify EPA of the results of any studies on ODM pesticides currently in progress to the extent specified in the section 6(a)(2) enforcement policy cited above. Specifically, information on any adverse toxicological effects of ODM pesticides, their impurities, metabolites, and degradation products must be submitted.

V. Public Comment Opportunity

All registrants and applicants for registration have been notified by certified mail of the Special Review being initiated on their ODM pesticide products. The Agency is providing a 90-day period to comment on this Notice. Comments must be submitted by January 4, 1987. The Agency invites all interested persons to submit further information concerning the risks and benefits associated with the use of ODM, as discussed in this Notice. All interested persons are also invited to comment on whether the use of ODM satisfies any of the risk criteria listed at 40 CFR 154.7, whether risks posed by the use of ODM are unreasonable, and

what, if any, regulatory action should be taken by the Agency. All comments and information should be submitted in triplicate to the address given in this Notice under ADDRESS to facilitate the work of EPA and others interested in inspecting them. The comments and information should bear the identifying notation OPP–*30000/55*.

During the comment period, interested members of the public or registrants may request a meeting to discuss factual information available to the Agency, to present any factual information, to respond to presentations by other persons, or to discuss what regulatory actions should be taken regarding ODM. Persons interested in arranging such meeting should contact the person listed in this Notice under **FOR FURTHER INFORMATION CONTACT.**

VI. Public Docket

The Agency has established a public docket [OPP–*30000/55*] for the Special Review on ODM. This public docket includes or will include: (1) The preliminary notification to the registrants concerning the ODM Special Review; (2) all written comments and materials (other than claimed confidential business information) submitted to the Agency in response to the preliminary notification; (3) this Notice of Special Review and all documents specifically referenced herein; (4) the Notice of Preliminary Determination and Notice of Final Determination concerning the ODM Special Review and all documents specifically referenced therein; (5) all written comments or other materials (other than claimed confidential business information) concerning the ODM Special Review submitted to the Agency by any person or party outside of government; (6) all documents or other written materials concerning the ODM Special Review provided by the Agency to any person or party outside of government; (7) a memorandum describing each meeting concerning the ODM Special Review between Agency personnel and any person or party outside of government; (8) any written response to the Notice of Preliminary Determination by the Secretary of Agriculture or the FIFRA Scientific Advisory Panel; (9) a transcript of all public meetings held by the Scientific Advisory Panel or the Agency concerning the ODM Special Review; and (10) a current index of all materials in the docket. All such materials will be available for public inspection and copying at Room 236, Crystal Mall Building #2, 1921 Jefferson Davis Highway, Arlington, VA. from 8 a.m. to 4 p.m. Monday through Friday, excluding legal holidays. The Agency will also distribute a compendium of indices for new materials in Special Review dockets by mail, on a monthly basis, to those members of the public who have specifically requested such material. To request inclusion on this mailing list, contact Frances Mann, (703–557–2805).

VII. References

The following list of references includes all documents cited in this Notice. These documents are part of the public docket for this Special Review (docket number OPP–30000/55). The Agency will continue to supplement the public docket with additional information as it is received.

The record includes the following information:

(1) *EPA.* Preliminary Notification Letter (July 21, 1987).

(2) *EPA.* Data-Call-In Notice for Oxydemeton-methyl (July 1984).

(3) *EPA.* Data-Call-In Notice for Oxydemeton-methyl (February 1985).

(4) *EPA.* Data-Call-In Notice for Oxydemeton-methyl (April 1986).

(5) *EPA.* Notice of Intent to Suspend (May 26, 1987).

(6) *Mobay Chemical Corp.* Letter to Bessie Hammiel, Hearing Clerk; Request for a Hearing (June 30, 1987).

(7) *EPA.* Data-Call-In Notice for Oxydemeton-methyl (September 1986).

(8) *EPA.* Data-Call-In Notice for Oxydemeton-methyl (June 1987).

(9) *Kroetlinger, F., Kaliner, G., "Two-Generation Study with Rats: R2170 (c.n. Oxydemeton-methyl)".* Unpublished report prepared by Bayer AG (1985).

(10) *California Department of Food and Agriculture.* Notice of action on oxydemeton-methyl (December 1986).

(11) *Mobay Chemical Corp.* Male Rat Reproductive System Toxicity Study (due December 1987).

(12) *Mobay Chemical Corp.* Repeat Two-Generation Rat Reproduction Study (due Fall 1988).

(13) *Mobay Chemical Corp.* Comparison between oral and dermal cholinesterase dose responses (due December 1987).

(14) *Mobay Chemical Corp.* Monkey dermal absorption study (due September 1987).

(15) *EPA.* Registration Standard for pesticide products containing oxydemeton-methyl (1987).

(16) *Doull, J., Cross, R., Arnold, J., et al., "Effects of Metasystox-®* on Human Plasma and RBC Cholinesterase Activity", Report No. 35525 (1947). Unpublished study received June 18, 1975 under 5F1644; prepared by the University of Kansas Medical Center and Truman Medical Research Laboratory, submitted by Mobay Chemical Corp., Kansas City, Mo., CDL: 094451–Z.

(17) *Kroetlinger, Janda. "Subchronic Toxicity Study on Rats (3-month feeding experiment): (Oxydemeton-methyl, the Active Ingredient of R Metasystox-R®)",* Report No. 12797. Unpublished study prepared by Bayer AG.

(18) *EPA.* Pesticide incident monitoring report on oxydemeton-methyl (1987).

(19) *Mobay Chemical Corp.* Response to Preliminary Notification of Possible Special Review (August 1987).

DEPARTMENT OF EDUCATION

34 CFR Part 251

Formula Grants; Local Educational Agencies and Tribal Schools

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Secretary proposes to amend the regulations to govern the eligibility of school children to be counted as "Indian" or "Alaska Native" under the Part A Formula Grants Program of the Indian Education Act. The proposed amendments are designed to clarify what documentation is necessary to establish eligibility and what effect failure to collect and maintain that documentation has on the grantee.

DATE: Comments must be received on or before November 19, 1987.

ADDRESSES: All comments concerning these proposed regulations should be addressed to Mr. Hakim Khan, Acting Director, Indian Education Programs, Office of Elementary and Secondary Education, U.S. Department of Education, 400 Maryland Avenue SW., Room 2177 (Mail Stop 6267), Washington, DC 20202. Telephone (202) 732–1887.

A copy of any comments that concern information collection requirements should also be sent to the Office of Management and Budget at the address listed in the Paperwork Reduction Act section of this preamble.

FOR FURTHER INFORMATION CONTACT: Mr. Hakim Khan. Telephone (202) 732–1887.

SUPPLEMENTARY INFORMATION: Under Part A of the Indian Education Act (the Act), Congress has made provision for local educational agencies and tribal schools to receive formula grant payments to support supplemental educational programs for "Indian" school children. The clear intent of Congress is that a local educational agency or a tribal school should be able to receive Part A funds for any Indian child who meets the statutory definition of "Indian." (section 453(a) of the Act). Under section 453(c) of the Act, Congress has charged the Department of Education with the responsibility of ensuring that there is documentation that children are eligible to be counted to generate funds under this program, before payment is made to the participating school districts. Currently, this documentation is provided through completion of ED Form 506, which must be kept on file by the school district for each student counted to generate funds under Part A. Under section 1149(a) of the Education Amendments of 1978, the Department of Education must review annually no less than one-third of the recipient school districts for compliance with Part A requirements, including the requirement that a certification form be maintained for each child counted under Part A.

Declining Documentation

Recent program review reports have shown a significant and continuing decline, as reflected on ED Form 506, in the extent to which school districts maintain complete documentation on students counted by the school districts under Part A. Forty percent of the projects reviewed and funded for the fiscal year 1982 grant period maintained complete eligibility information, while 23 percent and 15 percent, respectively, of the projects for fiscal year 1983 and fiscal year 1984 maintained complete eligibility information. Consequently, the Department is issuing these proposed regulations to assist school districts in meeting the Part A requirements.

Intent of Rulemaking

The intent of these proposed amendments to the regulations is not to restrict or eliminate any eligible Indian child from being counted to generate funds under this program. On the contrary, the proposed changes are designed to assist school districts in meeting the Part A requirements by clarifying and simplifying the steps the school district must take to complete the documentation process. The Department proposes to accomplish this by including as many valid forms of documentation as are possible within the statutory requirements and based upon commonly accepted sources of historical identification, tribal and governmental recognition, and official validation of Indian ancestry. See § 251.51. The notable exception is the absence of documentation such as a birth certificate which of itself does not prove a child's status as Indian.

The result of these amendments would be to provide a broad range of sources of documentation that should meet not only the letter, but also the spirit of the law. ED Form 506 would be revised to reflect these amendments. The proposed revised form, which is published as Appendix A to this proposed regulation, is included to illustrate the intent of the proposed regulations and to elicit suggestions for further improvements in the form. The revised form will not be codified in the Code of Federal Regulations when the final regulations are published.

Effective Timetable

The Department has sent letters to all school district superintendents regarding the Department's intent to publish these regulations. It is expected that final regulations will be in place in time to be applicable for fiscal year 1989 awards, for use in the 1989–1990 academic year. The revised ED Form 506 will also be used for the 1989–1990 academic year. Therefore, in the 1989–1990 academic year, completed student certification forms for each child counted in the grantee's application for funds for that academic year will be required, regardless of whether a child is enrolled in the school district at the time of the Department's review of a school district's compliance with the requirements of the Act and its implementing regulations.

Executive Order 12291

These proposed regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the Order.

Regulatory Flexibility Act Certification

The Secretary certifies that these proposed regulations would not have a significant economic impact on a substantial number of small entities. The small entities that would be affected by these regulations are small school districts or tribal schools receiving Federal financial assistance under this program. The regulations clarify current recordkeeping requirements by listing the types of documentation required to establish eligibility for payments under the law. The regulations also impose penalties for failure to maintain proper records. The recordkeeping requirements are not excessively burdensome or expensive, and the penalties will affect only the limited number of entities found not to be in compliance with the regulations.

Paperwork Reduction Act of 1980

Sections 251.50, 251.51, and 251.53(a)(2) contain information collection requirements, and § 251.22 adds a new assurance to the application form. As required by section 3504(h) of the Paperwork Reduction Act of 1980, the Department of Education will submit a copy of these proposed regulations to the Office of Management and Budget (OMB) for its review.

Organizations and individuals desiring to submit comments on the information collection requirements should direct them to the Office of Information and Regulatory Affairs,

OMB, Room 3208, New Executive Office Building, Washington, DC 20503; Attention: James D. Houser.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79. The objective of the Executive Order is to foster an intergovernmental partnership and a State and local government coordination and review of proposed Federal financial assistance.

In accordance with the Order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations. The Department is particularly interested in learning about actual situations where the commenter believes that a child currently eligible to be counted under Part A would be excluded from being counted under Part A were these regulations, as currently proposed, to become final.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 2177, FOB–6, (Mail Stop 6267), 400 Maryland Avenue, SW., Washington, DC 20202 between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

To assist the Department in complying with the specific requirements of Executive Order 12291 and the Paperwork Reduction Act of 1980 and their overall requirement of reducing regulatory burden, public comment is invited on whether there may be further opportunities to reduce any regulatory burdens found in these proposed regulations.

List of Subjects in 34 CFR Part 251

Education, Elementary and secondary education, Grant programs—education, Grant programs—Indians, Indians—education, Reporting and recordkeeping requirements.

(Catalog of Federal Domestic Assistance Number 84.060, Formula Grants—Local Educational Agencies and Tribal Schools)

Dated: September 30, 1987.

William J. Bennett,

Secretary of Education.

The Secretary proposes to amend Part 251 of Title 34 of the Code of Federal Regulations as follows:

PART 251—FORMULA GRANTS—LOCAL EDUCATIONAL AGENCIES AND TRIBAL SCHOOLS

1. The authority citation for Part 251 is revised to read as follows:

Authority: 20 U.S.C. 241aa–241ff, unless otherwise noted.

2. Section 251.22 is amended by deleting "and" after paragraph (b)(3)(ix), adding "and" after paragraph (b)(3)(x)(B), and adding a new paragraph (b)(3)(xi) and revising the authority to read as follows:

§ 251.22 What must an application include?

* * * * *

(b) * * *

(3) * * *

(xi) Prior to the LEA's inclusion of a child in a count to generate funds under this part, the LEA has determined that the child is eligible in accordance with § 251.51;

* * * * *

(Authority: 20 U.S.C. 241dd, 1221h)

3. Section 251.50 is revised to read as follows:

§ 251.50 What are the responsibilities of a grantee regarding student certification?

Before including a student in the count of Indian children to generate funds under this part, a grantee shall determine, at the time the application is submitted to the Secretary—

(a) That the child is enrolled in and receiving free public education in the school district; and

(b) That a completed student certification form that meets the requirements of section 453 of the Indian Education Act and establishes eligibility under § 251.51 is on file for the child.

(Authority: 20 U.S.C. 241bb–241dd, 1221h)

4. A new § 251.51 is added to read as follows:

§ 251.51 How does a child establish eligibility?

(a) To establish eligibility as an Indian, as defined in 34 CFR 250.4(b), a child must have one of the following:

(1) If applicable, an enrollment number of the child or the parent or grandparent through whom the child claims membership.

(2) If an enrollment number is not applicable, one of the following:

(i) A written certification of membership of the child or the child's parent or grandparent by an authorized representative of the tribe, band, or other organized group of Indians.

(ii) A copy of a tribal voter registration card assigned to the child or the child's parent or grandparent.

(iii) A copy of a tribal membership card assigned to the child or the child's parent or grandparent.

(iv) The tribal census number for the child or the child's parent or grandparent.

(v) A copy of an Indian Health Service Beneficiary Identification Card assigned to the child or the child's parent or grandparent.

(vi) A Certificate of Degree of Indian Blood, issued by the Department of the Interior, that contains information documenting that the child or the child's parent or grandparent is a member of an eligible tribe, band, or other organized group of Indians.

(vii) A certification of an authorized representative of an adoption or foster care agency that, based upon records available to that agency, an adopted or foster child meets the definition of "Indian" in § 250.4(b).

(viii) Evidence that the child or the child's parent or grandparent receives benefits from the State in which that individual resides, based upon the State's determination that that individual is a member of a tribe, band, or other organized group of Indians as the term "Indian" is defined in 34 CFR 250.4(b).

(ix) For a child claiming eligibility as an Eskimo, Aleut, or other Alaska Native, a certification by an authorized official of an Alaskan Native village group (including a regional corporation or village corporation) that the child is a member of the entity in which the child claims membership.

(b) For a child claiming eligibility as an individual recognized to be an Indian by the Secretary of the Interior, the child's eligibility must be established through membership in an Indian tribal entity recognized and eligible to receive services from the United States Bureau of Indian Affairs. A list of Indian tribal entities is published annually by the Department of the Interior in the **Federal Register** (Indian Tribal Entities Recognized and Eligible to Receive Services).

(c)(1) For a child claiming eligibility as an individual who is Eskimo, Aleut, or other Alaska Native, the child's eligibility must be established through membership in a Native entity within the State of Alaska recognized by and eligible to receive services from the United States Bureau of Indian Affairs. A list of Native entities is published annually by the Department of the Interior in the **Federal Register** (Native Entities Within the State of Alaska Recognized and Eligible to Receive Services From the United States Bureau of Indian Affairs).

(2) For the purposes of this paragraph, references in paragraph (a)(2) of this section to "tribe, band, or other organized group of Indians" are to be read as "Eskimo entity, Aleut entity, or other Alaska Native entity."

(Authority: 20 U.S.C. 241bb–241dd, 1221h)

5. A new § 251.52 is added to read as follows:

§ 251.52 How does the Secretary determine a grantee's compliance with § 251.50?

Periodically, the Secretary reviews a grantee's records to determine if a student certification form that meets the requirements of section 453 of the Indian Education Act and establishes eligibility under § 251.51 is on file for each child included by the grantee in the count of children to generate funds under this part for the current fiscal year and for prior fiscal years for which the grantee is required to maintain records.

(Authority: 20 U.S.C. 241bb–241dd, 1221h)

6. A new § 251.53 is added to read as follows:

§ 251.53 What action does the Secretary take if a grantee fails to meet the requirements of § 251.50?

(a) If the Secretary determines under § 251.52 that a grantee does not have a completed student certification form for each child counted by the grantee to generate funds under this part for the current fiscal year or prior fiscal years for which the grantee is required to maintain records, the grantee must repay to the Department the amount of funds improperly generated. The Secretary may—

(1) Collect the funds awarded for each such child in the fiscal year or years at issue by—

(i) Demanding direct repayment from the grantee;

(ii) Reducing the grantee's current grant award where the Secretary's determination under paragraph (a) of the section concerns the current fiscal year; or

(iii) Offsetting the equivalent amount from the grantee's award for a fiscal year following the determination; and

(2) For one to three years following that determination, require the grantee to submit with its application for funds under this part a verification by an independent auditor that student certification forms have been completed and maintained by the grantee for each child included in the count in the aplication.

(b) In applying an administrative offset under § 251.53(a)(1)(iii), the Secretary uses the procedures contained in 34 CFR Part 30.

(Authority: 20 U.S.C. 241bb–241dd; 1221h)

Appendix A

Note: This from will not be codified in the Code of Federal Regulations.

Department of Education, Office of Elementary and Secondary Education

Indian Education Programs

Washington, DC 20202

Indian Student Certification

See instructions on reverse side.

1. Name of Eligible Child
Address (Include number, street, city, State and ZIP code).

Part I—Membership Information

2. Name of the tribe, band or other organized group of Indians.

3. Who is a member of the tribe, band or other organized group of Indians? Check only one of the boxes and answer the remaining questions for that person.

(a) / / child (b) / / natural parent (c) / / natural grandparent

If you checked box b or c, enter the name and address of the parent or grandparent:

Name:_____
Address:_____

4. The tribe, band or other organized group is (Check only one box):

(a) — Federally recognized (other than Alaska Native)

(b) — Eskimo, Aleut or other Alaska Native

(c) — State and Federally recognized (other than Alaska Native)

(d) — State recognized (indicate State):

(e) — Terminated

(f) — Other than the categories listed in paragraph 4 (a)–(e) of this form. (Explain).

_____

5. Complete "a" or "b".

(a) Where applicable, enter the individual's enrollment number:

_____

(b) Where "a" is not applicable, attach copy of other document(s) verifying membership. (See reverse side for a list of other documents that can be used to verify membership).

6. Name of the organization which maintains membership information:

Address of organization:

Part II—School Information

7. Name of Child's School
School Address Child's Grade

Part III—Parent Information

I certify that this information is correct, and I understand that this form may be provided to the Title IV, Part A parent committee.

8. Parent Signature Date
Address, if different from Child.

Instructions

In order to receive funds under the formula grant program of Part A of the Indian Education Act, your school district must determine the number of Indian children enrolled in its schools who are eligible to be counted as "Indian" under that Act.

Any child who meets the following definition from the Indian Education Act and for whom the school district has collected this completed form may be counted for this purpose.

"Indian" means "any individual who (1) is a member of a tribe, band, or other organized group of Indians, including those tribes, bands, or groups terminated since 1940 and those recognized by the State in which they reside, or who is a descendant, in the first or second degree, of any such member, or (2) is considered by the Secretary of the Interior to be an Indian for any purpose, or (3) is an Eskimo or Aleut or other Alaska Native".

You are not required to submit this form to the local educational agency. If you choose not to submit a completed form, however, your school district may not count your child to generate funds under Part A of the Indian Education Act.

Item 5b. Where the enrollment number is not applicable, *one* of the following documents must be provided:

- A written certification of membership of the child or the child's parent or grandparent by an authorized representative of the tribe, band, or other organized group of Indians.
- A copy of a tribal voter registration card assigned to the child or the child's parent or grandparent.
- A copy of a tribal membership card assigned to the child or the child's parent or grandparent.
- The tribal census number for the child or the child's parent or grandparent.
- A copy of an Indian Health Service Beneficiary Identification Card assigned to the child or the child's parent or grandparent.
- A Certificate of Degree of Indian Blood, issued by the Department of the Interior, that contains information documenting that the child or the child's parent or grandparent is a member of an eligible tribe, band, or other organized group of Indians.
- A certificate of an authorized representative of an adoption or foster care agency that, based upon records

available to that agency, an adopted or foster child meets the definition of "Indian" in 34 CFR 250.4(b).

• Evidence that the child or the child's parent or grandparent receives benefits from the State in which that individual resides, based upon the State's determination that that individual is a member of a tribe, band, or other organized group of Indians as the term "Indian" is defined in 34 CFR 250.4(b).

LIST OF PUBLIC LAWS

Last List October 2, 1987

This is a continuing list of public bills from the current session of Congress which have become Federal laws. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202-275-3030)

H.J. Res. 362/Pub. L. 100-120

Making continuing appropriations for fiscal year 1988, and for other purposes. (Sept. 30, 1987; 101 Stat. 789; 3 pages) Price: $1.00

H.R. 1163/Pub. L. 100-121

To amend section 902(e) of the Federal Aviation Act of 1958 to revise criminal penalties relating to certain aviation reports and records offenses. (Sept. 30, 1987; 101 Stat. 792; 1 page) Price: $1.00

S.J. Res. 191/Pub. L. 100-122

To provide for the extension of certain programs relating to housing and community development, and for other purposes. (Sept. 30, 1987; 101 Stat. 793; 1 page) Price: $1.00

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

New units issued during the week are announced on the back cover of the daily **Federal Register** as they become available.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $595.00 domestic, $148.75 additional for foreign mailing.

Order from Superintendent of Documents, Government Printing Office, Washington, DC 20402. Charge orders (VISA, MasterCard, CHOICE, or GPO Deposit Account) may be telephoned to the GPO order desk at **(202) 783-3238** from 8:00 a.m. to 4:00 p.m. eastern time, Monday—Friday (except holidays)

[1] Because Title 3 is an annual compilation, this volume and all previous volumes should be retained as a permanent reference source.

[2] No amendments to this volume were promulgated during the period Apr. 1, 1980 to March 31, 1987. The CFR volume issued as of Apr. 1, 1980, should be retained.

[3] No amendments to this volume were promulgated during the period July 1, 1985 to June 30, 1986. The CFR volume issued as of July 1, 1985 should be retained.

[4] The July 1, 1985 edition of 32 CFR Parts 1–189 contains a note only for Parts 1–39 inclusive. For the full text of the Defense Acquisition Regulations in Parts 1–39, consult the three CFR volumes issued as of July 1, 1984, containing those parts.

[5] The July 1, 1985 edition of 41 CFR Chapters 1–100 contains a note only for Chapters 1 to 49 inclusive. For the full text of procurement regulations in Chapters 1 to 49, consult the eleven CFR volumes issued as of July 1, 1984 containing those chapters.

[6] No amendments to this volume were promulgated during the period Oct. 1, 1985 to Sept 30, 1986. The CFR volume issued as of Oct. 1, 1985 should be retained.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register.**

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 52 FR 12345.

Presidential Documents

Title 3—

The President

Proclamation 5713 of October 1, 1987

National Poison Prevention Week, 1988

By the President of the United States of America

A Proclamation

In the 27 years our Nation has observed National Poison Prevention Week, thousands of children under age five have been saved from accidental poisonings thanks to greater public awareness of poison prevention and the use of child-resistant bottle and container closures. This success story is due to the combined efforts of consumers, health professionals, and government and industry. All these groups are represented on the Poison Prevention Week Council. Through the annual observance of National Poison Prevention Week, parents have been urged to keep household chemicals and medicines out of the reach of young children. Poison control centers have helped save lives by offering emergency advice to consumers who call when a poisoning occurs. The United States Consumer Product Safety Commission (CPSC) has required that potentially hazardous household chemicals and medicines be packaged with effective child-resistant closures.

Data recently compiled by CPSC show that the number of child poisonings has decreased since child-resistant packaging began to be used. In 1972, when the first drugs were required to have child-resistant packaging, 96 children died from accidental drug ingestion. By 1974, the first year in which child-resistant packaging was required for most prescription drugs, there were 57 fatalities. In subsequent years, other products were required to have child-resistant packaging, and the number of deaths due to ingestion of these drugs continued to decline. In 1984, the last full year for which we have received information on drug ingestion fatalities, there were 31 deaths.

Child-resistant packaging has saved many lives, but there is more to do. We must remind new parents and grandparents of the need to keep medicines and household chemicals out of the reach of children. Underlying our poison prevention program is the assumption that virtually all childhood poisonings are preventable.

To encourage the American people to learn more about the dangers of accidental poisonings and to take more preventive measures, the Congress, by a joint resolution approved September 26, 1961 (75 Stat. 681), authorized and requested the President to issue a proclamation designating the third week of March of each year as "National Poison Prevention Week."

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby designate the week beginning March 20, 1988, as National Poison Prevention Week. I call upon all Americans to observe this week by participating in appropriate ceremonies and events and by learning how to prevent childhood poisonings.

IN WITNESS WHEREOF, I have hereunto set my hand this first day of October, in the year of our Lord nineteen hundred and eighty-seven, and of the Independence of the United States of America the two hundred and twelfth.

Ronald Reagan

Proclamation 5714 of October 1, 1987

National Medical Research Day, 1987

By the President of the United States of America

A Proclamation

Once, childhood diseases such as diphtheria, polio, and tetanus claimed the lives of thousands of American youngsters each year. Now, vaccines developed through biomedical research have virtually eliminated these killers from the United States. In addition to their contributions to the creation of these and many other vaccines, U.S. medical researchers have designed new drugs and surgical techniques and identified environmental and life-style factors that lead to illness. All of these advances have helped to bring American's death rate to an all-time low and its life expectancy rates to all-time highs.

America is an acknowledged world leader in promoting health and preventing disease and disability. Research conducted in this country has contributed enormously to the worldwide control of epidemic diseases such as cholera, smallpox, yellow fever, and bubonic plague. The common goal of better health for all has helped to foster a productive research partnership among government, academia, industry, and voluntary organizations.

America's preeminence in biomedical and behavioral medical research is greatly encouraged by more than a century of continuing commitment by the Government of the United States. For example, this year marks the 100th anniversary of the National Institutes of Health, our Nation's largest biomedical research agency. The returns from the cooperative efforts of the Federal government and the private sector in medical research—in terms of reduced illness and improved individual productivity for many Americans—are immense. More than 90 Americans have been rewarded with international recognition in the form of the award of Nobel Prizes for work in physiology, medicine, and chemistry.

Today, America's medical researchers are studying the basic workings of cells and organisms in ever finer detail. Someday, these inquiries into the fundamental aspects of life may unravel the mysteries of cancer, AIDS, Alzheimer's disease, heart and lung diseases, mental illnesses, and many other diseases that claim or severely impair the lives of Americans. To fulfill the promise of current investigations and to ensure that the caliber of American medical research remains high, it is imperative that the United States continue to foster the training of the scientists of the future.

We all acknowledge with pride the accomplishments of America's medical researchers and look to them for continued progress in relieving human suffering. In recognition of the many successes of the American medical research enterprise, the Congress, by Senate Joint Resolution 142, has designated October 1, 1987, as "National Medical Research Day" and has authorized and requested the President to issue a proclamation in observance of this occasion.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim October 1, 1987, as National Medical Research Day, and I call upon the people of the United States and all Federal, State, and local government officials to observe the day with appropriate events and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this first day of October, in the year of our Lord nineteen hundred and eighty-seven, and of the Independence of the United States of America the two hundred and twelfth.

Proclamation 5715 of October 1, 1987

General Pulaski Memorial Day, 1987

By the President of the United States of America

A Proclamation

The American people proudly and gratefully observe every October 11 in memory of General Casimir Pulaski, because on that date in 1779 this young Polish count and cavalry officer, wounded two days before while leading a charge during the siege of Savannah, gave his life for our country.

Before casting his lot with America, Casimir Pulaski had fought bravely against tyranny and foreign domination in his beloved Poland and had been forced into exile. He and other Polish freedom fighters well understood that humanity's battle for liberty and self-government is indivisible around the world; with the immortal cry, "For Your Freedom and Ours," they went forth to many nations in support of freedom, justice, independence, and individual rights. These ideals are forever part of Poland's heritage; they are dear to the Polish people, and this devotion continues to inspire America and the rest of the world.

The freedoms for which General Pulaski fought and died—the freedoms he helped America win—have not yet been realized in many parts of the globe. The United States of America will always champion religious, political and economic liberty, tolerance, and human rights around the world. Wherever mankind's fight for freedom continues, there stands the spirit of Pulaski and there stands the hope, the commitment, and the help of the United States—"For Your Freedom and Ours."

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim Sunday, October 11, 1987, as General Pulaski Memorial Day, and I direct the appropriate government officials to display the flag of the United States on all government buildings on that day. In addition, I encourage the people of the United States to commemorate this occasion as appropriate throughout our land.

IN WITNESS WHEREOF, I have hereunto set my hand this first day of October, in the year of our Lord nineteen hundred and eighty-seven, and of the Independence of the United States of America the two hundred and twelfth.

Proclamation 5716 of October 1, 1987

Columbus Day, 1987

By the President of the United States of America

A Proclamation

Every October the people of the United States celebrate the day nearly 500 autumns ago when Christopher Columbus and the crews of the *Nina*, the *Pinta*, and the *Santa Maria* found a New World. That world is our Western Hemisphere, and we in the United States trace the history and development of our country and our culture back to Columbus and his daring exploration, his initiative, his faith, and his courage.

Columbus continues to inspire the United States and the rest of the world for almost half a thousand years because of his great understanding and vision and because of his single-minded determination to let no disappointment, ridicule, or risk keep him from a goal he knew to be sensible, feasible, and of great promise. He viewed the unknown as an opportunity, not as a danger.

The Admiral of the Ocean Seas is remembered as well for challenging the horizons of his time and place, for his spirit of reaching beyond the obvious, for defying the pessimists and expanding the frontiers of knowledge. That spirit animated those who followed him to the New World through the centuries and brought untold energy, boldness, and ingenuity with them. We Americans are risk-takers; like Columbus, we have a vision of the world as it can be, and of the future as an opportunity and a challenge.

Italian Americans have special reason to celebrate Columbus Day with great pride. Columbus was the first of many Italian travelers who have made contributions to the New World. Columbus is one of many links binding the United States and Italy in a special relationship.

This tribute also has special meaning for Americans of Spanish descent. Without Spanish support, Columbus's voyage of discovery would not have been possible. Spain's contribution to the New World and to its cultural and economic heritage went on to be even larger, as the recent visit by Their Majesties King Juan Carlos and Queen Sofia of Spain to the American Southwest reminded us.

The year 1992 will be the 500th anniversary of Columbus's first voyage to the Americas. The Christopher Columbus Quincentenary Jubilee Commission, a distinguished group of Americans aided by representatives from Spain and Italy, prepared a report that I transmitted to the Congress in September of this year, making recommendations for our Nation's observance of the Quincentenary, including themes that embody the broad significance of this anniversary and suggestions for Quincentenary programs that will extend to communities, organizations, and institutions around the United States.

In tribute to Christopher Columbus, the Congress of the United States, by joint resolution approved April 30, 1934 (48 Stat. 657), as modified by the Act of June 28, 1968 (82 Stat. 250), has requested the President to proclaim the second Monday in October of each year as "Columbus Day."

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim Monday, October 12, 1987, as Columbus Day. I invite the people of this Nation to observe that day with appropriate ceremonies in honor of this great explorer. I also direct that the flag of the United States be displayed on all public buildings on the appointed day in honor of Christopher Columbus.

IN WITNESS WHEREOF, I have hereunto set my hand this first day of October, in the year of our Lord nineteen hundred and eighty-seven, and of the Independence of the United States of America the two hundred and twelfth.

Proclamation 5717 of October 1, 1987

United Nations Day, 1987

By the President of the United States of America

A Proclamation

United Nations Day is an opportunity for us to reemphasize the principles upon which the United Nations was founded. The framers of the United Nations Charter envisioned a world where nations live together in freedom, justice, and peace, a world with universal and reciprocal respect for human rights and human dignity.

The United Nations General Assembly took a historic first step last year by adopting reforms aimed at strengthening the organization's effectiveness and efficiency. The ideals of the United Nations are important to the United States. We are committed to working closely with other member states and with the Secretary General to see that the reforms are faithfully implemented and to secure the organization's future.

We are pleased that reform efforts are extending to the specialized and technical agencies of the United Nations. These agencies are not well-known, but do affect us directly and on a daily basis. For instance, the Weather Watch of the World Meteorological Organization helps us know when and where storms will hit American cities. The International Maritime Organization and International Civil Aviation Organization work for safety on the seas and in the skies for American travelers. The Food and Agricultural Organization saves U.S. farmers, foresters, and fishermen countless dollars in damage every year. The International Atomic Energy Agency helps promote international cooperation and safeguards regarding nuclear technology, and the World Health Organization coordinates global efforts against AIDS.

One of the youngest specialized agencies, the International Fund for Agricultural Development (IFAD), was established to mobilize financial resources and make them available for agricultural projects specifically designed to improve food production systems in the poorest food-deficient regions of the world. In just 10 years, IFAD has financed more than 200 projects in developing countries that, when fully implemented, will boost food production by more than 22 million tons a year.

Our world—every nation, every people, every individual—can know the blessings of peace and see the light of freedom and justice in the future if we have the courage to build on the hope of the past—the hope upon which the United Nations was built.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim Saturday, October 24, 1987, as United Nations Day. I urge all Americans to acquaint themselves with the activities and accomplishments of the United Nations. I have appointed J. Willard Marriott, Jr., to serve as 1987 United States Chairman for United Nations Day, and I welcome the role of the United Nations Association of the United States of America in working with him to celebrate this special day.

IN WITNESS WHEREOF, I have hereunto set my hand this first day of October, in the year of our Lord nineteen hundred and eighty-seven, and of the Independence of the United States of America the two hundred and twelfth.

Proclamation 5718 of October 2, 1987

Implementation of an Orderly Marketing Agreement on Ammonium Paratungstate and Tungstic Acid

By the President of the United States of America

A Proclamation

1. On June 5, 1987, the United States International Trade Commission (USITC) reported to the President the results of its investigation under section 406 of the Trade Act of 1974 (19 U.S.C. 2436) (the Trade Act) with respect to imports from the People's Republic of China (the PRC) of ammonium paratungstate (APT) and tungstic acid provided for in items 417.40 and 416.40, respectively, of the Tariff Schedules of the United States (TSUS) (19 U.S.C. 1202). The USITC determined that market disruption within the meaning of section 406 of the Trade Act exists with respect to imports from the PRC of APT and tungstic acid. To remedy this market disruption, the USITC recommended that, for the next 5 years, the combined volume of imports of APT and tungstic acid from the PRC be limited to the larger of 1.116 million pounds of tungsten content per year or 7.5 percent of U.S. consumption.

2. On August 5, 1987, pursuant to sections 406, 202, and 203 of the Act (19 U.S.C. 2436, 2252, and 2253), and after taking into account the considerations specified in section 202(c) of the Trade Act (19 U.S.C. 2252(c)), I determined to provide import relief for the domestic industry in the form of a negotiated orderly marketing agreement. To this end, I directed the United States Trade Representative (the USTR) to negotiate and conclude an orderly marketing agreement with the PRC and to report the results of such negotiations to me within 50 days.

3. Section 406(b)(2) of the Trade Act (19 U.S.C. 2436(b)(2)) requires that if import relief consists of, or includes, an orderly marketing agreement, then such agreement shall be entered into within 60 days after a presidential determination to provide relief.

4. Pursuant to the authority vested in the President by the Constitution and the statutes of the United States, including section 203(a)(4) of the Trade Act (19 U.S.C. 2253(a)(4)), an agreement for orderly trade was signed on September 28, 1987, between the Government of the United States of America and the Government of the People's Republic of China limiting the export from the PRC, and the import into the United States, of APT and tungstic acid provided for in items 417.40 and 416.40, respectively, of the TSUS.

5. Pursuant to section 203(k)(1) of the Trade Act (19 U.S.C. 2253(k)(1)), I have considered the relation of such action to the international obligations of the United States. Since February 1, 1980, the United States and the PRC have had in effect a bilateral trade agreement under which I have determined, pursuant to section 405 of the Trade Act (19 U.S.C. 2435), a satisfactory balance of concessions has been maintained during the life of such agreement, and for which I reconfirm that actual or foreseeable reductions in U.S. tariffs and nontariff barriers to trade resulting from multilateral negotiations are, and continuously have been, satisfactorily reciprocated by the PRC. The present agreement for orderly trade is within the parameters of the safeguard measures envisioned by the bilateral trade agreement.

6. In accordance with section 203(d)(2) of the Trade Act (19 U.S.C. 2253(d)(2)), I have determined that the level of import relief hereinafter proclaimed permits the importation into the United States of a quantity or value of articles that is not less than the average annual quantity or value of such articles imported into the United States from the PRC in the 1982–1984 period, which I have determined to be the most recent representative period for imports of such articles.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, acting under the authority vested in me by the Constitution and the statutes of the United States, including sections 203, 406, and 604 of the Trade Act (19 U.S.C. 2253, 2436, and 2483), section 332 of the Tariff Act of 1930, and section 301 of title 3, United States Code, do proclaim that—

(1) An orderly marketing agreement was entered into on September 28, 1987, between the Government of the United States of America and the Government of the People's Republic of China, with respect to trade in APT and tungstic acid, effective October 1, 1987. The agreement for orderly trade is to be implemented according to its terms and as directed in this Proclamation, including the Annex thereto.

(2) Subpart A, part 2 of the Appendix to the TSUS is modified as set forth in the Annex of this Proclamation.

(3) The President's authority under section 203(e)(3) of the Trade Act (19 U.S.C. 2253(e)(3)) to determine that the agreement is no longer effective is hereby delegated to the USTR. In the event of such a determination, the USTR shall prepare such **Federal Register** notice as may be appropriate to implement import relief authorized by section 203(e)(3) of the Trade Act.

(4) The USTR shall take such actions and perform such functions for the United States as may be necessary concerning the administration, implementation, modification, amendment or termination of the agreement described in paragraph (1) of this Proclamation, and any action that may be subsequently required to implement paragraph (3) of this Proclamation. In carrying out his responsibilities under this paragraph, the USTR is authorized to direct and delegate to appropriate officials or agencies of the United States, authority to perform any functions necessary for the administration and implementation of the agreement, or in the event he determines the agreement to be no longer effective, such further action as he deems necessary and appropriate consistent with this Proclamation. The USTR is authorized to make any changes in part 2 of the Appendix to the TSUS that may be necessary to carry out the agreement or such other action as may be required should he determine the agreement to be no longer effective. Any such changes in the agreement shall be effective after their publication in the **Federal Register**.

(5) The U.S. Customs Service shall take such actions as the USTR shall determine are necessary to carry out the agreement described in paragraph (1) of this Proclamation, or to implement any import relief implemented pursuant to paragraphs (3) and (4) of this Proclamation, or any modification thereof, with respect to the entry, or withdrawal from warehouse for consumption, into the United States of products covered by such agreement or by such other import relief.

(6) The U.S. Customs Service shall collect and assemble such data as are necessary to monitor compliance with the agreement. Such data shall include import statistics with respect to tungsten oxide, provided for in item 422.42, part 2C, schedule 4 of the TSUSA, as well as data for APT and tungstic acid.

VOL 52 ISS 193 OC 6 1987 UMI

IN WITNESS WHEREOF, I have hereunto set my hand this 2nd day of October, in the year of our Lord nineteen hundred and eighty-seven, and of the Independence of the United States of America the two hundred and twelfth.

Ronald Reagan

ANNEX

Subpart A, part 2 of the Appendix to the Tariff Schedules of the United States (19 U.S.C. 1202) is modified—

(a0 by adding in numerical sequence the following new headnote 11:

"11. *Quantitative limitations on certain tungsten articles.*—The provisions of this headnote apply to items 926.30 through 926.34, inclusive, of this subpart. The limitations imposed are in addition to the duties provided for the restrained articles in schedule 4, part 2B and part 2C, respectively, or in schedule 8, where applicable. The quantitative limitations shall include imports entered, or withdrawn from warehouse for consumption, informal entries, temporary imports under bond, and imports under schedule 8 of the TSUS.

(a) *Definitions.*—For purposes of this subpart—

(i) the term "tungsten articles" means ammonium paratungstate provided for in item 417.40 in schedule 4, part 2C and tungstic acid provided for in item 416.40, schedule 4, part 2B;

(b) *Export certificate.*—Effective January 1, 1988, none of the tungsten articles provided for herein that are exported from the People's Republic of China (the PRC) shall be entered, or withdrawn from warehouse for consumption, unless such tungsten articles are accompanied by a validated export certificate issued by the competent authority of the Government of the People's Republic of China;

(c) *Carryover.*—Whenever the specified limit of imports has not be entered during a period, an amount not to exceed 5 percent (except that the United States Trade Representative may by prior determination permit a carryover of greater than 5 percent) of the limit specified in the period in which the shortfall occurred may be entered in the subsequent period.

(d) *Exceeding restraint levels.*—The USTR may by **Federal Register** notice authorize an increase in the specified limits of imports by not more than 10 percent during any period, except that the USTR may by prior determination permit an increase of greater than 10 percent. If a specified limit of imports is exceeded during a period, there shall be a downward adjustment of the specified limit for the next period in the amount the preceding specified limit was exceeded. To the extent that imports of the tungsten articles provided for herein exceed 1.7 million pounds tungsten content for calendar year 1987, the specified limits for subsequent periods will be reduced according to the following schedule: the 1988 calendar year specified limit shall be reduced by 50 percent of the excess; the specified limit of 1989 shall each be reduced by 30 percent of the excess; and the specified limit of 1990 shall be reduced by 20 percent of the excess.

(e) *United States International Trade Commission (USITC) surveys.*—The USITC shall conduct annual surveys (pursuant to section 332 of the Tariff Act of 1930) to obtain data on ammonium paratungstate, tungstic acid and tungsten oxide (provided for in item 422.42, part 2C, schedule 4 of the TSUSA) from the producers in the United States by calendar quarter on shipments, profits, capacity and capacity utilization, and annual data on capital expenditures and research and development expenditures; and to obtain data on such products from importers by calendar quarter on prices, orders, and inventories. The initial survey shall cover calendar year 1987 and shall be published by March 31, 1988, and the results of subsequent annual surveys shall be published on March 31 of each year thereafter as long as the agreement is in effect.

(f) *Administration of import limitations.*—Imports accounting for no more than 65 percent of each annual specified limit may be entered in any two consecutive quarters in that year unless authorized by a determination of the USTR."

(b) by inserting in numerical sequence the following new provisions:

"Item	Articles	Specified Limit (in million pounds tungsten content)
	Whenever the respective aggregate quantity of articles, the product of the People's Republic of China, has been entered in any period specified in any item below (whether, for tariff purposes, in schedule 4 or in schedule 8), no article in such items may be entered during the remainder of such period, except as provided in headnote 11:	
	Tungstic acid provided for in item 416.40, part 2B, schedule 4, and ammonium paratungstate provided for in item 417.40, part 2C, schedule 4:

Presidential Documents

Proclamation 5719 of October 2, 1987

German-American Day, 1987

By the President of the United States of America

A Proclamation

More Americans trace their heritage back to German ancestry than to any other nationality. More than seven million Germans have come to our shores through the years, and today some 60 million Americans—one in four—are of German descent. Few people have blended so completely into the multicultural tapestry of American society and yet have made such singular economic, political, social, scientific, and cultural contributions to the growth and success of these United States as have Americans of German extraction.

The United States has embraced a vast array of German traditions, institutions, and influences. Many of these have become so accepted as parts of our way of life that their ethnic origin has been obscured. For instance, Christmas trees and Broadway musicals are familiar features of American society. Our kindergartens, graduate schools, the social security system, and labor unions are all based on models derived from Germany.

German teachers, musicians, and enthusiastic amateurs have left an indelible imprint on classical music, hymns, choral singing, and marching bands in our country. In architecture and design, German contributions include the modern suspension bridge, Bauhaus, and Jugendstil. German-American scientists have helped make the United States the world's pioneer in research and technology. The American work ethic, a major factor in the rapid rise of the United States to preeminence in agriculture and industry, owes much to German-Americans' commitment to excellence.

For more than 3 centuries, Germans have helped build, invigorate, and strengthen this country. But the United States has given as well as received. Just a generation ago, America conceived of and swiftly implemented the Marshall Plan, which helped the new German democracy rise from the rubble of war to become a beacon of democracy in Central Europe. The Berlin Airlift demonstrated the American commitment to the defense of freedom when, still recovering from war, Berlin was threatened by strangulation from the Soviets.

Today, the Federal Republic of Germany is a bulwark of democracy in the heart of a divided Europe. Germans and Americans are rightfully proud of our common values as well as our shared heritage. For more than 3 decades the German-American partnership has been a linchpin in the Western Alliance. Thanks to it, a whole generation of Americans and Europeans has grown up free to enjoy the fruits of liberty.

Our histories are thus intertwined. We now contribute to each other's trade, enjoy each other's cultures, and learn from each other's experiences. The German-American Friendship Garden, which will be dedicated in the District of Columbia in the near future, is symbolic of the close and amicable relations between West Germany and the United States.

The Congress, by Public Law 100–104, has designated October 6, 1987, the 304th anniversary of the arrival of the first German immigrants in Philadelphia, as "German-American Day" and has authorized and requested the President to issue a proclamation in observance of that day.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim Tuesday, October 6, 1987, as German-American Day. I urge all Americans to learn more about the contributions of German immigrants to the life and culture of the United States and to observe this day with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this 2nd day of Oct., in the year of our Lord nineteen hundred and eighty-seven, and of the Independence of the United States of America the two hundred and twelfth.

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 52, No. 193
Tuesday, October 6, 1987

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

9 CFR Part 92

[Docket No. 87-107]

Import Permits for Birds, Poultry, or Pigeons Transiting the Port of Anchorage, AK

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are amending the regulations to provide that importers can obtain and use—under certain circumstances—a single import permit for more than one shipment of birds, poultry, or pigeons transiting the port of Anchorage, Alaska. This will help reduce paperwork and resulting expenditures.

EFFECTIVE DATE: November 5, 1987.

FOR FURTHER INFORMATION CONTACT: Mr. Wade Ritchie, Import-Export Operations Staff, VS, APHIS, USDA, Room 766, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–8172.

SUPPLEMENTARY INFORMATION:

Background

The regulations in 9 CFR Part 92 contain provisions concerning the importation of certain animals, birds, poultry, and pigeons.

On March 27, 1987, we published in the **Federal Register** (52 FR 9871–9873, Docket No. 85–084) a document proposing to allow importers to obtain and use—under certain circumstances—a single import permit or more than one shipment of birds, poultry, or pigeons transiting the port of Anchorage, Alaska.

We proposed that the permit be valid only during the calendar year in which it was issued. We also proposed to prohibit the off-loading of birds, poultry, or pigeons transiting the port of Anchorage, Alaska, under a permit issued for multiple shipments.

Our proposal invited the submission of written comments on or before May 26, 1987. We did not receive any comments. Based on the rationale set forth in the proposal, we are adopting the proposed rule as a final rule.

Miscellaneous

As stated above, we proposed that an import permit issued for multiple shipments of birds, poultry, or pigeons transiting the port of Anchorage, Alaska, be valid only during the calendar year in which it was issued. We discussed this provision in the supplementary information to the proposed rule but inadvertently left it out of the proposed regulatory text. We have added this provision to § 92.4(e) in the regulatory text of the final rule.

We have made a nonsubstantive change to the proposed rule to correct a typographical error.

Executive Order 12291 and Regulatory Flexibility Act

We are issuing this rule in conformance with Executive Order 12291, and we have determined that it is not a "major rule." Based on information compiled by the Department, we have determined that this rule will have an effect on the economy of less than $100 million; will not cause a major increase in costs or prices for consumers, individual industries, federal, state, or local government agencies, or geographic regions; and will not cause a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

We anticipate that fewer than one percent of shipments of birds, poultry, or pigeons transiting the United States will be affected by this rule, as compared with the number of all shipments of birds, poultry, or pigeons transiting or entering the United States through all ports of entry.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

Information collection requirements contained in this document have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and have been assigned OMB control numbers 0579–0040 and 0579–0060.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with state and local officials. (see 7 CFR Part 3015, Subpart V.)

List of Subjects in 9 CFR Part 92

Animal diseases, Canada, Imports, Livestock and livestock products, Mexico, Poultry and poultry products, Quarantine, Transportation, Wildlife.

Accordingly, 9 CFR Part 92 is amended to read as follows:

PART 92—IMPORTATION OF CERTAIN ANIMALS AND POULTRY AND CERTAIN ANIMAL AND POULTRY PRODUCTS; INSPECTION AND OTHER REQUIREMENTS FOR CERTAIN MEANS OF CONVEYANCE AND SHIPPING CONTAINERS THEREON

1. The authority citation for Part 92 continues to read as follows:

Authority: 7 U.S.C. 1622; 19 U.S.C. 1306; 21 U.S.C. 102–105, 111, 134a, 134b, 134c, 134d, 134f, and 135; 7 CFR 2.17, 2.51, and 371.2(d).

2. In § 92.4, in the first sentence of paragraph (a)(1) "§§ 92.2(b) and (c), 92.19, 92.27, and 92.31" is revised to read "§§ 92.2(b) and (c), 92.4(e), 92.19, 92.27, and 92.31".

3. In § 92.4, a new paragraph (e) is added to read as follows:

§ 92.4 Import permits for ruminants, swine, horses from countries affected with CEM, poultry, poultry semen, animal semen, birds and for animal specimens for diagnostic purposes;[1] and reservation fees for space at quarantine facilities maintained by Veterinary Services.

* * * * *

[1] For other permit requirements for birds, the regulations issued by the U.S. Department of the Interior (Part 17, Title 50, Code of Federal Regulations) and the regulations issued by the U.S. Department of Health and Human Services (Subpart J–1 of Part 71, Title 42, Code of Federal Regulations) should be consulted.

(e) Notwithstanding any other provisions in this part, importers are not required to obtain in import permit and provide the shipper with an original import permit for each individual shipment of birds, poultry, or pigeons transiting the port of Anchorage, Alaska, if the following conditions are met:

(1) The importer applies for and obtains an import permit for multiple shipments of birds, poultry, or pigeons transiting the port of Anchorage, Alaska, in accordance with the provisions of this section and related requirements concerning application for the permit. However, the following information is not required on the application:

(i) The species, breed, and number of birds, poultry, or pigeons to be imported;

(ii) The individual animal identification;

(iii) The country of origin;

(iv) The name and address of the exporter;

(v) The port of embarkation in the foreign country;

(vi) The mode of transportation and the route of travel;

(vii) The proposed date of arrival of the birds, poultry, or pigeons; and

(viii) The name and address of the person to whom the birds, poultry, or pigeons will be delivered.

(2) The importer completes a copy of the import permit obtained under paragraph (e)(1) of this section for each separate shipment of birds, poultry, or pigeons intended to transit the port of Anchorage, Alaska, by inserting the following information on a copy of the permit:

(i) The species, breed, and number of birds, poultry, or pigeons to be imported;

(ii) The individual animal identification (except poultry);

(iii) The country of origin;

(iv) The name and address of the exporter;

(v) The port of embarkation in the foreign country;

(vi) The mode of transportation and the route of travel;

(vii) The proposed date of arrival of the birds, poultry, or pigeons; and

(viii) The name and address of the person to whom the birds, poultry, or pigeons will be delivered.

(3) The importer, not less than 2 weeks prior to the anticipated date of arrival of each separate intransit shipment of birds, poultry, or pigeons at the port of Anchorage, Alaska, provides the port veterinarian with a copy of the completed import permit;

(4) A copy of the completed import permit accompanies each separate intransit shipment of birds, poultry, or pigeons to the port of Anchorage, Alaska;

(5) Import permits issued for multiple shipments of birds, poultry, or pigeons transiting the port of Anchorage, Alaska, will be valid only during the calendar year in which they are issued.

§ 92.2 [Amended]

4. In § 92.2, the first sentence in paragraph (d)(1)(ii) is amended by adding the following phrase before "They are unloaded, . . ." to read "Except for birds, poultry, or pigeons in transit through Anchorage, Alaska, under § 92.4(e) of this part, which are not allowed to be unloaded . . ."

Done at Washington, DC, this 1st day of October, 1987.

B.G. Johnson,

Acting Deputy Administrator, Veterinary Services, Animal and Plant Health Inspection Service.

[FR Doc. 87-23107 Filed 10-5-87; 8:45 am]

BILLING CODE 3410-34-M

---

9 CFR Part 166

[Docket No. 87-121]

Swine Health Protection

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are amending the Swine Health Protection regulations by adding Minnesota to the list of states that have primary enforcement responsibility under the Swine Health Protection Act (Act). Minnesota now meets the requirements for enforcing laws and regulations concerning the treatment of garbage to be fed to swine and the feeding of that garbage to swine. Only in certain emergencies would the Secretary of Agriculture enforce in Minnesota the provisions of the Act and the Federal regulations.

EFFECTIVE DATE: November 5, 1987.

FOR FURTHER INFORMATION CONTACT: Dr. Dale C. Gigstad, Senior Staff Veterinarian, Domestic Programs Support Staff, Veterinary Services, APHIS, USDA, Room 850, Federal Building, Hyattsville, MD 20782, 301-436-8715.

SUPPLEMENTARY INFORMATION:

Background

The "Swine Health Protection" regulations (contained in 9 CFR Part 166 and referred to below as the regulations) were established under the Swine Health Protection Act (contained in 7 U.S.C. 3801 *et seq.*, and referred to below as the Act). The Act and the regulations contain provisions concerning the treatment of garbage to be fed to swine and the feeding of that garbage to swine. These provisions operate as safeguards against the spread of certain swine diseases in the United States.

On July 21, 1987, we published in the **Federal Register** (52 FR 27413-27414, Docket Number 87-048) a document proposing to amend the regulations by adding Minnesota to the list of states that have primary enforcement responsibility under the Act, and by removing it from the list of states that do not have this responsibility. We did not receive any comments, which were required to be postmarked or received on or before August 20, 1987. Based on the rationale set forth in the proposal, we are adopting the provisions of the proposal as a final rule.

Executive Order 12291 and Regulatory Flexibility Act

We are issuing this rule in conformance with Executive Order 12291, and we have determined that it is not a "major rule." Based on information compiled by the Department, we have determined that this rule will have an effect on the economy of less than $100 million; will not cause a major increase in costs or prices for consumers, individual industries, federal, state, or local government agencies, or geographic regions; and will not cause a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this action, the Office of Management and Budget has waived its review process required by Executive Order 12291.

Almost all persons who operate facilities for the treatment of garbage to be fed to swine or who feed or permit the feeding of garbage to swine are considered small entities. However, the amendments made by this document will affect less than one percent of those persons who operate facilities for the treatment of garbage to be fed to swine and less than one percent of those persons who feed, or permit the feeding of, garbage to swine. These amendments will not cause significant changes in the requirements for affected persons.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have

a significant economic impact on a substantial number of small entities.

This rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with state and local officials. (See 7 CFR Part 3015, Subpart V.)

List of Subjects in 9 CFR Part 166

African swine fever, Animal diseases, Foot-and-mouth disease, Garbage, Hog cholera, Hogs, Swine vesicular disease, Vesicular exanthema of swine.

Accordingly, 9 CFR Part 166 is amended as follows:

PART 166—SWINE HEALTH PROTECTION

1. The authority citation for Part 166 continues to read as follows:

Authority: 7 U.S.C. 3802, 3803, 3804, 3808, 3809, 3811; 7 CFR 2.17, 2.51, and 371.2(d).

§ 166.15 [Amended]

2. Paragraph (c) of § 166.15 is amended by adding "Minnesota," immediately after "Michigan,".

3. Paragraph (d) of § 166.15 is amended by removing "Minnesota,".

Done in Washington, DC, this 1st day of October, 1987.

B.G. Johnson,

Acting Deputy Administrator, Veterinary Services, Animal and Plant Health Inspection Service.

[FR Doc. 87-23109 Filed 10-5-87; 8:45 am]

BILLING CODE 3410-34-M

FEDERAL TRADE COMMISSION

16 CFR Part 13

[Dkt. 9194]

Prohibited Trade Practices, and Affirmative Corrective Actions; Buckingham Productions, Inc. et al.

AGENCY: Federal Trade Commission.

ACTION: Consent order.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent order requires, among other things, the Furlong, Pa. marketers of mail-order weight reduction or weight control products, programs or services to cease falsely representing the effectiveness of its programs, products or services without competent and reliable evidence supporting such claims.

DATE: Complaint issued June 24, 1985. Amended Complaint and Order issued July 30, 1987.[1]

FOR FURTHER INFORMATION CONTACT: Michael Dershowitz, FTC/S-4002, Washington, DC 20580, (202) 326-3158.

SUPPLEMENTARY INFORMATION: On Friday, August 15, 1986, there was published in the **Federal Register**, 51 FR 29265, a proposed consent agreement with analysis In the Matter of Buckingham Productions, Inc., dba Rotation Diet Center; Furlong-Elliot Corp., Freedom Center, Inc., Plaza Business Services, Inc., N.F. Rotation, Inc., Rotation-Freedom Diet, Inc., Health and Diet Corp., Inc., and Howard Elliot, for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions or objections regarding the proposed form of order.

A comment was filed and considered by the Commission. The Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered its order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding as to the above noted respondents.

The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13, are as follows: Subpart—Advertising Falsely Or Misleadingly: Section 13.10 Advertising falsely or misleadingly; S.13.170-74 Reducing, non-fattening, low-calorie, etc.; S.13.190 Results; S.13.205 Scientific or other relevant facts. Subpart—Corrective Actions And/Or Requirements: S.13.533 Corrective actions and/or requirements; S.13.533-20 Disclosures; S.13.533-45 Maintain records; S.13.533-45(a) Advertising substantiation. Subpart—Misrepresenting Oneself And Goods-Goods: S.13.1730 Results.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Parts 2 and 284

[Docket No. RM87–34–000]

Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol

Issued: October 2, 1987.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of local seminars.

SUMMARY: The Federal Energy Regulatory Commission is announcing that it is sponsoring a series of local seminars on the implementation of Order No. 500 in Oklahoma City, OK, New Orleans, LA, Houston and Lubbock, TX, from October 19 to 22, 1987. Order No. 500 was issued by the Commission on August 7, 1987, in response to the U.S. Court of Appeals for the D.C. Circuit remand of Order No. 436, a rule which established an open-access transportation program. Order No. 500 was designed to keep gas flowing under transportation arrangements while mitigating the impact of take-or-pay liability that the Court found could occur under Order No. 436.

FOR FURTHER INFORMATION CONTACT: Kenneth F. Plumb, (202) 357–8400, Office of the Secretary, Federal Energy Regulatory Commission, 825 North Captiol Street NE., Washington, DC 20426.

SUPPLEMENTARY INFORMATION: The Federal Energy Regulatory Commission is sponsoring a series of local seminars on the implementation of Order No. 500. The seminars are to be held in Oklahoma City, OK, New Orleans, LA, Houston and Lubbock, TX. The purpose of these seminars is to offer technical guidance to those responsible for their company's implementation of Order No. 500. Commission representatives will clarify the scope of the rule and will explain the operation of its provisions. There will be no charge for the seminars, and no prior registration will be required.

The Commission issued Order No. 500 on August 7, 1987, (52 FR 30334, August 14, 1987) in response to the U.S. Court of Appeals for the D.C. Circuit remand of Order No. 436, a rule which established an open-access transportation program. Order No. 500 was designed to keep gas flowing under transportation arrangements while mitigating the impact of take-or-pay liability that the Court found could occur under Order No. 436.

Order No. 500 became effective with the issuance of the Court's mandate on September 15, 1987. Requirements that producers credit transported volumes against take-or-pay liability are in effect now for new arrangements, and will take effect November 1, 1987, for existing arrangements.

Following are the dates, times, and locations of these seminars:

Monday, October 19, 1987, at 2:00 p.m
Holiday Inn West, 801 South Meridian, Oklahoma City, Oklahoma 73108
Tuesday, October 20, 1987, at 2:00 p.m.
Downtown Howard Johnsons, 330 Loyola Avenue, New Orleans, Louisiana 70112
Wednesday, October 21, 1987, at 1:00 p.m.
Marriott Astrodome Hotel, 2100 South Braeswood, Houston, Texas 77030
Thursday, October 22, 1987, at 9:00 a.m.
Days Inn Civic Center, 500 Avenue Q, Lubbock, Texas 79401

18 CFR Part 4

[Docket No. RM87–32–000; Order No. 480]

Requirements of Landowner Notification Under Section 14 of the Electric Consumers Protection Act

Issued: September 30, 1987.

AGENCY: Federal Energy Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Federal Energy Regulatory Commission is amending its regulations to implement the landowner notification requirements contained in section 14 of the Electric Consumers Protection Act (Act). The Act requires an applicant for a hydroelectric license (other than a new license under section 15 of the Federal Power Act) to make a good faith effort to notify by certfified mail certain property owners and government entities.

EFFECTIVE DATE: Effective November 5, 1987.

FOR FURTHER INFORMATION CONTACT: Thomas J. Lane, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC. 20426, (202) 357–8530.

SUPPLEMENTARY INFORMATION:

I. Introduction

On October 16, 1986, the President signed the Electric Consumers Protection Act of 1986 (ECPA).[1] Section 14 of the Act amends section 9 of the Federal Power Act (FPA)[2] to require an applicant for a hydroelectric license (other than a new license under section 15 of the FPA)[3] to make a good faith effort to notify by certified mail "(1) [a]ny person who is an owner of record of any interest in the property within the bounds of the project, [and] (2) [a]ny Federal, State, municipal or other local governmental agency likely to be interested in or affected by such application." The Commission is amending Part 4 of its regulations to implement this requirement.

II. Background

Under current Commission regulations, an applicant for a preliminary permit or hydroelectric license is required only to identify in the application certain individuals or government entities that might be affected by the project.[4] Once the Commission accepts an application, notice of the proposed project is published once each week for four weeks in a local newspaper.[5]

---

[1] Pub. L. No. 99–495, 100 Stat. 1243 (1986).
[2] 16 U.S.C. 802 (1982).
[3] 16 U.S.C. 808 (1982).
[4] 18 CFR 4.32(a)(2) (1987).
[5] 16 U.S.C. 797(f) (1982).

Additionally, the Commission notifies in writing any State or municipality likely to be interested in or affected by the application.[6]

Concern that publication in a local newspaper sometimes did not notify absent landowners of the proposed project led Congress to add a landowner notification provision to ECPA.[7]

III. Discussion

The Commission is amending its regulations to implement the notification requirements contained in section 14 of ECPA. The new regulations require applicants for licenses other than FPA section 15 licenses to make a good effort to notify by certified mail certain property owners and government entities. An application for such a license must contain a statement that the applicant has made this effort either at the time of or before the filing of the application.

Under the new regulations a good faith effort must be made to so notify every property owner of record of any interest in the property within the bounds of the project. For projects without a specified boundary, this effort must be made to notify any owner of property which would underlie or be adjacent to the project works including any impoundments.

Additionally, the applicant must make this effort to notify the following:

(1) Every county in which any part of the project, and any Federal facilities that would be used by the project, would be located;

(2) Every city, town, or similar local political subdivision:

(a) In which any part of the project, and any Federal facilities that would be used by the project, would be located; or

(b) That has a population of 5,000 or more people and is located within 15 miles of the project dam;

(3) Every irrigation district, drainage district, or similar special purpose political subdivision:

(a) In which any part of the project and any Federal facilities that would be used by the project, would be located; or

(b) That owns, operates, maintains, or uses any project facilities or any Federal facilities that would be used by the project; and

(4) Every other political subdivision or Federal, state, municipal or other local government agency in the general area of the project that there is reason to believe would be interested in, or affected by, the application.[8]

Notification must contain the name, business address, and telephone number of the applicant and a copy of Exhibit G as contained in the application. Exhibit G is a map of the project. The notice must also state that a license application is being filed with the Commission.

IV. Paperwork Reduction Act

The information collection provisions in this final rule are being submitted to the Office of Management and Budget (OMB) for its approval under the Paperwork Reduction Act [9] and OMB's regulations.[10] Interested persons can obtain information on the proposed information collection provisions by contacting the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. (Attention: Ellen Brown, Division of Organization and Management Analysis, (202) 357-5311). Comments on the information collection provisions in this rule may be sent to the Office of Information and Regulatory Affairs of OMB, New Executive Office Building, Washington, DC 20503 (Attention: Desk Officer for the Federal Energy Regulatory Commission).

V. Administrative Findings and Effective Date

The Administrative Procedure Act exempts interpretative rules from both the notice and comment requirements of section 4(b) of the Administrative Procedure Act [11] and the requirement that publication be made thirty days before the effective date of the rule.[12] Since this rule merely implements the notification requirements contained in ECPA it is properly characterized as an interpretative rule. In order to allow OMB sufficient time to review the reporting requirements in this final rule, however, it will become effective November 5, 1987. If OMB has not approved this rule by that date, the Commission will issue a notice temporarily suspending the effective date until OMB has approved the requirements.

List of Subjects in 18 CFR Part 4

Electric power, Reporting and recordkeeping requirements.

In consideration of the foregoing, the Commission amends Part 4, Chapter I, Title 18, Code of Federal Regulations, as set forth below.

By the Commission.

Kenneth F. Plumb,

Secretary.

PART 4—LICENSES, PERMITS, EXEMPTIONS, AND DETERMINATION OF PROJECT COSTS

1. The authority citation for Part 4 is revised to read as follows:

Authority: Federal Power Act, 16 U.S.C. 791a–825r, as amended by the Electric Consumers Protection Act of 1986, Pub. L. No. 99–495; Public Utility Regulatory Policies Act of 1978, 16 U.S.C. 2601–2645 (1982); Department of Energy Organization Act, 42 U.S.C. 7101–7352 (1982); E.O. 12009, 3 CFR 1978 Comp., p. 142, unless otherwise noted.

2. In § 4.32 paragraphs (a)(3) and (a)(4) are redesignated as (a)(4) and (a)(5), paragraph (a)(2)(iv) is revised and a new paragraph (a)(3) is added to read as follows:

§ 4.32 Acceptance for filing or rejection.

(a) * * *

(2) * * *

(iv) Every other political subdivision in the general area of the project that there is reason to believe would likely be interested in, or affected by, the application.

(3)(i) For a license (other than a license under section 15 of the Federal Power Act) state that the applicant has made, either at the time of or before filing the application, a good faith effort to give notification by certified mail of the filing of the application to:

(A) Every property owner of record of any interest in the property within the bounds of the project, or in the case of the project without a specific boundary, each such owner of property which would underlie or be adjacent to any project works including any impoundments; and

(B) The entities identified in paragraph (a)(2) of this section, as well as any other Federal, state, municipal or other local government agencies that there is reason to believe would likely be interested in or affected by such application.

(ii) Such notification must contain the name, business address, and telephone number of the applicant and a copy of the Exhibit G contained in the application, and must state that a

Food and Drug Administration

21 CFR Part 74

[Docket No. 85C-0283]

Confirmation of Effective Date for D&C Violet No. 2

AGENCY: Food and Drug Administration.

ACTION: Final rule; confirmation of effective date.

SUMMARY: The Food and Drug Administration (FDA) is confirming the effective date of June 29, 1987, for the final rule that amended the color additive regulations to provide for the safe use of D&C Violet No. 2 for coloring contact lenses.

EFFECTIVE DATE: Effective date confirmed: June 29, 1987.

FOR FURTHER INFORMATION CONTACT: Marvin D. Mack, Center for Food Safety and Applied Nutrition (HFF-335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of May 27, 1987 (52 FR 19719), FDA amended the color additive regulations by adding § 74.3602 (21 CFR 74.3602) to provide for the safe use of D&C Violet No. 2 for coloring contact lenses.

FDA gave interested persons until June 26, 1987, to file objections or requests for a hearing on this final rule. The agency received no objections or requests for a hearing. Therefore, FDA concludes that the final rule published in the **Federal Register** of May 27, 1987, should be confirmed.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Parts 203 and 234

[Docket No. R-87-1296; FR-2197]

Refinancing of FHA Insured Single Family Mortgages

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Final rule.

SUMMARY: This rule adopts as final (without change) an earlier interim rule revising HUD regulations concerning the refinancing of FHA-insured single family mortgages. The rule: (1) Extends the maximum term allowable on a refinancing mortgage to the unexpired term of the existing mortgage plus twelve years, but not exceeding thirty years and (2) extends the authority to insure refinancing mortgages to FHA-insured mortgages covering units in condominium projects.

EFFECTIVE DATE: Under section 7(o)(3) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(o)(3)), this final rule cannot become effective until after the first period of 30 calendar days of continuous session of Congress which occurs after the date of the rule's publication. HUD will publish a notice of the effective date of this rule following expiration of the 30-session-day waiting period. Whether or not the statutory waiting period has expired, this rule will *not* become effective until HUD's separate notice is published announcing a specific effective date.

FOR FURTHER INFORMATION CONTACT: Morris Carter, Director, Single Family Development Division, Department of Housing and Urban Development, Room 9270, 451 Seventh Street, SW., Washington, DC 20410, telephone (202) 755-6720. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: The recent trend toward lower mortgage interest rates made it advantageous for many FHA mortgagors who purchased their homes when interest rates were higher to refinance their mortgage loans. Such refinancings are also advantageous to HUD, since a lowering of monthly mortgage payments based on lower interest charges decreases the risk of default and, consequently, the risk exposure of the FHA insurance funds. In order to take better advantage of this situation HUD published an interim rule in the **Federal Register** on February 10, 1987 (52 FR 4138). The interim rule revised HUD's single family refinancing policies in an effort to make it possible for a larger number of FHA mortgagors to take advantage of current market conditions. This rule adopts as final, without change, the earlier interim rule.

Background and Description of Rule

HUD's authority to insure mortgages given to refinance single family insured mortgages, where the refinancing mortgage does not meet all eligibility requirements, is derived from section 223(a)(7) of the National Housing Act. The refinancing provisions in section 223(a)(7) were enacted to authorize the Department to insure mortgages given to refinance existing FHA insured mortgages, when the refinancing mortgages do not meet all of the requirements of the section of the National Housing Act under which the mortgages were originally insured. After enactment of section 223(a)(7), HUD issued a regulation (24 CFR 203.43(b)(7)), the refinancing provisions of which provide that the Department may accept a mortgage for insurance if—

> Given to refinance an existing mortgage insured under the (National Housing) Act. The amount of the refinancing mortgage shall not exceed the original principal amount of the existing mortgage. It shall have a maturity limited to the unexpired term of the existing mortgage.

The basic statute, section 223(a)(7) of the National Housing Act, also provided that—

> In any case involving the refinancing of a loan in which the Secretary determines that the insurance of a mortgage for an additional term will inure to the benefit of the applicable insurance fund, taking into consideration the outstanding insurance liability under the existing insured mortgage, such refinancing mortgage may have a term not more than twelve years in excess of the unexpired term of such existing insured mortgage.

This provision for an increased mortgage term was not incorporated in the HUD regulation—24 CFR 203.43(b)(7). In the interim rule, the Department did incorporate the statutory provision—with the addition of safeguards relating to review of the mortgagor's prior payment record and assurances that the refinancing will result in lower monthly payments. The

change was based upon HUD's findings, stated earlier, concerning current mortgage market trends and their probable impact upon FHA mortgagors and the FHA insurance funds.

The interim rule also changed the maximum mortgage amount of the refinancing mortgage so that it is the lesser of the original principal amount for the existing mortgage or the unpaid principal balance of such mortgage plus closing costs as approved by the Commissioner. Previously, 24 CFR 203.43(b)(7) provided that the mortgage amount of the refinancing mortgage shall not exceed the original principal amount of the existing mortgage.

In the interim rule; previous § 203.43(b)(7) was removed and a new § 203.43(c), containing the provisions referred to above, was substituted. In addition, the rule amended 24 CFR Part 234 (Condominium Ownership Mortgage Insurance) to authorize the refinancing of insured condominium unit mortgages under the same terms and conditions. With respect to the other large category of FHA single family mortgages that falls outside Part 203—namely section 221(d)(2) mortgages covering low-cost homes—it should be noted that 24 CFR 221.1 incorporated by reference the refinancing provisions contained in 24 CFR 203.43 as revised by the interim rule. Through similar incorporations by reference, other miscellaneous single family programs are also covered. It should be noted, however, that the rule was *not* made applicable to mortgages insured under section 235 of the National Housing Act (see 24 CFR 235.1).

The Department recognizes that the rule will not be capable of being applied to Graduated Payment Mortgages and Modified Graduated Payment Mortgages until their negative amortization has been paid down to the original principal amount. "Original principal amount" is not to be equated with the "maximum principal amount" permitted in the GPM and modified GPM programs.

Also, the rule makes clear that any refund of a one-time MIP which was included in the amount of an existing mortgage shall be deducted in determining that mortgage's original principal amount and unpaid principal balance, but the amount of one-time MIP (if any) associated with the refinancing mortgage may be included in that mortgage.

Public Comments on Interim Rule

At the time of publication, the Department solicited public comments for a 60-day period on the interim rule. Three public comments were received—National Association of Homebuilders, United States League of Savings Institutions and The Mortgage Bankers Association of America. All commenters approved on the rule as drafted and had no recommendations for changes in the regulatory text.

The National Association of Homebuilders, did, however, express some disappointment over a current HUD policy which disallows financing of Commissioner-approved closing costs under the new regulation. The Department has determined that since there is no appraisal/underwriting performed which would serve to support an increased mortgage amount, the Government's interests are better served by not increasing the basic mortgage amount in cases where such underwriting is not carried out.

The U.S. League of Savings Institutions noted that there was some confusion within its membership concerning the coverage of the interim rule. Some mortgagees did not realize that the interim rule only addressed refinancings that do not require a new appraisal and new underwriting. In other words, the mortgage term and mortgage amount limitations of the interim rule do not apply to FHA refinancings where a new appraisal and underwriting are utilized. Such loans can usually be processed to higher loan-to-value ratios with the closing costs and discounts being included in the mortgage.

At present, the Department provides for two types of mortgage refinancing transactions that do not require regular mortgage credit underwriting. They are frequently referred to as "streamlined refinancings". These two types of streamlined finance transactions involve the refinancing of an FHA insured mortgage either *without* an appraisal (as under the interim rule) or *with* an appraisal but no full underwriting. In neither case may the mortgagor take "cash out" as a part of the refinancing.

In addition, HUD insures mortgages on other refinance transactions where there is an appraisal and full underwriting of the mortgagor. In such cases owner-occupant mortgages may take cash from the transaction, provided the mortgage amount does not exceed 85 percent of the value of the property.

Procedural Requirements

This rule does not constitute a "major rule" as that term is defined in section 1(b) of Executive Order 12291 on Federal Regulation issued by the President on February 17, 1981. Analysis of the proposed rule indicates that it does not: (1) Have an annual effect on the economy of $100 million or more; (2) cause a major increase in cost or prices for consumer, individual industries, Federal, State or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations in 24 CFR Part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969. The Finding of No Significant Impact is available for public inspection and copying during regular business hours in the Office of the Rules Docket Clerk, Office of the General Counsel, Room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410.

Under 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the Undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities. While the rule will have some impact on those mortgagors who choose to refinance their existing FHA-insured mortgages, and on their mortgagees, the rule's impact on individual borrowers and lenders should not be economically substantive, and in all instances its impact will be in accord with existing contractual rights reflected in these parties' mortgage loan contracts.

This rule was listed as item H–8–86 [Sequence Number 922] under the Office of Housing in the Department's Semiannual Agenda of Regulations published on April 27, 1987 (52 FR 14362, 14380) under Executive Order 12291 and the Regulatory Flexibility Act.

The FHA home mortgage insurance and condominium unit mortgage insurance programs are listed in the Catalog of Federal Domestic Assistance as 14.117, Mortgage Insurance—Homes and 14.133 Mortgage Insurance—Purchase of Units in Condominiums.

List of Subjects

24 CFR Part 203

Mortgage insurance.

24 CFR Part 234

Condominiums, Mortgage insurance, Homeownership, Projects, Units.

Accordingly, the interim rule on Refinancing of FHA Insured Single Family Housing promulgated on February 10, 1987 (52 FR 4138) is adopted as final without change.

BILLING CODE 4210-27-M

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Parts 221, 234, and 251

[Docket No. R-87-1339; FR-2222]

Multifamily Leasehold Projects; Minimum Lease Term Eligibility

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Final rule.

SUMMARY: This rule implements the 1980 statutory change which lowers the minimum lease term for certain multifamily leaseholds projects to permit HUD-insured mortgages on leasehold with leases having a period of not less than 10 years to run beyond the maturity date of the mortgage. Before the statutory change, a first mortgage on real estate with a leasehold could be insured under the National Housing Act only if the lease has a period of *not less than* 50 years to run from the date that the mortgage was executed. (For administrative reasons, the Department set the limit generally at not less than 75 years.)

EFFECTIVE DATE: Under section 7(o)(3) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(o)(3)), this final rule cannot become effective until after the first period of 30 calendar days of continuous session of Congress which occurs after the date of the rule's publication. HUD will publish a notice of the effective date of this rule following expiration of the 30-session-day waiting period. Whether or not the statutory waiting period has expired, this rule will *not* become effective until HUD's separate notice is published announcing a specific effective date.

FOR FURTHER INFORMATION CONTACT: Frank Brown, Deputy Director, Office of Multifamily Housing Development, Room 6134, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410. Telephone: (202) 755-6500. (This is not a toll-free number.) Morris Bourne, Director, Office of Multifamily Housing Management, Room 6158, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410. Telephone (202) 426-3968. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: This rule permits HUD-insured mortgages on leaseholds with leases having a period of not less than 10 years to run beyond the maturity date of the mortgage. Current regulations require that such leaseholds have a period of not less than 75 years to run from the date the mortgage was executed.

Section 306 of the Housing and Community Development Act of 1980, Pub. L. 96-399, amended the definition of "mortgage" in section 201(a) of the National Housing Act, 12 U.S.C. 1707, by inserting, in lieu of "having a period of not less than fifty years to run from the date the mortgage was executed", the language "having a period of not less than ten years to run beyond the maturity date of the mortgage". Because of the discretion afforded the Department under the terminology "not less than" and for administrative reasons concerning such problems as financing and mortgage extensions, the regulations published by the Department before the 1980 amendment required a lease term of not less than 75-years from the date of mortgage execution. The 75-year term was also set because of the Department's assessment that value often is a direct function of the remaining term of the lease. The Department has determined, however, that the 75-year restriction set because of the aforementioned underwriting concerns is no longer needed. Experience has shown that the greatest risk of foreclosure is during the early years of a mortgage and that there have been very few incidences of failure in the later years of a mortgage.

This regulatory change to reduce the required leasehold period will make insured mortgage financing more readily available in areas where leaseholds are prevalent. Renegotiations of leases solely to comply with the 50-year (or 75-year) requirement will be unnecessary. The change also provides the Department with some flexibility in disposing of Secretary-held properties. For example, ground leases will not have to be renegotiated before the property's sale. This amendment also makes HUD's program consistent with those of the VA and FNMA, whose policies require the term of a lease to exceed the mortgage term by 14 and 10 years, respectively.

This rule amends Part 221—Low Cost and Moderate Income Mortgage Insurance, Part 234—Condominium Ownership Mortgage Insurance (Projects-Conversion Individual Sales Units), and Part 251—Coinsurance for the Construction or Substantial Rehabilitation of Multifamily Housing Projects. Corresponding regulations changes were made to the single family mortgage insurance program—Parts 203, 213 (Individual Properties), and 234 (Individually Owned Units)—on May 21, 1984 (49 FR 21317). The May 21, 1984 change to Part 203 affected a number of other mortgage insurance programs because of their adoption of Part 203 definitions or eligibility requirements (e.g., Parts 220 (Homes), 222, 226,228, 233, 235, and 237). The majority of the remaining mortgage insurance programs (e.g., Parts 207, 213 (Projects), 220 (Projects), 224, 225, 227, 229, 231, 232, 238, 240, 241, 242, 244, and 255) are not affected by the 1980 statutory change to the definition of "mortgage" because they either adopt the definition of "mortgage" as stated in section 207 of the National Housing Act, which has not been amended, or they establish their own specific eligibility requirements.

Sections 221.544(a)(3), 234.520(a)(2)(ii), and 251.501(a)(3) are amended to permit HUD-insured mortgages on leaseholds with leases having a period of not less than 10 years to run beyond the maturity date of the mortgage. To make necessary conforming changes and to avoid subjecting leases executed by government agencies, Indians or Indian Tribes to more stringent insurance requirements than leases contemplated in the amended sections, §§ 221.544(a)(4), 234.520(a)(2)(iii) and 251.501(a)(4) are removed by this rule.

The Secretary has determined that notice and prior public procedure are unnecessary and contrary to the public interest and that good cause exists for making this rule effective as soon after publication as possible because this rule conforms with a statutory change, the legislative history clearly reflects the Congress' wish that the Department's programs be made consistent with those of VA and FNMA, and the effect of the rule will be to make the Department's insurance programs available for use with a wider range of mortgaged properties.

Findings

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations in 24 CFR Part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332. The Finding of No Significant Impact is available for public inspection and copying during regular business hours in the Office of the Rules Docket Clerk, Room 10276, 451 Seventh Street SW., Washington, DC 20410.

This rule does not constitute a "major rule" as that term is defined in section

1(b) of the Executive Order on Federal Regulation issued by the President on February 17, 1981. Analysis of the rule indicates that it does not: (1) Have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Under the provisions of 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the Undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities. While the changes made by this rule affect mortgagors and owners of leased fees, some of whom may constitute small entities, there is not likely to be any significant economic impact on them. By reducing HUD requirements regarding lease terms, the rule makes it easier, and perhaps less costly, for mortgagors to negotiate lease terms.

This rule was listed as item number 961 in the Department's Semiannual Agenda of Regulations published on April 27, 1987 (52 FR 14362) under Executive Order 12291 and the Regulatory Flexibility Act.

The Catalog of Federal Domestic Assistance program numbers are 14.112, 14.124, 14.126, 14.133, 14.134, 14.135, 14.137, 14.138, and 14.139.

List of Subjects

24 CFR Part 221

Condominiums, Low and moderate income housing, Mortgage insurance, Displaced families, Single family housing, Projects, Cooperatives.

24 CFR Part 234

Condominiums, Mortgage insurance, Homeownership, Projects, Units.

24 CFR Part 251

Mortgage insurance, Coinsurance of multifamily mortgages.

Accordingly, Chapter II of Title 24 of the Code of Federal Regulations is amended as follows:

PART 221—LOW COST AND MODERATE INCOME MORTGAGE INSURANCE

1. The authority citation for Part 221 is revised to read as follows:

Authority: Secs. 211 and 221, National Housing Act, 12 U.S.C. 1715b, 1715*l*; section 221.544(a)(3) is also issued under sec. 201(a) of the National Housing Act, 12 U.S.C. 1707(a).

2. Section 221.544 is amended by removing paragraph (a)(4), and by revising paragraph (a)(3) to read as follows:

§ 221.544 Eligibility of property.

(a) * * *

(3) Under a lease having a period of not less than 10 years to run beyond the maturity date of the mortgage.

* * * * *

PART 234—CONDOMINIUM OWNERSHIP MORTGAGE INSURANCE

3. The authority citation for Part 234 is revised to read as follows:

Authority: Secs. 211 and 234, National Housing Act, 12 U.S.C. 1715b, 1715y; section 234.520(a)(2)(ii) is also issued under sec. 201(a) of the National Housing Act, 12 U.S.C. 1707(a).

4. Section 234.520 is amended by removing paragraph (a)(2)(iii) and by revising paragraph (a)(2)(ii) to read as follows:

§ 234.520 Eligibility of property.

(a) * * *

(2) * * *

(ii) A period of not less than 10 years to run beyond the maturity date of the mortgage.

* * * * *

PART 251—COINSURANCE FOR THE CONSTRUCTION OR SUBSTANTIAL REHABILITATION OF MULTIFAMILY HOUSING PROJECTS

5. The authority citation for Part 251 is revised to read as follows:

Authority: Sec. 7(d), Department of Housing and Urban Development Act, 42 U.S.C. 3535(d); sec. 244, National Housing Act, 12 U.S.C. 1715z(9); section 251.501(a)(3) is also issued under sec. 201(a) of the National Housing Act, 12 U.S.C. 1707(a).

6. Section 251.501 is amended by removing paragraph (a)(4) and by revising paragraphs (a)(2) and (3) to read as follows:

§ 251.501 Mortgage requirements—real estate.

(a) * * *

(2) Under a renewable lease for not less than 99 years; or

(3) Under a lease having a period of not less than 10 years to run beyond the maturity date of the mortgage.

* * * * *

Dated: September 28, 1987.

Thomas T. Demery,

Assistant Secretary for Housing-Federal Housing Commissioner.

24 CFR Part 888

[Docket No. N-87-1729; FR-2392]

Section 8 Housing Assistance Payments Program; Fair Market Rents for New Construction and Substantial Rehabilitation; Consolidation of Flint and Saginaw Market Areas

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Final notice.

SUMMARY: This Notice established that Flint and Saginaw, Michigan, shall be consolidated into one market area known as "Flint" because of the historical duplication of the Fair Market Rents (FMRs) for these two areas. It also establishes that the FMRs that were set forth in the August 7, 1986 final notice for the Flint market area shall be the FMRs for the newly consolidated Flint market area.

EFFECTIVE DATE: October 6, 1987.

FOR FURTHER INFORMATION CONTACT: Edward M. Winiarski, Chief Appraiser, Valuation Branch, Technical Support Division, Office of Insured Multifamily Housing Development, 451 Seventh Street, SW., Washington, DC 20410, (202) 426-7624. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: In researching previous Fair Market Rents (FMRs) for the Flint and Saginaw market areas, the Department has discovered that for several years prior to 1985 the FMRs have been the same for both areas. The published FMRs for the Flint market area, effective October 3, 1985, reflected a special request by HUD's Detroit Office to increase the Flint market area rents; however, the Saginaw market was inadvertently overlooked at that time. Therefore, this Notice established that because of the historical coinciding of the FMRs for the two market areas, the two market areas designated as Flint and Saginaw shall be consolidated and known as the "Flint" market area for purposes of establishing FMRs.

In keeping with section 8(c)(1) of the U.S. Housing Act of 1937 (42 U.S.C. 1437f), which requires the Secretary to establish FMRs periodically, but not less frequently than annually, a final notice

announcing Fiscal Year 1986 FMRs for the Section 8 Substantial Rehabilitation Program was published on August 7, 1986, at 51 FR 28486. The August 7, 1986 final notice was issued following publication of the Department's proposed FMRs on April 22, 1986, at 51 FR 15174.

As a follow-up to the consolidation of the Flint and Saginaw market areas, below is the schedule of FMRs for Fiscal Year 1986 for the newly designated "Flint" area. It reiterates the schedule as set forth in the August 7, 1986 final notice for the Flint area with only a minor deviation for an "elevator 2–4 sty, O bedroom" unit which is being raised from $321 to $326. This five dollar raise for this category is being made to conform with the logical progression of FMRs from a "walkup" to an "elevator" type unit.

Other Information

HUD regulations in 24 CFR Part 50, implementing section 102(2)(C) of the National Environmental Policy Act 1969, contain categorical exclusions from their requirements for the actions, activities and programs specified in § 50.20. Since the FMRs announced in this Notice are within the exclusion set forth in § 50.20(1), no environmental assessment is required, and no environmental finding has been prepared.

The Catalog of Federal Domestic Assistance Program number and title for the activities covered by this Notice are 14.156, Lower Income Housing Assistance Program (Section 8).

Dated: September 28, 1987.

Thomas T. Demery,

Assistant Secretary for Housing—Federal Housing Commissioner.

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 351 and 382

[DoD Directive 5134.1]

Under Secretary of Defense (Acquisition)

AGENCY: Office of the Secretary, DoD.

ACTION: Final rule.

SUMMARY: This rule removes 32 CFR Part 351 (DoD Directive 5129.1) in its entirety. It assigns responsibilities, functions, relationships, and authorizes to the Under Secretary of Defense for Acquisition because of an agency reorganization.

EFFECTIVE DATE: February 10, 1987.

FOR FURTHER INFORMATION CONTACT: Mr. Howard Becker, Office of the Assistant Secretary of Defense (Comptroller), Pentagon, Washington, DC 20301, telephone (202) 697–0709.

SUPPLEMENTARY INFORMATION:

List of Subjects in 32 CFR Part 382

Organization and functions (Government agencies).

PART 351—[REMOVED]

Accordingly, 32 CFR Part 351 is removed in its entirety.

Accordingly, Title 32 is amended to add Part 382 to Subchapter R as follows:

PART 382—UNDER SECRETARY OF DEFENSE (ACQUISITION)

Sec.
382.1 Purpose.
382.2 Definitions.
382.3 Responsibilities.
382.4 Functions.
382.5 Authorities and relationships.

Appendix A—Delegations of Authorities

Authority: 10 U.S.C. 133.

§ 382.1 Purpose.

Pursuant to title 10, United States Code this part assigns responsibilities, functions, relationships, and authorities as prescribed herein, to the Under Secretary of Defense (Acquisition) (USD(A)).

§ 382.2 Definitions.

(a) *Department of Defense Acquisition System.* A single uniform system whereby all equipment, facilities, and services are planned, designed, developed, acquired, maintained, and disposed of within the Department of Defense. The system entails establishing policies and practices that govern acquisitions, determining and prioritizing resource requirements, directing and controlling the process, contracting, and reporting to Congress.

(b) *DoD Components.* The Office of the Secretary of Defense (OSD); the Military Departments; the Organization of the Joint Chiefs of Staff (OJCS); the Unified and Specified Commands; the Office of the Inspector General, Department of Defense (OIG, DoD); Defense Agencies; and DoD Field Activities.

§ 382.3 Responsibilities.

The *Under Secretary of Defense for Acquisition* (USD(A)) is the principal staff assistant and advisor to the Secretary of Defense for all matters relating to the acquisition system; research and development; production; logistics; command, control, communications, and intelligence activities related to acquisition; military construction; and procurement.

(a) The *USD(A)* shall:

(1) Serve as the Defense Acquisition Executive with responsibility for supervising the performance of the entire DoD acquisitions system in accordance with the policies, provisions, and authorities contained in DoD Directive 5000.1[1] and Office of Management and Budget (OMB) Circular No. A–109.

[1] Copies may be obtained if needed from the U.S. Naval Publications and Forms Center, Attn: Code 301, 5801 Tabor Avenue, Philadelphia, PA 19120.

(2) Develop policy for acquisition plans and strategies, validate program acquisition requirements, and develop acquisition program guidance;

(3) Set policy for acquisition matters, including contracting, research and development, production, construction, logistics, developmental testing, procurement, and training and career development of acquisition personnel;

(4) Set policy for administrative oversight of defense contractors;

(5) Serve as the DoD Procurement Executive, with responsibilities as prescribed in Executive Order (E.O.) 12352 and 41 U.S.C. 401–419;

(6) The IC, DoD shall coordinate audit and oversight of contractor activities with the USD(A) to prevent duplication of effort within the Department and unnecessary duplicative oversight of contractors.

(7) Serve as the National Armaments Director and Secretary of Defense representative to the Four Power Conference. Develop memoranda of agreements and memoranda of understandings with friendly and allied nations relating to acquisition matters; and

(8) Chair the Defense Acquisition Board (DAB) assisted by an integrated structure of councils and committees that relate to the acquisition process.

(b) For each assigned area, the *USD(A)* shall:

(1) Direct planning and special studies to analyze and evaluate the technical, economic, and military worth of programs in the acquisition system;

(2) Develop policies, conduct analyses, provide advice, make recommendations, and issue guidance on DoD plans and programs;

(3) Develop systems and standards for the administration and management of approved DoD acquisition plans and programs;

(4) Develop plans, programs, actions, and taskings to ensure adherence to DoD policies and national security objectives, and to ensure that programs and systems are designed to accommodate cross-Service operational requirements and promote modernization, consistent with the readiness, sustainability, and efficiency of the Armed Forces of the United States and its allies;

(5) Review and evaluate recommendations on requirements and priorities;

(6) Review and evaluate DoD Component plans and programs to ensure adherence to approved policies, standards, and resource planning guidance;

(7) In conjunction with the Assistant Secretary of Defense (Comptroller) ASD(C)) and Director of Program Analysis and Evaluation, review proposed resource programs, formulate budget estimates, recommend resource allocations, and monitor the implementation of approved resource programs;

(8) Fulfill planning, programming, and budgeting activities relating to USD(A) responsibilities;

(9) Promote coordination, cooperation, and mutual understanding of all matters related to assigned activities, both inside and outside the Department of Defense;

(10) Serve as primary focal point and principal spokesman for the Department of Defense and serve on boards, committees, and other groups pertaining to assigned functional areas, and represent the Secretary of Defense on USD(A) matters outside the Department of Defense;

(11) Develop and maintain information management and reporting systems; and

(12) Perform such other duties as the Secretary of Defense may prescribe.

§ 382.4 Functions.

The USD(A) shall carry out the responsibilities described in § 382.3, for the following functional areas:

(a) Acquisition management.

(b) Basic and applied research, design and engineering, and the development of weapon systems.

(c) Command, control, communications, and intelligence programs, systems, and activities related to acquisition.

(d) Logistics management, to include supply systems, spares program management, items standardization, transportation, energy, warehousing, distribution, and related activities.

(e) Procurement activities.

(f) Scientific and technical information.

(g) Production and manufacturing.

(h) Industrial base resources and productivity.

(i) Force modernization.

(j) Developmental test and evaluation, as defined in DoD Directive 5000.2,[2] and review and approval of the Test and Evaluation Master Plan.

(k) Environmental services.

(l) Assignment and reassignment of research and engineering and acquisition responsibility for programs, systems, and activities.

(m) Codevelopment, coproduction, logistics support, and research interchange with friendly and allied nations, in coordination with the Under Secretary of Defense for Policy.

(n) Installation management.

(o) Construction, including construction funded by host nations under the North Atlantic Treaty Organization (NATO) Infrastructure program.

§ 382.5 Authorities and relationships.

(a) The USD(A) shall take precedence in the Department of Defense on acquisition matters after the Secretary and Deputy Secretary of Defense. On all other matters, the USD(A) shall take precedence after the Secretary and Deputy Secretary of Defense and the Secretaries of the Military Departments.

(b) The USD(A) shall direct the Secretaries of the Military Departments and Heads of other DoD Components on policy, procedure, and execution of the acquisition system. This includes responsibility for the development, management, supervision, and evaluation of acquisition systems and processes.

(c) The Secretary/Deputy Secretary of Defense shall make decisions on Acquisition milestones and resource matters, based on recommendations by the USD(A). The USD(A) shall prepare the documentation that reflects the Secretary/Deputy Secretary of Defense milestone decisions. These decisions shall be executed through the USD(A) for implementation by the Heads of DoD Components.

(d) In the performance of assigned functions, the USD(A) shall:

(1) Exercise direction, authority, and control over activities reporting directly to that official. These include:

(i) The Director of Defense Research and Engineering;

(ii) The Assistant Secretary of Defense (Research and Technology);

(iii) The Assistant Secretary of Defense (Production and Logistics);

(iv) Acquisition-related activities of the Assistant Secretary of Defense (Command, Control, Communications, and Intelligence);

(v) The Assistant to the Secretary of Defense (Atomic Energy);

(vi) The Director of Small and Disadvantaged Business Utilization; and

(vii) The Defense Advanced Research Projects Agency, the Defense Communications Agency, the Defense Logistics Agency, the Defense Mapping Agency, the Defense Nuclear Agency, and the Defense System Management College.

(2) Provide technical guidance for utilization of the Electromagnetic Compatibility Analysis Center.

(3) Provide policy guidance, goal setting, and management supervision for the Logistics Systems Analysis Office,

[2] See footnote 1 to § 382.3(a)(1).

Defense Logistics Studies Information Exchange, Defense Management Journal, Defense Materiel Specifications and Standards Office, Product Engineering Service Office, Weapon Support Improvement and Analysis Office, Defense Housing Management Systems Office, Defense Base Operations Analysis Office, and utilization of Federally Funded Research and Development Centers (FFRDCs).

(4) Use existing facilities and services of the Department of Defense and other Federal Agencies, whenever practicable, to avoid duplication and to achieve an appropriate balance among modernization, readiness, sustainability, efficiency, and economy.

(e) The USD(A) shall also:

(1) Issue DOD Instruction DOD publications, and one-time directive-type memoranda, consistent with DOD 5025.1-M,[3] that implement policies approved by the Secretary of Defense in the functions assigned to the USD(A). Instructions to Unified and Specified Commands shall be issued through the Chairman of the Joint Chiefs of Staff (CJCS).

(2) Obtain reports, information, advice, and assistance, consistent with DOD Directive 7750.5,[4] as necessary in carrying out assigned functions.

(3) Communicate directly with the Heads of DOD Components. Communications to Commanders of the Unified and Specified Commands shall be coordinated through the CJCS.

(4) Establish arrangements for DOD participation in nondefense governmental programs for which the USD(A) is assigned primary DOD cognizance.

(5) Communicate with other Government Agencies, representatives of the legislative branch, and members of the public, as appropriate, in carrying out assigned functions.

(6) Coordinate and exchange information with other OSD and DOD officials exercising collateral or related responsibilities.

(7) Exercise the delegations of authority contained in the Appendix of this part.

(f) Other OSD officials and Heads of DOD Components shall coordinate with the USD(A) on all matters related to authorities, responsibilities, and functions assigned in this part.

Appendix A—Delegations of Authority

Pursuant to the authority vested in the Secretary of Defense, and subject to his direction, authority, and control, and in accordance with DOD policies, Directives, and Instructions, the USD(A), or in the absence of the USD(A), the person acting for the USD(A) is hereby delegated authority to exercise, within his assigned responsibilities and functional areas, all authority of the Secretary of Defense derived from statute, executive order, and interagency agreement, except where specifically limited by statute or executive order to the Secretary of Defense, to include but not limited to:

1. Exercise all authorities delegated to the Secretary of Defense by the International Trade Commission, Department of Commerce BDSA Del. No. 1, as amended (DOD Directive 4405.6,[5] July 8, 1986).

2. Act for the Secretary of Defense in the exercise of extraordinary contractual action authority under Pub. L. 85-804—an Act to authorize the making, amendment, and modification of contracts to facilitate the national defense, August 28, 1958, in accordance with E.O. 10789, November 14, 1958, as amended, and Part 50 of the Federal Acquisition Regulation.

3. Make Secretarial determinations, justifications, and approvals on behalf of the Defense Advanced Research Projects Agency (DARPA), Defense Communications Agency (DCA), Defense Logistics Agency (DLA), Defense Mapping Agency (DMA), and the Defense Nuclear Agency (DNA) under Title 10, United States Code, with the authority to redelegate to the Directors of those Agencies as appropriate.

4. Act for The Secretary of Defense in the establishment and granting of waivers under the Buy American Act (41 U.S.C. 10a-10b).

5. Act for the Secretary of Defense on delegations of authority to him by the U.S. Trade Representative to waive the prohibition against procurement from certain countries, pursuant to Title 3, Pub. L. 96-39, Trade Agreements Act of 1979 (19 U.S.C. 2511 *et. seq.*), and E.O. 12260, July 26, 1979.

6. Act for the Secretary of Defense in the exercise of authority delegated by the Administrator of General Services to dispose of surplus personal property and to waive prescribed demilitarization requirements under DoD Directive 4160.21,[6] December 5, 1980.

7. Make determinations with respect to the donation of surplus personal property to educational activities of special interest to the Armed Forces of the United States as prescribed in DoD Directive 4160.25,[7] April 30, 1984.

8. Act for, and exercise the powers of, the Secretary of Defense concerning requests for waiver of the navigation and vessel inspection laws of the United States under Pub. L. 891, 81st Congress, 2nd Session, December 27, 1950, (64 Stat. 1120), except on those matters that have been delegated by the Secretary of Defense to the Secretary of the Army.

9. Make recommendations to the Department of Energy in connection with facilities for transmission of electric energy and natural gas across borders of the United States, pursuant to the authority given the Secretary of Defense in E.O. 10485, September 3, 1953, as amended by E.O. 12038, February 3, 1978.

10. Act for the Secretary of Defense in the field of transportation and traffic management under section 201(a), Title 11, of the Federal Property and Administrative Services Act of 1949, June 30, 1949, as amended (40 U.S.C. 481(a)) (DoD Directive 5126.9,[8] June 18, 1979).

11. Act for the Secretary of Defense as the DoD claimant to other designated Executive Departments and Agencies for petroleum requirements and allocations in an emergency (DoD Directive 4140.25,[9] May 15, 1980).

12. Exercise all responsibilities and authorities of the Secretary of Defense under Title 10, United States Code, section 2404 with respect to the acquisition of petroleum.

13. Act for the Secretary of Defense in the implementation of OMB Circular No. A-109, "Major System Acquisitions," April 5, 1976.

14. Make the determination required by Title 50, United States Code, section 1512(1), concerning transportation or testing of any lethal chemical or any biological warfare agent.

15. Submit the annual report to Congress on funds obligated in the chemical warfare and biological defense research programs, required by Title 50, United States Code, section 1511.

16. Act for the Secretary of Defense for ensuring compliance with Pub. L. 92-463, the Federal Advisory Committee Act (5 U.S.C. Appendix), and make written determinations for conduct of all closed meetings of Federal Advisory Committees under his cognizance as prescribed by section 10(d) of the Act, (5 U.S.C. Appendix, 10(d)).

17. Act for the Secretary of Defense as the primary OSD interface with the Defense Policy Advisory Committee on Trade.

18. Act for the Secretary of Defense to make appropriate supporting determinations execute leases under title 10, United States Code, section 2667.

19. Act for the Secretary of Defense in the implementation of OMB Circular A-76, "Performance of Commercial Activities," as revised, August 4, 1983.

The USD(A) may redelegate these authorities, as appropriate, except as otherwise specifically indicated above or prohibited by law or regulation.

Linda M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 250

[SWH-FRL 3089-7]

Guideline for Recovered Materials Content in Paper Products Procured by the Federal Government

AGENCY: U.S. Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) today is issuing a guideline for Federal procurement of paper and paper products containing postconsumer recovered materials. The guideline implements section 6002 of the Resource Conservation and Recovery Act of 1976, as amended (RCRA). Section 6002 states that if an agency uses appropriated Federal funds to purchase certain designated items, such items must contain the highest percentage of recovered materials practicable, and in the case of paper, postconsumer recovered materials. EPA is required to designate items for procurement and to issue guidelines to assist procuring agencies in complying with the section 6002 procurement provisions.

This guideline designates paper and paper products as items for which the procurement requirements of RCRA section 6002 apply. The guideline also presents recommendations for carrying out these procurement requirements, as well as the requirements to revise specifications to allow use of post consumer recovered materials to the maximum extent possible.

Elsewhere in today's **Federal Register**, EPA is proposing amendments to this guideline to recommend specific minimum content standards, a definition of "waste paper," and recommendations regarding data gathering to meet the annual review and monitoring requirement. These proposed amendments respond to comments received by EPA on the paper guideline proposed on April 9, 1985 (50 FR 14076).

DATE: The effective date of the guideline is November 5, 1987.

ADDRESS: The public docket for this guideline may be inspected in Room MLG-100, U.S. EPA, 401 M Street SW., Washington, DC from 9:00 am to 4:00 pm, Monday through Friday, excluding holidays. To review docket materials, the public must make an appointment by calling (202) 475-9327. A maximum of 50 pages of material may be copied from any regulatory docket at no cost. Additional copies cost 20 cents per page.

FOR FURTHER INFORMATION CONTACT: RCRA Hotline, toll-free, at (800) 424-9346 or at (202) 382-3000. For technical information, contact William Sanjour, Office of Solid Waste, WH-563, U.S. EPA, 401 M Street SW., Washington, DC 20460, telephone: (202) 382-4502.

I. Authority

This guideline is being issued under the authority of sections 2002(a) and 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended, 42 U.S.C. 6912(a) and 6962.

II. Introduction

A. Purpose and Scope

The Environmental Protection Agency (EPA) today is issuing the second of a series of guidelines designed to encourage the use of products containing materials recovered from solid waste. Section 6002 of the Resource Conservation and Recovery Act of 1976, as amended ("RCRA" or "Act"), 42 U.S.C. 6962, states that if a Federal, State, or local procuring agency uses appropriated Federal funds to purchase certain designated items, such items must be composed of the highest percentage of recovered materials practicable. EPA is required to designate such items and to prepare guidelines to assist procuring agencies in complying with the requirements of section 6002.

EPA issued the first of these guidelines, for cement and concrete containing fly ash, on January 28, 1983 (48 FR 4230). A second guideline, for paper and paper products containing recovered materials, was proposed on April 9, 1985 (50 FR 14076). A third guideline, for asphalt materials containing ground tire rubber, was proposed on February 20, 1986 (51 FR 6202). EPA also is preparing guidelines for re-refined lubricating oils and for retread tires.

Today EPA is issuing the final guideline for paper and paper products. Elsewhere in today's **Federal Register**, EPA is proposing to amend the guideline in response to certain comments.

B. Requirements of Section 6002

Section 6002 of the Act, titled Federal Procurement, directs all procuring agencies that use appropriated Federal funds to procure items that contain the highest percentage of recovered materials practicable, and in the case of paper, postconsumer recovered materials, provided that reasonable levels of competition, cost, availability, and technical performance are maintained. This requirement applies only to those items (or products) that are designated by EPA under section 6002(e). Further, the requirement applies only when the purchase price of the item exceeds $10,000 or when the cost of such items purchased during the preceding year exceeded $10,000.

Federal agencies responsible for drafting or reviewing specifications are required to review and revise their specifications for items designated by EPA in order to remove requirements that items be manufactured from virgin materials and remove prohibitions against the use of recovered materials,

VOL
52
ISS
193
OC
6
1987
UMI

including, in the case of paper, postconsumer recovered materials.

Vendors are required to estimate the percentage of postconsumer recovered materials utilized for the performance of any contract and to certify that the percentage of postconsumer recovered material content to be utilized is at least the amount called for by the specifications or other contractual requirements.

Section 501 of the Hazardous and Solid Waste Amendments of 1984 added paragraph (i) to section 6002 of RCRA. This provision requires procuring agencies to develop an affirmative procurement program for procuring items designated by EPA. The program must be consistent with Federal procurement requirements and must contain at least four elements:

(1) A recovered materials preference program;

(2) An agency promotion program;

(3) A program for requiring estimates, certification, and verification; and

(4) Annual review and monitoring of the effectiveness of the procurement program.

Section 6002(e) requires EPA to prepare guidelines to assist procuring agencies in carrying out these requirements. The guidelines must designate those products that can be produced with recovered materials and whose procurement by procuring agencies will fulfill RCRA objectives. The EPA guidelines also must provide specific recommendations with respect to the procurement of products containing recovered materials.

Federal procurement of products made from recovered materials can increase recovery of materials from the solid waste stream, and use of such products by Federal, state, and local agencies can demonstrate their technical and economic viability to others. The use of recovered materials in paper and paper products will materially reduce the quantity of paper that must be landfilled. In addition, the Federal government's commitment to increase purchases of paper and paper products containing postconsumer recovered materials may encourage manufacturers to increase the amount of other recovered materials in their products. The Federal government accounts for the purchase of about two percent of all paper consumed in the United States. For some types of paper, such as tissue and printing/writing papers, the percentage is higher than this and therefore is significant. Thus, this guideline could have a positive effect on public attitudes and on consumers' acceptance of paper and paper products containing postconsumer recovered materials.

C. Rationale for Selecting Paper and Paper Products Containing Recovered Materials for a Procurement Guideline

As indicated in the preamble to the fly ash guideline, EPA prepares guidelines for items containing recovered materials that have been designated by the Administrator under section 6002(e) after consideration of certain factors.

Section 6002(e) of RCRA specifically directs the EPA Administrator to issue a procurement guideline for paper. The term "paper" is construed by EPA to include paperboard and paper products also. Since Congress already has designated this product as an appropriate subject for a procurement guideline, it is not necessary for EPA to demonstrate further in this preamble that paper satisfies the statutory criteria for designating a procurement item.

III. Background Information on Using Recovered Materials in Paper and Paper Products

A. Introduction

In 1984, about 77 million tons of paper and paper products were consumed in the U.S.A., of which about 21 million tons were recovered for recycling and about 50 million tons of paper and paper products were disposed of, primarily in municipal solid waste landfills. This is about half of all manufactured product waste appearing in municipal solid waste and about 35 percent of all municipal solid waste discarded (principally from households, commercial businesses, and institutions). By any measure, paper and paper products constitute a major portion of solid waste in this country.

The nation spends more than $9 billion annually on solid waste disposal. Most communities are running out of landfill capacity, and the siting of new landfills has become very difficult. Thus, activity to promote recovery and reuse of paper and paper products is a matter of national priority both to reduce the cost of disposal and to extend the life of existing landfills.

It should be noted, however, that paper and paper product disposal is not known to be a significant threat to human health or the environment as the wastes are generally nonhazardous in character. Thus, while the disposal of paper does not present an urgent need for immediate solution from the health and environment viewpoint, it is being addressed because many areas of the U.S. are running out of disposal options for all wastes and face serious crises unless the solid waste streams can be reduced and/or disposed of in an acceptable manner.

B. Use of Recovered Materials in Paper and Paper Products

Within the paper industry and its suppliers, discarded paper recovered for use in manufacturing processes is called waste paper, recyclable paper, or paper stock. It is often kept separate from mixed refuse at the businesses and residences where it is discarded. For example, businesses may separate and bale used corrugated containers to be picked up by a waste paper dealer, and people may separate newspapers in their homes to be donated to a local paper drive for a charity. Some businesses and institutions practice the separate recovery of office papers in office buildings by means of a desk top sorting container or other ways. Waste paper that is separated and collected is then customarily transferred to a waste paper dealer, who prepares the paper for shipment by baling or other means, and sells the waste paper to a paper mill.

At the paper mill, waste paper is mixed with water in a large vessel with rotating beaters at the bottom similar to a kitchen blender, but much larger. The beating process separates the paper fibers and forms a slurry pulp. This recycled pulp is similar in appearance to virgin pulp prepared from wood. Recycled pulp is then cleaned and washed as necessary. In some recycling processes, the recycled pulp is washed with chemicals to remove inks, adhesives, and other contaminants. This process is referred to within the paper industry as "deinking." After deinking, the recycled pulp is equivalent to virgin pulp. Both recycled and virgin pulps are formed into paper and paper products in a similar fashion.

Paper products are manufactured from either virgin or recovered materials, or combinations of the two, by various manufacturers. Tests have shown that for a given product grade there is a wide variation in all measurable characteristics depending on particular manufacturers or particular production runs at a given mill. Products from both virgin and recovered materials generally fall into the same range of variability and frequently, they cannot be distinguished by the typical end user.

However, recycled paper fibers do tend to be shorter than virgin fibers because of the recycling process. The short fibers may cause recycled paper to be weaker than an otherwise equivalent virgin sheet, but the sheet will also have a higher opacity. In paperboard products, the recycled grade is

sometimes produced at a somewhat higher caliper (thickness) than the equivalent virgin fiber product to ensure similar performance characteristics. Paper and paperboard manufacturers can generally manufacture products that meet customer specifications by taking into account the characteristics of paper made from recovered material. For some products the recycled fiber characteristics are preferred; for most there need not be any differences distinguishable by the end user.

Some recycled fiber is derived from paper containing printing, or from paper that has other materials such as coatings or adhesives on it. Paper made from these recovered materials sometimes does not have quite the same appearance as virgin paper. It is not quite as bright, or as white, or has a grayish or bluish tint, and it is sometimes speckled in appearance. Recycled paper manufacturers can bleach and brighten the paper and clean contaminants from the pulp. Coatings can also be added to the paper surface to enhance its "whiteness" and "brightness." These processes allow paper made from recovered materials to meet customer specifications.

EPA concludes that as a general rule, paper containing recovered materials can be manufactured to meet customer specifications. However, some of the commenters on the proposd paper guideline questioned whether paper made from recovered materials is always available at all locations at a reasonable price. This concern is addressed later in this preamble.

C. "Postconsumer Recovered Materials"

RCRA Section 6002(h) provides that, in the case of paper products, the term "recovered materials" includes: (1) Postconsumer materials; and (2) manufacturing, forest residues, and other wastes. The Hazardous and Solid Waste Amendments of 1984, in revising section 6002, uses the specific term "postconsumer recovered materials" in describing the material whose use is to be maximized by the guideline for paper and paper products. For this reason, the guideline refers to paper and paper products containing postconsumer recovered materials, rather than to "recycled paper."

The general category of waste paper includes all types of postconsumer recovered materials such as old newspaper, used corrugated containers, and office waste paper. It also includes preconsumer wastes from manufacturing processes, distributors, printers and paper converting operations such as white trimmings (called pulp substitutes) or printed paper which has never reached the consumer. The use of preconsumer waste paper (or "recovered materials") is already at a high level. Increasing the demand for paper products containing recovered materials therefore requires that postconsumer waste paper be used. While the use of postconsumer recovered materials is emphasized in RCRA section 6002, increased usage of preconsumer waste materials in paper and paper products should also be addressed. As demand increases for a wider range of paper and paper products containing recovered materials, manufacturers of products that are currently made with preconsumer materials will have to use larger quantities of postconsumer recovered materials to meet their raw materials (i.e., waste paper) supply needs.

D. Major Federal Purchasers

The major Federal purchasers of paper, and, therefore, the agencies most likely to be affected by this guideline are: The Government Printing Office (GPO), which operates under the direction of the Congressional Joint Committee on Printing (JCP); the General Services Administration (GSA); and the Department of Defense (DOD). On advice of its Committee on Paper Specifications, which includes representatives from GPO, JCP adopts specifications and standards for printing and writing grades of paper. GSA adopts specifications for all other paper and paper products. DOD further reviews these standards and drafts additional specifications, as necessary, to establish military standards for some of the items it procures.

IV. Discussion of Guideline

This section of the preamble summarizes and explains the basis for each section of the final guideline. Section V discusses recommendations as to price, competition, availability, and performance, while section VI discusses implementation of the guideline.

A. Scope

This guideline applies to the use of postconsumer recovered materials in paper and paper products purchased by procuring agencies using Federal funds. Included are all paper and paperboard categories except building and construction paper grades. The Agency believes that by including as many items as possible within the scope of the guideline, the paper industry will be encouraged to increase and to improve the production of paper and paper products containing postconsumer recovered materials.

The following list of major paper and paperboard purchase categories is included as an illustration. However, the list is not intended to be all-inclusive.

High Grade Bleached Papers
- Printing and writing papers, including mimeo and duplicator papers
- Mailing envelopes
- Memo pads
- Form bond and manifold business forms
- Computer paper
- Xerographic/copy paper

Newsprint

Tissue Products
- Sanitary products, e.g., toilet tissue, paper towels, facial tissue, paper napkins
- Industrial wipers

Unbleached Paper and Paperboard

Coarse paper

Linerboard and corrugating medium

Corrugated boxes

Fiber sheets and boxes

In making its decision regarding the scope of this guideline, the Agency considered suggestions from the Government Printing Office and representatives of the printing industry to the effect that performance standards for certain grades of printing and writing paper can currently be met only by virgin paper. It was suggested that EPA exclude these papers on an item-by-item basis. It was also suggested that certain items that must meet stringent standards of noncontamination, such as surgical masks and items coming in contact with wet or oily foods, should be individually identified for exclusion.

EPA has concluded that the language of section 6002(d)(2) of RCRA requiring the "use of recovered materials to the maximum extent possible without jeopardizing the intended use of the item" effectively allows the exclusion of an item when performance standards cannot be met if postconsumer recovered materials are included in the content. None of the commenters indicated why the statutory limitation is inadequate to accommodate the concerns of agencies that draft and review specifications. A determination to exclude a specific item from a recovered materials content requirement may be made by the agency in drafting and reviewing specifications based on standards related to performance. EPA suggests a procedure for establishing such an exclusion in § 250.13 of this guideline. It is further suggested that performance tests be cited and that test results be included in records for the annual review process and in any reporting on the effectiveness of this guideline implementation.

VOL
52
ISS
193
OC
6
1987
UMI

EPA decided not to include building and construction grades of paper based on several considerations. In reviewing the variety of paper and paper products that are or may be manufactured with a percentage of postconsumer recovered materials, it became apparent that building and construction grades constitute a significant and distinct industry unrelated to the manufacturing of virtually all other grades of paper and paperboard. The manufacturing, marketing, standards, and testing mechanisms for building and construction grades are different from those for other grades of paper. Any evaluation of the feasibility and potential effectiveness of a Federal procurement program for these grades would require extensive additional information; in addition, different procurement offices and procedures are involved in the procurement of construction categories. For these reasons, EPA believes that it would be more appropriate to consider building and construction grades of paper in a separate context.

B. Applicability

The requirements of section 6002 generally apply to"procuring agencies" which are defined in section 1004 as "any Federal agency, or any State agency or agency of a political subdivision of a State which is using appropriated Federal funds for such procurement, or any person contracting with any such agency with respect to work performed under such contract." Under section 6002(a), the procurement requirements apply to any purchase by a procuring agency exceeding $10,000 or to purchases where the quantity of "functionally equivalent" items purchased in the preceding fiscal year exceeded $10,000. EPA believes that its interpretation of this requirement, which is described in more detail below, will provide an effective program without imposing an unreasonable bookkeeping burden on the purchasers and users of paper and paper products.

1. *Direct Purchases.* For the purpose of this guideline, purchases made as a result of a solicitation by a procuring agency for its own general use or that of other agencies (for example, GSA purchases) are considered "direct." EPA believes that a contract for printing is, in part, a paper procurement action because the type of paper to be used is explicitly stated in the contract. (Labor and overhead expenses involved in printing would be considered a service.) Therefore, a Federal agency that provides printing services to other governmental agencies would be subject to this guideline. The guideline leaves the method of calculating the value of paper used in performing a printing contract to the discretion of the agency awarding that contract. This provides wide latitude. GPO has stated that the value of the paper may be as low as 20 percent or as high as 80 percent of the contract. The value allocated to the paper used in the performance of the printing contract would determine the applicability of the guideline: If that value is $10,000 or more, the guideline would apply.

2. *Indirect Purchases.* As stated previously, section 6002 of RCRA and the guideline apply to procurement actions by non-Federal agencies if they expend appropriated Federal funds. Thus, if Federal funds are used to establish or maintain a program or activity by a State, local government, contractor, or grantee and if accounts of Federal monies are kept separately from other accounts, the requirements of section 6002 and the provisions of the guideline would apply to any procurement of paper or paper products for that program or activity if it meets the $10,000 threshold. If, however, Federal funds are used to support continuing programs and activities, and it is not possible to separate such funds from other receipts, these requirements would not apply. For example, if a city Housing Authority receives a Federal grant to build and maintain a housing project and uses $10,000 of the funds for stationery, leases, or brochures, the provisions of the guideline would apply. On the other hand, if the Housing Authority receives a disbursement of Federal funds from a block grant for general support of its continuing program, and the disbursement includes other sources of funding and/or no separate accounting for specific items is maintained, the provisions of the guideline would not apply.

3. *The $10,000 Threshold.* The procurement requirements of section 6002(a) apply to any purchase of a "procurement item" or "functionally equivalent" procurement item costing $10,000 or more. In common usage, terms such as "paper" and "boxes" include many items manufactured to meet different performance standards. They may not, therefore, technically be "functionally equivalent." (For instance, offset printing paper should not be used for high-speed office copiers.) The variations in grades and types of paper products are numerous. The JCP has specifications for over 50 grades of all types of paper, 23 for printing alone, while GSA estimates that it providesspecifications for about 300 paper products. Because few procuring agencies, as defined in the Act, purchase $10,000 worth of any one grade of paper or any one paper product, restricting the applicability of section 6002 to purchases based on a very technical definition of functional equivalency would limit the effectiveness of the guideline in meeting the objectives of the Act.

The Agency has concluded that, in the case of paper and paper products, "functionally equivalent" items should be defined as a category of items having the same or substantially similar end use. EPA has developed a categorization based on this concept of similar end use. For procuring agencies making many purchases, the categorization will extend the applicability ofthe guideline beyond a technically defined "functional equivalency" so that a greater number of procurement actions are affected. The categorization will, on the other hand, reduce the number of small entities affected because the categories represent a more limited concept of functional equivalency than the inclusive term "paper."

Under § 250.3 of the guideline, each of the following groups of items are "functionally equivalent":

—All grades and types of xerographic/copy paper;
—Newsprint;
—All grades and types of printing and writing paper;
—Corrugated boxes and fiberboard boxes;
—Folding boxboard and cartons;
—Stationery, office papers (memo pads, scratch pads, etc.), envelopes, and manifold business forms including computer paper;
—Toilet tissue, paper towels, facial tissue, paper napkins, doilies, and industrial wipers;
—Brown papers and coarse papers.

Note that some of these categories have been revised slightly from the proposed guideline in response to comments.

C. Requirements vs. Recommendations

Commenters stated that the proposed preamble and guideline did not clearly define what was required of procuring agencies. In particular, commenters found EPA's use of the verbs "shall," "must," "recommend," "should," and "suggest" to be confusing.

RCRA section 6002 requires procuring agencies and contracting officers to perform certain activities, such as revising specifications for procurement items. It also requires EPA to prepare "guidelines for the use of procuring agencies in complying with" section 6002. The guidelines refer to the section

6002 requirements and contain two types of provisions: Requirements (mandated by Congress in section 6002) and recommendations (EPA's guidance for complying with the requirements of section 6002). The verbs "shall" and "must" indicate requirements, while verbs such as "recommend," "should," and "suggest" indicate recommendations.

Procuring agencies must comply with the requirements of section 6002, whereas EPA's recommendations are only advisory. Procuring agencies may use a different approach to meeting the section 6002 requirements. EPA believes, however, that compliance with its recommendations constitutes compliance with the section 6002 requirements.

D. Definitions

Most of the definitions in this guideline are the same definitions used in RCRA and therefore do not require further explanation. Other definitions, such as "paper," incorporate standard industry definitions. A few definitions are further discussed in this section of the preamble.

1. *"Paperboard."* One common term used by the industry is "paperboard." This term is used to describe thick paper used in the manufacture of products such as tablet backs, folding boxes, and corrugated boxes. Paperboard is similar in composition and form to paper, but generally refers to sheet that is 0.012 inch thick or thicker. Thus, the term "paper," which is used in the Act, is construed to include paperboard and paperboard products.

2. *"Practicable."* Section 6002 requires procuring agencies to procure items composed of the highest percentage of recovered materials *practicable* and to develop programs to assure that recovered materials are purchased to the maximum extent *practicable* (emphasis added). Commenters asked EPA to define the term "practicable" as used in section 6002. In response, EPA has added a definition of "practicable" in the final guideline.

EPA's definition of "practicable" combines the dictionary definition with certain statutory criteria for determining practicability. The dictionary definition of practicable is "capable of being used," and EPA believes that Congress intended the term to be defined in this way. Congress also provided four criteria for determining the maximum amount practicable: Competition, availability, performance, and price. EPA's definition of "practicable" incorporates these criteria.

3. *"Mill Broke."* EPA has determined that the definition of dry paper and paperboard waste in "recoverable materials" (section 6002(h)(2)(A)) specifically excludes mill broke, which is any paper waste generated before completion of the papermaking process. Mill broke is commonly returned to the pulping process and is composed of whatever the pulp is derived from, e.g., wood pulp, waste paper, etc. In the final guideline, the definition of "mill broke" makes clear that it is excluded from the term "recovered materials."

E. Specifications

1. *General.* Section 6002(d)(1) required that, no later than May 8, 1988, Federal agencies that draft and review specifications for procurement items procured by Federal agencies eliminate specifications that prohibit the use of recovered materials or that require that items be manufactured from virgin materials only. Section 6002(d)(2) requires that within one year after publication of this guideline, procuring agencies must assure that "such specifications require the use of recovered materials to the maximum extent possible without jeopardizing the intended use of the item."

Since passage of the 1980 Amendments to section 6002(d) of RCRA, some agencies have moved to require the use of recovered materials; others have felt it sufficient to "permit" and/or "encourage" the use of "reclaimed fibers" or "recovered materials." By adding the requirements that procuring agencies establish affirmative procurement programs for items containing postconsumer recovered materials or other recovered materials, the 1984 Amendments make it clear that simply "permitting" or "encouraging" the use of such materials is not sufficient to assure that specifications require the maximum use of postconsumer recovered materials "without jeopardizing the intended use of the item." Federal agencies must take affirmative steps to encourage their use.

Section 250.12(b) of the guideline presents recommendations for specification revisions to implement the statutory requirements. Unnecessarily stringent specifications must be revised to allow for a higher postconsumer recovered materials content. Specifications need not be revised, however, "if it can be technically determined that for a particular end use a product containing such materials will not meet reasonable performance standards." (§ 250.13.)

Commenters stated that specifications sometimes do not clearly state the intended end use of products. For example, paper purchased as printing paper is sometimes used in high-speed copiers with unfortunate results simply because the user did not properly recognize a difference in paper characteristics. In such cases, product specifications should be revised to clearly state an intended end use for a product(s). When using postconsumer recovered materials, it is important that the correct grades be supplied for the intended end use. EPA recommends that specifications clearly identify both the expected performance and the specific intended use, especially when the paper is to be used in high-speed copiers.

The proposed guideline contained a recommendation that procuring agencies insert a clause in specifications to indicate that paper and paper products containing postconsumer recovered materials were preferred over those without such content. (See § 250.12(b)). Commenters pointed out that this clause was vague, ill-defined, and possibly counter-productive. EPA agrees and has deleted this paragraph from the final guideline.

2. *Specifications Related to Performance.* Certain paper items may not meet the standards of performance necessary for their intended end use if they contain any percentage of postconsumer recovered materials. Examples of such items are paper which comes into contact with wet or oily food, archival papers, certain map papers, deed papers, and face masks for use in "clean rooms." EPA considered removing these paper items from its designation of items to be covered by the guideline. Unlike construction grade papers, which are excluded on a categorical basis, these papers would have to be excluded on an item-by-item basis. EPA concluded that it does not have the expertise to make such a technical determination, and that such determinations are best left to procuring agencies.

Section 250.13 of the guideline recommends that an agency document any finding that, for a particular end use, an item containing postconsumer recovered materials will not meet reasonable performance standards and reference the documentation in subsequent solicitations for bids for that item. The documentation should clearly show that the unacceptable performance is caused by the properties of the paper itself and not by the equipment with which the paper is used. The documentation should reference specific tests used to judge performance.

Commenters raised questions relating to the performance of products containing postconsumer recovered materials in the printing/writing and fiber box categories. As a result, EPA

BEST COPY AVAILABLE

reviewed information about the technical performance of these products.

a. *Printing/Writing Papers.* Performance testing of paper containing postconsumer recovered materials is a continuing activity of paper manufacturers. In some instances, the evaluation of the reports of these organizations was complicated by the fact that the recovered materials used were not precisely identified as either postconsumer or other recovered materials. The reports of these organizations indicate, however, that acceptable performance is possible in most grades of paper and paper products made from recovered materials. The use of preconsumer recovered materials is common in printing and writing papers, although the use of postconsumer recovered materials is more limited.

Commenters also stated that paper containing postconsumer recovered materials causes difficulty in printing and high-speed copier machines. EPA has reviewed documentation from State printing agencies and private sector printers and has found that this is a common reaction by pressmen. In many States, printers have refused to use paper made from recovered materials. However, several States have had many years of experience in printing with such paper, after having first overcome adverse reactions by pressmen. These States report that while there is some difficulty in using printing paper made from postconsumer recovered materials, it is no more than with other economy grades of printing paper. Therefore, procuring agencies and agencies that revise and write specifications should carefully identify the performance expected of the product so that acceptance or rejection is based on verifiable tests rather than preconceived perceptions.

EPA has obtained results of laboratory tests for both virgin paper and paper made from postconsumer recovered materials.[1] These test results provide additional verification that paper made from recovered materials can and does meet the same standards as virgin paper for many categories of printing/writing papers. This is especially true in the economy grades typically purchased in competitive bids by public agencies.

b. *Fiber Boxes.* The primary standards for linerboard (the facing material of corrugated containers) and fiber boxes are set by the Uniform Freight Regulations and are measures of basis weight and mullen (burst strength). As noted below under "New Specifications," these standards are currently under review. The contemplated changes would replace the mullen test with a "crush" test that would enable linerboard manufacturers to use a percentage of postconsumer recovered materials. (In fact, there are already a few mills that produce linerboard made of 100 percent postconsumer waste paper.) Federal procurement of linerboard containing postconsumer recovered materials could then be practicable.

c. *Other Performance Issues.* Commenters recommended that the Agency develop its own tests or testing procedures. However, the Agency does not have the expertise to do so. Moreover, EPA believes that analysis of product characteristics, including conducting tests and/or analyzing test results, is a responsibility of the procuring agency. EPA also believes that procuring agencies should maintain data on such test results. In the companion action in today's **Federal Register**, EPA is proposing that procuring agencies maintain such test results.

3. *Specifications Related to Aesthetics.* Some commenters stated that specifications related to aesthetics, such as whiteness, brightness, color, and dirt count, serve as impediments to the use of paper containing postconsumer recovered materials. The American Society for Testing and Materials (ASTM) and the Technical Association of the Pulp and Paper Industry (TAPPI) have established standards for brightness and dirt counts which paper and paper products made from postconsumer recovered materials can meet. Using these established standards as a reference, EPA recommends that agencies that draft specifications conduct a careful review of existing specifications related to aesthetics to determine whether they are overly stringent for the product's intended end use, and if so, amend them.

4. *New Specifications.* Considerable technological advances are occurring in the paper and paperboard manufacturing industry. These advances are leading to increased utilization of postconsumer recovered materials in many products and the introduction of the use of preconsumer materials in other products, e.g., pulp substitutes and deinking grades of waste paper and sawdust and other forest residues. For instance, the Railway Association is currently considering a performance test change that would effectively allow more use of recovered materials in fiber (corrugated) boxes. In recent years, the process of manufacturing newsprint with nearly 100 percent postconsumer recovered materials has become common. In § 250.14 of the guideline, EPA recommends that procuring agencies monitor new developments and use them to increase the use of postconsumer and other recovered materials.

F. Affirmative Procurement Program

Section 6002(i) of RCRA requires procuring agencies to adopt an affirmative procurement program to ensure that paper and paper products containing postconsumer recovered materials are purchased to the maximum extent practicable. As discussed previously, RCRA section 6002(h) provides that "postconsumer recovered materials" are a specific subset of "recovered materials." The definition of "postconsumer recovered materials" includes paper, paperboard, and fibrous wastes that have passed through their end usage as a consumer item or that enter and are collected from municipal solid waste. "Recovered materials" is a broader term, including postconsumer recovered materials as well as such widely-used wastes as manufacturing wastes, forest residue, and other wastes. Because the intent of this guideline is to reduce the municipal solid waste stream, the focus of this guideline is postconsumer recovered materials, which are not used as widely.

EPA received comments that the proposed guideline did not make the specific requirements of an affirmative procurement program clear. In response, EPA has devoted this section of the preamble to clarifying these requirements. The affirmative procurement program must contain four elements: (1) A preference program; (2) a promotion program; (3) procedures for estimation, certification, and verification; and (4) procedures for annual review and monitoring of the program's effectiveness.

1. *Preference Program.* The first of the four requirements of the affirmative procurement program is a recovered materials preference program to maximize the use of postconsumer recovered materials. The procuring agency may implement the preference program by employing a case-by-case approach, by adopting minimum content standards, or by choosing a substantially equivalent alternative.

Section 6002(i) also requires that any affirmative procurement program be consistent with applicable provisions of Federal procurement law. From time to time, Congress has established preferential procurement programs in order to attain socioeconomic goals.

[1] See docket materials dated October 9, 1985 submitted by an EPA contractor.

Among these are the Small Business, Labor Surplus Area, and Minority Business procurement programs. EPA considered applying either or both of the mechanisms used in those programs—price preferences and set-asides—to this guideline. A price preference allows the procuring agency to pay a higher price, if necessary, for a specified product from preferred vendors. A set-aside requires the procuring agency to award a certain percentage of its contracts to preferred vendors of a product regardless of price. Price preferences and set-asides are currently being used in some State programs for the procurement of paper and paper products containing recovered materials. Four States are currently using price preference programs in which products containing recovered materials may cost from 5 to 10 percent more than virgin materials. Two States have set-aside programs for paper and paper products. These States report that they successfully procure products containing recovered materials.

EPA has considered recommending these programs at the Federal level. However, in the case of existing Federal preferential procurement programs that allow a price preference or a set-aside, the Agency found that each had been established under explicit statutory authority or a specific Executive Order. Neither the statutory language nor the legislative history of section 6002 seems, however, to contemplate the adoption of either price preferences or set-asides, and doing so would conflict with existing Federal procurement regulations. Therefore, rather than recommending price preferences or set-asides, EPA is recommending that agencies use either a case-by-case approach, minimum content standards, or a substantially equivalent alternative, as provided in RCRA section 6002(i)(3).

In the proposed guideline, EPA recommended case-by-case procurement as the preferred approach, although other approaches could be used. In response to comments, the final rule leaves the choice of approach for procurement of each paper or paper product to the individual procurement agencies. However, after careful consideration of all available data—including data submitted with the comments—EPA has concluded that agencies which elect to use reasonable minimum content standards will be in compliance with the statutory requirements, but agencies using the case-by-case approach or a substantially equivalent approach will not necessarily meet these requirements.

The strongest reason supporting this conclusion is the fact that tie bids are rare in government procurements. Consequently, wide use of the case-by-case approach may not result in agencies buying paper and paper products with postconsumer recovered materials to the maximum extent practicable. Therefore, an agency that selects the case-by-case or a substantially equivalent method will be expected to justify how its approach meets the statutory requirements.

a. *Case-by-Case Approach.* The case-by-case approach is defined in section 6002(i)(3)(A) as a policy of awarding contracts to the vendor offering an item composed of the highest percentage of recovered materials (and in the case of paper, postconsumer recovered materials) practicable, when all other factors, such as price, availability within a reasonable period of time, and ability to meet performance standards, are equal. Under the case-by-case approach, if there is a tie bid, then the procurement *must* be awarded to the vendor who offers the highest postconsumer recovered materials content.

Procuring agencies need accurate information to evaluate bids when postconsumer recovered materials content is a factor. Because an estimate of postconsumer recovered materials content to be used is not binding, it is not reliable for evaluating tie bids. By contrast, a certification becomes part of the contract and is binding. These terms are explained below in section IV.F.3 of the preamble.

Therefore, EPA recommends that procuring agencies require all vendors of paper and paper products to certify to the minimum percentage of postconsumer recovered materials in items they offer when submitting bids. Vendors should also be advised that such percentage will be the deciding factor in the event of a tie bid. Those vendors unfamiliar with the content of their products or offering products made entirely from virgin materials could easily meet the requirement by certifying a minimum percentage of 0 percent. The winning vendor that actually supplies the product *must* estimate the postconsumer recovered materials content of the paper actually supplied and the procuring agency must have a program to verify such estimates. This is true regardless of whether the selection was made on the basis of postconsumer recovered materials content.

If a paper or paper product containing postconsumer recovered materials is consistently offered at a competitive rate, EPA recommends that the procuring agency consider adopting a minimum postconsumer recovered materials content standard for that item. Through this solicitation process, the procuring agency would be assured of the lowest possible price, the maximum level of competition, and availability of the product. Several commenters voiced the opinion that a case-by-case approach would not be effective and urged EPA to eliminate that option. However, both RCRA and the Congressional colloquy show clearly that Congress intended that the case-by-case approach be an option. Therefore, EPA has no grounds to eliminate the case-by-case option.

b. *Minimum Content Standards.* Under the final guideline issued today, agencies may also adopt a program of minimum content standards for any of the items procured, as described in RCRA section 6002(i)(3)(B). Under this approach, procuring agencies would decide on minimum levels of postconsumer recovered materials, and these levels would be included in the specifications for the paper or paper products.

When using this approach, procuring agencies also need assurance from vendors that at least the minimum recovered content required in the specification will be contained in the products offered, and vendors must be required to provide estimates of the actual content in the goods supplied under contract.

EPA recommends that procuring agencies use the same certification and estimation procedure outlined in the case-by-case approach. Vendors should be required to certify to the mimimum postconsumer recovered content (which could, but would not have to be, higher than the minimum standard in the specification) when responding to bids. Vendors should also be required to provide an estimate of the actual percentage of postconsumer recovered content in the product that is shipped in fulfillment of the contract.

Comments have been received by EPA that a minimum content standards program may not be consistent with Federal procurement regulations. However, EPA has determined that since RCRA expressly authorizes specifications that include minimum content standards, such standards do not conflict with current Federal procurement regulations, if carried out under a competitive bid process. That is, full and open competition must exist, and after specifying the minimum content standard, all responsible sources that can meet the standard must be allowed to compete. The Competition

in Contracting Act of 1984 (CICA) (Pub. L. 98–369) permits agencies to use restrictive procurement procedures authorized by law, and RCRA creates the authorization for minimum content standards. In all other respects, full and open competition is necessary.

EPA believes that minimum content standards better achieve the legislative goal of procuring items containing the highest percentage of recovered materials practicable. As discussed above, today's final guideline leaves it to procuring agencies to establish minimum content standards. In response to comments, EPA is also proposing recommended minimum content standards elsewhere in today's **Federal Register**.

c. *Substantially Equivalent Approach.* Procuring agencies also can adopt a procurement approach that is substantially equivalent to the case-by-case approach and minimum content standards. Like the other two approaches, the substantially equivalent approach must assure that paper and paper products containing postconsumer recovered materials will be purchased to the maximum extent practicable. The approach also must be consistent with applicable provisions of Federal procurement law.

2. *Agency Promotion Program.* The second requirement of the affirmative procurement program is an effort by procuring agencies to promote procurement of paper and paper products containing postconsumer recovered materials. The proposed guideline made several suggestions for procuring agencies to consider for disseminating information about their preference program, such as placing notations in solicitations for bids and conducting discussions about the program at bidders' conferences and meetings. The proposed guideline also suggested that agencies such as GSA that procure paper and paper products for use by other agencies consider noting in their catalogs those papers or paper products that contain postconsumer recovered materials. These recommendations have been retained in the final guideline.

Some commenters felt that EPA should be actively involved in promotional programs. However, RCRA section 6002(1) specifies that the promotion program is an integral part of the affirmative procurement program, and therefore is the responsibility of each procuring agency, not EPA.

3. *Estimation, Certification, and Verification.* The third requirement of the affirmative procurement program set forth in section 6002(i) covers estimation, certification, and verification of postconsumer recovered material content in procurements. Estimates and certifications of content in an item are most easily expressed as a percentage of total content and can range from 0 percent to 100 percent, depending on the type of product or the feedstocks used in manufacturing the item. Many issues have been raised about these requirements, such as when the information should be provided, who is to provide it, and how it is to be obtained. To clarify this subject, it is necessary to review the requirements of the statute.

a. *Estimation.* RCRA section 6002(c)(3)(B) and section 6002(i)(2)(C) require that, after the effective date of this guideline, vendors that supply Federal procuring agencies with paper or paper products covered by this guideline must provide an *estimate* (emphasis added) of the total percentage of postconsumer recovered materials utilized in the performance of the contract. Furthermore, contracting officers must require that this information be provided.

EPA believes that this requirement is for the purpose of gathering statistical information on price, quantity, availability, and performance of paper and paper products made from postconsumer recovered materials. EPA further believes that this requirement applies regardless of the reasons why a contract is awarded. Estimates may differ from percentages of minimum postconsumer recovered content in certifications, and will provide up-to-date information for the annual review which is required of procuring agencies.

Therefore, EPA recommends that procuring agencies use the same procedure to require vendors to provide estimates of actual postconsumer recovered content in products shipped in fullfillment of contracts, no matter which approach is used.

b. *Certification.* The use of certification is common in government procurement. It is written assurance that goods or services delivered will fulfill requirements. Failure to meet conditions which have been certified can result in penalties to a vendor. RCRA section 6002(c)(3)(A) requires that after the effective date of this guideline, vendors must "certify that the percentage of postconsumer recovered materials *to be used* in the performance of the contract will be at least the amount required by applicable specifications or other contractual requirements". In other words, vendors must certify that a minimum percentage of postconsumer recovered material will be contained in products to be supplied. RCRA section 6002(i)(2)(C) requires "certification of minimum postconsumer recovered materials content *actually utilized*".

Together, these sections could be interpreted to mean that multiple certifications will be required: One when bids are offered, and another with each shipment. EPA is concerned that this interpretation could create unnecessary burdens for vendors and procuring agencies, and thus work against the intent of section 6002. States which purchase paper and paper products with recovered material content have found one certification sufficient. As an example, New York State requires certification of the content from vendors within six days of a bid opening. Vendors commonly discuss product specifications and availability with manufacturers prior to submitting a bid, so information for certification can be obtained at that time. A vendor can easily certify to a minimum of 0 percent if it does not wish postconsumer recovered material content to be a factor in its bids. The certification then becomes part of the contract awarded to the successful vendor. In the case-by-case approach, procuring agencies would have the assurance of a certification, rather than an estimate which must be confirmed, of postconsumer recovered content when bid awards are determined. Such assurance would be equally useful in the minimum content standards approach. EPA has concluded that one certification will fulfill both statutory requirements and, by using it in all instances, procuring agencies can adapt their purchasing programs most easily.

Accordingly, EPA recommends procuring agencies require certification as a condition of a responsive bid when bids are offered, regardless of whether the case-by-case, minimum content standard, or a substantially equivalent approach is used. Also, as previously stated, the successful vendor must estimate the actual postconsumer recovered content in products that are supplied. The estimate may or may not be different than the minimum percentage that is certified.

EPA understands that for both estimation and certification, the vendor will not have direct knowledge of postconsumer recovered content. Only the mill that produces the paper will have that information. However, there is no direct authority in RCRA section 6002 for the Federal government to require this information from anyone but the vendor. Therefore, the vendor must make its own arrangements for obtaining this information from the mill operator. The legislative history suggests the approach intended, as

shown by the following excerpt from the Conference Committee Report on the Hazardous and Solid Waste Amendments of 1984:

"In obtaining certification of the percentage of postconsumer materials and the percentage of manufacturing forest residues and other wastes, it is the intent of Section 6002 as amended by this Act that vendors supply the procuring agency with a statement *from the mill* indicating the percentages used *by the mill* in producing the paper and their sources of raw material." (H.R. Rep. No. 98–1133, 98th Cong. 2nd Sess. 121 (1984) [emphasis added].

c. *Verification.* Procuring agencies also are required to establish "reasonable verification procedures for estimates and certifications." See RCRA section 6002(i)(2)(C). If these verification procedures include access to mill operators' records, then the procuring agency must use some authority other than RCRA to inspect these records or must require vendors to have an agreement with the mill operator to supply such information or access to the procuring agency.

In general, paper manufacturers maintain records of the feedstocks used in each "run" or "lot" of paper for their own internal quality and specification controls. The optimum mix of recovered and virgin fiber often remains the same for each grade of paper, though variations may occur in individual runs.

In most cases manufacturers will be able to provide a certification to vendors as to the specific fiber content of the product shipped to a customer. It is not intended that the guideline require any additional records to be kept by the mills; records normally kept should be complete enough to estimate or certify to postconsumer recovered materials content accurately. However, to simplify the verification procedure and accommodate variations dictated by quality control and supply, the average amount of postconsumer materials used in each specific product over a one-month period may be used, if necessary, to meet the requirement for verification of estimates. Since mills commonly keep accounting and record summaries on a monthly basis, EPA recommends that the one-month figures be used for estimates of fiber percentages. Should it be necessary to verify the exact content of a specific lot or run of paper, the mill records for that lot or run can then be consulted.

However, if the vendor knows that that the postconsumer recovered materials content of paper or paper products supplied to procuring agencies differs from the monthly average, then the average cannot be used. For example, if the monthly average is 30 percent recovered materials content but the paper or paper product supplied contains no recovered materials or conversely contains 60 percent recovered content, then the vendor cannot use the monthly average. Use of the average in such instances will be viewed as an attempt to circumvent the requirements of RCRA in supplying paper or paper products to the procuring agency.

Monthly *averages* cannot be used for certification. Every shipment may not contain postconsumer recovered content equal to or greater than the average. However, the *minimum* percentage of postconsumer recovered materials used in recycled paper and paper products by the mill can be determined from monthly records for certification purposes.

Some comments have been made that mills cannot always distinguish postconsumer recovered materials from other recovered materials, thus making estimation and certification difficult if not impossible. EPA has verified that this is sometimes true for the printing and writing grades, but this is not generally the case. In most cases, mills have detailed knowledge of their raw materials. While postconsumer recovered materials content of every bale of waste paper may not be known to a certainty, mills can make reasonable estimates based on their extensive knowledge of their raw materials. In the companion action in today's **Federal Register**, EPA is proposing "waste paper" content standards to resolve inherent fiber identification problems with the printing and writing grades of paper.

4. *Annual Review and Monitoring.* The fourth requirement of the affirmative procurement program is an annual review and monitoring of the effectiveness of the program. The review should include an estimate of the quantity of paper and paper products containing postconsumer recovered materials purchased during the year.

EPA believes that procuring agencies should review the range of estimates and certifications of postconsumer recovered content provided by vendors during the year. Significant and repeated variations between standards, certifications, and estimates would signal whether changes in approach (e.g., from case-by-case to minimum content standards) or specific minimum content standards are warranted. EPA further believes that information provided by the estimation requirement will be particularly helpful to procuring agencies when they review their compliance with the requirement to purchase paper and paper products with the highest percentage of postconsumer recovered materials practicable. Therefore, EPA is proposing additional annual review procedures and related recordkeeping recommendations in the companion action published in the **Federal Register** today.

V. Recommendations as to Price, Competition, Availability, and Performance

Section 6002(c)(1) provides that the affirmative procurement requirement is subject to four limitations. First, the price of the item must not be unreasonable. Second, a satisfactory level of competition must be maintained. Third, the item must be reasonably available. Fourth, the item must meet the specifications established by the procuring agency.

Commenters stated that EPA is required under section 6002(e) to provide detailed information about the availability, price, and performance of paper and paper products containing postconsumer recovered materials. EPA has determined that such information varies significantly over short periods of time. Paper and paper products are made from virgin and recovered commodities which fluctuate in value according to supply and demand within the national and international economies. Even relative prices between paper products made with virgin or recovered fibers are subject to short-term fluctuation. Also, availability of paper and paper products made from recovered materials is a result of demand. Recent consolidation within the paper industry, the development of this guideline, and current activity to legislate preferences for recycled products at the State and local level, can all affect availability. Therefore, specific information about price and availability would not remain accurate long enough, at this point in time, to be useful in a guideline. General information is presented in this section. Information about performance has been obtained and is discussed in section III of the preamble.

A. Price

Section 6002 provides that a procuring agency can decide not to purchase a designated item, i.e., paper or a paper product containing postconsumer recovered materials, if the price is "unreasonable." EPA recommends that for the purpose of this guideline, when considering bids, "unreasonable price" is any price other than the price offered in the lowest responsive bid by a responsible bidder.

Several factors, other than those mentioned above, affect the market

price, or bid price, of paper and paper products containing postconsumer recovered materials in relation to the prices of products manufactured from other fibers, including the percentage of postconsumer recovered materials used, the degree of decontamination and deinking required to meet the performance standards for a specific product, and the proximity of the mill to (1) the supply of postconsumer recovered materials; and (2) the prospective customer. In many instances, mills bid for government procurements to "fill in" for capacity at a mill not already committed to other customers. Because, at a given point in time, there is no uniform method of determining the relative price of these items other than through the competitive bidding process, this final guideline recommends that procuring agencies use an "open-bid" process, allowing vendors of paper and paper products containing postconsumer recovered materials to compete for government contracts. For the case-by-case approach, this would include competition between vendors of products containing postconsumer recovered materials, as well as those which do not. If the minimum content standards approach is chosen, competition would be restricted to those products meeting the minimum content standards. However, open bidding would exist between vendors of those products.

States currently procuring paper or paper products containing postconsumer recovered materials have not been required to pay unreasonable prices for these products. Data on the recent experience of these State agencies show that virgin products and products containing postconsumer recovered materials compete in the open marketplace and are sold at competitive prices. Thus, unreasonable price should not be an issue in affirmative procurement programs, especially when open bidding will take place. Documentation of recent price comparisons in States with affirmative procurement programs can be found in the record for this guideline.

EPA does not expect that an affirmative procurement program will result in the government paying a higher price for its paper or paper products. In fact, some representatives of the paper recycling industry claim that affirmative procurement will lower the price, but this claim has not been documented by EPA.

Using the case-by-case approach, as defined in the guideline, there is no difficulty achieving price equality. However, EPA believes that approach will not usually achieve the legislative mandate of procuring "the highest percentage of recovered materials practicable." Therefore, it will usually be necessary to use a minimum content standard. But in setting such standards, it is EPA's position that "practicable" includes the concept of price equality.

In setting minimum content standards, procuring agencies must attempt to set levels of postconsumer recovered materials that are high, but not so high as to drive out competition to the point of increasing the price. But since, under this scheme, the agency would be buying only paper or paper products containing postconsumer recovered materials, it may not know if it is paying too much. Under this scheme, there is no way to guarantee that every sheet of paper procured was procured at a price no greater than the price for paper that would be procured if the policy were not in place. On the contrary, EPA expects that there will be fluctuations in price in both directions. EPA therefore is recommending that procuring agencies interpret the reasonable price provision of RCRA section 6002(c)(1)(C) to mean that, for paper or paper products containing postconsumer recovered materials, there is no long-term or average increase over the price of comparable virgin paper or paper products.

EPA also recommends that if procuring agencies using minimum content standards find over the course of several months to a year that they are paying a higher price for paper or paper products containing postconsumer recovered materials than they would have paid for comparable virgin paper or paper products, they should adjust the minimum content levels so as to try to bring the price in line. On the other hand, if they find they can raise the levels without causing a long term-increase in price, they must do so. In either case, procuring agencies must be governed by the statutory requirement to procure designated items with the highest percentage of postconsumer recovered materials practicable.

B. Competition

The existing level of competition for paper and paper products containing postconsumer recovered materials varies depending on the product. The case-by-case, open bid approach in which bids are solicited for paper and paper products composed of virgin fibers as well as those containing postconsumer recovered materials will assure competition for all potential vendors while encouraging the maximum utilization of postconsumer recovered materials by offering a preference in the bidding process for products with such materials in case of a tie bid.

The other recommended approach is to set minimum content standards. For a large majority of products, both virgin and recycled products coexist in the marketplace, with some manufacturers producing products from all-virgin materials, some using only recovered materials, and others using both. Thus, a minimum content standard will automatically exclude many potential bidders that market only virgin products. The percentage of bidders excluded depends on how high the minimum content standards are set. EPA knows of no analytical method of accurately setting minimum content standards that are low enough to assure adequate competition, and yet high enough to maximize the use of postconsumer recovered materials, except through experience. Thus, procuring agencies must learn through trial and error how best to insure competition while fulfilling the primary goals of this guideline.

C. Availability and Delays

The Agency does not believe that procuring agencies should have to tolerate any unusual or unreasonable delays in obtaining paper or paper products containing postconsumer recovered materials. The experiences of GSA and of States with affirmative procurement programs have shown that these products are generally available at all locations. One possible exception mentioned by some States is printing and writing paper. In some cases, delays have been incurred because of low levels of storage or warehousing in the vicinity of the procurement depot. However, as affirmative procurement programs prove effective, printing and writing papers containing recovered materials should become more widely and consistently available, as are other paper and paper products containing postconsumer recovered materials.

Some commenters have suggested that EPA should provide assistance to procuring agencies in determining availability by identifying potential suppliers and by encouraging these suppliers to bid on government contracts. EPA has placed in the record lists of mills that manufacture paper or paper products using postconsumer recovered materials, especially printing and writing paper and tissue products. Procuring agencies also are in direct contact with paper vendors on a regular basis and can seek this information directly.

VOL 52 ISS 193 OC 6 1987 UMI

D. Performance

Product performance is discussed in Section III.E of the preamble.

VI. Implementation

Different parts of section 6002 refer to different dates by which procuring agencies must have completed or initiated a required activity: (1) May 8, 1986 (i.e., 18 months after enactment of HSWA); (2) one year after the date of publication of an EPA guideline; and (3) the date specified in EPA guidelines. As a result, there is some confusion with respect to which activities must be completed or initiated by each date. This section of the preamble explains these requirements.

First, under section 6002(d)(1), Federal agencies that have the responsibility for drafting or reviewing specifications for procurement items must eliminate from such specifications any exclusion of recovered materials and any requirements that items be manufactured from virgin materials. This activity was required to be completed by May 8, 1986.

Second, procuring agencies must assure that their specifications for procurement items designated by EPA require the use of recovered materials to the maximum extent possible without jeopardizing the intended end use of the item (Section 6002(d)(2)). In addition, procuring agencies must develop an affirmative procurement program for purchasing items designated by EPA, in this instance, paper and paper products containing postconsumer recovered materials (Section 6002(i)(1)). Both of these activities must be completed within *one year after the date of publication of this final guideline* [emphasis added].

Third, after the date specified by EPA in the applicable guideline, procuring agencies that procure items designated by EPA must begin procurement of such items containing the highest percentage of recovered materials practicable (Section 6002(c)(1)). In addition, contracting officers must require vendors to submit estimates and certifications of recovered materials content (Section 6002(c)(3)).

With respect to this third set of requirements, EPA believes that procuring agencies should begin to procure paper and paper products containing postconsumer recovered materials as soon as the specification revisions have been completed and the affirmative procurement programs have been developed. As stated, these latter activities must be completed within one year after publication of this final guideline. The proposed guideline did not clearly specify the date on which affirmative procurement, including a program for obtaining estimates and certifications, must begin. Therefore, to be consistent with the statutory requirements, EPA has specified that affirmative procurement should begin in one year.

To clarify this point, EPA has added § 250.22 to the final guideline which states procuring agencies must begin procurement of paper and paper products containing postconsumer recovered materials one year from the date of publication of this guideline as a final rule.

VII. Summary of Supporting Analyses

A. General

There are three major studies on the effects of a Federal policy for the procurement of paper containing recovered materials: *Can Federal Procurement Practices be Used to Reduce Solid Waste?* (Arthur D. Little, Inc., 1973); *Collection of Data Pertinent to Paper Products Containing Recycled Materials* (Franklin Associates, Ltd., 1979); and *Evaluation of Federal Paper Procurement Practices* (Gershman, Brickner and Bratton, Inc., 1981). These studies appear in the public record for this rulemaking. In addition, an economic analysis, a background document, and other pertinent information are included in the record.

B. Environmental and Energy Effects

Several commenters pointed out that the notice of proposed rulemaking contained no discussion of the environmental impact of using paper and paper products containing postconsumer recovered materials, although no such information was submitted with these comments. As stated earlier, concerns about the high cost of solid waste disposal and the difficulty many communities are having in locating new disposal sites, as well as Congressional mandate, are the chief reasons for this guideline. Published reports discussing the environmental impacts of using paper and paper products containing postconsumer recovered materials describe the impact on natural resources and air, surface water, and ground-water pollution.[2] [3] [4]

However, based on information in its possession, EPA is unable to conclude that there will be any significant environmental impact, positive or negative, from the Federal procurement of paper and paper products containing postconsumer recovered materials (or waste paper).

Several commenters took exception to the statements in the notice of proposed rulemaking regarding the contamination of recycled paper by polychlorinated biphenyls (PCBs), although, again, no contradictory data were submitted. However, upon reconsideration, EPA notes that the PCB content of paper and paper products is already regulated by the Agency under the Toxic Substances Control Act and that, therefore, no special restriction or provision is necessary in this procurement guideline.

Background information placed in the record indicates that production of recycled newsprint and semichemical medium used in fiber boxes require somewhat less fossil energy than comparable products manufactured of 100 percent virgin fiber. Other paper products vary considerably as to energy use with no clear pattern. The energy efficiency of mills depends on a number of factors, including the age and configuration of the mills. Modern mills are likely to be more energy efficient than older mills, and larger mills are likely to be more energy efficient than smaller mills. The energy advantage varies from product to product and mill to mill as well as between users of virgin and recovered materials. Recycled feedstocks seem to be a minor factor.

In any event, the variability in energy efficiency between mills, be they virgin or recycling, is greater than the difference in energy efficiency between the two types of mills, which tends to reduce the importance of this issue.

C. Volume Reduction and Cost Impacts of Reducing Paper Disposal in Landfills

Paper is the largest single component of municipal solid waste both on the basis of weight and volume. As a consequence, any reduction of the volume of paper to be disposed will have a favorable impact on both the cost of disposal and on the space devoted to landfilling.

Based on the paper consumption statistics and reported utilization rates of waste paper, EPA estimates that 50 million tons of paper entered the municipal solid waste stream in 1984 that had to be disposed of by landfill and other means. This estimate assumes a 10 percent allowance for paper that is temporarily or permanently retained

---

(books, business records, etc.), or otherwise diverted (toilet tissue, building products, etc.). The Resource Conservation Committee report to the President and Congress [5] estimated average disposal costs for municipal solid waste at $43 per ton. Savings through diversion and/or recovery were estimated to be at least $15 per ton. Therefore, any reduction in this volume of postconsumer solid waste should be economically beneficial to the municipalities disposing of the waste.

D. Executive Order No. 12291

Under Executive Order (E.O.) No. 12291, regulations must be classified as major or nonmajor. E.O. No. 12291 establishes the following criteria for a regulation to qualify as a major rule:

1. An annual effect on the economy of $100 million or more;

2. A major increase in costs or prices for consumers; individual industries; Federal, State, or local government agencies; or geographic regions; or

3. Significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Federal purchases of paper and paper products do not constitute a large enough share of these markets for industry to make manufacturing decisions that are not otherwise economically feasible in order to meet Federal procurement requirements. In fact, some Federal procurement policies have been modified in recent years to conform more closely to common commercial standards for some paper products, e.g., toilet tissue. The granting of a price preference is not recommended in the final guideline; therefore, product costs should not increase. Furthermore, the flexibility allowed to the procuring agencies in implementing an affirmative procurement program should make it possible to make adjustments if any adverse market dislocation or decrease in competition should occur.

Because of the number of items included in the paper and paper product categories and the number of procurement actions taken by procuring agencies each year, some agencies may find it necessary to initially allocate additional resources to implement this guideline. However, the flexibility allowed and the practices recommended in this guideline are intended to avoid on-going increased expenditures by procuring agencies. For example, EPA has recommended that the procedure for estimating and certifying postconsumer recovered materials content be simple and that it be consistent with the procuring agency's usual contracting procedure.

On the basis of the above information and on more extensive data in the rulemaking docket, the Agency has concluded that this guideline is a nonmajor rule.

This document has been submitted to the Office of Management and Budget (OMB) for review as required by E.O. No. 12291.

E. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601 et seq., whenever an agency publishes a general notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis that describes the impact of the rule on small entities (i.e., small businesses, small organizations, small governmental jurisdictions), unless the Administrator certifies that the rule will not have significant economic impact on a substantial number of small entities.

Because of the $10,000 threshold, EPA does not expect a substantial number of small entities to be affected by this guideline. The Agency also believes that the flexible approach to procurement of paper and paper products containing postconsumer recovered materials provided for in this guideline will not impose a significant regulatory or economic burden on small procuring agencies, manufacturers, vendors, or contract printers. Detailed information on this assessment can be found in the RCRA docket for this guideline.

For the above reasons, EPA certifies that this guideline will not have a significant economic impact on a substantial number of small entities. Therefore, this guideline does not require a regulatory flexibility analysis.

F. Paperwork Reduction Act

The information collection requirements contained in the final rule have been approved by OMB under the provisions of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq. and have been assigned OMB control number 2050–0045.

List of Subjects in 40 CFR Part 250

Forest and forest products, Government contracts, Government procurement, Packaging and containers, Paper, Recycling, Resource recovery.

Dated: September 18, 1987.

Lee M. Thomas,

Administrator.

For the reasons set out in the Preamble, Part 250 is added to Chapter I of Title 40 of the CFR to read as follows:

PART 250—GUIDELINE FOR FEDERAL PROCUREMENT OF PAPER AND PAPER PRODUCTS CONTAINING RECOVERED MATERIALS

Subpart A—General

Sec.
250.1 Purpose.
250.2 Designation.
250.3 Applicability.
250.4 Definitions.

Subpart B—Revisions and Additions to Paper and Paper Product Specifications

250.10 Introduction.
250.11 Elimination of recovered materials exclusion.
250.12 Requirement of postconsumer recovered materials content.
250.13 Exclusion for products containing postconsumer recovered materials that do not meet reasonable performance standards.
250.14 New specifications.

Subpart C—Affirmative Procurement Program for Paper Containing Postconsumer Recovered Materials

250.20 Elements of affirmative procurement program.
250.21 Limitations to affirmative procurement program.
250.22 Implementation.

Authority: 42 U.S.C. 6912(a) and 6962.

Subpart A—General

§ 250.1 Purpose.

(a) The purpose of this guideline is to assist procuring agencies in complying with the requirements of section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act (RCRA), as amended, as that section applies to paper and paper products.

(b) This guideline contains recommendations for implementing the requirements of section 6002 of RCRA, including the revision of specifications and the establishment of an affirmative program for the procurement of paper and paper products containing postconsumer recovered materials. The guideline also makes recommendations concerning solicitations for bids and estimation, certification, and verification procedures. In addition, the guideline sets dates for implementation.

(c) The Agency believes that adherence to the practices recommended in the guideline constitutes compliance with section 6002

[5] Choices for Conservation. SW–779. Resource Conservation Committee Final Report to the President and Congress, July 1979.

of RCRA, as it relates to the purchase of paper and paper products containing postconsumer recovered materials.

§ 250.2 Designation.

Under section 6002(e)(1) of RCRA, paper and paper products are designated as items which can be produced with recovered materials and whose procurement by procuring agencies will carry out the objectives of section 6002 of RCRA.

§ 250.3 Applicability.

(a) This guideline applies to all paper and paper products purchased with appropriated Federal funds.

(b) This guideline applies to all procuring agencies and to all procurement actions when (1) the agency purchases a procurement item, as defined in § 250.4, with appropriated Federal funds; and (2) the purchase price of the item exceeds $10,000, or the quantity of such items or of functionally equivalent items purchased with appropriated Federal funds during the preceding fiscal year was $10,000 or more. For purposes of this guideline, each item listed in each category below is considered functionally equivalent to every other item in the category: All grades and types of xerographic/copy paper; newsprint; all grades and types of printing and writing paper; corrugated and fiberboard boxes; folding boxboard and cartons; stationery, office papers (e.g., memo pads, scratch pads), envelopes, and manifold business forms including computer paper; toilet tissue, paper towels, facial tissue, paper napkins, doilies, and industrial wipers; and brown papers and coarse papers.

(c) Procurement actions covered by this guideline include:

(1) All purchases of paper or paper products made directly by a procuring agency or by any person contracting with any such agency with respect to work being performed under such contract, for example, contract printing; and

(2) Indirect purchases of paper and paper products made by a procuring agency, such as purchasing resulting from Federal grants, loans, and similar forms of disbursements of monies that the procuring agency intended to be used for the procurement of paper or paper products, except in cases where funds are designated for continuing programs or activities and no separate accounting is made.

(d) Purchases of paper and paper products that are unrelated or incidental to Federal funding, i.e., not the direct result of a Federal contract, grant, loan, funds disbursement, or agreement with a procuring agency, are not covered by this guideline.

§ 250.4 Definitions.

As used in this guideline, the following terms shall have the meaning indicated below:

"Act" or "RCRA" means the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act, as amended;

"Bleached papers" means paper made of pulp that has been treated with bleaching agents;

"Bond paper" means a generic category of paper used in a variety of end use applications such as forms (see "form bond"), offset printing, copy paper, stationery, etc. In the paper industry, the term was originally very specific but is now very general.

"Book paper" means a generic category of papers produced in a variety of forms, weights, and finishes for use in books and other graphic arts applications, and related grades such as tablet, envelope, and converting papers;

"Brown papers" means papers usually made from unbleached kraft pulp and used for bags, sacks, wrapping paper, and so forth;

"Coarse papers" means papers used for industrial purposes, as distinguished from those used for cultural or sanitary purposes;

"Computer paper" means a type of paper used in manifold business forms produced in rolls and/or fan folded. It is used with computers and word processors to print out data, information, letters, advertising, etc. It is commonly called computer printout;

"Corrugated boxes" means boxes made of corrugated paperboard, which, in turn, is made from a fluted corrugating medium pasted to a flat sheet of paperboard (linerboard); multiple layers may be used;

"Cover stock" or "Cover paper" means a heavyweight paper commonly used for covers, books, brochures, pamphlets, and the like;

"Doilies" means paper place mats used on food service trays in hospitals and other institutions;

"Duplicator paper" means writing papers used for masters or copy sheets in the aniline ink or hectograph process of reproduction (commonly called spirit machines);

"Envelopes" means brown, manila, padded, or other mailing envelopes not included with "stationery";

"Facial tissue" means a class of soft absorbent papers in the sanitary tissue group;

"Federal agency" means any department, agency, or other instrumentality of the Federal Government, any independent agency or establishment of the Federal Government including a government corporation, and the Government Printing Office;

"Fiber or fiberboard boxes" means boxes made from containerboard, either solid fiber or corrugated paperboard (general term); or boxes made from solid paperboard of the same material throughout (specific term);

"Folding boxboard" means a paperboard suitable for the manufacture of folding cartons;

"Form bond" means a lightweight commodity paper designed primarily for business forms including computer printout and carbonless paper forms. (See manifold business forms);

"Industrial wipers" means paper towels especially made for industrial cleaning and wiping;

"Ledger paper" means a type of paper generally used in a broad variety of recordkeeping type applications such as in accounting machines.

"Manifold business forms" means a type of product manufactured by business forms manufacturers that is commonly produced as marginally punched continuous forms in small rolls or fan folded sets with or without carbon paper interleaving. It has a wide variety of uses such as invoices, purchase orders, office memoranda, shipping orders, and computer printout;

"Mill broke" means any paper waste generated in a paper mill prior to completion of the papermaking process. It is usually returned directly to the pulping process. Mill broke is excluded from the definition of "recovered materials";

"Mimeo paper" means a grade of writing paper used for making copies on stencil duplicating machines;

"Newsprint" means paper of the type generally used in the publication of newspapers or special publications like the *Congressional Record*. It is made primarily from mechanical wood pulps combined with some chemical wood pulp;

"Office papers" means note pads, loose-leaf fillers, tablets, and other papers commonly used in offices, but not defined elsewhere;

"Offset printing paper" means an uncoated or coated paper designed for offset lithography;

"Paper" means one of two broad subdivisions of paper products, the other being paperboard. Paper is generally lighter in basis weight, thinner, and more flexible than paperboard. Sheets 0.012 inch or less in thickness are generally classified as paper. Its primary uses are for printing, writing, wrapping,

and sanitary purposes. However, in this guideline, the term paper is also used as a generic term that includes both paper and paperboard. It includes the following types of papers: Bleached paper, bond paper, book paper, brown paper, coarse paper, computer paper, cover stock or cover paper, duplicator paper, form bond, ledger paper, manifold business forms, mimeo paper, newsprint, office papers, offset printing paper, printing paper, stationery, tabulating paper, unbleached papers, writing paper, and xerographic/copy paper;

"Paper napkins" means special tissues, white or colored, plain or printed, usually folded, and made in a variety of sizes for use during meals or with beverages;

"Paper product" means any item manufactured from paper or paperboard. The term "paper product" is used in this guideline to distinguish such items as boxes, doilies, and paper towels from printing and writing papers. It includes the following types of products: Corrugated boxes, doilies, envelopes, facial tissue, fiber of fiberboard boxes, folding boxboard, industrial wipers, paper napkins, paper towels, tabulating cards, and toilet tissue;

"Paper towels" means paper toweling in folded sheets, or in raw form, for use in drying or cleaning, or where quick absorption is required;

"Paperboard" means one of the two broad subdivisions of paper, the other being paper itself. Paperboard is usually heavier in basis weight and thicker than paper. Sheets 0.012 inch or more in thickness are generally classified as paperboard. The broad classes of paperboard are containerboard, which is used for corrugated boxes; boxboard, which is principally used to make cartons; and all other paperboard;

"Practicable" means capable of being used consistent with: Performance in accordance with applicable specifications, availability at a reasonable price, availability within a reasonable period of time, and maintenance of a satisfactory level of competition;

"Printing paper" means paper designed for printing, other than newsprint, such as offset and book paper;

"Procurement item" means any device, good, substance, material, product, or other item, whether real or personal property, that is the subject of any purchase, barter, or other exchange made to procure such item;

"Procuring agency" means any Federal agency, or any State agency or agency of a political subdivision of a State that is using appropriated Federal funds for such procurement, or any person contracting with any such agency with respect to work performed under such contract;

"Recovered materials" means waste material and by-products that have been recovered or diverted from solid waste, but such term does not include those materials and by-products generated from, and commonly reused within, an original manufacturing process. In the case of paper and paper products, the term "recovered materials" includes:

(a) Postconsumer materials such as:

(1) Paper, paperboard, and fibrous wastes from retail stores, office buildings, homes, and so forth, after they have passed through their end usage as a consumer item, including: Used corrugated boxes, old newspapers, old magazines, mixed waste paper, tabulating cards, and used cordage, and

(2) All paper, paperboard, and fibrous wastes that enter and are collected from municipal solid waste; and

(b) Manufacturing, forest residues, and other wastes such as:

(1) Dry paper and paperboard waste generated after completion of the papermaking process (that is, those manufacturing operations up to and including the cutting and trimming of the paper machine reel into smaller rolls or rough sheets) including: Envelope cuttings, bindery trimmings, and other paper and paperboard waste, resulting from printing, cutting, forming, and other converting operations; bag, box and carton manufacturing wastes; and butt rolls, mill wrappers, and rejected unused stock; and

(2) Finished paper and paperboard from obsolete inventories of paper and paperboard manufacturers, merchants, wholesalers, dealers, printers, converters, or others;

(3) Fibrous by-products of harvesting, manufacturing, extractive, or wood-cutting processes, flax, straw, linters, bagasse, slash, and other forest residues;

(4) Wastes generated by the conversion of goods made from fibrous material (e.g., waste rope from cordage manufacture, textile mill waste, and cuttings); and

(5) Fibers recovered from waste water that otherwise would enter the waste stream;

"Recyclable paper" means any paper separated at its point of discard or from the solid waste stream for utilization as a raw material in the manufacture of a new product. It is often called "waste paper" or "paper stock." Not all paper in the waste stream is recyclable; it may be heavily contaminated or otherwise unusable.

"Specification" means a detailed description of the technical requirements for materials, products, or services that specifies the minimum requirement for quality and construction of materials and equipment necessary for an acceptable product. Specifications are generally in the form of a written description, drawings, prints, commercial designations, industry standards, and other descriptive references;

"State" means any of the several States, the District .of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands;

"Stationery" means writing paper suitable for pen and ink, pencil, or typing. Matching envelopes are included in this definition;

"Tabulating cards" means cards used in automatic tabulating machines;

"Tabulating paper" means paper used in tabulating forms for use on automatic data processing equipment;

"Toilet tissue" means a sanitary tissue paper. The principal characteristics are softness, absorbency, cleanliness, and adequate strength (considering easy disposability). It is marketed in rolls of varying sizes or in interleaved packages;

"Unbleached papers" means papers made of pulp that has not been treated with bleaching agents;

"Writing paper" means a paper suitable for pen and ink, pencil, typewriter or printing.

"Xerographic/copy paper" means any grade of paper suitable for copying by the xerographic process (a dry method of reproduction).

Subpart B—Revisions and Additions to Paper and Paper Product Specifications

§ 250.10 Introduction.

This subpart offers guidance to Federal agencies that draft or review specifications for paper and paper products.

§ 250.11 Elimination of recovered materials exclusion.

By May 8, 1986, each Federal agency was required to assure that its specifications do not unfairly discriminate against the use of recovered materials. At a minimum, except as provided in § 250.13 of this Part, each Federal agency was required to:

(a) Revise those specifications, standards, and procedures that require that paper and paper products contain

only virgin materials to eliminate this restriction; and

(b) Revise those specifications, standards, and procedures that prohibit using recovered materials in paper and paper products to eliminate this restriction.

§ 250.12 Requirement of postconsumer recovered materials content.

(a) Within one year of publication of this guideline, paper and paper product specifications must require the use of postconsumer recovered materials to the maximum extent possible without jeopardizing the intended end use of the paper or paper product.

(b) Specifications that are unnecessarily stringent for a particular end use and that bear no relation to function, such as brightness and whiteness for copy paper, should be revised in order to allow for a higher postconsumer recovered materials content. Specifications that bear no relation to function should be revised according to the agency's established review procedure. In determining the relationship to function of existing specifications, Federal agencies should make maximum use of existing voluntary standards and research by organizations such as the American Society for Testing and Materials' Committees D6, D10, and F5; the Technical Association of the Pulp and Paper Industry; and the American Institute of Paper Chemistry.

§ 250.13 Exclusion for products containing postconsumer recovered materials that do not meet reasonable performance standards.

(a) Notwithstanding the requirements of §§ 250.11 and 250.12 of this Part, Federal agencies need not revise specifications to allow or require the use of postconsumer recovered materials if it can be technically determined that for a particular end use a product containing such materials will not meet reasonable performance standards.

(b) Any determination under this section should be documented by the drafting and reviewing agency and be based on technical performance information related to a specific item, not a grade of paper or type of product. Agencies should reference such documentation in subsequent solicitations for the specific item in order to avoid repetition of previously documented points.

§ 250.14 New specifications.

When paper or a paper product containing postconsumer recovered materials is produced in types and grades not previously available, specifications should be revised to allow use of such type or grade or new specifications should be developed for such type or grade. EPA recommends that procuring agencies monitor new developments and use them to increase the use of postconsumer recovered materials as appropriate.

Subpart C—Affirmative Procurement Program for Paper Containing Postconsumer Recovered Materials

§ 250.20 Elements of affirmative procurement program.

Within one year after the publication of the final guideline, procuring agencies must establish an affirmative procurement program consisting of the following elements:

(a) A preference program for procurement of paper and paper products containing postconsumer recovered materials consisting of one of the following:

(1) A policy of awarding contracts, on a case-by-case basis (where competing bids for individual items are otherwise equal), to the vendor offering an item composed of the highest percentage of postconsumer recovered materials practicable, subject to the limitations based on competition, availability, performance, and price described in section 6002(c)(1) (A)–(C) of the Act and § 250.21 of this Part, or

(2) Minimum recovered materials content standards that assure that the postconsumer recovered materials content is the maximum available without jeopardizing the intended end use of the item or violating the limitations of section 6002(c)(1) (A)–(C) of the Act and § 250.21 of this Part, or

(3) A substantially equivalent alternative to paragraph (a)(1) or (a)(2) of this section.

(b) A promotion program to promote the preference program adopted under paragraph (a) of this section. Under the program, procuring agencies should consider all possible promotional methods including the following:

(1) A special notation prominently displayed in any paper or paper product procurement solicitation or invitation to bid.

(2) A statement in each paper or paper products specification defining "postconsumer recovered materials" as they are defined in § 250.4 of this Part.

(3) A brief statement in advertisements of bids describing the preference program. Such advertisements should be placed in the *Commerce Business Daily* and periodicals commonly read by vendors of paper and paper products containing postconsumer recovered materials.

(4) Catalog listings of available products (such as GSA's Office Supplies) indicating which paper or paper product contains postconsumer recovered materials.

(5) Discussion of the preference program at prebidders' conferences or similar meetings of potential bidders.

(c) A program for estimates, certification, and verification.

(1) Agencies must require vendors to estimate the total percentage of postconsumer recovered materials in paper and paper products supplied to them.

(2) Agencies must require vendors to certify the minimum postconsumer recovered materials to be used in the performance of a contract.

(3) There must be reasonable verification procedures for estimates and certifications, e.g., the procuring agency may state in solicitations for bids that, in the case of a bidder's protest, all estimates and certifications will be subject to audits of mill records.

(d) A program for review and monitoring.

(1) Each agency must conduct an annual review and monitoring of the effectiveness of its affirmative procurement program.

(2) The annual review should include an estimate of the quantity of paper and paper products purchased containing postconsumer recovered materials.

§ 250.21 Limitations to affirmative procurement program.

A decision not to procure paper or paper products containing postconsumer recovered materials may be based only on one or more of the following factors: lack of competition among vendors; lack of reasonable availability within a reasonable time period; failure to meet the performance standards in the solicitation for bids or in the reasonable performance standards of the agency; or unreasonable price. For purposes of this guideline when considering bids, "unreasonable price" is any price other than the price offered in the lowest responsive bid by a responsible bidder.

§ 250.22 Implementation.

Procuring agencies must begin procurement of paper and paper products containing postconsumer recovered materials as required by Section 6002 and this guideline one year from the date of publication of this guideline as a final rule.

BILLING CODE 6560-50-M

VOL 52 ISS 193 OC 6 1987 UMI

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 69

[CC Docket 87-113; FCC 87-271]

Jurisdictional Separations Procedures

AGENCY: Federal Communications Commission; Federal-State Joint Board.

ACTION: Final rule.

SUMMARY: The Commission adopted revisions to the Access Charge Rules. Since there is a close relationship between these rules and the jurisdictional separations rules, and since the jurisdictional separations rules were also recently revised, it was necessary to conform the Access Charge Rules to the new separations rules.

EFFECTIVE DATE: January 1, 1988.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Michael Wilson or Charles Needy, Audits Branch, Accounting and Audits Division, Common Carrier Bureau, (202) 632-7500.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order, CC Docket No. 87-113, adopted August 14, 1987, and released August 18, 1987.

The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Summary of Report and Order

1. On May 1, 1987, the Commission released Notice of Proposed Rulemaking (Notice), CC Docket No. 87-113, 2 FCC Rcd 2673, published in the **Federal Register** May 6, 1987 (52 FR 17252), seeking comment on proposed amendments to Part 69 of its Rules. The Commission stated that its primary objective was to conform these Access Charge Rules to the recently revised jurisdictional separations rules. Accordingly, it proposed numerous conformance changes that, with only two exceptions, related to the apportionment of costs among the existing access cost elements. The two exceptions were a proposal to eliminate the Local Switching subelements and a proposal to consolidate the Line Termination, Local Switching and Intercept costs elements into a single cost element called Switching. In addition to proposing conformance changes, the Commission also proposed several minor changes to enhance its ability to review annual access tariff filings. Specifically, the Notice included a proposal to limit the annual October filings to rate level changes and it discouraged filings during the three-month period following the October filings. Finally, the Commission encouraged interested parties to provide data identifying any revenue requirement shifts expected to result from implementation of the proposed revisions.

2. The majority of the parties commenting in this proceeding were supportive of the proposed revisions on the whole. Moreover, based on its analysis of test data submitted by twelve parties, the Commission determined that the proposed revisions would result in only minimal industry revenue requirement shifts among the access cost elements. Consequently, on August 14, 1987, the Commission adopted, with modifications and minor corrections, all but one of its proposed amendments to the Access Charge Rules. The rejected amendment was the proposal to assign all interstate Marketing Expense to the interexchange cost category. The Commission decided that, in view of its decision in a separate proceeding to revise the jurisdictional separations procedures for Marketing Expense, it would retain the current Part 69 procedures for apportioning this expense to maintain consistency between these two procedures.

3. Further, the Commission substantially modified four of the proposed revisions before adopting them. One of these was the proposal to eliminate the Local Switching subelements. The Commission decided that these subelements should not be eliminated on a flash cut basis but, rather, should be phased out over a five-year period in a manner that parallels the formula for phasing in the new jurisdictional separations allocation factor for the same Central Office Equipment (COE). Another revision that was substantially modified was the proposal to allocate service observation board equipment on the basis of the remaining combined investment in COE Category 2 and Category 3. The Commission decided that this apportionment basis should include COE Category 1 as well as COE Category 2 and Category 3 to maintain consistency between Part 69 and Part 36 of its Rules. In addition, the Commission substantially modified its proposal to allocate the interstate expenses in Accounts 6210, 6220 and 6230 on the basis of the associated COE investment. The Commission found that, by changing this basis to "total COE investment," the allocation procedure would not only be more consistent with the Part 36 procedure but would also result in a significant reduction of the industry revenue requirement shift between the Switching and Special Access elements. Finally, the proposal to allocate Telephone Operator Services Expense on the basis of the relative number of weighted standard work seconds was substantially changed. Because some carriers purchase such services and therefore do not know the relative number of weighted standard work seconds, the Commission modified this proposal to allow such carriers to directly assign contracted operation services to the appropriate cost element.

4. The Commission rejected the suggestion of six commenting parties that different apportionment rules be prescribed for Class A and Class B carriers. It acknowledged that, under its adopted revisions to Part 69, some shifts in revenue requirements will occur among the access cost elements for individual companies and for the industry as a whole. The Commission concluded, however, that these shifts will not be large enough for the Class B carriers as a group to merit the increased administrative costs that would result from the inconsistent treatment of Class A and Class B carriers. It further concluded that these shifts will not be large enough to produce adverse consequences. Finally, the Commission decided to make the revisions effective on January 1, 1988, to coincide with the effective date of the revised jurisdictional separations rules and the revised accounting rules.

Ordering Clause

5. Accordingly, it is ordered, that the amendments to Part 69 contained herein are adopted effective January 1, 1988. This action is taken pursuant to sections 1, 4 (i) and (j), 205, 221(c), 403, and 410 of the Communications Act, as amended, 47 U.S.C. 151, 154 (i) and (j), 205, 221(c), 403 and 410.

Secretary.

Rules Changes

PART 69—[AMENDED]

1. The authority citation for Part 69 continues to read as follows:

Authority: Secs. 4, 201, 202, 203, 205, 218, 403, 48 Stat. 1066, 1070, 1072, 1077, 1094, as amended, 47 U.S.C. 154, 201, 202, 203, 205, 218, 403.

2. Section 69.2 is revised to read as follows:

§ 69.2 Definitions.

For purposes of the part:

(a) "Access Minutes" or "Access Minutes of Use" is that usage of exchange facilities in interstate or foreign service for the purpose of calculating chargeable usage. On the orginating end of an interstate or foreign call, usage is to be measured from the time the originating end user's call is delivered by the telephone company and acknowledged as received by the interexchange carrier's facilities connected with the originating exchange. On the terminating end of an interstate or foreign call, usage is to be measured from the time the call is received by the end user in the terminating exchange. Timing of usage at both the orginating and terminating end of an interstate or foreign call shall terminate when the calling or called party disconnects, whichever event is recognized first in the originating and terminating end exchanges, as applicable;

(b) "Access Service" includes services and facilities provided for the origination or termination of any interstate or foreign telecommunication;

(c) "Annual revenue requirement" means the sum of the return component and the expense component;

(d) "Association" means the telephone company association described in Subpart G of this Part;

(e) "Big Three Expenses" are the combined expense groups comprising: Plant Specific Operations Expense, Accounts 6110, 6120, 6210, 6220, 6230, 6310 and 6410; Plant Nonspecific Operations Expenses, Accounts 6510, 6530 and 6540, and Customer Operations Expenses, Accounts 6610 and 6620;

(f) "Big Three Expense Factors" are the ratios of the sum of Big Three Expenses apportioned to each element or category to the combined Big Three Expenses.

(g) "Cable and Wire Facilities" includes all equipment or facilities that are described as cable and wire facilities in the *Separations Manual;*

(h) "Carrier Cable and Wire Facilities" means all cable and wire facilities that are not subscriber line cable and wire facilities;

(i) "Central Office Equipment" or "COE" includes all equipment or facilities that are described as Central Office Equipment in the *Separations Manual;*

(j) "Corporate Operations Expenses" include Executive and Planning Expenses (Account 6710) and General and Administrative Expenses (Account 6720);

(k) "Customer Operations Expenses" include Marketing and Services expenses in Accounts 6610 and 6620, respectively;

(l) "Direct Expense" means expenses that are attributable to a particular category or categories of tangible investment described in Subpart D of this Part and includes:

(1) Plant Specific Operations expenses in Accounts 6110, 6120, 6210, 6220, 6223, 6310 and 6410; and

(2) Plant Nonspecific Operations Expenses in Accounts 6510, 6530, 6540 and 6560;

(m) "End User" means any customer of an interstate or foreign telecommunications service that is not a carrier except that a carrier other than a telephone compauy shall be deemed to be an "end user" when such carrier uses a telecommunications service for administrative purposes and a person or entity that offers telecommunications services exclusively as a reseller shall be deemed to be an "end user" if all resale transmissions offered by such reseller originate on the premises of such reseller;

(n) "Entry Switch" means the telephone company switch in which a transport line or trunk terminates;

(o) "Expense Component" means the total expenses and income charges for an annual period that are attributable to a particular element or category;

(p) "Expenses" include allowable expenses in the Uniform System of Accounts, Part 32, apportioned to interstate or international services pursuant to the *Separations Manual* and allowable income charges apportioned to interstate and international services pursuant to the *Separations Manual;*

(q) "General Support Facilities" include buildings, land, vehicles, aircraft, work equipment, furniture, office equipment and general purpose computers as described in the *Separations Manual;*

(r) "Information Origination/Termination Equipment" includes all equipment or facilities that are described as information origination/termination equipment in the *Separations Manual* except information origination/termination equipment that is used by telephone companies in their own operations;

(s) "Interexchange" or the "interexchange category" includes services or facilities provided as an integral part of interstate or foreign telecommunications that is not described as "access service" for purposes of this Part;

(t) "Level I Contributors" are telephone companies that are not association Common Line tariff participants, file their own Common Line tariffs effective April 1, 1989, and had a lower than average Common Line revenue requirement per minute of use in 1988 and thus were net contributors (i.e. had a negative net balance) to the association Common Line pool in 1988;

(u) "Level I Receivers" are telephone companies that are not association Common Line tariff participants, file their own Common Line tariffs effective April 1, 1989, and had a higher than average Common Line revenue requirement per minute of use in 1988 and thus were net receivers (i.e. had a positive net balance) from the association Common Line pool in 1988;

(v) "Level II Contributor" is a telephone company or group of affiliated telephone companies with fewer than 300,000 access lines and less than $150 million in annual operating revenues that is not an association Common Line tariff participant, files its own Common Line tariff effective January 1, 1990, and that had a lower than average Common Line revenue requirement per minute of use in 1988 and thus was a net contributor (i.e., had a negative net balance) to the association Common Line pool in 1988;

(w) "Level II Receiver" is a telephone company or group of affiliated telephone companies with fewer than 300,000 access lines and less than $150 million in annual operating revenues that is not an association Common Line tariff participant, files its own Common Line tariff effective January 1, 1990, and that had a higher than average Common Line revenue requirement per minute of use in 1988 and thus was a net receiver (i.e., had a positive net balance) from the association Common Line pool in 1988;

(x) "Line" or "Trunk" includes, but is not limited to, transmission media such as radio, satellite, wire, cable and fiber optic cable means of transmission;

(y) "Long Term Support" (LTS) means funds provided by telephone companies that are not association Common Line tariff participants to association Common Line tariff participants. LTS enables association Common Line tariff

VOL 52 ISS 193 OC 6 1987 UMI

participants to charge a Common Line (CL) rate equivalent to the CL rate that would result if all telephone companies participated in the association Common Line tariff;

(z) "Net Investment" means allowable original cost investment in Accounts 2001 through 2003, 1220 and 1402 that has been apportioned to interstate and foreign services pursuant to the *Separations Manual* from which depreciation, amortization and other reserves attributable to such investment that has been apportioned to interstate and foreign services pursuant to the *Separations Manual* have been subtracted and to which working capital that is attributable to interstate and foreign services has been added;

(aa) "Operating Taxes" include all taxes in Account 7200;

(bb) "Origination" of a service that is switched in a Class 4 switch or an interexchange switch that performs an equivalent function ends when the transmission enters such switch and "termination" of such a service begins when the transmission leaves such a switch, except that;

(1) Switching in a Class 4 switch or transmission between Class 4 switches that is not deemed to be interexchange for purposes of the Modified Final Judgement entered August 24, 1982, in *United States v Western Electric Co.*, D.C. Civil Action No. 82–0192, will be "origination" or "termination" for purposes of this Part; and

(2) "Origination" and "Termination" does not include the use of any part of a line, trunk or switch that is not owned or leased by a telephone company;

(cc) "Origination" of any service other than a service that is switched in a Class 4 switch or a switch that performs an equivalent function ends and "termination" of any such service begins at a point of demarcation that corresponds with the point of demarcation that is used for a service that is switched in a Class 4 switch or a switch that performs an equivalent function;

(dd) "Private Line" means a line that is used exclusively for an interexchange service other than MTS, WATS or an MTS–WATS equivalent service, including a line that is used at the closed end of an FX or CCSA service or any service that is substantially equivalent to a CCSA service;

(ee) "Public Telephone" is a telephone provided by a telephone company through which an end user may originate interstate or foreign telecommunications for which he pays with coins or by credit card, collect or third number billing procedures;

(ff) "Return Component" means net investment attributable to a particular element or category multiplied by the authorized annual rate of return;

(gg) "Subscriber Line Cable and Wire Facilities" means all lines or trunks on the subscriber side of a Class 5 or end office switch, including lines or trunks that do not terminate in such a switch, except lines or trunks that connect an interexchange carrier;

(hh) "Telephone Company" means a carrier that provides telephone exchange service as defined in section 3(r) of the Communications Act of 1934;

(ii) "Transitional Support" (TRS) means funds provided by telephone companies that are not association Common Line tariff participants, but were net contributors to the association Common Line pool in 1988, to telephone companies that are not association Common Line tariff participants and were net receivers from the association Common Line pool in 1988;

(jj) "Unit of Capacity" means the capability to transmit one conversation;

(kk) "WATS Access Line" means a line or trunk that is used exclusively for WATS service.

3. Section 69.3 is amended by revising paragraph (a) and by adding paragraph (e)(10) to read as follows:

§ 69.3 Filing of access service tariffs.

(a) A tariff for access service shall be filed with this Commission for an annual period. Such tariff shall be filed so as to provide a minimum of 90 days notice with a scheduled effective date of January 1. Such tariff filings shall be limited to rate level changes.

* * * * *

(e) * * *

(10) Any data supporting a tariff that is not an association tariff shall be consistent with any data that the filing carrier submitted to the association.

* * * * *

4. In § 69.4, paragraph (b) is revised to read as follows:

§ 69.4 Charges to be filed.

* * * * *

(b) Except as provided in subpart C of this Part and in § 69.4(c), the carrier's carrier charges for access service filed with this Commission shall include charges for each of the following elements:

(1) Limited pay telephone;
(2) Carrier common line;
(3) Local switching;
(4) Information;
(5) Common transport;
(6) Dedicated transport; and
(7) Special access.

* * * * *

5. Section 69.103 is revised to read as follows:

§ 69.103 Limited pay telephone (public telephones that can access the services of only one interexchange carrier).

(a) A charge that is expressed in dollars and cents per line per month shall be assessed upon an interexchange carrier for each line terminating in a public telephone which can be used to originate any of its interstate or foreign telecommunications services, but not such services of other interexchange carriers.

(b) The per line charge shall be computed by dividing one-twelfth of the projected annual revenue requirement for the Limited Pay Telephone element by the projected average number of public telephones which can access the services of only one interexchange carrier.

6. Section 69.106 is revised to read as follows:

§ 69.106 Local switching.

(a) Charges that are expressed in dollars and cents per access minute of use shall be assessed upon all interexchange carriers that use local exchange switching facilities for the provision of interstate or foreign services.

(b) A per minute charge shall be computed by dividing the projected annual revenue requirement for the Local Switching element by the projected annual access minutes of use for all interstate or foreign services that use local exchange switching facilities.

(c) If end users of an interstate or foreign service that uses local switching facilities pay message unit charges for such calls in a particular exchange, a credit shall be deducted from the Local Switching element charges to such carrier for access service in such exchange. The per minute credit for each such exchange shall be multiplied by the monthly access minutes for such service to compute the monthly credit to such a carrier.

(d) If all local exchange subscribers in such exchange pay message unit charges, the per minute credit described in paragraph (c) of this section shall be computed by dividing total message unit charges to all subscribers in a particular exchange in a representative month by the total minutes of use that were measured for purposes of computing message unit charges in such month.

(e) If some local exchange subscribers pay message unit charges and some do not, a per minute credit described in paragraph (c) of this section shall be computed by multiplying a credit

computed pursuant to paragraph (d) of this section by a factor that is equal to total minutes measured in such month for purposes of computing message unit charges divided by the total local exchange minutes in such month.

§ 69.107 [Removed]

7. Section 69.107 is removed.

§ 69.108 [Removed]

8. Section 69.108 is removed.

9. Section 69.201 is revised to read as follows:

§ 69.201 General.

Notwithstanding §§ 69.4, 69.104 through 69.106, and 69.111 through 69.112, charges for the access elements described in this Subpart shall be computed in accordance with this Subpart during the period commencing January 1, 1984 and ending December 31, 1992. This subpart does not supersede §§ 69.106(c) through 69.106(e).

10. Section 69.205 is revised to read as follows:

§ 69.205 Transitional premium charges.

(a) Charges that are computed in accordance with this section shall be assessed upon interexchange carriers or other persons that receive premium access in lieu of carrier charges that are computed in accordance with §§ 69.105, 69.106, 69.111 and 69.112 of this Part if any carrier or other person does not receive premium access. For purposes of this subpart, a carrier or other person shall be deemed to receive premium access if access is provided through a local exchange switch that has the capability to provide access for an MTS–WATS equivalent service that is substantially equivalent to the access provided for MTS or WATS, except that access provided for an MTS–WATS equivalent service that does not use such capability shall not be deemed to be premium access until six months after the carrier that provides such MTS–WATS equivalent service receives actual notice that such equivalent access is or will be available at such switch.

(b) The transitional premium charge for the Carrier Common Line element shall be expressed in dollars and cents per access minute. Such charge shall be computed by dividing the revenue requirement for such element by the sum of the projected premium access minutes for such element for such period and a number that is computed by multiplying the projected non-premium access minutes for such element for such period by .45.

(c) Separate Local Switching transitional premium charges that are expressed in dollars and cents per access minute shall be computed for the LS1 and LS2 categories. The LS1 category shall consist of local dial switching for services other than MTS, WATS and services receiving access to the local switch equal to that received by MTS and WATS. The LS2 category shall consist of local dial switching for MTS, WATS and services receiving access to the local switch equal to that received by MTS and WATS.

(d) The charge for an LS2 premium access minute shall be computed by dividing the premium Local Switching revenue requirement by the sum of the projected LS2 premium access minutes and a number that is computed by multiplying the projected LS1 premium access minutes by the applicable LS1 transition factor. The charge for an LS1 premium access minute shall be computed by multiplying the charge for an LS2 premium access minute by the applicable LS1 transition factor. The premium Local Switching revenue requirement shall be computed by subtracting the projected revenues from non-premium charges attributable to the Local Switching element from the revenue requirement for such element.

(e) During each of the following years the LS1 transition factor shall be:

(1) 1988—.78;
(2) 1989—.83;
(3) 1990—.88;
(4) 1991—.93; and
(5) 1992—.98.

(f) Transitional premium charges that are computed in accordance with applicable requirements shall be assessed for the Transport element or elements. Such premium charges shall be designed to produce total annual revenue that is equal to the premium transport revenue requirement. The premium transport revenue requirement shall be computed by subtracting projected revenues from non-premium charges attributable to the Transport element or elements from the revenue requirement for such element or elements.

11. Section 69.206 is revised as follows:

§ 69.206 Transitional non-premium charges for MTS–WATS equivalent services.

(a) Charges that are computed in accordance with this section shall be assessed upon interexchange carriers or other persons that receive access that is not deemed to be premium access in lieu of carrier charges that are computed in accordance with §§ 69.105, 69.106, 69.111 and 69.112.

(b) The transitional non-premium charge for the Carrier Common Line element shall be computed by multiplying the premium charge for such element by .45.

(c) The transitional non-premium charge for the Local Switching element shall be computed by multiplying a hypothetical premium charge for such element by .45. The hypothetical premium charge for such element shall be computed by dividing the annual revenue requirement for such element by the sum of the projected premium access minutes for such element for such period and a number that is computed by multiplying the projected non-premium minutes for such element for such period by .45.

(d) The transitional non-premium charge or charges for the Transport element or elements shall be computed by multiplying the corresponding premium charge or charges by .45.

§ 69.208 [Removed]

12. Section 69.208 is removed.

13. Subparts D and E of Part 69 are revised as follows:

Subpart D—Apportionment of Net Investment

Sec.
69.301 General.
69.302 Net investment.
69.303 Information origination/termination equipment (IOT).
69.304 Subscriber line cable and wire facilities.
69.305 Carrier cable and wire facilities (C&WF).
69.306 Central office equipment (COE).
69.307 General support facilities.
69.308 Equal access equipment.
69.309 Other investment.
69.310 Capital investment.

Subpart E—Apportionment of Expenses

69.401 Direct expenses.
69.402 Operating taxes (Account 7200).
69.403 Marketing expenses (Account 6610).
69.404 Telephone operator services expenses in Account 6620.
69.405 Published directory expenses in Account 6620.
69.406 Local business office expenses in Account 6620.
69.407 Revenue accounting expenses in Account 6620.
69.408 All other customer services expenses in Account 6620.
69.409 Corporate operations expenses (Account 6710 and 6720).
69.410 Equal access expenses.
69.411 Other expenses.
69.412 Non participating company payments/receipts.
69.413 Universal service fund expenses.
69.414 Lifeline assistance expenses.

VOL 52 ISS 193 OCT 6 1987 UMI

Subpart D—Apportionment of Net Investment

§ 69.301 General.

(a) For purposes of computing annual revenue requirements for access elements net investment as defined in § 69.2(z) shall be apportioned among the interexchange category, the billing and collection category and access elements as provided in this subpart. Expenses shall be apportioned as provided in Subpart E of this part.

(b) The End User Common Line and Carrier Common Line elements shall be combined for purposes of this subpart and subpart E of this part. Those elements shall be described collectively as the Common Line element. The Common Line element revenue requirement shall be segregated in accordance with subpart F of this part.

§ 69.302 Net investment.

(a) Investment in Accounts 2001, 1220 and Class B Rural Telephone Bank Stock booked in Account 1402 shall be apportioned among the interexchange category, billing and collection category and appropriate access elements as provided in §§ 69.303 through 69.309.

(b) Investment in Accounts 2002 and 2003 shall be apportioned in the following manner:

(1) Central Office Equipment (COE) investment shall be apportioned among the interexchange category and appropriate access elements in the same proportions as total Accounts 2210, 2220, and 2230 COE Assets combined;

(2) Cable and Wire Facilities (C&WF) investment shall be apportioned among the interexchange category and appropriate access elements in the same proportions as total Account 2410 C&WF Assets;

(3) General Support Facilities investment shall be apportioned among the interexchange category, the billing and collection category, and appropriate access elements on the basis of General Support Facilities Investment in Account 2001.

(4) Investment that is not COE, C&WF or General Support Facilities shall be apportioned among the interexchange category, the billing and collection category, and appropriate access elements in the same proportions as the associated investment in Account 2001, Telecommunications Plant in Service.

§ 69.303 Information origination/termination equipment (IOT).

(a) Investment in public telephones and appurtenances shall be assigned to the Common Line element, if capable of use with the services of more than one interexchange carrier, or the Limited Pay Telephone element, if capable of use with the services of only one interexchange carrier.

(b) Investment in all other IOT shall be apportioned between the Special Access and Common Line elements on the basis of the relative number of equivalent lines in use, as provided herein. Each interstate or foreign Special Access Line, excluding lines designated in § 69.115(e), shall be counted as one or more equivalent lines where channels are of higher than voice bandwidth, and the number of equivalent lines shall equal the number of voice capacity analog or digital channels to which the higher capacity is equivalent. Local exchange subscriber lines shall be multiplied by the interstate Subscriber Plant Factor to determine the number of equivalent local exchange subscriber lines.

§ 69.304 Subscriber line cable and wire facilities.

(a) Investment in local exchange subscriber lines shall be assigned to the Common Line element.

(b) Investment in interstate and foreign private lines and interstate WATS access lines shall be assigned to the Special access element.

(c) Investment in lines terminating in public telephones which may only access the services of one interexchange carrier (or partnership) shall be assigned to the Limited Pay Telephone element. Investment in all other lines terminating in public telephones shall be assigned to the Common Line element.

§ 69.305 Carrier cable and wire facilities (C&WF).

(a) Carrier C&WF that is not used for "origination" or "termination" as defined in § 69.2(bb) and § 69.2(cc) shall be assigned to the interexchange category.

(b) Carrier C&WF, other than WATS access lines, not assigned pursuant to paragraph (a) of this section that is used for interexchange services that use switching facilities for origination and termination that are also used for local exchange telephone service shall be apportioned between the Dedicated Transport and Common Transport elements. Such C&WF shall be assigned to the Dedicated Transport element if it is used exclusively for the interexchange services of a particular carrier.

(c) All Carrier C&WF that is not apportioned pursuant to paragraphs (a) and (b) of this section shall be assigned to the Special Access element.

§ 69.306 Central office equipment (COE).

(a) The Separations Manual categories shall be used for purposes of apportioning investment in such equipment except that any Central office equipment attributable to a Dedicated transport subelement shall be assigned to the Dedicated transport element.

(b) COE Category 1 (Operator Systems Equipment) shall be apportioned among the interexchange category and the access elements as follows: Category 1 that is used for intercept services shall be assigned to the Local Switching element. Category 1 that is used for directory assistance shall be assigned to the Information element. Category 1 other than service observation boards that is not assigned to the Information element and is not used for intercept services shall be assigned to the interexchange category. Service observation boards shall be apportioned among the interexchange category and the Information, Common Transport and Local Switching access elements based on the remaining combined investment in COE Category 1, Category 2 and Category 3.

(c) COE Category 2 (Tandem Switching Equipment) that is deemed to be exchange equipment for purposes of the Modification of Final Judgment in *United States* v. *Western Electric Co.* shall be assigned to the Common Transport element. All other COE Category 2 shall be assigned to the interexchange category.

(d) COE Category 3 (Local Switching Equipment) shall be assigned to the Local Switching element except as provided in paragraph (a) of this Section.

(e) COE Category 4 (Circuit Equipment) shall be apportioned among the interexchange category and the Common Line, Limited Pay Telephone, Dedicated Transport, Common Transport and Special Access elements. COE Category 4 shall be apportioned in the same proportions as the associated Cable and Wire Facilities.

§ 69.307 General support facilities.

General Support Facilities investments shall be apportioned among the interexchange category, the billing and collection category, and Common Line, Limited Pay Telephone, Local Switching, Information, Dedicated Transport, Common Transport, and Special Access elements on the basis of Central Office Equipment, Information Origination/Termination Equipment, and Cable and Wire Facilities excluding Category 1.3, combined.

§ 69.308 Equal access equipment.

Equal Access investment shall be assigned to the Local Switching element.

§ 69.309 Other investment.

Investment that is not apportioned pursuant to §§ 69.302 through 69.308 shall be apportioned among the interexchange category, the billing and collection category, and access elements in the same proportions as the combined investment that is apportioned pursuant to §§ 69.303 through 69.308.

§ 69.310 Capital leases.

Capital Leases in Account 2680 shall be directly assigned to the appropriate interexchange category or access elements consistent with the treatment prescribed for similar plant costs or shall be apportioned in the same manner as Account 2001.

Subpart E—Apportionment of Expenses

§ 69.401 Direct expenses.

(a) Plant Specific Operations Expenses in Accounts 6110 and 6120 shall be apportioned among the interexchange category, the billing and collection category and appropriate access elements on the following basis:

(1) Account 6110—Apportion on the basis of other investment apportioned pursuant to § 69.309.

(2) Account 6120—Apportion on the basis of General and Support Facilities investment pursuant to § 69.307.

(b) Plant Specific Operations Expenses in Accounts 6210, 6220 and 6230 shall be apportioned among the interchange category and access elements on the basis of the apportionment of the total COE investment.

(c) Plant Specific Operations Expenses in Accounts 6310 and 6410 shall be assigned to the appropriate investment category and shall be apportioned among the interexchange category and access elements in the same proportions as the total associated investment.

(d) Plant Non Specific Operations Expenses in Accounts 6510 and 6530 shall be apportioned among the interchange category, the billing and collection category, and access elements in the same proportions as the combined investment in COE, IOT, and C&WF apportioned to each element and category.

(e) Plant Non Specific Operations Expenses in Account 6540 shall be assigned to the interexchange category.

(f) Plant Non Specific Operations Expenses in Account 6560 shall be apportioned among the interexchange category, the billing and collection category, and access elements in the same proportion as the associated investment.

(g) Amortization of embedded customer premises wiring investment shall be deemed to be associated with § 69.303(b) IOT investment for purposes of the apportionment described in paragraph (c) of this section.

§ 69.402 Operating taxes (Account 7200).

(a) Federal income taxes, state and local income taxes, and state and local gross receipts or gross earnings taxes that are collected in lieu of a corporate income tax shall be apportioned among the interexchange category, the billing and collection category and all access elements based on the approximate net taxable income on which the tax is levied (positive or negative) applicable to each element and category.

(b) All other operating taxes shall be apportioned among the interexchange category, the billing and collection category and all access elements in the same manner as the investment apportioned to each element and category pursuant to § 69.309 Other Investment.

§ 69.403 Marketing expense (Account 6610).

Marketing expense shall be apportioned among the interexchange category and all access elements in the same proportions as the combined investment that is apportioned pursuant to § 69.309.

§ 69.404 Telephone operator services expenses in Account 6620.

Telephone Operator Services expenses shall be apportioned among the interexchange category, and the Local Switching and Information elements based on the relative number of weighted standard work seconds. For those companies who contract with another company for the provision of these services, the expenses incurred shall be directly assigned among the interexchange category and the Local Switching and Information elements on the basis of the bill rendered for the services provided.

§ 69.405 Published directory expenses in Account 6620.

Published Directory expenses shall be assigned to the Information element.

§ 69.406 Local business office expenses in Account 6620.

(a) Local business office expenses shall be assigned as follows:

(1) End user service order processing expenses attributable to presubscription shall be apportioned among the Common Line, Switching, and Transport elements in the same proportion as the investment apportioned to those elements pursuant to § 69.309.

(2) End user service order processing, payment and collection, and billing inquiry expenses attributable to the company's own interstate private line and special access service shall be assigned to the Special Access element.

(3) End user service order processing, payment and collection, and billing inquiry expenses attributable to interstate private line service offered by an interexchange carrier shall be assigned to the billing and collection category.

(4) End user service order processing, payment and collection, and billing inquiry expenses attributable to the company's own interstate message toll service shall be assigned to the interexchange category. End user service order processing, payment and collection, and billing inquiry expenses attributable to interstate message toll service offered by an interexchange carrier shall be assigned to the billing and collection category. End user payment and collection and billing inquiry expenses attributable to End User Common Line access billing shall be assigned to the Common Line element.

(5) End user service order processing, payment and collection, and billing inquiry expenses attributable to TWX service shall be assigned to the Special Access element.

(6) Interexchange carrier service order processing, payment and collection, and billing inquiry expenses attributable to private lines and special access shall be assigned to the Special Access element.

(7) Interexchange carrier service order processing, payment and collection, and billing inquiry expenses attributable to interstate switched access and message toll, shall be apportioned among the Common Line, Local Switching and Transport elements in the same proportion as the investment apportioned to those elements pursuant to § 69.309.

(8) Interexchange carrier service order processing, payment and collection, and billing inquiry expenses attributable to billing and collection service shall be assigned to the billing and collection category.

(9) Coin collection and administration expenses shall be divided between limited and non-limited public telephones. Coin collection and administration expenses attributable to limited public telephones shall be assigned to the Limited Pay Telephone element. Coin collection and administration expenses attributable to non-limited public telephone shall be assigned to the Common Line element.

VOL 52 ISS 193 OCT 6 1987 UMI

§ 69.407 Revenue accounting expenses in Account 6620.

(a) Revenue accounting expenses that are attributable to End User Common Line access billings shall be assigned to the Common Line element.

(b) Revenue Accounting Expenses that are attributable to carrier's carrier access billing and collecting expense shall be apportioned among all carrier's carrier access elements except the Common Line element. Such expenses shall be apportioned in the same proportion as the combined investment in COE, C&WF and IOT apportioned to those elements.

(c) All other Revenue Accounting Expenses shall be assigned to the billing and collection category.

§ 69.408 All other customer services expense in Account 6620.

All other customer services expenses shall be apportioned among the Interexchange category, the billing and collection category and all access elements based on the combined expenses in §§ 69.403 through 69.407.

§ 69.409 Corporate operations expenses (Accounts 6710 and 6720).

All corporate operations expenses shall be apportioned among the interexchange category, the billing and collection category and all access elements in accordance with the Big 3 Expense Factor as defined in § 69.2(f).

§ 69.410 Equal access expenses.

Equal Access expenses shall be assigned to the Local Switching element.

§ 69.411 Other expenses.

Except as provided §§ 69.412, 69.413, and 69.414, expenses that are not apportioned pursuant to §§ 69.401 through 69.410 shall be apportioned among the interexchange category and all access elements in the same manner as § 69.309 Other investment.

§ 69.412 Non participating company payments/receipts.

For telephone companies that are not association Common Line tariff participants, the payment or receipt of funds described in § 69.612(a) and (b) shall be apportioned, respectively, as an addition to or a deduction from their common line revenue requirement.

§ 69.413 Universal service fund expenses.

Expenses allocated to the interstate jurisdiction pursuant to §§ 36.631 and 36.641 shall be assigned to the Carrier Common Line Element until March 31, 1989. Beginning April 1, 1989, such expenses shall be assigned to the Universal Service Fund Element.

§ 69.414 Lifeline assistance expenses.

Expenses allocated to the interstate jurisdiction pursuant to § 36.741 shall be assigned to the Carrier Common Line element until March 31, 1989. Beginning April 1, 1989, such expenses shall be assigned to the Lifeline Assistance element.

14. Section 69.501 is amended by revising paragraphs (c) and (d) to read as follows:

§ 69.501 General.

* * * * *

(c) Any portion of the Common Line element annual revenue requirement that is attributable to customer premises wiring included in IOT investment or expense shall be assigned to the Carrier Common Line element or elements.

(d) Any portion of the Common Line element revenue requirement that is attributable to public telephone investment or expense shall be assigned to the Carrier Common Line element or elements.

* * * * *

15. Section 69.603 is revised to read as follows:

§ 69.603 Association functions.

(a) The Association shall not engage in any activity that is not related to the preparation of access charge tariffs or the collection and distribution of access charge revenues or the operation of a billing and collection pool on an untariffed basis unless such activity is expressly authorized by order of the Commission.

(b) Participation in Commission or court proceedings relating to access charge tariffs, the billing and collection of access charges, the distribution of access charge revenues, or the operation of a billing and collection pool on an untariffed basis shall be deemed to be authorized association activities.

47 CFR Part 73

[MM Docket No. 85-156; RM-4938; RM-5403; RM-5808]

Radio Broadcasting Services; Claremore and Locust Grove, OK; Barling, AR

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission, at the request of Mike Warren, allocates Channel 233A to Claremore, Oklahoma, at the community's first local FM service. At the request of Doyal Hoover, Channel 264A is allocated to Locust Grove, Oklahoma, as the community's first local FM service. Additionally, at the request of Teresa Brown, Channel 233C2 is substituted for Channel 233A at Barling, Arkansas, and her construction permit for Station KPHN is modified to

specify the higher powered channel. The allocation of Channel 233A at Claremore requires a site restriction of 11.6 kilometers (7.2 miles) south and Channel 233C2 at Barling requires a site restriction of 11.4 kilometers (7.1 miles) south. The allocation at Locust Grove requires no site restriction. With this action, this proceeding is terminated.

DATES: Effective November 13, 1987. The window period for filing applications for the Claremore and Locust Grove, Oklahoma, allotments will open on November 16, 1987, and close on December 16, 1987.

47 CFR Parts 73, 74 and 76

Oversight of the Radio and TV Rules

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This Order amends the Alphabetical Indexes in Parts 73, 74 and 76 by updating and correcting them as needed.

EFFECTIVE DATE: October 1, 1987.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Steve Crane, Policy and Rules Division, Mass Media Bureau, (202) 632–5414.

SUPPLEMENTARY INFORMATION: In this Order, the Alphabetical Indexes are amended by removing listings of rules removed during the past year, adding listings of newly adopted rules and correcting listings as needed. Adopted September 15, 1987; released September 30, 1987.

Order

Adopted: September 15, 1987.

Released: September 30, 1987.

By the Chief, Mass Media Bureau.

1. In this Order, the Commission adds or deletes listings in the alphabetical indexes of Parts 73, 74, and 76 (no modifications in Part 78), pursuant to changes adopted in Commission rule makings in the past 12 months. These corrections are made in September of each year for inclusion in the upcoming October edition of Title 47 of the Code of Federal Regulations.

2. Our experience in alphabetically indexing the broadcast rules clearly indicates that this data makes possible the location of regulations quickly and easily. This fast access has brought about a better understanding of our rules by broadcasters and practitioners. Providing easy access to the rules has reduced considerably the number of letters and phone calls to the FCC requesting help in rule location, thereby minimizing paperwork and administrative workload on the FCC staff, broadcasters and their legal and engineering advisors.

3. No substantive changes are made herein which impose additional burdens or remove provisions relied upon by licensees or the public. We conclude, for the reasons set forth above, that these revisions to Parts 73, 74, and 76 will serve the public interest.

4. These amendments are implemented by authority delegated by the Commission to the Chief, Mass Media Bureau. Inasmuch as these amendments impose no additional burdens and raise no issue upon which comments would serve any useful purpose, prior notice of rule making, effective date provisions and public procedure thereon are inapplicable pursuant to the Administrative Procedure act. 5 U.S.C. 553(b)(3)(B).

5. Since general notice of proposed rule making is not required, the Regulatory Flexibility Act does not apply.

6. Therefore, it is ordered, that pursuant to sections 4(i), 303(r) and 5(c)(1) of the Communications Act of 1934, as amended, and §§ 0.61 and 0.283 of the Commission's Rules, Parts 73, 74 and 76 of the FCC Rules and Regulations

VOL 52 ISS 193 OC 6 1987 UMI

are amended as set forth below, effective October 1, 1987.

7. For further information on this Order, contact Steve Crane, Mass Media Bureau, (202) 632–5414.

Federal Communications Commission.

William H. Johnson,

Acting Chief, Mass Media Bureau.

Rule Changes

47 CFR is amended to read as follows:

1. The authority citations for Parts 73, 74, and 76 continue to read as follows:

Authority: 47 U.S.C. 154 and 303.

PART 73—[AMENDED]

2. The alphabetical index of 47 CFR Part 73 is amended by removing the following index entries:

Channels, Classes of Commercial, and stations operating thereon (FM).....73.206
Classes of stations and permissible channels (FM).....73.206
Origination, Program.....73.1130
Station program origination.....73.1130

3. The alphabetical index of 47 CFR Part 73 is amended by adding the following index entries:

[Following "FM subsidiary communications services".....73.295]
FM transmitter site map submissions...73.4108
[Following "Multiple" under Applications–]
Mutually exclusive applications for LPTV and TV translator and booster stations.....73.3521

4. The alphabetical index of 47 CFR Part 73 is amended by making the following corrections:

(a) Correcting the section number for the listing "Foreign broadcast stations—Permits to furnish programs" from 73.3543 to 73.3545;

(b) Correcting the section title for § 73.3572 (under Applications) which currently reads "TV, LPTV, TV translator processing" to correctly state "TV, LPTV, translator and TV booster processing".

PART 74—[AMENDED]

5. The alphabetical index of 47 CFR Part 74 is amended by adding the following index entry:

[Following "Translators, TV, Purpose of (LPTV/TV Translators)."....74.731]
TV boosters, Broadcast rules applicable to (LPTV/TV Translators/TV Boosters.....74.780

6. The alphabetical index of 47 CFR Part 74 is amended by correcting the entry of § 74.780, Broadcast regulations applicable to LPTV and TV translators, to correctly read, Broadcast regulations applicable to LPTV, TV translators and TV boosters.

PART 76—[AMENDED]

7. The alphabetical index of 47 CFR Part 76 is amended by removing the following index entries:

Carriage services on vertical blanking interval.....76.64
Carriage, Subscription TV programs.....76.64
Carriage, TV broadcast signals.....76.55
Contours, signal, Determination of.....76.65
Determination, Signal contour.....76.65
Market size operation provisions—
Major TV markets.....76.61
Small TV markets.....76.59
Markets outside major/smaller.....76.57
Must Carry requirements.....76.7
Operating provisions by market size—
Major TV markets.....76.61
Smaller TV markets.....76.59
Markets outside major/smaller.....76.57
Provisions to operate by market size—
Major TV markets.....76.61
Smaller TV markets.....76.59
Markets outside major/smaller.....76.57
Signal Carriage, Manner of.....76.55
Signal contour determination.....76.65
Smaller TV markets.....76.5
Subscription TV program carriage.....76.64
TV broadcast signals, Carriage of.....76.51
TV markets, Smaller.....76.51

8. The alphabetical index of 47 CFR Part 76 is amended by adding the following index entries:

[Preceding "Broadcast station, TV".....76.5]
Broadcast, Sports.....76.67
[Following "Candidates for public office, Cablecast by".....76.205]
Carriage disputes.....76.58
Carriage, mandatory, Expiration of.....76.64
Carriage, Manner of.....76.62
Carriage of other TV signals.....76.60
Carriage of TV stations, Mandatory.....76.56
Carriage of TV stations, Mandatory, Exemption from.....76.70
[Following "Community Unit".....76.5]
Consumer education-selector switches.....76.66
[Following "Dismissal: Special relief petitions".....76.8]
Disputes concerning carriage.....76.58
[Following "Independent station".....76.5]
Input selector switches.....76.66
Input selector switches, consumer education.....76.66
Input selector switches, Exemption.....76.70
[Preceding "Marine and aeronautical emergency frequencies, Operation near".....76.616]
Mandatory carriage of TV stations.....76.56
Mandatory carriage of TV stations, Exemption from.....76.70
Manner of carriage.....76.62
[Under "Q"]—
Qualified TV station, Showing.....76.55
[Preceding "Show cause order".....76.9]
Selector switches, Input.....76.66
Selector switches, input, Exemption.....76.70
[Following "TV markets, Major".....76.51]
TV signals, Carriage non-mandatory.....76.60

§ 76.53 [Amended]

9. The alphabetical index of 47 CFR Part 76 is amended by correcting the entry for § 76.53, Boundaries, TV worksheets, to correctly read Boundaries, TV markets.

[FR Doc. 87–23057 Filed 10–5–87; 8:45 am]
BILLING CODE 6712–01–M

VETERANS ADMINISTRATION

48 CFR Part 819

Small Business and Small Disadvantaged Business Concerns

AGENCY: Veterans Administration.

ACTION: Final rule.

SUMMARY: The Veterans Administration (VA) is amending the VA Acquisition Regulation (VAAR) to make it consistent with the provisions in the National Defense Authorization Act for FY 1987.

EFFECTIVE DATE: October 1, 1987.

FOR FURTHER INFORMATION CONTACT: Chris A. Figg, Policy and Interagency Service (91A), Office of Procurement and Supply, Veterans Administration, 810 Vermont Avenue NW., Washington, DC 20420, (202) 233–2334.

SUPPLEMENTARY INFORMATION:

I. Program Information

VAAR §§ 819.806–2 and 819.806–4 were published as deviations to the Federal Acquisition Regulation (FAR). The deviation provided a different definition of fair market price from that contained in the FAR. The VAAR definition allowed the award of 8(a) contracts if the price was determined to be fair and reasonable. Pub. L. 99–661 relies upon the FAR definition of fair market price and the VAAR is made consistent with that definition by this amendment. This amendment emphasizes steps to ensure that all appropriate actions are considered in determining the fair market price.

II. Executive Order 12291

Pursuant to the memorandum from the Director, Office of Management and Budget, to the Administrator, Office of Information and Regulatory Affairs, dated December 13, 1984, this final rule is exempt from sections 3 and 4 of Executive Order 12291.

III. Regulatory Flexibility Act (RFA)

Because this final rule does not come within the term rule as defined in the RFA (5 U.S.C. 601(2)), it is not subject to the requirements of that Act. In any case, this change, in itself, will not have a significant economic impact on a

substantial number of small entities because the VAAR subpart will primarily implement the regulations set forth in FAR Subpart 8.4.

IV. Paperwork Reduction Act

This final rule requires no additional information collection or recordkeeping requirement upon the public.

List of Subjects in 48 CFR Part 819

Government procurement.

Approved: September 28, 1987.

Thomas K. Turnage,

Administrator.

Part 819 of Title 48 Code of Federal Regulations is amended as follows:

PART 819—SMALL BUSINESS AND SMALL DISADVANTAGED BUSINESS CONCERNS

1. The authority citation for Part 819 continues to read as follows:

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

2. In 48 CFR Part 819, all references to "Office of Construction" are revised to read "Office of Facilities."

Subpart 819.8—Contracting with the Small Business Administration (The 8(a) Program)

3. Sections 819.806–2 and 819.806–4 are revised, and section 819.806–3 is added to read as follows:

819.806–2 Estimating the current fair market price.

(a) Estimating the fair market price is a crucial initial step in determining what is a reasonable price for a negotiated 8(a) contract. For supplies and equipment, previous prices paid under competitive conditions, adjusted for inflation, may provide necessary data to make such an estimate.

(b) Estimating fair market price for such services as architect-engineer and construction may be accomplished through independent cost estimates and other pertinent data obtained from SBA when the estimated fair market price is not fully supportable from available documentation (see FAR 19.806–2(a)).

819.806–3 Pricing review by the Small Business Administration.

In order to expedite the 8(a) process, SBA should be informed as soon as a disparity between the 8(a) offered price and the estimated fair market price is determined. The SBA and the VA contracting office should collaborate to determine if the disparity is:

(a) A result of deficiencies in developing the fair market price, thereby requiring revision to the estimate;

(b) A result of overpricing by the 8(a) company, thereby requiring further efforts to negotiate a decrease in the offered price; or

(c) A legitimate differential which should be funded through the SBA business development expense.

819.806–4 Funding business development expense.

If SBA declines to fund the business development expense, it will be reported in accordance with 819.870.

819.7004 [Amended]

4. Section 819.7004 is amended by removing the words "07–2268 or."

[FR Doc. 87–22984 Filed 10–5–87; 8:45 am]

BILLING CODE 6320–01–M

INTERSTATE COMMERCE COMMISSION

49 CFR Parts 1160 and 1165

[Ex Parte No. MC–142 (Sub-No. 4)]

Revision of Licensing Procedures To Include Applications for Removal of Restrictions From Authorities of Motor Carriers of Property and Passengers

AGENCY: Interstate Commerce Commission.

ACTION: Final rule.

SUMMARY: The Commission eliminates the restriction removal rules at 49 CFR Part 1165 and substitutes a new Subpart G to the licensing rules at 49 CFR Part 1160 to allow carriers to remove operating restrictions from their authorities by using conventional application procedures. This action unifies and simplifies the application and restriction removal guidelines, and preserves the procedural requirements for restriction removal applications of 49 U.S.C. 10922(i).

EFFECTIVE DATE: This action will be effective November 6, 1987.

FOR FURTHER INFORMATION CONTACT: Suzanne Higgins O'Malley (202) 275–7181 or Andrew L. Lyon, (202) 275–7691.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to Dynamic Concepts, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423, or call (202) 289–4357 (assistance for the hearing impaired is available through TDD services (202) 275–1721) or by pickup from Dynamic Concepts, Inc., in Room 2229 at Commission headquarters.

Environmental and Energy Considerations

The rules adopted here will not affect significantly the quality of the human environment or the conservation of energy resources.

Regulatory Flexibility Analysis

We confirm our preliminary assessment and certify that the revised approach to restriction removal adopted here will not have a significant economic impact on the substantial number of small entities because the new Subpart G does not alter the licensing and restriction removal options presently available. Carriers are not required to take action in response to these rule revisions. When such carriers do institute an application pursuant to the rules, they need only refer to a simplified set of guidelines. Small shipper entities will continue to benefit from the resulting expanded service options.

List of Subjects in 49 CFR Parts 1160 and 1165

Administrative practice and procedure, Buses, Motor carriers.

Decided: September 28, 1987.

By the Commission, Chairman Gradison, Vice Chairman Lamboley, Commissioners Sterrett, Andre, and Simmons.

Noreta R. McGee,

Secretary.

Title 49 of the Code of Federal Regulations is amended as follows:

PART 1165—REMOVAL OF RESTRICTIONS FROM AUTHORITIES OF MOTOR CARRIERS OF PROPERTY, MOTOR CARRIERS OF PASSENGERS, AND FREIGHT FORWARDERS [REMOVED]

1. Part 1165 of the Code of Federal Regulations, Title 49, is removed.

PART 1160—HOW TO APPLY FOR OPERATING AUTHORITY

2. The authority citation for 49 CFR Part 1160 is revised to read as follows:

Authority: 49 U.S.C. 10101, 10305, 10321, 10921, 10922, 10923, 10924, and 11102; 5 U.S.C. 553 and 559; and 16 U.S.C. 1456.

3. Part 1160 of the Code of Federal Regulations, Title 49, is amended by adding a new Subparagraph G as follows:

Subpart G—Rules for Removing Restrictions from Operating Authority; Motor Carriers of Property and Passengers

Sec.

1160.107 Requests for restriction removal.
1160.108 Procedural guidelines.

BEST COPY AVAILABLE

VOL 52 ISS 193 OC 6 1987 UMI

Sec.
1160.109 Information which shall accompany the application.
1160.110 Participation of interested persons.
1160.111 Notice.
1160.112 Furnishing a copy of the application package to interested persons.
1160.113 Disposition of the application.
1160.114 Compliance.

Subpart G—Rules for Removing Restrictions from Operating Authority; Motor Carriers of Property and Passengers

§ 1160.107 Requests for restriction removal.

Form OP–1 (an original and 1 copy) is to be filed by:

(a) Motor carriers of property seeking to remove operating restrictions from their certificates or permits in accordance with 49 U.S.C. 10922(i)(1); and

(b) Motor carriers of passengers seeking to remove operating restrictions from their certificates in order to authorize interstate transportation or service to intermediate points on any authorized route in accordance with 49 U.S.C. 10922(i)(4).

§ 1160.108 Procedural guidelines.

(a) Carriers seeking to relieve their existing authorities of operating restrictions as provided should distinguish their application forms by including at the top of page one the designation "Restriction Removal Application."

(b) The Commission will assign applications identified in this manner an "X" suffix on the docket number. Applications so designated will be processed within the expedited statutory time limitations provided at 49 U.S.C. 10922(i)

§ 1160.109 Information which shall accompany the application.

In addition to the pertinent information requested in the body of Form OP–1, restriction removal applicants shall submit the following information (an original and 1 copy) in the order set forth below:

(a) A copy of the certificate or permit from which applicant seeks to have restrictions removed or which it proposes be broadened.

(b) A proposed draft of the certificate or permit (commodity and territorial descriptions) with the restrictions removed or the authority broadened as proposed, together with sufficient information for the Commission to determine readily the precise portions of the existing authority to be modified. The redrafted certificate or permit shall be in the same format as the original so that, if the application is granted, it can be issued promptly without further redrafting by the Commission.

(c) A caption summary (an original and 1 copy) of the modifications proposed, suitable for publication in the ICC Register. The caption summary shall include an accurate summary of the restrictions applicant seeks removed, the authority applicant seeks broadened under these rules, or the authority applicant would hold if its application were granted. It shall also include the authority (including specific sub-numbers) which would be superseded by a grant of the application.

(d) Where the applicant is a motor carrier of property,

(1) A brief statement affirmatively indicating that it is fit, willing, and able to perform the broader service to be authorized; and

(2) A statement describing the effect of the proposal upon one or more of the following factors:

(i) The consumption of energy resources;

(ii) Potential cost savings and improved efficiency;

(iii) The provisions of the transportation policy set forth in 49 U.S.C. 10101(a); or

(iv) The provision and maintenance of service to small and rural communities and small shippers.

§ 1160.110 Participation of interested persons.

Comments (an original and 1 copy) shall be filed with the Commission within 25 days of the date of publication in the *ICC Register*. The envelope containing the comments and the comments shall be clearly marked "Restriction Removal Comments."

(a) Comments on applications filed by motor carriers of property. Any interested persons may comment on the applicant's proposal. Comments may address either or both:

(1) The merits of the particular proposal, including the reasonableness of the sought commodity expansion, and applicant's fitness, willingness, and ability to perform operations under the broadened authority, or

(2) Whether the proposal properly should be considered under these rules.

(b) Comments on applications filed by motor carriers of passengers. No common carrier of passengers may protest an application to remove an operating restriction under 49 U.S.C. 10922(i)(4) unless:

(1)(i) It possesses authority to handle, in whole or in part, the traffic for which authority is applied;

(ii) It is willing and able to provide service that meets the reasonable needs of the traveling public; and

(iii) It has performed service within the scope of the application during the previous 12-month period or has, actively in good faith, solicited traffic within the scope of the application during such period;

(2) It has pending before the Commission an application filed prior in time to the application being considered for substantially the same traffic; or

(3) The Commission grants leave to intervene upon a showing of other interests that are not contrary to the transportation policy set forth in 49 U.S.C. 10101(a).

(c) Protests for motor carriers of passengers must address:

(1) Whether the proposed interstate transportation directly competes with a commuter bus operation; and

(2) Whether the resulting interstate transportation would have a significant adverse effect on commuter bus service in the area in which the competing service will be performed.

(3) Protests also may address whether the proposal should properly be considered under these rules.

§ 1160.111 Notice.

Notice to the public of the filing of an application under these rules will be given by the Commission through publication of a caption summary in the *ICC Register*. Applicant shall comply with the requirements at 49 CFR 1160.9 (property carriers) or 1160.77 (passenger carriers) concerning filing copies of the application or caption summary with the Commission and State regulatory bodies.

§ 1160.112 Furnishing a copy of the application to interested persons.

Applicant's representative is required to furnish a copy of the application package to interested persons in accordance with the regulations at 49 CFR 1160.13(a) (property carriers) or 1160.81 (passenger carriers).

§ 1160.113 Disposition of the application.

(a) *Basis for determining the application.* Except in extraordinary circumstances, applications will be determined solely on the basis of the application itself and any comments that are received. There will be neither oral hearings nor the opportunity for the submission of evidence under modified procedure.

(b) *The Commission's decision.* Applications will be published in the *ICC Register* in the form of tentative decisions granting the authority

requested. If no comments are filed, the application will stand granted at the conclusion of the 25-day comment period, unless the Commission, prior to that time, stays the effectiveness of the tentative decision.

(c) *Administrative finality and appeals.* A decision disposing of an application subject to these rules is a final action of the Commission. Review of such an action on appeal is discretionary and is governed by the Commission's appeal regulations at 49 CFR Part 1115. Any party seeking review should specify the "extraordinary circumstances" involved in the proceeding to enable the Commission to extend the deadline for final Commission action an additional 90 days

§ 1160.114 Compliance.

A reformed certificate or permit will be issued upon a grant of an application. Prior to beginning operations under the newly issued authority, compliance must be made as described at 49 CFR 1160.19 (property carriers) or 1160.86 (passenger carriers).

Proposed Rules

Federal Register
Vol. 52, No. 193
Tuesday, October 6, 1987

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

9 CFR Part 92

[Docket No. 87-086]

Specifically Approved States Authorized To Receive Mares and Stallions Imported From CEM-Affected Countries

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: We are proposing to add Montana to the list of states approved to receive certain mares and stallions imported into the United States from countries affected with contagious equine metritis (CEM). We are taking this action because Montana has entered into an agreement with the Deputy Administrator, Veterinary Services, to enforce its state laws and regulations to control CEM and to require inspection, treatment, and testing of horses, as required by federal regulations, to further ensure the horses' freedom from CEM. This action will relieve unnecessary restrictions on importers of mares and stallions from countries affected with CEM.

DATE: Consideration will be given to comments postmarked or received on or before December 7, 1987.

ADDRESS: Send an original and two copies of written comments to Steven B. Farbman, Assistant Director, Regulatory Coordination, APHIS, USDA, Room 728, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Please state that your comments refer to Docket Number 87-086. Comments received may be inspected in Room 728 of the Federal Building between 8:00 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Dr. Harvey A. Kryder, Senior Staff Veterinarian, Import-Export and Emergency Planning Staff, VS, APHIS, USDA, Room 810, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-8695.

SUPPLEMENTARY INFORMATION:

Background

The regulations in 9 CFR Part 92, §§ 92.2(i)(2), 92.4(a)(5) and 92.4(a)(8), allow certain horses (mares and stallions over 731 days old) to be imported into the United States from certain countries where contagious equine metritis (CEM) exists if specific requirements to prevent their introducing CEM into the United States are met and the horses are consigned to approved states for further inspection, treatment, and testing.

Mares and stallions over 731 days old must be consigned to states which have been approved by the Deputy Administrator, Veterinary Services (VS), as meeting conditions necessary to ensure that the horses are free of CEM. These conditions, which concern inspection, treatment, and testing of the horses, are contained in § 92.4(a)(6) of the regulations for stallions and § 92.4(a)(9) of the regulations for mares.

Montana has agreed to abide by the regulations concerning horses imported from countries where CEM exists, and to enter into a written agreement with the Deputy Administrator, VS, to enforce its state laws and regulations to control CEM. Therefore, we propose to add Montana to the list of states approved to receive mares and stallions that are over 731 days old and imported into the United States from certain countries where CEM exists.

Executive Order 12291 and Regulatory Flexibility Act

We are issuing this proposed rule in conformance with Executive Order 12291, and we have determined that it is not a "major rule." Based on information compiled by the Department, we have determined that this proposed rule would have an effect on the economy of less than $100 million; would not cause a major increase in costs or prices for consumers, individual industries, federal, state, or local government agencies, or geographic regions; and would not cause a significant adverse effect on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this action, the Office of Management and Budget has waived the review process required by Executive Order 12291.

We anticipate that fewer than 25 mares and stallions over 731 days old will be imported into the state of Montana annually from countries where CEM exists. Approximately 2,400 mares and stallions over 731 days old and from countries where CEM exists were imported into the entire United States in Fiscal Year 1986. During this same period, approximately 26,000 horses of all classes were imported into the United States.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this section would not have a significant economic impact on a substantial number of small entities.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with state and local officials. (See 7 CFR Part 3015, Subpart V.)

List of Subjects in 9 CFR Part 92

Animal diseases, Canada, Imports, Livestock and livestock products, Mexico, Poultry and poultry products, Quarantine, Transportation, Wildlife.

Accordingly, 9 CFR Part 92 would be amended as follows:

PART 92—IMPORTATION OF CERTAIN ANIMALS AND POULTRY AND CERTAIN ANIMAL AND POULTRY PRODUCTS; INSPECTION AND OTHER REQUIREMENTS FOR CERTAIN MEANS OF CONVEYANCE AND SHIPPING CONTAINERS THEREON

1. The authority citation for Part 92 would be revised to read as follows:

Authority: 7 U.S.C. 1622; 19 U.S.C. 1306; 21 U.S.C. 102-105, 111, 134a, 134b, 134c, 134d, 134f, and 135; 31 U.S.C. 9701; 7 CFR 2.17, 2.51, and 371.2(d).

§ 9.24 [Amended]

2. In § 92.4, paragraphs (a)(5)(ii) and (a)(8)(ii) would be amended by adding

"The State of Montana." in alphabetical order.

Done in Washington, DC, on this 1st day of October, 1987.

B. G. Johnson,

Acting Deputy Administrator, Veterinary Services, Animal and Plant Health Inspection Service.

[FR Doc. 87-23108 Filed 10-5-87; 8:45 am]

BILLING CODE 3410-34-M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 50

[Docket No. PRM-50-44]

Committee To Bridge the GAP; Denial of Petition for Rulemaking

AGENCY: Nuclear Regulatory Commission.

ACTION: Denial of petition for rulemaking.

SUMMARY: The Nuclear Regulatory Commission (NRC) is denying a petition for rulemaking submitted by the Committee To Bridge the Gap. The petitioner requested that the Commission amend its regulations to require all licensees whose reactors employ graphite as a neutron moderator or reflector and whose licensed power is greater than 100 W to: (1) Formulate and submit for NRC approval fire response plans for combating a reactor fire involving graphite and other constituent reactor parts (e.g., fuel); (2) formulate and submit for NRC approval evacuation plans in case of a reactor fire; and (3) perform measurements of the Wigner energy stored in the graphite of their reactors and submit these measurements to the NRC for review, together with a revised safety analysis that shall address the risks and consequences of a reactor fire.

The petitioner believes these requirements are necessary because the previous NRC safety evaluations of these reactors allegedly were based on a belief that graphite fires were not credible and on an inability of the NRC and its contractors to properly calculate Wigner energy in the graphite. The Commission is denying the petition because Fort St. Vrain Nuclear Generating Station and all NRC-licensed research and test (non-power) reactors have approved plans for dealing with emergencies in accordance with existing regulations. The protective actions are based on conservative dose calculations consistent with those proposed by the petitioner.

Graphite burning is a very low-probability (i.e., noncredible) event and its potential is essentially independent of stored energy in graphite. Empirical measurements of stored energy in graphite are not needed to perform an evaluation of the releasable stored energy. Furthermore, the requirement for such measurements could result in personnel exposures that would be inconsistent with NRC's as low as is reasonably achievable (ALARA) principle.

ADDRESSES: Copies of the petition, public comments and abstracts of the comments received on the petition, and the Brookhaven National Laboratory Report NUREG/CR-4981 are available for inspection and copying under Docket No. PRM-50-44 in the NRC Public Document Room, 1717 H Street NW., Washington, DC. Copies of NUREG/CR-4981 may be purchased through the U.S. Government Printing Office by calling (202) 275-2060 or by writing to the U.S. Government Printing Office, P.O. Box 37082, Washington, DC 20013-7082. Copies may also be purchased from the National Technical Information Service, U.S. Department of Commerce, 5285 Port Royal Road, Springfield, VA 22161.

FOR FURTHER INFORMATION CONTACT: Theodore S. Michaels, Standardization and Non-Power Reactor Project Directorate, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone (301) 492-8251.

SUPPLEMENTARY INFORMATION:

The Petition

A petition for rulemaking was filed by the Committee To Bridge the GAP (CBG) on July 7, 1986. The petition was docketed by the Commission on July 7, 1986 and was assigned Docket No. PRM-50-44. A notice requesting comments on the petition was printed in the **Federal Register** on September 3, 1986 (51 FR 31341). The petition requests that the Commission amend its regulations.

Basis for the Request

The petitioner offered the following justification for the proposeod revision of the regulations:

- The occurrence of a graphite fire at the Chernobyl plant in the Soviet Union demonstrates that such fires are credible events. The NRC and its licensees have mistakenly dismissed graphite fires as noncredible events.
- New experimental data show that NRC's generic analysis of stored energy in research reactor graphite significantly underestimates the actual amount of stored energy, and thus underestimates the associated risk of graphite fire.
- The NRC failed to required basic safety measures that could help to reduce the threat of such a fire. Licensees whose reactors use graphite, including dozens of non-power reactors and one commercial power reactor, have no fire response plans for combating graphite fires in their reactors. Non-power reactor licensees do not have adequate emergency plans to evacuate members of the public in the event of a graphite fire or other severe accident.

For these reasons, the petitioner would require all licensees whose reactors employ graphite as a neutron moderator or reflector and whose licensed power is greater than 100 W to:

(a) Formulate and submit for NRC approval fire response plans for combating a reactor fire involving graphite and other constituent reactor parts (e.g., fuel) which might be involved in such a fire, taking into consideration the potential for explosive reactions. Response plans shall identify precisely which materials will be used to suppress a fire without increasing the risk of explosion, and shall indicate where and in what quantities these materials will be stored.

(b) Formulate and submit for NRC approval evacuation plans for a reactor fire. Plans should include evacuation out to a sufficient distance from the reactor such that no member of the public receives a dose to the thyroid greater than 5 rem, assuming a release to the environment of 25% of the equilibrium radioactive iodine inventory.

(c) Perform measurements of the "Wigner energy" stored in the graphite of their reactor, and submit these measurements to NRC for review together with a revised safety analysis, which shall address the risks and consequences of a reactor fire. A sufficient number of graphite samples shall be measured to identify the location of maximum stored energy, and to determine the maximum quantity of stored energy within ±10%.

Public Comments on the Petition

On September 3, 1986, the Commission published a notice in the **Federal Register** (51 FR 31341) requesting comments on the petition. The NRC received nine requests for an extension of the comment period. An extension of the comment period was granted, changing the closing date for the comments from November 3, 1986, to February 2, 1987. A total of 27 comments were received, six of which supported the petition and 21 of which opposed the petition. Of the six commenters supporting the petition, two were individual citizens and four were from

citizen's groups. Of the 21 commenters opposed to the petition, 15 were universities or university-related organizations, four were companies involved with the nuclear industry, one was a state government agency, and one was an individual citizen.

Of the comments in support of the petition, none offered any specific technical insights but rather simply endorsed the information and basis of the petition. These comments covered general concerns that include:

- The potential for graphite fires,
- Training of firefighters to manage graphite fires,
- Evacuation of persons on-site and in nearby areas in the event of an accident.

Highlights from the comments opposing the petition are as follows:

- CBG's comparison of research reactors to the Chernobyl-4 (RBMK) reactor ignores the extreme differences in power level, core size, fission product inventory, operating temperature, reactor control systems, and inherent design characteristics.
- CBG's inference that graphite fires were the initiating events in both the Chernobyl and Windscale accidents cannot be substantiated.
- The operating temperature of the Chernobyl graphite (700°C) dismisses CBG's contention that stored energy in the irradiated graphite played any role in the Chernobyl accident.
- CBG ignores the necessity for an initiating event to raise the graphite temperature 50C°-100C° above its normal operating temperature before any Wigner (stored) energy in graphite can be released.
- CBG ignores the fact that only the releasable stored energy, not the total stored energy, in graphite, in accordance with the annealing temperature, can contribute to a graphite temperature increase.
- The conditions necessary for graphite burning do not exist nor can they be created by random events in non-power reactors.
- The conditions necessary for graphite burning do not exist in the Fort St. Vrain reactor.
- Operating temperatures of the graphite in the Fort St. Vrain reactor preclude the accumulation of any significant quantity of stored energy (i.e., the graphite is self-annealing).
- NRC-approved emergency plans (required by 10 CFR Part 50, Appendix E) are in place at all NRC-licensed reactors and are adequate and acceptable.
- Measurement of stored energy is not consistent with the ALARA philosophy, since it requires the unnecessary exposure of reactor personnel.
- CBG fails to provide a technical basis for any of the petition's proposed requirements.

The comments opposing the petititon are too numerous to address individually. However, each comment has been considered by the staff and its contractors in analyzing the petition and in developing the NRC position. Abstracts of all comments received and the full text are available at the NRC Public Document Room in the Docket file PRM–50–44, as noted in the address section above.

Analysis of the Petition

(1) The petitioner asserts that "the occurrence of a graphite fire at the Chernobyl plant demonstrates that such fires are indeed credible events."

CBG filed its petition on July 7, 1986. Consequently, only fragmentary information, mostly conjecture, was available before the petition was filed. More detailed and definitive information was first made available, outside the Soviet Union, during a meeting held by the International Atomic Energy Agency (IAEA) in Vienna, Austria, on August 25 to 29, 1986. Without the benefit of the detailed Soviet report, the basis of the petititon is seriously flawed.

In response to the CBG assertion regarding the Chernobyl event, the NRC selected Brookhaven National Laboratory (BNL), operator of the Brookhaven Graphite Research Reactor, whose staff is recognized internationally for its research on reactor-grade graphite and its properties, to review the published information and determine its relevancy to the use of graphite in NRC-licensed reactors. In addition, BNL personnel reviewed the Chernobyl and Windscale accidents and the role, if any, of the graphite moderator in these events. The results of this review are contained in NUREG/CR-4981, "A Safety Assessment of the Use of Graphite in Nuclear Reactors Licensed by the U.S. NRC," July 1987. This report is available as noted in the address section above.

The staff has used the BNL report, comments received from the public, and its own understanding of and expertise relevant to the use of graphite in non-power reactors and Fort St. Vrain to evaluate and respond to the assertions and proposed requirements of the CGB petition (PRM–50–44).

In their evaluations of the Chernobyl accident, both Soviet and international scientists argee that graphite burning did occur during this accident. However, most of the experts, including the scientists at BNL, consider the graphite burning a secondary or corollary event resulting from the explosions that occurred as a result of a very rapid reactivity insertion that overheated the fuel and cladding. The explosion created the conditions necessary to initiate and sustain graphite burning (e.g., fragmentation of fuel and graphite, rupture of the moderator inert gas boundary, admission of air, a favorable ratio of graphite volume-to-surface area, sustained heat input from asphalt fires, and decay heat). Although the petition considers the Chernobyl accident a demonstration of graphite fire credibility, the accident confirms that initiation and sustained burning of graphite require the existence of a complex combination of ideal conditions, which are extremely difficult to achieve in any real situation and are virtually incredible in the reactors being considered under this petition. The words "credible" and "incredible" have been used in many AEC/NRC safety analyses. As used by the staff, these words have always been a qualitative statement of the likelihood or probability of an event or condition occurring. Accordingly, the staff's conclusion that sustained or self-sustained graphite burning is not a credible event in NRC-licensed reactors is still valid (i.e., the random simultaneous occurrence of the several conditions necessary for sustained graphite burning or self-sustained graphite burning is an event with a very small probability of occurring). The staff thus concurs in the conclusion reached in the BNL report: "There is no new evidence associated with the analyses of either the Windscale accident or the Chernobyl accident that indicates a credible potential for a graphite burning accident in any of the reactors considered in this review. Nor is there any new evidence that detailed case-by-case safety analysis of the role of graphite in NRC-licensed reactors are warranted." Accordingly, there has been no change in the staff's assessment of graphite burning, the Chernobyl accident notwithstanding, in NRC-licensed reactors, and no changes are required in the staff's previous findings in the safety evaluation reports prepared for these reactors.

(2) The petitioner states that "the NRC has failed to require basic safety measures to reduce the threat of a graphite fire."

The petitioner did not identify the "basic measures" the NRC has failed to require and provided no basis for this statement. The staff considers that the

VOL 52 ISS 193 OC 6 1987 UMI

elements of the NRC regulatory and licensing process represent the basic safety measures required of licensees to ensure the safe design and operation of their reactors as well as to provide specific plans and procedures for managing and responding to off-normal conditions and accidents. Some examples that are relevant to fire [1] detection, protection, and mitigation are listed below:

- Safety reviews of non-power reactors include an assessment of the fire protection systems at each facility. Fire detection, fire extinguishers, fire alarms, fire prevention, fire fighting training of facility personnel, and onsite and offsite response to fire alarms are typical areas included in the safety review. Inadequacies identified during the review must be corrected before a license is granted.
- Each non-power reactor licensee is required by conditions of the license (Technical Specifications) to provide a safety review for experiments to be inserted in their reactors and for changes in reactor operation. Among many other safety considerations, an assessment of fire potential (e.g., flammable materials) is included.
- Each non-power reactor licensee has responded to the requirements of 10 CFR 50.54(q) and 10 CFR Part 50, Appendix E, in submitting an emergency plan for NRC review and approval. All licensed non-power reactors now have approved emergency plans and the necessary implementing procedures. These plans were reviewed against ANSI/ANS–15.16–1982 and Regulatory Guide 2.6, proposed Revision 1, as outlined in NUREG–0849, "Standard Review Plan for the Review and Evaluation of Emergency Plans for Research and Test Reactors."

Examples of the evaluation items that are relevant to "basic safety measures to reduce the threat of . . . fire" are listed below:

(a) The [emergency] plan should also describe non-radiological monitors or indicators * * * (2) Fire detectors * * *

(b) The emergency plan should describe an initial training and periodic retraining program designed to maintain the ability of emergency response personnel to perform assigned functions for the following:

* * * f. Police security, ambulance, and fire fighting personnel * * * (NUREG–0849, Sections 8.0 and 10.0)

The licensee for Fort St. Vrain has satisfactorily met the requirements of 10 CFR Part 50.48 and 10 CFR Part 50, Appendix R. Appendix R, "Fire Protection Program for Nuclear Power Facilities Operating Prior to January 1, 1979," sets forth fire protection features required to satisfy Criterion 3 of Appendix A to 10 CFR Part 50. These NRC requirements include the "basic safety measures to reduce the threat of a . . . fire."

It is the staff's judgment that the NRC has required adequate basic safety measures to reduce the threat of fire as well as to mitigate the consequences of any fires that do occur. These measures have been reviewed, approved, and implemented for all licensed reactors. They generally apply to all fires and have been found to provide acceptable protection for the health and safety of the public.

(3) The petitioner alleges that "licensees have no fire response plans for graphite fires."

As discussed in item 2, above, all licensees have NRC-approved emergency plans in accordance with 10 CFR 50.54(q) and 10 CFR Part 50, Appendix E. These plans provide for response to fires, for training of fire fighting personnel, and for periodic drills to demonstrate proper operation of the plan in accordance with procedures developed for each facility. One commenter opposing the petition reported that the offsite fire fighters and their supervisors were regularly trained in fire fighting procedures for their facilities and that the fire fighters were confident that they were prepared to deal with the type of fires they could encounter, including a fire involving graphite. This is consistent with BNL research,[2] which recommends a basic fire fighting technique for graphite fires, that is, exclude air or oxygen and cool the graphite. Success in using this basic "cool-and-smother" technique was demonstrated during the Chernobyl accident. Gold nitrogen gas was pumped into the bottom of the reactor to successfully cool the graphite and fuel debris while excluding oxygen to smother any burning. Also at Chernobly, graphite blocks were successfully quenched using water (NUREG–1250, pp. 4–12, 4–21, and 7–23). Since this basic cool-and-smother technique is effective for most fires, the staff has concluded that the licensee' existing emergency plans provide an adquate response for graphite fires as well as any other type of fire.

(4) The petitioner asserts that "non-power reactors do not have adequate emergency plans to evacuate members of the public in the event of a graphite fire."

Neither the petitioner nor any of the citizens' groups or individuals supporting the petition provided a basis in support of this assertion. The staff has reconsidered the need to provide a plan to evacuate members of the public located off site in the very unlikely event of a graphite fire and, in the course of evaluating this petition, has not identified any such need.

As stated in Regulatory Guide 2.6, Revision 1:

> In the judgment of the NRC staff, the potential radiological hazards to the public associated with the operation of research and test reactors are considerably less than those involved with nuclear power plants. In addition, because there are many different kinds of non-power reactors, the potential for emergency situations arising and the consequences thereof vary from facility to facility. These differences and variations are expected to be reflected realistically in the emergency plans and procedures developed for each research and test reactor facility.

Accordingly, each non-power reactor licensee has developed an emergency plant based on the identified characteristics of its reactor facility. To assist licensees in meeting the requirements of 10 CFR Part 50, Appendix E, Regulatory Guide 2.6 (ANSI/ANS–15.16–1982, Table 2) provides an "Alternate Method for Determining the Size of an Emergency Planning Zone (EPZ)." Table 2 is based on highly conservative does calculations that are generically applicable to non-power reactors. These calculations include the very conservative assumption for non-power reactors that 25% of the equilibrium radioactive iodine is gaseous and will escape from the reactor building into the environment. It is the current and standard practice of the NRC staff to use the 25% iodine source term with regard to 10 CFR Part 20 recommended dose considerations in its safety evaluations of non-power reactors. Table 2, which is based on power level, recommends that reactors with power levels less than or equal to 2 MW use their "operations boundry" for their EPZs, which essentially recognizes that a reactor of this power level will only need to initiate protective actions for members of the general public on site and will not pose an unacceptable radiological hazard to members of the public off site. There are only five licensed non-power reactors containing graphite that have power levels greater than 2 MW. Three

[1] Covers all types of fires, including graphite fires.

[2] R.W. Powell, R.A. Meyer, and R.G. Bourdeau, "Control Radiation Effects in a Graphite Reactor Structure," *Proceedings of the Second United Nations International Conference on the Peaceful Uses of Atomic Energy*, Vol. 7, 1958, p. 293.

of the reactors have power levels less than 10 MW, one has a power level of 10 MW, and one has a power level of 20 MW. Table 2 recommends an EPZ of 100 meters of non-power reactors with power levels greater than 2 MW and equal to or less than 10 MW, and 400 meters for those with power levels greater than 10 MW and equal to or less than 20 MW. The licensee for each of these reactors has an NRC-approved emergency plan that takes into consideration the specific characteristics of each reactor (e.g., fision product inventory and engineered safety features) in the development of the action levels, procedures, and protective actions necessary to protect all members of the public within its EPZ. Regulatory Guides 1.3 and 1.4 recommend the use of the 25% radioactive iodine source term in determining the compliance of power reactors with the siting, containment, and dose guidelines of 10 CFR Part 100. The staff believes the current regulatory practices are suitable to ensure that the basic statutory requirement, for adequate protection of public health and safety, is met.

These emergency planning considerations are appropriate for reactors utilizing graphite components. Because the graphite contains no fission products and very few activation products, even the remote possibility of the graphite burning would not contribute to the radiological source term. Therefore, a graphite fire in and of itself presents essentially no radiological hazard to the public.

Because of the major differences in design, power level, core size, fission product inventory, reactor control systems, and inherent reactor neutronics, comparison of the Chernobyl accident and its consequences with accidents and the resulting consequences for non-power reactors is not appropriate, nor is it meaningful. Many of the comments received in opposition to the petition speak of the impropriety of comparing NRC-licensed non-power reactors with the Chernobyl RBMK–1000 reactor.

The petitioner has not provided any proof of inadequacy in the emergency plans for non-power reactors. On the basis of a review of the guidance for emergency planning contained in Regulatory Guide 2.6 and ANSI/ANS 15.16–1982 and the requirements of 10 CFR Part 50, Appendix E, the staff has concluded that the emergency plans previously approved by NRC are still appropriate and adequate. Neither the petitioner nor the commenters supporting the petition hve supplied information that demonstrates that, even in the remote case of graphite burning, there is a need to modify any existing emergency plans.

(5) The petitioner states that "NRC's generic analysis of stored energy in research reactor graphite significantly underestimates the actual amount of stored energy and thus underestimates the associated risk of graphite fire."

The conditions necessary for stored energy releases in graphite are described in section 3 of the BNL report. The staff agrees with the methodology derived for estimating the stored energy that can be released from graphite and in the analysis applied to the estimation of stored energy releases in Section 6 of the BNL report.

In section 2 of the BNL report, the necessary conditions for graphite to burn are discussed in detail. A reassessment of the literature on the experiments previously performed at BNL and the reported details of the Windscale and Chernobyl accidents are included in the BNL study. The conclusions reached as a result of these analyses are:

> [T]he potential to initiate or maintain a graphite burning incident is essentially independent of the stored energy in the graphite, and depends on other factors that are unique for each research reactor and for Fort St. Vrain. In order to have self-sustained rapid graphite oxidation in any of these reactors, certain necessary conditions of geometry, temperature, oxygen supply, reaction product removal and a favorable heat balance must be maintained. There is no new evidence associated with either the Windscale Accident or the Chernobyl Accident that indicates a credible potential for a graphite burning accident in any of the reactors considered in this review.

On the basis of its review of the BNL report, the literature on BNL experiments, and the information on the Windscale and Chernobyl events, the staff finds that the conclusions reached by BNL are correct and adopts them as its own.

(6) The petitioner asserts that "actual empirical measurements of Wigner energy will be required to assess the magnitude of the energy stored in research reactor graphite."

Measurements of stored energy in its research reactor graphite were made by the University of California, Los Angeles, in the course of decommissioning its Argonaut research reactor. Several things learned from its program of sampling and measuring stored energy were reported by a commenter who opposed the petition. This information was also reported in a paper by Ashbaugh, Ostrander, and Pearlman [3] at the American Nuclear Society annual meeting in June 1986.

- Stored energy decreases with increasing distance from the fuel region (e.g., 5.61 cal/gm at 18 inches, 1.34 cal/gm at 22 inches, and an unmeasurable amount at 26 inches).
- Within the graphite island, stored energy decreases from 33.3 cal/gm at the fuel box graphite interface to 19.2 cal/gm about 3 inches from the fuel box toward the center of the graphite island.

These results illustrate the principles associated with the proposed requirement to measure the Wigner energy stored in the research and test reactor graphite. The significant changes in stored energy with relatively small differences in location demonstrate the difficulty in selecting the locations and the number of samples needed to characterize the "maximum stored energy and to determine the maximum quantity of stored energy to within ±10%."

The bases fore storage and release of Wigner energy in graphite are delineated in the BNL report, which shows that there is no unique connection between total stored energy and the releasable energy. Thus, establishing the magnitude of the stored energy in non-power reactor graphite by empirical measurements would not provide the information needed to evaluate this potential. Because the releasable stored energy saturates, an upper bound on the stored energy that can be released to 700°C can be determined from existing data. Therefore, no measurement of stored energy is required.

Also, because of the several conditions required to initiate graphite burning in addition to a graphite temperature of 650°C, the potential to initiate or maintain a graphite-burning incident is esentially independent of stored energy in the graphite. This further supports the conclusion that no measurement of stored energy is needed.

Many of the commenters who opposed the petition cited a violation of ALARA considerations because stored energy measurements would not provide needed information, but would incur radiological exposures. The impracticality of taking the samples and making the measurements was also pointed out. For example, sampling the graphite reflector pieces in the ends of a

[3] C.E. Ashbaugh, N.C. Ostrander, and H. Perlman, "Graphite Stored Energy in the UCLA Research Reactor," *Transactions of the ANS*, Vol. 52, 1986, p 372.

TRIGA fuel pin would require breaching the fuel pin cladding as well as providing shielding against the fuel pin's radioactivity. Similar challenges would be associated in taking a sample from graphite reflector components clad with metal. In addition, it was pointed out that numerous samples would be required to establish the true magnitude of stored energy in the various graphite components.

The staff has considered the relevant BNL findings and the comments received and has concluded that empirical measurement of stored energy in non-power reactor graphite components is not practical nor is it necessary to ensure the health and safety of the public.

(7) The petitioner refers to "one commercial power reactor," indicating that it has no fire response plans for combating graphite fires. The petitioner also states that "graphite is used as a moderator in the Fort St. Vrain nuclear power plant in Colorado."

Other than the lack of graphite fire response plans, the petitioner does not identify specific concerns related to Fort St. Vrain. However, it is implied that all reactors using graphite components are subject to CBG's concerns and assertions. In reality, the petition and requirements are really directed at NRC-licensed non-power reactors.

Fort St. Vrain is a high-temperature gas-cooled reactor (HTGR) owned and operated by Public Service Company of Colorado. Its design capacity is 330 MWe. It uses a ceramic fuel particle (uranium and thorium carbide) clad with silicon carbide and multiple layers of pyrolytic carbon. The fuel particles are compacted into small rods and installed in fuel holes in the hexagonal graphite fuel blocks. Including the reflectors there are 500 tons of reactor graphite in the core. The reactor coolant is helium with an average inlet temperature of 762° F (405°C) and an outlet temperature of 1445°F (785°C). The average graphite moderator temperature is 1380°F (749°C). These characteristics are far different than those of the non-power reactors. BNL has reviewed Fort St. Vrain parameters in relation to graphite stored energy and concludes in section 7 of its report, "Fort St. Vrain operates at temperatures that preclude accumulation of stored energy. There are no know problems associated with stored energy in graphite for operating temperatures associated with HTGRs." The staff agrees with BNL's conclusion and can find no reason to empirically measure the stored energy in Fort St. Vrain's graphite components.

In response to an NRC request, Public Service Company of Colorado addressed the implications of the Chernobyl accident for the Fort St. Vrain. The licensee submitted a final report entitled "Design Differences, Air Ingress and Graphite Oxidation, and Steam Ingress and Water Gas Generation" (P–86641, December 4, 1986). The staff has reviewed the report and concludes that the only significant similarity between Chernobyl and Fort St. Vrain reactors is that they both contain a large amount of graphite moderator. There are design differences between these reactors that preclude an accident similar to the Chernobyl accident at Fort St. Vrain.

Furthermore, on the basis of its reviews, the staff concluded that the structural integrity of the Fort St. Vrain prestressed concrete reactor vessel would be maintained during and after the assumed accident scenarios. Although the initiating events are beyond the plant's original design basis, the plant design appears to have an adequate margin of safety to withstand these events.

The staff's comments and conclusions can be found in the NRC Public Document Room under Docket No. 50–267, in a letter dated April 1, 1987, Accession No. 8704090248.

The petitioner's assertion that graphite burning and oxidation were not included in the staff's evaluation for Fort St. Vrain is in error. This subject was thoroughly reviewed in both the construction permit and operating license safety evaluations. These staff evaluations may be found in the Public Document Room in the 50–267 docket file. The licensee's updated Fort St. Vrain Final Safety Analysis Report, section 14, contains much of the information and analyses submitted for NRC review. The staff concluded that significant graphite oxidation at Fort St. Vrain was not credible. (Note: In addition to the previously discussed conditions necessary for graphite burning, Fort St. Vrain must suffer simultaneous independent structural failures resulting in the release of the inert helium and the subsequent supply of an adequate air/oxygen flow). The staff finds no basis for changing its previous conclusions. The licensee for Fort St. Vrain has met the requirements of 10 CFR Part 50, Appendix R (which sets forth fire protection features required to satisfy Criterion 3 of 10 CFR Part 50, Appendix A) and has an NRC-approved emergency plan that meets to 10 CFR Part 50, Appendix E. The Fort St. Vrain fire protection program and emergency plan specify the necessary organization, plans, and procedures to privide the necessary protection of the health and safety of the public even in the very unlikely event of a graphite fire.

Basis for Denial

The NRC denies the petitioner's request to amend 10 CFR Part 50 to require licensees whose reactors employ graphite as a neutron moderator or reflector and whose licensed power is greater than 100 W to:

(1) Formulate and submit for NRC approval fire response plans for combating a reactor fire involving graphite and other constitutent reactor parts (e.g., fuel);

(2) Formulate and submit for NRC approval evacuation plans in case of a reactor fire; and

(3) Perform measurements of the Wigner energy stored in the graphite of their reactors, and submit these measurements to the NRC for review together with a revised safety analysis that shall address the risk and consequences of a reactor fire.

This denial is a based on the following:

(1) Each licensee of a non-power reactor has submitted an emergency plan that has been approved as meeting the requirements of 10 CFR Part 50, Appendix E. The petitioner has not demonstrated that these plans do not provided an appropriate level of protection of the health and safety of the public.

(2) The licensee for Fort St. Vrain has an approved emergency plan that meets the requirements of 10 CFR Part 50, Appendix E, as well as an approved fire protection program that meets the requirements of 10 CFR Part 50, Appendix R. In addition, at the request of the NRC, the licensee has submitted a report addressing the implications of the Chernobyl accident for Fort St. Vrain. The report has been reviewed and approved by the staff. The petitioner has not provided a technical basis that would show that an additional fire response plan would enhance the protection provided for the health and safety of the public by the existing emergency plan and fire protection program.

(3) Measurement of maximum stored energy in non-power reactors are not necessary to ascertain the releasable stored energy in graphite components below 650°C. Existing knowledge provides this information which is adequate for a safety evaluation of the effect of stored energy on the potential for graphite burning and the associated danger to the health and safety of the public. Additionally, such measurements

VOL
52
ISS
193
OC
6
1987
UMI

are contrary to the NRC's ALARA principle, since unneeded knowledge would be sought at the expense of unnecessary personnel exposure.

Accordingly, the Commission denies the petition.

Dateds at Bethesda, Maryland, this 23 day of September 1987.

FEDERAL TRADE COMMISSION

16 CFR Part 13

[Docket D-8908]

Prohibited Trade Practices; Encyclopaedia Britannica, Inc., et al.

AGENCY: Federal Trade Commission.

ACTION: Notice of period for public comment on petition to reopen the proceeding and modify the order.

SUMMARY: Encyclopaedia Britannica, a corporate respondent in the order in Docket No. D-8908, is prohibited from making misrepresentations while recruiting sales representatives, promoting merchandise or services, or attempting to collect debts, and filed a petition on April 2, 1987 requesting that the Commission reopen the proceeding and either set aside the order, now or at a fixed future date, or modify the order. A supplemental request to reopen the proceeding has been filed on September 22, 1987. This document announces the public comment period on the supplemental petition.

DATE: The deadline for filing comments on this matter is October 31, 1987.

ADDRESS: Comments should be sent to the Office of the Secretary, Federal Trade Commission, 6th Street and Pennsylvania Avenue NW., Washington, DC 20580.

Requests for copies of the petition should be sent to Public Reference Branch, Room 130.

FOR FURTHER INFORMATION CONTACT: Jock K. Chung, Enforcement Division, Bureau of Consumer Protection, Federal Trade Commission, Washington, DC 20580, (202) 326-2984.

SUPPLEMENTARY INFORMATION: The order in Docket No. D-8908 was published at 41 FR 17884 on April 29, 1976. A correction to the order was published at 41 FR 19301 on May 12, 1976. The original request to reopen the proceeding was published at 52 FR 12430 on April 16, 1987. The petitioner, Encyclopaedia Britannica, sells encyclopedias and related products and services direct to the consumer by means of in-home, over-the-counter, direct mail and telephone sales solicitation. The order modification request is based on claimed changes of fact and law. The supplemental petition was placed on the public record on September 22, 1987.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 37

[Docket No. RM87-35-000]

Generic Determination of Rate of Return on Common Equity for Public Utilities

Issued: September 30, 1987.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Energy Regulatory Commission hereby institutes a proceeding under Part 37 of its regulations. The purpose of this proceeding is to determine an estimate of the average cost of common equity for the jurisdictional operations of public utilities for the year ending June 30, 1987 and a quarterly indexing procedure to establish benchmark rates of return on common equity for use in individual rate cases. It is proposed that these benchmark rates of return remain advisory only. These benchmark rates of return on equity established as the result of this proceeding, should be used as a guide to companies and intervenors in individual rate cases and as a reference point for the Commission in its deliberations. The Commission may take official notice of them in individual rate proceedings.

DATE: Comments addressing the issues in this proceeding are due on November 5, 1987.

ADDRESS: All filings should reference Docket No. RM87-35-000 and should be addressed to: Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426.

FOR FURTHER INFORMATION CONTACT: Ronald L. Rattey, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, (202) 357-8293.

SUPPLEMENTARY INFORMATION:

I. Introduction

Pursuant to Part 37 of its regulations, the Federal Energy Regulatory Commission (Commission) hereby institutes its fourth annual proceeding to determine: (1) An estimate of the average cost of common equity for the jurisdictional operations of public utilities for the year ending June 30, 1987; and (2) a quarterly indexing procedure to establish benchmark rates of return on common equity for use in individual rate cases.

The benchmark rates of return resulting from the first three annual proceedings were advisory.[1] The Commission proposes to make the benchmark rates of return established by this proceeding advisory also.

II. Discussion

A. Base Year Average Cost of Common Equity: Market Required Rate of Return

The Commission proposes to adopt the same method of analysis used in Order Nos. 420, 442-A, and 461.[2] The Commission believes that the method adopted in those prior orders has received a full airing of the issues and represents the most reasonable way to determine the benchmark rate of return. Therefore, the Commission proposes to rely on the following constant growth discounted cash flow (DCF) model to determine the average market required rate of return for electric utilities for the year ending June 30, 1987:

$$k = (1 + .5g)\, y + g$$

where:

k = market required rate of return
y = current dividend yield (current annual dividend rate divided by current market price)
g = dividend growth rate

[1] In the third annual benchmark rate proceeding the NOPR proposed to presumptively set the allowed rate of return on common equity for individual utilities at the benchmark rate of return in effect at the time a company filed. *See* Notice of Proposed Rulemaking, Generic Determination of Rate of Return on Common Equity for Public Utilities, Docket No. RM86-12-000, 51 FR 27050 (July 21, 1986). The final rule, after consideration of comments filed, allowed the benchmark rates of return to remain advisory only. *See* Order No. 461, Generic Determination of Rate of Return on Common Equity for Public Utilities, 52 FR 11 at 12 (January 2, 1986).

[2] Order No. 420, Generic Determination of Rate of Return on Common Equity for Public Utilities, 50 FR 21802 (May 20, 1985). Order No. 442-A, Generic Determination of Rate of Return on Common Equity for Public Utilities, 51 FR 22505 (June 20, 1986). Order No. 461, see *supra* fn. 1.

(1+.5g)=dividend adjustment factor for quarterly dividend payments

Because this model was first adopted in Order No. 420, the Commission will refer to it hereafter on occasion as the "420 Model."

The Commission proposes that the following procedures be used to compute the dividend yield for the base year estimate of the market required rate of return as well as for the quarterly indexing procedure.

First, the Commission proposes to use a sample of 100 electric utilities based on the standards adopted in the prior annual proceedings. The sample consists essentially of those publicly traded electric utilities or combination companies that meet explicit standards; these are that the utility: [3]

(1) Is predominantly electric;

(2) Has its stock traded on either New York or American Stock Exchanges;

(3) Is included in the Utility Compustat II data base; and

(4) Is not excluded by the Commission on a case-by-case basis, based on unique circumstances.[4]

Second, the Commission proposes to continue screening the companies in the sample each quarter. The following criteria will be used in each quarterly calculation to ensure that the data for each company is available and that the data can be mechanically employed without producing distorted or unreasonable statistics. That is, a company will be dropped from the sample if:

(i) The company's common stock, through merger or other action, no longer is publicly traded;

(ii) The company has decreased or omitted a common dividend payment in the current or prior three quarters; or

(iii) The Commission determines on a case-by-case basis that some other occurrence causes the dividend yield for that company to be substantially misleading and would therefore bias the resulting quarterly average.

The Commission further proposes to use the median dividend yield for the 100 company sample as the industry average dividend yield.[5] In computing the dividend yield for each company, the Commission proposes that the dividend rate be the "indicated dividend rate," which is the last declared quarterly dividend times four. The price used in the calculation would be the simple average of the three monthly high and low prices for the quarter. The Commission proposes that the average of the quarterly median dividend yields for the sample utilities calculated in this manner be used for the base year cost determination and for the quarterly indexing procedure. The base year cost would use the average of four quarterly median dividend yields. The quarterly indexing procedure would use the average of two quarterly median dividend yields.

In estimating the (constant) growth rate that would apply to the base year determination of the cost of common equity and serve as a basis for the fixed parameters in the quarterly indexing procedure, the Commission proposes to rely on both a fundamental analysis approach and a two-stage growth model. That is, it intends to examine and evaluate the two underlying components of dividend growth: growth from retention of earnings (br) and growth from sales of new common stock (sv).[6] The Commission also intends to evaluate past and forecast data within the context of a two-state growth DCF model. The Commission will also look at other data and methods for estimating the expected growth, but primarily as a check on the reasonableness of its determination from fundamental and non-constant growth analyses.

The Commission requests that commenters provide estimates of the above-referenced model parameters applicable to determining the market required rate of return on common equity for the (base) year ending June 30, 1987.

B. Flotation Costs

The Commission proposes to estimate the adjustment to the required rate of return for flotation costs using the following formula:

$$k^* = \frac{fs}{(1+s)}$$

where:

k^* = flotation cost adjustment to required rate of return

f = industry average flotation cost as a percentage of offering price

s = proportion of new common equity expected to be issued annually to total common equity

This formula estimates an adjustment that reflects the average annualized amount of flotation costs incurred by utilities. The resulting adjustment factor would be added to the required rate of return as determined above.

The Commission requests that commenters submit estimates of the parameters in the above formula for estimating the appropriate flotation cost adjustment to the market required rate of return for the base year ending June 30, 1987.

C. Quarterly Indexing Procedure

In Order No. 461, the Commission amended § 37.9 of its regulations and adopted a quarterly indexing procedure for determining benchmark rates of return on common equity for the jurrisdictional operations of electric utilities. The Commission proposes to adopt the same procedure for the current proceeding.

In summary, the adopted indexing procedure ties the cost of common equity to changes in utility dividend yields. The dividend yield index is set as the average of the median dividend yields for the 100 company sample for the two most recent calendar quarters prior to the period to which the benchmark is intended to apply. The procedures for determining the median dividend yield are the same as those described above with reference to the estimation of the base year cost of common equity. This dividend yield will be used in a formula whose parameters are determined through the base year determination. The formula is essentially the DCF model referred to above, adjusted for flotation costs.

---

[3] Operationally, the Commission has selected all companies classified in the industry groupings "Electric Service" or "Electric and Other Services Combined" by Standard and Poor's Compustat Services, Inc. These industry groupings are supposed to conform as nearly as possible to the Office of Management and Budget Standard Industry Classification Codes. The Compustat "Electric Services" (Industry Classification Number 4911) is defined as establishments engaged in the generation, transmission and/or distribution of electric energy for sale where these services constitute 90% or more of revenues. "Electric and Other Services Combined" (Industry Classification Number 4931) is defined as establishments primarily engaged in providing electric services in combination with other services, with electric services as the major part, though less than 90% of revenues. (Standard and Poor's Compustat Services, Inc., Utility Compustat II User Manual (1985)).

[4] These companies which meet the first three standards are eliminated from the sample. Southwestern Public Service Company is eliminated because it is the only utility which uses a non-standard fiscal year which does not end at the end of a calendar quarter. This causes its dividend yields to be out of time with the rest of the companies. CP National is deleted because, in spite of its being listed as a predominately electric company, only 18 percent of its revenues in 1986 were derived from electric sales and only 13 percent of its assets as of the end of 1986 were electric. Finally, Catalyst Energy Development Corporation is omitted because it has never paid common stock dividends.

[5] In Order Nos. 420, 442–A, and 461, the Commission estimated the median dividend yield for each of the four quarters of the base year and then averaged them for the year. The Commission proposes to adopt the same procedure in this proceeding.

[6] Growth from retained earnings, or internal growth, is a function of the expected return on common equity (r) and the expected retention ratio (b). Growth from common stock sales, or external growth, is a function of how much stock is expected to be sold (s) and at what price relative to book value (v).

VOL 52 ISS 193 OC 6 1987 UMI

$k = a(y) + b$

where:

k = average cost of common equity
y = current dividend yield (current dividend rate divided by current market price)
a = 1 + .5g = dividend adjustment factor for quarterly dividend payments and
b = the expected dividend growth rate (g, assumed constant between proceedings) plus adjustment for flotation costs.

D. Request for Comments

The Commission has not decided a section 205 case filed since July 1985 (when the first benchmark went into effect) in which the rate of return issue was litigated. Furthermore, the issue of the appropriateness of the benchmark rates of return has not been considered in any Initial Decision by an administrative law judge. The Commission is concerned that despite numerous urgings, in the previous rulemaking proceedings, parties are not giving due consideration to the benchmark rate of return. In this proceeding, the Commission reiterates its request that all rate case participants (including staff) evaluate the reasonableness of the applicable benchmark rate of return, in light of the special circumstances of the subject utility.[7] Specifically, the Commission requests that litigants submit substantive analyses of the risks of individual utilities *vis-a-vis* the average utility represented through the benchmark rates of return. The Commission believes that such evidence will enable it to use the benchmark rates of return as points of departure in setting allowed rates of return.

In addition to requesting comments on the base year cost of common equity and the quarterly indexing procedure, the Commission requests comments on the following three proposals:

(1) Currently, the rule applies only to filling for initial or changed rates under section 205 of the Federal Power Act (FPA). The Commission is proposing that the rule also apply to complaints which arise pursuant to section 206 of the FPA. Any Commission decision in a section 206 proceeding has prospective application only. Therefore, the Commission is proposing that the applicable benchmark rate of return be the one in effect at the time the order concluding the proceeding is issued.

(2) The existing regulation requires that the Commission institute annual proceedings. The Commission is proposing to amend that regulations to require that the proceedings be periodic, but not more often than annually. The Commission believes that it is not necessary to institute a yearly proceedings since industry average growth rates and flotation cost adjustments appear to fluctuate over a very small range. However, the Commission is proposing to initiate a proceeding on its own motion or upon a motion by any person that shows changed circumstances sufficient to warrant modification of one or more parameters of the quarterly indexing procedure in effect.

(3) In the last three proceedings, the Commission found growth rates ranging from 4.30 to 4.60 percent. In the last two proceedings, the Commission found the range of plausible growth rates to be from 4.30 to 4.70 percent. The Commission also found flotation costs adjustments in the range of 0.03 to 0.07 percent in the last three proceedings. The effect of these findings has been that one parameter, a, in the quarterly indexing procedure has remained unchanged at 1.02 for the last three years and the second parameter, b,[8] has varied from 4.37 to 4.63. The Commission considers these variations to be so small that they do not justify the costs of a full blown rulemaking proceeding, especially while the benchmark remains advisory. The Commission therefore is proposing that the parameters of the quarterly indexing procedure be set based on a combined finding of an industry average growth rate and flotation cost adjustment of 4.6 percent. However, the Commission is proposing that if the combination of growth rate and flotation cost adjustment appears to move outside the range of 4.3 to 4.8 percent, it may institute a new proceeding.

Although the Commission will give consideration to all comments filed in response to this notice, the Commission expects that issues previously resolved in earlier proceedings will not be revisited.

III. Regulatory Flexibility Act

The Regulatory Flexibility Act (Act) requires Federal agencies to consider whether the rule, if promulgated, will have a "significant economic impact on a substantial number of small entities." Nearly all of the jurisdictional utilities which must comply with the rule proposed here are too large to be considered "small entities" within the meaning of the Act.[9] The Commission certifies, therefore, that this rule, if promulgated, will not have a significant economic impact on a substantial number of small entities.

IV. Paperwork Reduction Act Statement

The Paperwork Reduction Act (PRA),[10] and the Office of Management and Budget's (OMB) regulations,[11] require that OMB approve certain information collection requirements imposed by an agency. The information collection requirements provided for in this rulemaking do not require OMB approval because these requirements have not been changed from the previous generic rate of return rulemaking. Therefore, the information collection requirements imposed by this rule are not being submitted to OMB for review or approval.

V. Comment Procedure

The Commission invites interested persons to submit comments, data, views, and other information concerning the matters set out in this notice.

The original and 14 copies of such comments must received by the Commission before 5:00 p.m., November 5, 1987. Comments should be submitted to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426 and should refer to Docket No. RM87–35–000.

All written comments will be placed in the Commission's public files and will be available for public inspection in the Commission's Division of Public Information, Room 1000, 825 North Capitol Street, NE., Washington, DC 20426 during regular business hours.

List of Subjects in 18 CFR Part 37

Electric power rates, Electric utilities, Reporting and recordkeeping requirements.

In consideration of the foregoing, the Commission proposes to amend Part 37, Chapter I, Title 18, Code of Federal Regulations.

By direction of the Commission.

Kenneth F. Plumb,

Secretary.

PART 37—GENERIC DETERMINATION OF RATE OF RETURN ON COMMON EQUITY FOR PUBLIC UTILITIES

1. The authority citation for Part 37 continues to read as follows:

---

[7] *See e.g.*, 52 FR at 12.

[8] *Supra*, Discussion, Section C, which contains the definition for parameter a and parameter b.

[9] The Act defines a "small entity" as a small business, a small not-for-profit enterprise, or a small governmental jurisdiction. 5 U.S.C. 601(6) (1982). A "small business" is defined, by reference to Section 3 of the Smalll Business Act, as an enterprise which is "independently owned and operated and which is not dominant in its field of operation." 15 U.S.C. 632(a) (1982).

[10] 44 U.S.C. 3501–3520 (1982).

[11] 5 CFR 1320.12 (1987).

Authority: Federal Power Act, 16 U.S.C. 791a-825r (1982); Department of Energy Organization Act, 42 U.S.C. 7101-7352 (1982).

2. In § 37.3, paragraphs (a) and (c) are revised to read as follows:

§ 37.3 Definitions.

(a) "Benchmark rate of return" means the rate of return on common equity that is determined each quarter based on the findings made in the most recently concluded proceeding regarding the indexing procedure and the average cost of common equity for the jurisdictional operations of public utilities.

* * * * *

(c) "Indexing procedure" means the method by which the average cost of common equity under this part is updated quarterly between periodic proceedings to determine benchmark rates of return.

3. Section 37.4 is revised to read as follows:

§ 37.4 Periodic proceedings.

An estimate of the average cost of common equity for the jurisdictional operations of public utilities and a quarterly indexing procedure to establish the initial benchmark rate of return and quarterly updates will be determined periodically, but not more often than annually through informal rulemaking proceedings under 5 U.S.C. 553 upon the *prima facie* showing by an interested person or the Commission that the combination of growth rate and flotation cost adjustment is outside the range of 4.3 to 4.8 percent.

4. In § 37.6, paragraph (a) is revised to read as follows:

§ 37.6 Application of benchmark rate of return in individual rate proceedings.

(a) *General rule.* Except as provided in § 37.8 and paragraph (b) of this section, it will be presumed that the allowed rate of return on common equity in an individual rate proceeding is the benchmark rate of return in effect at the time a rate schedule is filed or in effect at the time the Commission issues its order concluding a complaint proceeding brought pursuant to section 206 of the Federal Power Act, 16 U.S.C. 824e (1982).

* * * * *

5. Section 37.8 is revised to read as follows:

§ 37.8 Transitional provision.

The benchmark rates of return resulting from the first four proceedings under this part will be advisory only. During the advisory period, the Commission may take official notice of the benchmark rates of return in individual rate proceedings if they are not otherwise made a part of the record.

6. In § 37.9, paragraphs (a)(1), (a)(2), and (c)(1) are revised to read as follows:

§ 37.9 Quarterly indexing procedure.

(a) * * *

(1) For purposes of establishing the benchmark rate of return on common equity for period t, the average cost of common equity for the jurisdictional operations of public utilities will be calculated as follows:

$K_t = A(Y_t) + b$

Where:

K_t = average cost of common equity for the jurisdictional operations of public utilities for period t;

a = adjustment factor to account for the timing of dividend increases (determined in annual proceeding);

Y_t = average current dividend yield applicable to period t determined under paragraph (b) of this section;

b = adjusted factor to account for expected growth, new common stock flotation costs and jurisdictional risk difference (determined in annual proceeding); and

t = successive three month time periods: February 1 through April 30, May 1 through July 31, August 1 through October 31, and November 1 through January 31.

(2) The benchmark rate of return on common equity for each quarter to which an periodic proceeding is applicable will be set equal to the average cost of common equity for the jurisdictional operations of public utilities as determined by the formula of paragraph (a)(1) of this section.

* * * * *

(c) *Sample of Companies Used to Calculate Quarterly Dividend Yields.* (1) Except as provided in paragraph (c)(2) of this section, the sample of companies used to calculate the average current dividend yield for the purpose of this section will be specified in the final order of each proceeding.

BILLING CODE 6717-01-M

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Parts 2640 and 2649

Adjustment of Liability for a Withdrawal Subsequent to a Partial Withdrawal

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Proposed rule.

SUMMARY: The Pension Benefit Guaranty Corporation proposes to establish rules for adjusting the statutory credit against partial or complete withdrawal liability of an employer that had previously partially withdrawn from the same multiemployer pension plan. This proposed regulation is required by the Employee Retirement Income Security Act, as amended. The purpose of the statutory credit is to avoid double-charging an employer for the same unfunded vested benefits upon which its liability for the prior partial withdrawal was based. However, in certain cases, this credit must be reduced to ensure that the employer does not avoid its fair share of liability based on plan experience and its participation in the plan subsequent to the prior partial withdrawal. The effect of this regulation, if adopted, would be to establish rules for computing the adjusted credit.

DATE: Comments must be received on or before December 7, 1987.

ADDRESSES: Comments may be mailed to the Corporate Policy and Regulations Department (35100), Pension Benefit Guaranty Corporation, 2020 K Street NW., Washington, DC 20006. Comments may be hand-delivered to Suite 7300 at the above address between 9:00 a.m. and 5:00 p.m. Written comments will be available for inspection at the above address, Suite 7100, between 9:00 a.m. and 4:00 p.m.

FOR FURTHER INFORMATION CONTACT: J. Ronald Goldstein, Manager, Regulations Division, Corporate Policy and Regulations Department (35100), Pension Benefit Guaranty Corporation, 2020 K Street NW., Washington, DC 20006; (202) 778-8850 (202) 778-8859 for TTY and TDD). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION:

Statutory Provisions

Under section 4205 of the Employee Retirement Income Security Act of 1974, as amended (ERISA or the Act), an employer is deemed to have partially withdrawn from a multiemployer pension plan under three circumstances. First, there is a partial withdrawal if the employer's contributions decline by 70-percent, as measured under section 4205(b)(1). There is also a partial withdrawal if the employer permanently ceases to have an obligation to contribute under one or more but fewer than all collective bargaining agreements under which the employer had been obligated to contribute under the plan, but the employer continues to perform work in the jurisdiction of the collective bargaining agreement of the type for which contributions were previously required or transfers such

VOL 52 ISS 193 OC 6 1987 UMI

work to another location section (4205(b)(2)(A)(i)). If the employer permanently ceases to have an obligation to contribute under the plan with respect to work performed at one or more but fewer than all of its facilities, but the employer continues to perform work at the facility of the type for which the obligation to contribute ceased, it is also deemed to have partially withdrawn (section 4205(b)(2)(A)(ii)).

Section 4205(c) provides a special partial withdrawal rule for the retail food industry. Section 4208(d) also provides special partial withdrawal rules for the construction and entertainment industries. All of the withdrawal liability rules apply to withdrawals after September 25, 1980 (except the 70-percent rule, which applies to partial withdrawals in plan years beginning after September 26, 1982).

The amount of an employer's liability for a partial withdrawal is calculated under section 4206(a). That section provides that partial withdrawal liability is equal to the unfunded vested benefits allocable to the employer for a complete withdrawal, adjusted under section 4209, if applicable, and multiplied by a fraction that measures the extent of the decrease in the employer's contribution base units.

Under section 4219(c)(1)(E), the annual payment for partial withdrawal liability is calculated by multiplying the annual payment that would have been required for a complete withdrawal by the same fraction used in section 4206(a) to determine partial withdrawal liability.

Section 4206(b) provides special rules for adjusting the liability of an employer that partially or completely withdraws from a plan after an earlier partial withdrawal from that plan. Under section 4206(b)(1), an employer's liability for the subsequent withdrawal is reduced by the amount of any liability for the earlier partial withdrawal, less any waiver or reduction of the earlier liability. Section 4206(b)(2) requires the PBGC to issue regulations adjusting the reduction prescribed by section 4206(b)(1) as may be necessary to ensure that the employer's liability for the subsequent withdrawal properly reflects its share of liability to the plan. Section 4206(b)(2) explicitly recognizes that such adjustments might be necessary to provide for changes in unfunded vested benefits or contribution base units after the original partial withdrawal, and it also authorizes the PBGC to provide adjustments for any other factors for which it determines adjustment to be appropriate.

The PBGC has tentatively determined that no adjustments are necessary to account for changes in unfunded vested benefits or contribution base units. Both of these factors are automatically taken into account in determining the employer's liability for a subsequent withdrawal. The proposed rule, therefore, does not contain any adjustments for these factors. After thorough consideration, the PBGC believes that there is only one factor that requires adjustment of the reduction in the subsequent liability: The length of time between the initial partial withdrawal and the subsequent withdrawal.

The purpose of the section 4206(b)(1) credit is to avoid double-charging an employer for the same plan unfunded vested benefits. However, depending on when the two withdrawals occur and the allocation method used by the plan, there may be little or no overlap in the unfunded vested benefits and contributions used to calculate the employer's initial partial withdrawal liability and its liability for the subsequent withdrawal. In that event, providing a full credit for the earlier partial withdrawal liability would relieve the employer of some or all of the liability properly allocable to it for its participation in the plan after the earlier partial withdrawal. Consequently, that liability would be unfairly shifted to the other employers remaining in the plan. This proposed regulation would avoid this result by reducing the employer's credit against its subsequent withdrawal liability to the extent that that liability is based on plan experience and the employer's participation in the plan subsequent to the initial partial withdrawal.

This regulation does not provide any adjustments to the payment schedules determined under section 4219(c) of the Act for either an employer's initial partial withdrawal or subsequent withdrawal. The PBGC recognizes that it would be possible under section 4219(c) for an employer that has incurred several partial withdrawals from the same plan to owe total annual payments in excess of the annual payment amount that the employer would have owed if it had completely withdrawn. The PBGC considered including a provision in this regulation dealing with this issue. The PBGC has tentatively concluded, however, that ERISA does not authorize it to alter the rules under section 4219(c) for determining payment schedules. Plans, themselves, may provide employers relief in these cases by adopting rules pursuant to section 4224 providing for other terms and conditions for the satisfaction of an employer's withdrawal liability.

The Regulation

Section 2649.1 of the proposed regulation describes the purpose and scope of the regulation. Section 2649.1(b) provides that the regulation shall apply to employers that have partially withdrawn from multiemployer plans after September 25, 1980 and subsequently completely or partially withdraw from the same plan after the effective date of this regulation. The PBGC contemplates making this regulation effective 30 days after publication of the final rule.

Section 2649.2 provides that whenever an employer that was assessed withdrawal liability for a partial withdrawal from a plan partially or completely withdraws from that plan in a subsequent plan year, it shall receive a credit, calculated pursuant to this regulation, against the new withdrawal liability. Section 2649.2 also provides that if the amount of the credit calculated in accordance with this regulation is less than zero, the amount of the credit shall equal zero. This provision is necessary to ensure that an employer's liability for its subsequent withdrawal is never increased as a result of its previous partial withdrawal.

Sections 2649.3–2649.6 provide separate calculations for determining the amount of the credit under each of the statutory allocation methods; § 2649.7 provides the rule for determining the credit in a plan that uses a modification of one of the statutory allocation methods. Each calculation is designed to make the credit equal to the amount of the original partial withdrawal liability, reduced as if that liability were being amortized in a manner consistent with the plan's allocation method. This approach ties the credit to the degree to which the elements used to calculate the initial partial withdrawal liability phase out of the calculation of liability for a subsequent withdrawal. In this manner the regulation assures that the employer's subsequent withdrawal liability is not reduced by an amount greater than is necessary to avoid charging the employer twice for the same unfunded vested benefits.

Section 2649.3 prescribes the calculation of the credit in plans using the presumptive allocation method (described in section 4211(b) of the Act). The presumptive method allocates unfunded vested benefits based on the employer's proportional share of three elements: the unamortized amount of the plan's unfunded vested benefits at the

end of the last plan year ending before September 26, 1980; the unamortized amount of the change in the plan's unfunded vested benefits for each plan year ending after September 25, 1980; and the unamortized amount of unfunded vested benefits reallocated under section 4211(b)(4). Each element is amortized at the rate of 5 percent of the original amount for each succeeding plan year. The employer's proportional share of each element is the ratio of its required contributions for the five plan years ending with the year in which the element arose to total plan contributions in that period (excluding the contributions of previously withdrawn employers).

In the event of a subsequent withdrawal, only the unamortized balances of those elements used to calculate the initial partial withdrawal liability enter into the calculation of the new withdrawal liability. The proper credit to the employer is thus the sum of the unamortized balances of the three elements, rather than the full amount of liability for the prior partial withdrawal. Under § 2649.3 the employer's credit would equal the sum of the unamortized amounts of the three elements used to determine the employer's withdrawal liability for the previous partial withdrawal, multiplied by two fractions. The first is the fraction determined under section 4206(a)(2) for the prior partial withdrawal. The second fraction takes into account the fact that the employer's assessment for its prior partial withdrawal might have been less than its allocable liability for that withdrawal because of the *de minimis* rule or the 20-year payment cap (sections 4209 and 4219(c)(1)(B) of the Act). Accordingly, the numerator of this fraction is the liability assessed for the prior partial withdrawal and the denominator is the amount of unfunded vested benefits allocable to the employer as if it had completely withdrawn as of the date of the prior partial withdrawal (determined without regard to any adjustments), multiplied by the fraction determined under section 4206(a)(2) for the prior partial withdrawal. Finally, if the employer's prior partial withdrawal liability was abated pursuant to section 4208, § 2649.3(d) provides that the credit shall be prorated to account for the lesser amount of withdrawal liability actually paid by the employer.

Section 2649.4 applies to plans using the modified presumptive allocation method (section 4211(c)(2) of the Act). The modified presumptive method uses the employer's share of two elements to determine its withdrawal liability. The first is the plan's unfunded vested benefits as of the last plan year ending before September 26, 1980, reduced as if those obligations were being amortized in level annual installments over fifteen years beginning with the first plan year beginning on or after that date. The second element reflects changes in the plan's unfunded vested benefits after September 26, 1980, and the employer's allocable share of this element is based on contributions during the most recent five plan years ending prior to the employer's withdrawal. Thus, the contributions used to calculate the employer's share of the second element for its initial partial withdrawal liability effectively phase out over a five-year period.

In the event of a subsequent complete or partial withdrawal, only the unamortized balances of these two elements enter into the calculation of withdrawal liability. The proper credit to the employer is, therefore, the sum of the unamortized balance of the two elements rather than the full amount of liability for the prior partial withdrawal. This is the rule set forth in § 2649.4. If the employer's prior partial withdrawal liability was abated, § 2649.4(d) provides that the credit shall be prorated to reflect the lesser amount of withdrawal liability actually paid by the employer.

Section 2649.5 prescribes the calculation of the credit in plans using the rolling-5 allocation method (section 4211(c)(3) of the Act). The rolling-5 method is nothing more than the second element of withdrawal liability under the modified presumptive method. Under § 2649.5, therefore, the credit simply equals the unamortized balance of that element. (Since that element is the entire liability under the rolling-5 method, the calculation under proposed § 2649.5 uses the assessed liability for the prior partial withdrawal.)

Section 2649.6 applies to plans using the direct attribution allocation method (section 4211(c)(4) of the Act). The direct attribution method uses the employer's share of two elements to determine its withdrawal liability. The first element is the unfunded vested benefits attributable to service with the employer. The second element is the employer's proportional share of unfunded vested benefits that are not attributable to service with employers that were obligated to contribute under the plan in the plan year prior to that employer's withdrawal.

In the event of a subsequent complete or partial withdrawal, the employer would be charged again for benefits included in the earlier partial withdrawal liability calculation only to the extent that they remain unfunded. Because of the different methods used by plans to determine an employer's allocable share of unfunded vested benefits, there will not necessarily be a one-to-one relationship between overall plan funding and the amount allocable to an individual employer.

To compensate for the unpredictability of the recurrence of unfunded vested benefits from the prior withdrawal in the calculation of liability for the subsequent withdrawal, under § 2649.6 the credit equals the amount of the liability assessed for the prior partial withdrawal, reduced as if that amount were being fully amortized in level annual installments. The PBGC has chosen uniform amortization of the old unfunded vested benefits as the best approximation of the extent to which unfunded vested benefits from the previous partial withdrawal will be used in the calculation of liability for the subsequent withdrawal. The amortization period begins with the plan year in which the prior partial withdrawal occurred and is the greater of 10 years or the number of years remaining on the plan's amortization schedule for the unfunded vested benefits used to determine the employer's liability for the prior partial withdrawal.

The latter amortization period reflects the plan's actual schedule for retiring unfunded vested benefits. It thus parallels the rules proposed for the other allocation methods in attempting to limit the amount of the employer's credit under § 2649.2 to the amount of unfunded vested benefits that would otherwise be included in both the prior and subsequent calculations of withdrawal liability.

The PBGC is concerned, however, that this approach will not afford employers the benefit of the credit when the plan's unfunded vested benefits are small. For that reason, the proposed regulation establishes a minimum amortization period of ten years. The PBGC recognizes that there may be other minimum amortization periods that would be reasonable and specifically invites comments on this issue.

Section 2649.7 is applicable to plans that have adopted an alternative method of allocating unfunded vested benefits pursuant to section 4211(c)(5) of ERISA and 29 CFR Part 2642. All of the alternative allocation methods approved to date by the PBGC are modified versions of one of the statutory methods. The proposed regulation, therefore, requires these plans to adopt, by plan amendment, a method of calculating the

VOL
52
ISS
193
OC
6
1987
UMI

employer's credit that is consistent with the applicable method prescribed in §§ 2649.3–2649.6 for the statutory allocation method most similar to the plan's alternative allocation method. This approach should provide plans the flexibility needed to fashion adjustments to the credit that are suited to their unique allocation method, while also assuring that employers are treated equitably.

Finally, § 2649.8 modifies the rules in §§ 2649.3–2649.6 to cover those situations in which either the initial or a subsequent partial withdrawal resulted from a 70-percent contribution decline. When that is the case, for purposes of computing the credits under §§ 2649.3–2649.6, the year in which the partial withdrawal occurred shall be deemed to be the first plan year in the 3-year testing period.

Executive Order 12291 and Regulatory Flexibility Act

The PBGC has determined that this regulation is not a "major rule" for the purposes of Executive Order 12291, because it will not have an annual effect on the economy of $100 million or more; or create a major increase in costs or prices for consumers, individual industries, or geographic regions; or have significant adverse effects on competition, employment, investment, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. This regulation will result in some shifting of costs among employers that contribute to multiemployer plans, but will not in the aggregate, increase costs.

Under section 605(b) of the Regulatory Flexibility Act, the Pension Benefit Guaranty Corporation certifies that this rule will not have a significant economic impact on a substantial number of small entities. Pension plans with fewer than 100 participants have traditionally been treated as small plans. The proposed regulation affects only multiemployer plans covered by the PBGC. Defining "small plans" as those with under 100 participants, they represent less than 14 percent of all multiemployer plans covered by the PBGC (346 out of 84,288). Approximately 500,000 employers contribute to multiemployer plans, most of them small employers (under 100 employees). The PBGC estimates that fewer than 10,000 (2 percent) of these employers will be required to pay partial withdrawal liability in any year, and an even smaller percentage will subsequently completely or partially withdraw from the same plan and thereby become subject to these rules. Therefore, the PBGC waives compliance with sections 603 and 604 of the Regulatory Flexibility Act.

Public Comments

The PBGC invites interested parties to submit comments on this proposed regulation. Comments should be addressed to the Director, Corporate Policy and Regulations Department (35100), Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, DC 20006. The PBGC will make written comments available for public inspection at the above address, Suite 7100, between the hours of 9:00 a.m. and 4:00 p.m.. Each comment should include the commenter's name and address, identify this proposed regulation, and give reasons for any recommendation. The PBGC may change this proposal in light of the comments it receives.

List of Subjects in 29 CFR Parts 2640 and 2649

Employee benefit plans, Pensions.

In consideration of the foregoing, the PBGC proposes to amend subchapter F of Chapter XXVI, Title 29, Code of Federal Regulations as follows:

PART 2640—DEFINITIONS

1. The authority for Part 2640 is revised to read as follows:

Authority: 29 U.S.C. 1302(b)(3).

2. Part 2640 is amended by adding a new § 2640.8 to read as follows:

§ 2640.8 Adjustment of Liability for a Withdrawal Subsequent to a Partial Withdrawal.

For purposes of Part 2649—

"Complete withdrawal" means a complete withdrawal as described in section 4203 of the Act.

"Partial withdrawal" means a partial withdrawal as described in section 4205 of the Act.

3. A new Part 2649 is added to read as follows:

PART 2649—ADJUSTMENT OF LIABILITY FOR A WITHDRAWAL SUBSEQUENT TO A PARTIAL WITHDRAWAL

Sec.

2649.1 Purpose and scope.
2649.2 Credit against liability for subsequent withdrawal.
2649.3 Amount of credit in plans using the presumptive method.
2649.4 Amount of credit in plans using the modified presumptive method.
2649.5 Amount of credit in plans using the rolling-5 method.
2649.6 Amount of credit in plans using the direct attribution method.
2649.7 Amount of credit in plans using alternative allocation methods.
2649.8 Special rule for 70-percent decline partial withdrawals.

Authority: 29 U.S.C. 1302(b)(3) and 1386(b).

§ 2649.1 Purpose and scope.

(a) *Purpose.* The purpose of this part is to prescribe rules, pursuant to section 4206(b) of the Act, for adjusting the partial or complete withdrawal liability of an employer that previously partially withdrew from the same multiemployer plan. Section 4206(b)(1) provides that when an employer that has partially withdrawn from a plan subsequently incurs liability for another partial or a complete withdrawal from that plan, the employer's liability for the subsequent withdrawal is to be reduced by the amount of its liability for the prior partial withdrawal (less any waiver or reduction of that prior liability). Section 4206(b)(2) requires the PBGC to prescribe regulations adjusting the amount of this credit to ensure that the liability for the subsequent withdrawal properly reflects the employer's share of liability with respect to the plan. The purpose of the credit is to protect a withdrawing employer from being charged twice for the same unfunded vested benefits of the plan. The reduction in the credit protects the other employers in the plan from becoming responsible for unfunded vested benefits properly allocable to the withdrawing employer. In the interests of simplicity, the rules in this part provide for a one-step calculation of the adjusted credit against the subsequent liability, rather than for separate calculations first of the credit and then of the reduction in the credit.

(b) *Scope.* This part applies to multiemployer plans covered under section 4021(a) of the Act and not excluded by section 4021(b) and to employers that have partially withdrawn from such plans after September 25, 1980 and subsequently completely or partially withdraw from the same plan after the effective date of this part.

§ 2649.2 Credit against liability for a subsequent withdrawal.

Whenever an employer that was assessed withdrawal liability for a partial withdrawal from a plan partially or completely withdraws from that plan in a subsequent plan year, it shall receive a credit against the new withdrawal liability in an amount determined in accordance with this part. If the credit determined under §§ 2649.3–2649.7 is less than zero, the amount of the credit shall equal zero.

§ 2649.3 Amount of credit in plans using the presumptive method.

(a) *General.* In a plan that uses the presumptive allocation method described in section 4211(b) of the Act, the credit shall equal the sum of the unamortized old liabilities determined under paragraph (b) of this section, multiplied by the fractions described or determined under paragraph (c) of this section. When an employer's prior partial withdrawal liability has been reduced or waived, this credit shall be adjusted in accordance with paragraph (d) of this section.

(b) *Unamortized old liabilities.* The amounts determined under this paragraph are the employer's proportional shares, if any, of the unamortized amounts as of the end of the plan year preceeding the withdrawal for which the credit is being calculated, of—

(1) The plan's unfunded vested benefits as of the end of the last plan year ending before September 26, 1980;

(2) The annual changes in the plan's unfunded vested benefits for plan years ending after September 25, 1980, and before the year of the prior partial withdrawal; and

(3) The reallocated unfunded vested benefits (if any), as determined under section 4211(b)(4), for plan years ending before the year of the prior partial withdrawal.

(c) *Employer's allocable share of old liabilities.* The sum of the amounts determined under paragraph (b) of this section are multiplied by the two fractions described in this paragraph in order to determine the amount of the old liabilities that was previously assessed against the employer.

(1) The first fraction is the fraction determined under section 4206(a)(2) of the Act for the prior partial withdrawal.

(2) The second fraction is a fraction, the numerator of which is the amount of the liability assessed against the employer for the prior partial withdrawal, and the denominator of which is the product of—

(i) The amount of unfunded vested benefits allocable to the employer as if it had completely withdrawn as of the date of the prior partial withdrawal (determined without regard to any adjustments), multiplied by—

(ii) The fraction determined under section 4206(a)(2) for the prior partial withdrawal.

(d) *Special rule when prior liability abated.* If an employer's withdrawal liability for a previous partial withdrawal has been abated pursuant to section 4208 of the Act, the credit determined pursuant to paragraph (a) of this section shall be adjusted in accordance with this paragraph. The credit shall be multiplied by a fraction—

(1) The numerator of which shall equal the excess of the total partial withdrawal liability of the employer for all partial withdrawals of prior years (excluding those partial withdrawals for which the credit determined pursuant to paragraph (a) of this section is zero) over the present value of each waiver or reduction of that prior withdrawal liability, calculated as of the date on which that prior partial withdrawal liability was determined; and

(2) The denominator of which shall equal the total partial withdrawal liability of the employer for all partial withdrawals in prior years (excluding those partial withdrawals for which the credit determined pursuant to paragraph (a) of this section is zero).

§ 2649.4 Amount of credit in plans using the modified presumptive method.

(a) *General.* In a plan that uses the modified presumptive method described in section 4211(c)(2) of the Act, the credit shall equal the sum of the unamortized old liabilities determined under paragraph (b) of this section, multiplied by the fractions described or determined under paragraph (c) of this section. When an employer's prior partial withdrawal liability has been reduced or waived, this credit shall be adjusted in accordance with paragraph (d) of this section.

(b) *Unamortized old liabilities.* The amounts described in this paragraph shall be determined as of the end of the plan year preceeding the withdrawal for which the credit is being calculated, and are the employer's proportional shares, if any, of—

(1) The plan's unfunded vested benefits as of the end of the last plan year ending before September 26, 1980, reduced as if those obligations were being fully amortized in level annual installments over 15 years beginning with the first plan year ending on or after such date; and

(2) The aggregate post-1980 change amount determined under section 4211(c)(2)(C) as if the employer had completely withdrawn in the year of the prior partial withdrawal (determined without regard to any adjustments), reduced as if those obligations were being fully amortized in level annual installments over the 5-year period beginning with the plan year in which the prior partial withdrawal occurred.

(c) *Employer's allocable share of old liabilities.* The sum of the amounts determined under paragraph (b) of this section are multiplied by the two fractions described in this paragraph in order to determine the amount of old liabilities that was previously assessed against the employer.

(1) The first fraction is the fraction determined under section 4206(a)(2) of the Act for the prior partial withdrawal.

(2) The second fraction is a fraction, the numerator of which is the amount of the liability assessed against the employer for the prior partial withdrawal, and the denominator of which is the product of—

(i) The amount of unfunded vested benefits allocable to the employer as if it had completely withdrawn as of the date of the prior partial withdrawal (determined without regard to any adjustments), multiplied by—

(ii) The fraction determined under section 4206(a)(2) for the prior partial withdrawal.

(d) *Special rule when prior liability abated.* If an employer's withdrawal liability for a previous partial withdrawal has been abated pursuant to section 4208 of the Act, the credit determined pursuant to paragraph (a) of this section shall be adjusted in accordance with this paragraph. The credit shall be multiplied by a fraction—

(1) The numerator of which shall equal the excess of the total partial withdrawal liability of the employer for all partial withdrawals of prior years (excluding those partial withdrawals for which the credit determined pursuant to paragraph (a) of this section is zero) over the present value of each waiver or reduction of that prior withdrawal liability, calculated as of the date on which that prior partial withdrawal liability was determined; and

(2) The denominator of which shall equal the total partial withdrawal liability of the employer for all partial withdrawals in prior years (excluding those partial withdrawals for which the credit determined pursuant to paragraph (a) of this section is zero).

§ 2649.5 Amount of credit in plans using the rolling-5 method.

In a plan that uses the rolling-5 allocation method described in section 4211(c)(3) of the Act, the credit shall equal the amount of the liability assessed for the prior partial withdrawal, reduced as if that amount was being fully amortized in level annual installments over the 5-year period beginning with the plan year in which the prior partial withdrawal occurred.

§ 2649.6 Amount of credit in plans using the direct attribution method.

In a plan that uses the direct attribution allocation method described in section 4211(c)(4) of the Act, the

credit shall equal the amount of the liability assessed for the prior partial withdrawal (less any waiver or reduction of that liability pursuant to section 4208 of the Act), reduced as if that amount was being fully amortized in level annual installments beginning with the plan year in which the prior partial withdrawal occurred, over the greater of 10 years or the amortization period for the resulting base when the combined charge base and the combined credit base are offset under section 412(b)(4) of the Internal Revenue Code.

§ 2649.7 Amount of credit in plans using alternative allocation methods.

A plan that has adopted an alternative method of allocating unfunded vested benefits pursuant to section 4211(c)(5) of the Act and Part 2642 of this subchapter shall adopt, by plan amendment, a method of calculating the credit provided by § 2649.2 that is consistent with the rules in §§ 2649.3–2649.6 for plans using the statutory allocation method most similar to the plan's alternative allocation method.

§ 2649.8 Special rule for 70-percent decline partial withdrawals.

For the purposes of applying the rules in §§ 2649.3–2649.6 in any case in which either the prior or subsequent partial withdrawal resulted from a 70-percent contribution decline (or a 35-percent decline in the case of certain retail food industry plans), the first year of the 3-year testing period shall be deemed to be the plan year in which the partial withdrawal occurred.

Issued in Washington, DC, this 29th day of September, 1987.

Kathleen P. Utgoff,

Executive Director, Pension Benefit Guaranty Corporation.

BILLING CODE 7708–01–M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Parts 816 and 817

Reopening and Extension of Public Comment Period; Surface Coal Mining and Reclamation Operations; Permanent Regulatory Program; Revegetation

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Notice of reopening and extension of public comment period.

SUMMARY: On July 27, 1987, the Office of Surface Mining Reclamation and Enforcement (OSMRE) published a proposed rule which would amend its regulations dealing with revegetation requirements for the repair of rills and gullies, replanting of trees and the time for measuring revegetation success. The comment period closed on October 5, 1987. OSMRE is now reopening and extending the comment period for the proposed rule until October 21, 1987.

DATE: The comment period on the proposed rule is extended until October 21, 1987.

ADDRESSES: Written comments may be mailed to the Office of Surface Mining Reclamation and Enforcement, Administrative Record, Room 5131–L, 1951 Constitution Avenue NW., Washington, DC 20240; or hand-delivered to the Office of Surface Mining Reclamation and Enforcement, Administrative Record, Room 5131, 1100 L St. NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Richard Miller, Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior, 1951 Constitution Avenue NW., Washington, DC 20240; Telephone: 202–343–5241 (Commercial or FTS).

SUPPLEMENTARY INFORMATION: OSMRE previously published the proposed rule on July 27, 1987. 52 FR 28012. The comment period was open until October 5, 1987. OSMRE received a request to extend the comment period and is hereby granting the request by reopening and extending the comment period for 15 days.

The proposed rule would amend OSMRE's regulations dealing with the repair of rills and guillies, replanting of trees and the time period for measuring revegetation success. This action is necessary because the previous rules were found in Federal district court to have been promulgated without sufficient supporting evidence in the record. The proposed rule would allow State regulatory authorities to demonstrate that the repair of rills and gullies is a normal husbandry practice in their State that may occur without restarting the operator's period of responsibility. The proposed rule also would allow certain trees planted during the operator's responsibility period to be counted in the measurement of revegetation success if State forestry and wildlife agencies approved the practice.

This proposed rule would also base the determination of whether revegetation has been achieved on a minimum two-year time period where the postmining land use is grazing land, pasture land or cropland. For further information, consult the preamble to the proposed rule, cited above.

Date: September 30, 1987.

Jed D. Christensen,

Director, Office of Surface Mining Reclamation and Enforcement.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 60

[AD-FRL 3273-4]

Assessment of Municipal Waste Combustor Emissions Under the Clean Air Act

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of reopening of public comment period.

SUMMARY: On July 7, 1987, EPA published the results of a preliminary assessment of air emissions from municipal waste combustors (MWC) (52 FR 25399). The action also constituted advance notice of EPA's intent to regulate new and existing MWC under section 111 of the Clean Air Act (CAA).

The July 7, notice requested public comment on EPA's determination by September 8, 1987. In response to requests for an extensin of this deadline, this notice reopens the period for receiving written comments until November 7, 1987.

DATES: Written comments to be included in the record on the subject notice must be postmarked no later than November 7, 1987.

ADDRESSES: Comments on the notice of the assessment of MWC emissions under the CAA should be submitted in (in duplicate if possible) to: Central Docket Section (LE–131), Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, ATTN: Docket No. A–86–16. The Central Docket Section is located at the offices of the U.S. Environmental Protection Agency, South Conference Center, Room 4, 401 M Street SW., Washington, DC. The docket may be inspected between 8:00 am and 4:30 pm on weekdays.

FOR FURTHER INFORMATION CONTACT: Robert G. Kellam, Pollutant Assessment Branch (MD–12), Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, (Telephone: Commercial (919) 541–5646/FTS 629–5646).

SUPPLEMENTARY INFORMATION: In the course of the public commment period attendant to the July 7, 1987 notice which ended September 8, 1987, the EPA received requests for an extension of the public comment period to provide additional time to submit comments on the advance notice of proposed rulemaking. In response to this request EPA is reopening the public comment period until November 7, 1987. The additional time will permit interested parties to review the MWC determination and the background information in support of the proposed action.

Date: September 29, 1987.

W. Ray Cunningham,

Assistant Administrator for Air and Radiation.

Minimum Recovered Materials Content in Paper and Paper Products Procured by the Federal Government

AGENCY: U.S. Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: Elsewhere in today's **Federal Register**, EPA is promulgating a final guideline for Federal procurement of paper and paper products containing recovered materials. This notice proposes to amend that guideline. Many commenters stated that EPA is required to recommend minimum recovered materials content standards for paper and paper products and, having determined that such recommendations are appropriate under section 6002(e), EPA today is proposing minimum content standards.

For most grades of paper and paper products, EPA is proposing minimum postconsumer recovered materials content standards. In the case of printing/writing grades, EPA is proposing minimum "waste paper" content standards. EPA also is proposing a definition of "waste paper"; it includes both postconsumer recovered materials and other, non-postconsumer, wastes.

EPA also is proposing recommendations for data-gathering. These are intended to provide procuring agencies with on-going information on price, availability, and performance of paper and paper products containing recovered materials.

DATE: EPA will accept public comments on this proposed rule until December 7, 1987.

ADDRESS: Comments on the proposed amendments to the paper guideline should be mailed to the Docket Clerk [Docket No. 6002, Minimum Content Standards for Paper], Office of Solid Waste, WH–565A, U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. Comments received by EPA may be inspected in Room MLG–100, U.S. EPA, 401 M Street, SW., Washington, DC from 9:00 a.m. to 4:00 p.m., Monday through Friday, excluding holidays. To review docket materials, the public must make an appointment by calling (202) 475–9327. A maximum of 50 pages of material may be copied from any regulatory docket at no cost. Additional copies cost 20 cents per page.

FOR FURTHER INFORMATION CONTACT: RCRA/Superfund Hotline, toll-free at (800) 424–9346 or at (202) 382–3000. For technical information, contact William Sanjour, Office of Solid Waste, WH–563, U.S. EPA, 401 M Street SW., Washington, DC 20460, telephone: (202) 382–4502.

SUPPLEMENTARY INFORMATION:

I. Authority

The proposed amendments to the Guideline for Federal Procurement of Paper and Paper Products Containing Recovered Materials are authorized by sections 2002(a) and 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended, 42 U.S.C. 6912(a) and 6962.

II. Proposed Revisions to the Paper Guideline

Many commenters on the paper guideline suggested that minimum content standards be established for procurement of paper and paper products containing postconsumer recovered materials. While EPA does not have authority under section 6002 to require procuring agencies to use specific minimum content standards, EPA today is proposing revisions to the paper guideline that recommend such standards as guidance to those agencies which elect to use the minimum content standards option.

As discussed in the preamble to the final rule published elsewhere in today's **Federal Register**, EPA believes that agencies which elect to use reasonable minimum content standards for applicable paper and paper products will be in compliance with the statutory obligation to procure items with the highest level of recovered materials practicable. Any agency choosing to use the case-by-case approach or a substantially equivalent approach is expected to justify how it meets the statutory requirements for each applicable procurement item.

A. Minimum Content Standards

1. *Methods for Establishing Minimum Content Standards.* Under the minimum content standards approach, procuring agencies would establish specific postconsumer recovered materials or

"waste paper" percentages in their specifications. EPA is proposing some standards as general guidance to procuring agencies. EPA notes that these proposed minimum content standards would be *recommendations*, not requirements. Procuring agencies could adopt other standards as long as the statutory requirements are met. These proposed standards include a "waste paper" category of recovered materials content for fine and printing papers. This term is discussed in section A.2.a of the preamble.

Information in the docket shows the average level of postconsumer recovered materials in common paper and paper product grades: agencies could set their minimum content standards at these levels. Agencies may instead use experience already gained by State procuring agencies, some of which have already set minimum content standards. These range from a low of 10 percent postconsumer recovered materials (within an overall 50 percent requirement for recovered materials) in California to a high of 80 percent postconsumer recovered materials in Maryland. Other State minimum content standards include 40 percent recovered materials in New York and 25 percent postconsumer recovered materials (or 50 percent recovered materials) in Oregon. All of these States reported to EPA that hte levels used have been satisfactory and no significant procurement problems have occurred. More specific information on individual state programs is included in the docket. Procuring agencies may want to use one of these alternatives or select some other reasonable basis to develop minimum content standards.

A document entitled *Background Documentation for Minimum Content Standards* has been placed in the docket and explains the basis for EPA's recommended minimum content standards. It identifies mills producing newsprint or fine papers with postconsumer or waste paper recovered content, respectively. The percentages of both types of recovered materials content in product also have been been identified.

Several commenters recommended other approaches to setting minimum content standards. These included soliciting letters of intent from purchasers including levels of postconsumer recovered materials, using trial bids, or using multiple procurements with different levels of postconsumer recovered material standards. While each of these approaches has some merit, EPA believes they are inappropriate for Federal procurement agencies, which already have experience in setting minimum content standards. However, these approaches might be suitable for agencies making small procurements, or for agencies without prior experience in procuring paper and paper products with postconsumer recovered materials.

No matter which alternative to setting standards is selected, the specific minimum content standards used should be included in the annual review process. If information from estimates received or other data reveal that sufficient bids would have been received using standards which set higher minimum content levels, then the standards must be revised accordingly. If there was a lack of competition, then the standards must be lowered. This would satisfy the statutory requirements for procuring agencies in RCRA section 6002(c)(1) and those specific to the minimum content standards approach in RCRA section 6002(i)(3)(B). EPA recommends that procuring agencies which adopt minimum content standards for paper and paper products monitor the variations between estimates and certifications of postconsumer recovered materials or waste paper content as one source of data for the annual review. This information is required from vendors, as explained in the final rule published elsewhere in today's **Federal Register**.

2. *Basis of Proposed Minimum Content Standards.* The United States General Services Administration (GSA) already has experience with minimum content standards. Beginning in 1971, minimum content standards were established for several types of paper and paper products. The GSA specifications established minimum levels for "reclaimed material" content and for "postconsumer waste" content which was a sub-set of "reclaimed material." In other words, a two-tiered approach was used. A list of those standards appear in Table 1. The "reclaimed material" and "postconsumer waste" categories correspond to the terms "recovered materials" and "postconsumer recovered materials", respectively, as used in this guideline.

TABLE 1.—GAS'S MINIMUM CONTENT STANDARDS

Product	Reclaimed material	Postconsumer waste
Newsprint	NA	NA
Offset printing	NA	NA
Mimeo and duplicator paper	NA	NA
Writing (stationery)	30	0
Office paper (note pads, etc.)	20	0
Copy paper for high-speed copiers	NA	NA

Recycled paperboard products including folding Cartons	100	50
Bond papers	NA	NA
Ledger	NA	NA
Cover stock	NA	NA

TABLE 1.—GAS'S MINIMUM CONTENT STANDARDS—Continued

Product	Reclaimed material	Postconsumer waste
Book papers	NA	NA

[1] Amounts vary depending on the specific product.

Comments have been received by EPA that very few manufacturers of printing/writing papers would be willing or able to meet a minimum content standard for postconsumer recovered materials. Thus an alternative was sought for this category. Some background information follows based upon EPA's evaluation of this subject.

First, it is important to compare and contrast the current recycling of paper in the two principal types of paper products purchased directly by Federal agencies—printing/writing papers and tissue papers. Some statistics for 1985 as reported by the American Paper Institute for these products are presented in Table 2.

TABLE 2.—API STATISTICS ON PRINTING/WRITING AND TISSUE PAPER MANUFACTURE (1985)

Category	Printing/writing and related papers [1]		Tissue Papers [1]	
	Tons	Percent of total	Tons	Percent of total
Waste paper consumed in manufacturing:				
Mixed Papers		0	72	3.5
Newspapers		D	182	8.9
Corrugated	14	1.4	200	9.8
Pulp substitute	702	68.9	654	31.9
High grade deinking	304	29.7	942	45.9
Total	1,019	100.0	2,049	100.0
Total production of finished product	18,450		4,941	
Waste paper as percent of production		5.5		41.5

[1] (In 1,000 short tons and percent).

These statistics reveal that 1.03 million tons more waste paper is recycled into tissue products than into printing/writing paper, even though total production of printing/writing grades is over four times greater than tissue. Put another way, waste paper is 5.5 percent of the raw material for printing/writing paper manufacture while waste paper is 41.5 percent of the feedstock for tissue paper manufacture.

A further contrast can be made on the source of the recovered paper that is used. Pulp substitute is a manufacturing waste, virtually all of which is derived from businesses that convert paper stock into finished products such as books or envelopes. Pulp substitute, as the name suggests, can be used instead of virgin pulp. The quantity of postconsumer recovered materials in pulp substitute is essentially zero. "High grade deinking" is printing scrap, which can include items such as missprinted forms that never reach the ultimate user. The high grade deinking category also includes a significant amount of postconsumer recovered materials, such as office waste paper. However, the paper mill does not always know whether the material is preconsumer or postconsumer because both types of material may be contained in the same bales. Tissue products use most of the postconsumer recovered materials consumed in the high grade deinking category while printing/writing paper producers use much less; many manufacturers of printing/writing papers avoid postconsumer recovered materials altogether. In other words, manufacturers of printing/writing papers tend to use preconsumer waste paper (manufacturing by-products such as pulp substitutes), whereas manufacturers of tissue papers are willing to use postconsumer waste. Tissue products do not have to meet the demands that printing and writing papers do. The contrast between the strength and color requirements for institutional paper towels and offset paper running through a high speed press illustrates this difference.

EPA contacted virtually every mill known to make printing/writing papers using recovered materials. Almost universally they stated that they preferred not to deal with postconsumer recovered materials under a minimum content standard. Some of the reasons cited were:

- Postconsumer recovered materials are not as predictable in fiber composition or content as other types, so it is difficult to assure that specifications can be met.
- A mill essentially needs deinking capability to use postconsumer recovered materials (whereas pulp substitutes are not normally cleaned in deinking systems).
- Contaminants cannot be controlled as well, and "off spec" products are much more likely to be produced using postconsumer recovered materials.
- Only a few mills handle postconsumer recovered materials successfully enough to overcome these problems consistently.

For these reasons, EPA finds that it is not advisable to set minimum postconsumer recovered materials content standards for printing/writing grades. EPA is, therefore, proposing a category of recovered materials called "waste paper" for the printing and writing paper grades only.

a. *Proposed Definition of Waste Paper.* This category includes all postconsumer recovered materials as defined in section 6002(h)(1) of RCRA, plus the first two categories of

BEST COPY AVAILABLE

"manufacturing, forest residues, and other wastes" as defined in section 6002(h)(2). (As discussed in the final rule published elsewhere in today's **Federal Register**, EPA has determined that mill broke is specifically excluded from the definition of recovered materials because it is waste generated *before* completion of the papermaking process.) These two non-postconsumer categories are:

(1) Dry paper and paperboard waste generated after completion of the papermaking process (that is, those manufacturing operations up to and including the cutting and trimming of the paper machine reel into smaller rolls or rough sheets) including: Envelope cuttings, bindery trimmings, and other paper and paperboard waste, resulting from printing, cutting, forming, and other converting operations; bag, box, and carton manufacturing wastes; and butt rolls, mill wrappers, and rejected unused stock; and

(2) Finished paper and paperboard from obsolete inventories of paper and paperboard manufacturers, merchants, wholesalers, dealers, printers, converters, or others.

EPA concludes that increasing the use of waste paper, as defined above, in the manufacturing of printing and writing papers will in fact allow maximum use of postconsumer recovered materials in those products while it increases the use of postconsumer recovered materials in others, thereby satisfying the intent of RCRA. As more preconsumer waste paper is used for printing and writing papers, there will be less available as a raw material for tissue products. As a result, manufacturers of tissue will use more postconsumer recovered materials as a raw material. Therefore, for printing and writing papers, EPA is proposing that for estimates of content, certification, minimum content standards, and any other instance where postconsumer wastes are to be quantified, information on *waste paper* content be supplied, instead of information on postconsumer recovered materials. For all other categories of paper and paper products, postconsumer recovered materials content should be used.

b. *Recommended Minimum Content Standards.* Several commenters have recommended that EPA adopt the GSA standards shown in Table 1 as minimum content standards. EPA has used these standards as a reasonable starting place for establishing recommended minimum content standards. However, because of the successful experience by several States in procuring printing and writing paper with recovered materials, EPA has determined that those grades of paper are available with a minimum of 50 percent waste paper content.

Therefore, EPA is today proposing a set of recommended minimum content standards as shown in Tabe 3 and invites comments on those standards. The previously referenced document in the docket explains how these recommended minimum content standards for each paper and paper product category were derived. EPA is proposing these standards as an amendment to the final guideline promulgated today. Following the public comment period, these or revised recommended standards would be included in the guideline for two reasons: To provide guidance for agencies that adopt a minimum content standards approach in their affirmative procurement programs (RCRA Section 6002(i)(3)(B)), and to satisfy EPA's obligations to recommend levels of recovered materials to be contained in paper products (RCRA Section 6002(e)).

TABLE 3.—EPA RECOMMENDED MINIMUM CONTENT STANDARDS FOR SELECTED PAPERS AND PAPER PRODUCTS

Product	Minimum percentage of postconsumer recovered materials	Minimum percentage of waste paper [1]
Newsprint	40	
High grade bleached printing and writing paper:		
Offset printing		50
Mimeo and duplicator paper		50
Writing (stationery)		50
Office paper (note pads, etc.)		50
Copy paper for high-speed copiers		0
Envelopes		50
Form bond including computer paper and carbonless		[2]
Book papers		50
Bond papers		50
Ledger		50
Cover stock		50
Tissue products:		
Toilet tissue	20	
Paper towels	40	
Paper napkins	30	
Facial tissue	5	
Doilies	40	
Industrial wipers	0	
Unbleached packaging:		
Corrugated boxes	40	
Fiber boxes	10	
Brown paper (bags, etc.)	5	
Recycled paperboard:		
Recycled paperboard products including folding cartons	80	
Pad backing	90	

[1] "Waste paper" is defined in § 250.4 and refers to specified postconsumer materials and other recovered materials.
[2] EPA found insufficient production of these papers with recycled content to assure adequate competition.

B. Recordkeeping Recommendations

In this notice, EPA is proposing additional recordkeeping recommendations. EPA has concluded that one purpose of the requirement that vendors estimate the total percentage of postconsumer recovered materials or (waste paper) is to provide information to procuring agencies that can be used in future procurements. Further, procuring agencies need to keep up-to-date on changes in recycling practices and availability of products containing postconsumer recovered materials or waste paper. (As explained above, in the case of printing/writing grades, waste paper content should be documented in the same way as postconsumer recovered materials content.)

For these reasons, EPA believes that agencies should keep statistical records of paper and paper products procurements to properly implement the intent of Congress in requiring an affirmative procurement program. A summary of these records should be included in the annual review and monitoring of the effectiveness of the program.

A program for gathering statistics need not be elaborated to be effective. However, agencies should monitor their procurements to provide data on the following:

(a) The percentage of postconsumer recovered materials (or waste paper) in the products procured or offered;

(b) Comparative price information on competitive procurements;

(c) The quantity of each item procured over a fiscal year;

(d) The availability of the paper and paper products to procuring agencies;

(e) Type of performance tests conducted, together with the categories of paper or paper products containing postconsumer recovered materials (or waste paper) that failed the tests, the percentage of total virgin products and products containing postconsumer or other recovered materials supplied that failed each test, and the nature of the failure;

(f) Agency experience with the performance of the procured products.

The Government Printing Office has informed EPA that every shipment of paper or paper products is tested. Because of the number of shipments received (shipments are received on a daily basis, with multiple shipments often being received on any given day), it would be a burden for procuring agencies to retain the results of each of these tests. Instead, procuring agencies should identify the performance tests used and maintain records, by test, on the percentage of failures by paper and paper products containing postconsumer recovered materials (or waste paper) and on the nature of these failures.

The Office of Procurement Policy (OFPP), in the Executive Office of the President, is required under section 6002(g) to report to Congress every two years on actions taken by Federal agencies and the progress made in implementing section 6002.

Accordingly, EPA recommends that each agency that is required to comply with section 6002(i)(2)(D) send a report on its annual review and monitoring of the effectiveness of its procurement program to OFPP. If the agency is using the case-by-case approach or a substantially equivalent approach, it should justify how that approach is maximizing the use of postconsumer recovered materials (or waste paper), and why the use of a minimum content approach is not justified. If the minimum content standard approach is used, the agency should justify whether the standard should be raised, lowered, or remain constant for each item. The justification should be based on reasonable determinations of price, quality, and availability as well as a comparison of estimates and certifications provided by the vendors. Agencies should also document their review of specifications and list those which are revised each year.

EPA notes that this guideline will apply to state and local procuring agencies, as explained under "Applicability" in the final rule published elsewhere in today's **Federal Register**. Information drawn from the experience of Federal procuring agencies about purchases of paper and paper products containing postconsumer recovered materials (or waste paper) would therefore be useful to state and local purchasing officials. Accordingly, EPA encourages Federal procuring agencies to make their reports available.

III. Regulatory Impact

Under Executive Order (E.O.) No. 12291, regulations must be classified as major or nonmajor. E.O. No 12291 establishes the following criteria for a regulation to qualify as a major rule:

1. An annual effect on the economy of $100 million or more;

2. A major increase in costs or prices for consumers; individual industries; Federal, State, or local government agencies; or geographic regions; or

3. Significant adverse effects on competition, employment investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Federal purchases of paper and paper products do not constitute a large enough share of those markets for industry to make manufacturing decisions that are not otherwise enconomically feasible in order to meet Federal procurement requirements. In fact, some Federal procurement policies have been modified in recent years to conform more closely to common commercial standards for some paper products, e.g., toilet tissue. The granting of a price preference is not recommended in the proposed guideline and methods to prevent long-term increases in price have been suggested for the minimum content standard approach; therefore, product costs should not increase. Furthermore, the flexibility allowed to the procuring agencies in implementing minimum content standards should make it possible to make adjustments if any adverse market dislocation or decrease in competition should occur.

Because of the number of items included in the paper and paper product categories and the number of procurement actions taken by procuring agencies each year, some agencies may find it necessary to initially allocate additional resources to implement this guideline. However, the flexibility allowed and the practices recommended in this guideline are intented to avoid on-going increased expenditures by procuring agencies. For example, EPA has recommended that the procedure for estimating and certifying postconsumer recovered materials content be simple and that it be consistent with the procuring agency's usual contracting procedures.

On the basis of the above information and on more extensive data in the rulemaking docket, the Agency has concluded that this guideline is a nonmajor rule.

This document has been submitted to the Office of Management and Budget for review as required by E.O. No. 12291.

IV. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, whenever an agency publishes a general notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis that describes the impact of the rule on small entities (i.e., small businesses, small organizations, small governmental jurisdictions), unless the Administrator certifies that the rule will not have significant

economic impact on a substantial number of small entities.

As described in the final rule published elsewhere in today's **Federal Register**, there is a $10,000 threshold governing applicability of the recovered materials procurement requirement. Because of this threshold, EPA does not expect a substantial number of small entities to be affected by the proposed amendments to the paper guideline. The Agency also believes that the flexible approach to procurement of paper and paper products containing postconsumer recovered materials provided for in this guideline will not impose a significant regulatory or economic burden on small procuring agencies, manufacturers, vendors, or contract printers. Detailed information on this assessment can be found in the RCRA docket for this guideline.

For the above reasons, EPA certifies that this guideline will not have a significant economic impact on a substantial number of small entities. Therefore, the proposed amendments to the paper guideline do not require a regulatory flexibility analysis.

List of Subjects in 40 CFR Part 250

Forest and forest products, Government contracts, Government procurement, Packaging and containers, Paper, Recycling, Resource recovery.

Dated: September 18, 1987.

Lee M. Thomas,

Administrator.

For the reasons set out in the preamble, it is proposed to amend 40 CFR 250.4 and 250.20 as follows:

PART 250—[AMENDED]

1. The authority citation for Part 250 continues to read as follows:

Authority: 42 U.S.C. 6912(a) and 6962.

2. In § 250.4, a definition of "waste paper" is added in alphabetical order to read as follows:

§ 250.4 Definitions.

* * * * *

"Waste paper" means any of the following "recovered materials":

(a) Postconsumer materials such as:

(1) Paper, paperboard, and fibrous wastes from retail stores, office buildings, homes, and so forth, after they have passed through their end usage as a consumer item, including: Used corrugated boxes, old newspapers, old magazines, mixed waste paper, tabulating cards, and used cordage, and

(2) All paper, paperboard, and fibrous wastes that enter and are collected from municipal solid waste; and

(b) Manufacturing, forest residues, and other wastes such as:

(1) Dry paper and paperboard waste generated after completion of the papermaking process (that is, those manufacturing operations up to and including the cutting and trimming of the paper machine reel into smaller rolls or rough sheets) including: Envelope cuttings, bindery trimmings, and other paper and paperboard waste, resulting from printing, cutting, forming, and other converting operations; bag, box, and carton manufacturing wastes; and butt rolls, mill wrappers, and rejected unused stock; and

(2) Finished paper and paperboard from obsolete inventories of paper and paperboard manufacturers, merchants, wholesalers, dealers, printers, converters, or others;

(3) In § 250.20, paragraphs (a)(2), (b)(2), (c)(1) and (c)(2) are revised and paragraphs (c)(4), (d)(3), and (d)(4) are added to read as follows:

§ 250.20 Elements of affirmative procurement program.

* * * * *

(a) * * *

(2)(i) Minimum recovered materials content standards that assure that the postconsumer recovered materials or waste paper content required is the maximum available without jeopardizing the intended end use of the item or violating the limitations of section 6002(c)(1)(A) through (C) of the Act and § 250.21 of this part. EPA recommends that procuring agencies use minimum content standards, rather than the case-by-case approach or a substantially equivalent approach, wherever possible.

(ii) A procuring agency that uses minimum content standards may use the minimum levels in Table 1 or may establish its own minimum content standards. Minimum content standards should be revised annually based on procurement experiences, including data collected from postconsumer recovered materials or waste paper content estimates submitted by all vendors as required under § 250.20(c)(1) of this Part.

* * * * *

(b) * * *

(2) A statement in each paper specification defining "postconsumer recovered materials" or "wastepaper," as applicable, as they are defined in § 250.4 of this Part.

* * * * *

(c) * * *

(1) Agencies must require vendors to estimate the total percentage of postconsumer recovered materials or waste paper in paper and paper products supplied to them.

(2) Agencies must require vendors to certify the minimum postconsumer recovered materials or waste paper to be used in the performance of a contract.

* * * * *

(4) For each paper or paper product procured, agencies should maintain the following records:

(i) The percentage of postconsumer recovered materials or waste paper in the products procured or offered;

(ii) Comparative price information on competitive procurements;

(iii) The quantity of each item procured over a fiscal year;

(iv) The availability of the paper and paper products to procuring agencies;

(v) Type of performance tests conducted, together with the categories of paper or paper products containing postconsumer recovered materials or waste paper that failed the tests, the percentage of total virgin products and products containing postconsumer recovered materials or waste paper supplied that failed each test, and the nature of the failure;

(vi) Agency experience with the performance of the procured products.

(d) * * *

(3) Procuring agencies should monitor the variation between estimates and certifications of postconsumer recovered materials or waste paper in paper and paper products purchased during the year. If the variations are significant, procuring agencies should determine whether minimum content standards can be introduced or raised without causing a long-term increase in price.

(4) It is recommended that each procuring agency make its information available to the Office of Federal Procurement Policy. This information should include a summary of the records recommended in § 250.20(c)(4) of this part and the results of the annual review and monitoring of the effectiveness of the program.

* * * * *

4. Table 1 is added to the end of § 250.20 to read as follows:

TABLE 1.—EPA RECOMMENDED MINIMUM CONTENT STANDARDS FOR SELECTED PAPERS AND PAPER PRODUCTS

Product	Minimum percentage of postconsumer recovered material	Minimum percentage of waste paper [1]
Newsprint	40	—

43 CFR Part 20

Employee Responsibilities and Conduct

AGENCY: Department of the Interior.

ACTION: Proposed rulemaking.

SUMMARY: Regulations governing the conduct and responsibilities of regular and special government employees of the Department of the Interior are proposed to be revised. This revision proposes to:

(1) Incorporate statutory requirements and Department policy decisions not previously pubished as regulations;

(2) Add new rules to correspond to rules recently established by the Office of Personnel Management's Office of Government Ethics;

(3) Update specific rules which are affected by changes in rules established and maintained by other Federal agencies;

(4) Explain existing rules and definitions which are vague or misleading; and

(5) Delete obsolete rules.

DATE: To be considered, comments must be received by November 20, 1987. All comments will receve full consideration.

ADDRESS: Comments concerning these proposed regulations should be sent to: Designated Agency Ethics Official, U.S. Department of the Interior, Mail Stop 5119, 18th & C Streets NW., Washington DC 20240.

FOR FURTHER INFORMATION CONTACT: Gabriele J. Paone or Mason Tsai on (202) 343-5916.

SUPPLEMENTARY INFORMATION: The reasons for the principal proposed additions, delections and changes are explained below:

Section 20.735-2(h)(4)(i) is proposed to be amended to state that on —— the Designated Agency Ethics Official approved a special code of conduct for all employees having duties and responsibilities involving the acquisition of property and sevices for the Department.

We propose to revise § 20.735-7 by adding a Note at the end of (b)(2)(i) which will advise employees holding acquisition duties and responsibilities that the exception on accepting gifts in (b)(2)(i) does not apply to them.

We propose to revise § 20.735-7(b)(2)(iii) to more accurately address the original intent of this provision. Gifts from Indians and Indian Tribes are commonly offered to employees who are on assignment at Bureau of Indian Affairs field locations or attending Indian program events. For cultural reasons, refusal to accept such gifts would be likely to cause offense or embarrassment or otherwise adversely affect relations with the United States. The provisions in 25 U.S.C. 451 authorize the Secretary to accept gifts for the advancement of the American Indian. Use of this authority is delegated to all employees and the proposed revision explains how this authority can be used as an exception to the policies in § 20.735-7(a).

It is also proposed to add a new paragraph § 20.735-7(b)(3) that informs the user that other statutory authorities exist that may provide an alternative to the policy in § 20.735-7(a). The proposal makes such use conditional on a determination that use will not create a conflict or apparent conflict of interest.

VOL 52 ISS 193 OCT 6 1987 UMI

The proposal to revise the definition of "Minimal Value" in § 20.735–8(b)(5) is made to update the value to the current General Services Administration regulation. Refer to GSA Bulletin FPMR H–49 dated March 2, 1987.

An explanation of penalties for violations of the honorarium provisions in § 20.735–11 is proposed. The explanation is intended to provide employees with the proper legal citations and a clarification that only knowing and willful violations of the $2,000 limitation for honorariums need to be reported to the Federal Election Commission.

A proposal for changes to § 20.735–15(b) on misuse of Government motor vehicles or aircraft is made to update the U.S. Code citations. The addition, in this same section, of a paragraph on misuse of official information for private gain, provides employees with an explanation of the kind of information and situations that are of concern.

Section 20.735–17(r) proposes to add a paragraph on acceptance of commercial discounts. This proposal is based on a March 19, 1985 memorandum from the Counsel to the President to all General Counsels of Executive Departments and Agencies. The proposed addition incorporates the policies advocated by the Director, Office of Government Ethics.

In response to several suggestions received from Bureau ethics counselors and employees, § 20.735–23 would be amended by the proposal to remove the words "outside work" and add in their place, the words "outside work or outside activity". This proposal does not change the extent of the current prohibitions. The current prohibitions do cover outside work and other outside activities. However, the wording of the current section does not specifically state outside activity throughout the text of the section and this has raised questions from the counselors charged with implementing the rules. The proposal is intended to eliminate these questions and more accurately express the intent of the prohibitions in the section.

It is proposed that Indian trust, allotted or restricted lands be added to the definition of Federal lands in § 20.735–24. The purpose for this amendment is to make clear the original intention that Indian lands for which the Secretary is trustee are included in the definition of "Federal lands".

In § 20.735–24(b)(1) and (b)(3) it is proposed to remove the word "acquire" in order to clarify the Department's policy that a waiver will not be issued to allow an employee to acquire an interest in Federal lands. A waiver may only be issued to allow an employee to retain an interest in Federal lands.

It is proposed to add to § 20.735–24(e)(1)(iv)(2) rules that will allow the Designated Agency Ethics Official to approve the retention of an outside employment interest with a sole proprietor, partnership or corporation that has interests in Federal lands. Without a waiver, an employment interest in such a business could result in a financial interest in Federal lands which may be a violation of Department regulation. Rules establishing the criteria for allowing such outside employment are necessary to ensure that employees are not unduly restricted from outside employment opportunities. The rules being proposed are intended to provide reasonable standards for allowing such outside work while maintaining the spirit and purpose of the statutory requirements.

A similar proposal is added in § 20.735–27(e)(1)(iv)(2), concerning outside employment in private mining activities.

Section 20.735–30 proposes that all Executive Order financial disclosure statements be retained for six years and longer if needed for an ongoing investigation. This proposal incorporates a directive received from the Director, Office of Government Ethics on July 23, 1985.

The revisions proposed for § 20.735–31 incorporate the provisions of Pub. L. 98–150 that was signed into law by the President on November 11, 1983. Another proposed revision in this section is the addition of information about the authority to grant time extensions for the filing requirements. The proposed information about time extensions is taken from Office of Government Ethics regulations in 5 CFR Part 734.

The Department has determined that this document is not a rule as defined by Executive Order 12291 because this proposed rule is related solely to agency management and personnel. For the same reason it will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act. 5 U.S.C. 601 *et seq.*

List of Subjects in 43 CFR Part 20

Conflicts of interests, Government employees.

Date: September 29, 1987.

Joseph W. Gorrell,

Principal Deputy Assistant Secretary, Policy, Budget and Administration, U.S. Department of the Interior.

Accordingly, 43 CFR Part 20 is proposed to be amended as follows:

PART 20—[AMENDED]

1. The authority citation for 43 CFR Part 20 is revised to read as follows:

Authority: 5 U.S.C. 301; 18 U.S.C. 207(j)(Supp. V 1981); sec. 12, Ch. 576, 48 Stat. 986 (25 U.S.C. 472); sec. 201(f), Pub. L. 95–87, 91 Stat. 450–51 (30 U.S.C. 1211 (Supp. V 1981)); E.O. 11222, E.O. 12565, 30 FR 6469, 3 CFR 1964–65 (Comp.), as amended (18 U.S.C. 201–209); 18 U.S.C. 437; 30 U.S.C. 6; 43 U.S.C. 11; 43 U.S.C. 31(a); 5 CFR 735.104; 5 CFR 734.103; 5 CFR 737.1(c)(7).

2. Section 20.735–1 is amended by revising paragraph (a)(9) to read:

§ 20.735–1 Definitions.

* * * * *

(a) * * *

(9) "Designated Agency Ethics Official" means the Assistant Secretary-Policy, Budget and Administration. The Deputy Agency Ethics Official shall serve as alternate agency ethics official.

* * * * *

3. Section 20.735–2 is amended by revising paragraphs (d)(2), (g), and (h)(4)(i) introductory text, and by adding a new paragraph (h)(4)(i)(C) to read:

§ 20.735–2 Purpose, policy and general responsibilities.

* * * * *

(d) * * *

(2) Obey the proper requests of his or her supervisors.

* * * * *

(g) *Employee responsibilities.* (1) It is the responsibility of employees to be familiar with and to comply with the

regulations in this Part. Employees are expected to consult with their supervisors and personnel officers on general questions they may have regarding the applicability of the regulations in this Part. For guidance on specific matters or questions concerning conflicts of interest, employees may obtain advice and guidance from their Ethics Counselors, Deputy Ethics Counselors, Associate or Assistant Ethics Counselors, the Designated Agency Ethics Official, or appropriate officials within the Office of the Solicitor.

(2) To be cautious in dealing with the general public with representatives of private industry so as not to give an opinion or decision contrary to expressed Departmental or bureau policy.

(3) To avoid expressing personal opinions or making unauthorized decisions about work situations where those opinions or decisions may be mistakenly taken to be the opinion or decision of the bureau or Department.

(4) To report directly or through appropriate channels to the Office of Inspector General matters coming to their attention which involve or may involve violations or law or rule by employees, contractors, sub-contractors, grantees, lessees, licensees or other persons having official business with the Department.

(h) * * *

(4)(i) Special codes of conduct have been approved in accordance with this paragraph (h) for the following groups of employees:

* * * * * *

(C) Department employees having duties and responsibilities involving the acquisition of property and services for the Department. The special code of conduct covering these employees is set forth in 48 CFR 1403.101 and 1415.608—approved ____ 1987.

* * * * * *

§ 20.735–3 [Amended]

4. In § 20.735–3(a)(2)(iv) and (b)(1) it is proposed to remove the words "Assistant Ethics Counselors" and add, in their place, the words "Assistant or Associate Ethics Counselors.".

§ 20.735–6 [Amended]

5. In § 20.735–6(b)(3) it is proposed to remove the citation "(41 CFR 1–1.302–3)" and add, in its place, the citation "(48 CFR 3.601)".

6. In § 20.735–6(b)(4) it is proposed to remove the citation "(41 CFR 1–1.302–3)" and add, in its place, the citation "(48 CFR 1403.602)".

§ 20.735–7 [Amended]

7. In § 20.735–7(a) introductory text it is proposed to remove the words "an employee shall not" and add, in their place, the words "an employee, whether on or off duty, shall not".

8. It is proposed that § 20.735–7 be amended by revising paragraph (b)(2)(i) and (b)(2)(iii) to read:

§ 20.735–7 Gifts, entertainment, and favors from domestic sources.

* * * * * *

(b) * * *

(2) * * *

(i) Food and refreshments or other tangible gifts of nominal value on infrequent occasions in the ordinary course of an official luncheon or dinner meeting or other official or professional function or on an inspection tour when an employee may properly be in attendance;

Note: The exclusion in paragraph (b)(2)(i) of this section does not apply to employees having duties and responsibilities involving the acquisition of property and services for the Department. The special code of conduct for these employees is set forth in 48 CFR 1403.101 and 1415.608.

* * * * * *

(iii) Gifts, on behalf of this Department, which are offered for the advancement of the American Indian can be accepted in circumstances where declining the gifts may cause offense or embarrassment or otherwise adversely affect relations with this Department; such gifts shall be deposited with the bureau property officer within 60 days of the date of acceptance.

* * * * * *

9. It is also proposed that § 20.735–7 be amended by redesignating (b)(3) as (b)(4). Then it is proposed to add a new paragraph (b)(3) to read:

§ 20.735–7 Gifts, entertainment, and favors from domestic sources.

* * * * * *

(b) * * *

(3) Separate statutory gift authorities may be used to provide an exclusion to the prohibitions in paragraph (a) of this section, so long as such use creates no conflict or apparent conflict of interest. Use of such statutory gift authorities should be well documented and gifts other than food or refreshments accepted under such authorities shall be deposited with the bureau property officer within 60 days of the date of acceptance. Notwithstanding paragraphs (b)(2)(iii) and (b)(3), see 48 CFR 1403.101 for special rules governing the acceptance on behalf of the Department of donated property or services including Automated Data Processing Services which are subject to the Department of the Interior Acquisition Regulation.

* * * * * *

10. It is proposed that § 20.735–8 be amended by revising paragraph (b)(5) to read:

§ 20.735–8 Gifts and decorations from foreign governments.

* * * * * *

(b) * * *

(5) "Minimal Value" means a retail value in the United States at the time of acceptance of $180.00 or less. Refer to 41 CFR Part 101–49.

* * * * * *

§ 20.735–8 [Amended]

11. In § 20.735–8(d)(2)(ii) it is proposed to remove the words "Assistant Secretary—Policy, Budget and Administration" and add, in their place, the words "Ethics Counselor".

12. It is proposed that § 20.735–9 be amended by revising paragraph (a)(4) to read (the Example Following (a)(4) remains unchanged):

§ 20.735–9 Reimbursement of travel and related expenses.

(a) * * *

(4) When participation at a function is not in an official capacity, an employee may accept reimbursement of travel and accommodation expenses from a private source, provided that such acceptance creates no conflict or appearance of a conflict of interest with one's official duties and is not in violation of other applicable statutory or regulatory prohibition. Refer to § 20.735–7 of this part. Participation as a private citizen must occur on one's own time, such as while on annual leave or leave without pay. If participation should occur during the course of official travel (i.e., evening or weekend hours during official travel status), the travel voucher submitted for Government reimbursement of official duty expenses must be adjusted to claim only that per diem and travel attributable to official duty. Employees who are appointed by the President and paid at a rate higher than the highest rate for GS–18 are on 24 hour duty and determinations of what constitutes official duty and what is private participation should be carefully made. In making such a determination, consultation with the Deputy Agency Ethics Official or the Associate Solicitor—Division of General Law is advisable.

* * * * * *

13. It is proposed that § 20.735–11 be amended by revising paragraph (f) to read:

§ 20.735–11 Honorariums and outside earned income.

* * * * *

(f) *Violation.* In addition to the potential sanctions in § 20.735–4, any employee who knowingly and willfully violates the $2,000 limitation on the amount of an honorarium that may be accepted in § 20.735–11(b)(4) shall be reported to the Federal Election Committee in accordance with the Commission's compliance procedures in 11 CFR Part 111. The employee may be subject to civil and criminal penalties as provided for by 2 U.S.C. 437g (Pub. L. 96–187, section 108).

14. It is proposed that § 20.735–15 be amended by revising paragraphs (b), (c), and adding paragraphs (d) and (e) to read:

§ 20.735–15 Government property.

* * * * *

(b) *Misuse of Government motor vehicles or aircraft.* Employees shall not willfully use or authorize the use of a Government-owned or leased passenger motor vehicle or aircraft for other than official purposes. Violation of this provision shall automatically result in suspension from duty without compensation, for not less than one month. See 31 U.S.C. 1344(a) and 31 U.S.C. 1349(b) for additional interpretation and guidance on official use of motor vehicles or aircraft.

(c) *Misuse of information.* Except as may be provided by regulation, an employee shall not, for the purpose of furthering private interests, directly or indirectly use or allow the use of official information obtained through or in connection with his Government employment. Information that is available to the general public on request is not covered by this prohibition unless its use creates a conflict or a substantial appearance of misusing public office for private gain.

(d) *Embezzlement of Government property.* Employees shall not convert, even temporarily on loan, for personal use, any Government property or equipment nor use Government authority, even though reimbursement is made, for personal acquisitions (18 U.S.C. 641, 643 and 654).

(e) *Unauthorized use of official mail.* Mail such as personal letters and Christmas cards, job resumes and applications, Freedom of Information and Privacy Act requests and appeals, complaints, grievances, and all similar materials which do not relate exclusively to the business of the Government may not be sent as penalty or postage and fees paid mail. An employee is prohibited from using official Government envelopes, with or without applied postage, or official letterhead stationery for personal business (18 U.S.C. 1719 and 39 U.S.C. 3201 *et seq.*). These statutory requirements prohibit employees from using Government envelopes to mail their own personal job applications.

15. It is proposed that § 20.735–17 be amended by revising paragraph (m) to read:

§ 20.735–17 Other conduct.

* * * * *

(m) *Commercial Discounts.* The acceptance by an employee of any special rate or commercial discount is governed generally by the rules and prohibitions related to the acceptance of gifts except that employees may accept special rates or commercial discounts that are offered to members of the public generally. An employee may not accept a special rate or commercial discount when:

(1) It is offered only to Department or bureau employees;

(2) The person or entity offering the rate or discount:

(i) Has exclusive interests that may be directly affected by the performane or non-performance of the employee's official duties,

(ii) Has or is seeking business directly with the Department, or

(iii) Appears to be offering the rate or discount with the hope or expectation of obtaining an advantage or preferment in dealing with the Department; or when

(3) Acceptance of the rate or discount creates a conflict or an appearance of conflict of interest or would otherwise adversely affect the public's confidence in the integrity of the government.

Employees are also prohibited from using any special rate or commercial discount related to government service to obtain any item for the purpose of resale at a profit. The provisions of this paragraph do not prohibit the acceptance of discounts offered on a geographical basis (for example, a specific city or municipality) or discounts offered to non-government groups to which an employee may belong such as the American Automobile Association, etc. Employees are restricted from accepting discounts from groups that are regulated by this Department, except where the groups are required by law, regulation or contract to offer discounts to everyone. The provisions of this paragraph also do not prohibit employees from accepting discounts from Department authorized operations.

16. It is proposed that § 20.735–20 be amended by revising paragraph (c) to read:

§ 20.735–20 Scope of subpart.

* * * * *

(c) For the purpose of applying the prohibitions in § 20.735–24 Interests in Federal lands, § 20.735–27 Interested in mining activities, and § 20.735–28 Interests in trading with Indians, of this subpart, the term "Office of the Secretary and other Departmental Offices reporting directly to a Secretarial Officer" means the following offices:

(1) The Immediate Office of the Secretary;
(2) The Immediate Office of the Under Secretary;
(3) Solicitor;
(4) Inspector General;
(5) Hearings and Appeals;
(6) Congressional and Legislative Affairs;
(7) Public Affairs;
(8) All Assistant Secretaries and their immediate Office Staffs and heads of bureaus or offices;
(9) The following offices under the Assistant Secretary-Policy, Budget, and Administration:
(i) Acquisition and Property Management;
(ii) Budget
(iii) Environmental Project Review;
(iv) Policy Analysis;

* * * * *

§ 20.735–21 [Amended]

17. In § 20.735–21(b)(4)(iv) **Note**, it is proposed to remove the words "Interests in mining activities, and § 20.735–27-Interests in trading with Indians" and add, in their place, the words "Interests in underground or surface coal mining operations, or § 20.735–27-Interests in mining activities.".

18. It is proposed that § 20.735–21 be amended by revising the **Example** following (b)(5)(ii) to read:

§ 20.735–21 General conflict of interest prohibitions.

* * * * *

(b) * * *
(5) * * *
(ii) * * *

Example: An employee who works as a contracting officer owns $5,000 worth of stock in a computer company. This employee has a substantial relationship between that financial interest and the computer company if either of the following situations exists: (1) He or she is required to deal directly with, render advice about, make recommendations or decisions concerning the company, or (2) he or she may be required to deal with or

make decisions concerning the company and it is reasonable for members of the public to perceive such potential activity as being a conflict of interest. In the first instance there is a substantial conflict. In the second instance there is a substantial apparent conflict. It is important to understand that if this employee were a Personnel Officer, a $5,000 interest in a particular computer company might not create a substantial conflict or apparent conflict, but for the Contracting Officer, even a small interest in that particular computer company may be considered substantial.

* * * * *

§ 20.735–22 [Amended]

19. In § 20.735–22(c)(3) it is proposed to revise the last two sentences to read as follows: "Except for the prohibition on executing surveys or examinations for private parties or corporations, these statutory restrictions are by this sentence, extended to the Director and all members of the Minerals Management Service. Refer to § 20.735–24 for prohibitions on interests in Federal lands and resources by employees of the Department generally."

§ 20.735–23 [Amended]

20. In § 20.735–23 it is proposed to remove the words "outside work" and add, in their place, the words "outside work or outside activity" in the following paragraph:

(b) (1) ("outside work" appears twice)
(b)(3)(i)
(c)(1)(iv)
(c)(1)(v)
(g)(2)(i)
(g)(2)(ii)
(g)(3)(i)
(h)(1)

21. It is proposed that § 20.735–23 be amended by revising paragraph (a)(2) to read:

§ 20.735–23 Outside work and interests.

* * * * *

(a) * * *

(2) "Outside activity" means volunteer services, lectures, consultations, discussions, writings, appearances and other similar activities.

* * * * *

22. In § 20.735–23(b)(3)(ii) it is proposed to remove the words "any work assignment or employment affiliation" and add, in their place, the words "any outside work or activity".

23. In § 20.735–23(c)(2) it is proposed to remove the words "may not perform outside work if:" and add, in their place, the words "may not perform outside work or an outside activity if:".

24. In § 20.735–23(c)(2)(i), (ii) and (iii) it is proposed to remove the words "The work" and add, in their place, the words "The work or activity".

25. It is proposed that § 20.735–23 be amended by revising paragraphs (d)(2), (e)(1) introductory text, (e)(1)(i) Note, (g)(1), and (g)(2)(iii) to read:

§ 20.735–23 Outside work and interests.

* * * * *

(d) * * *

(2) While a special government employee is not prohibited from performing outside work or other outside activity solely because the work or activity is of the same general nature as the work he or she performs for the Department, such an employee may not perform outside work or activity if (i) The work or activity is such that the employee would be expected to do it as a part of his or her regular duties; or

(ii) The work or activity would tend to influence the exercise of impartial judgment on any matters coming before the employee in the course of his or her official duties.

* * * * *

(e) * * *

(1) A regular employee shall not receive any salary or anything of monetary value from a private source as compensation for services to the Government (18 U.S.C. 209). This statute does not cover outside work performed for no compensation, nor does it prevent an employee from:

(i) * * *

Note: Continued participation in stock options or profit sharing benefit plans maintained by a former employer may be prohibited by other statutory requirements.

(ii) * * *

(g) * * *

(1) Except for U.S. Mineral Surveyors, a regular or special government employee engaged in outside work or outside activity shall report that work or activity to his or her immediate supervisor if the work or activity is to be performed frequently or on a standardized schedule.

(2) * * *

(iii) A statement of the employee's opinion of any apparent or potential conflict of interest between the work or activity and his or her official duties.

* * * * *

26. It is proposed that § 20.735–24 be amended by revising paragraph (a)(1) to read:

§ 20.735–24 Interests in Federal lands.

* * * * *

(a) * * *

(1) "Federal lands" means lands or resources or an interest in lands or resources which are administered or controlled by the Department of the Interior, including, but not limited to, the Outer Continental Shelf and Indian trust or restricted lands.

* * * * *

27. It is proposed that § 20.735–24 be amended by adding a sentence after paragraph (a)(4)(ii) to read:

§ 20.735–24 Interests in Federal lands.

* * * * *

(a) * * *
(4) * * *
(ii) * * *

Refer to Note in § 20.735–21(b)(4) for examples of the kinds of interests that are not covered.

* * * * *

28. In § 20.735–24(b)(1)(ii) it is proposed to remove the words "except that they may acquire or retain such interests" and add, in their place, the words "except that they may retain such interests".

29. In § 20.735–24(b)(2) introductory text it is proposed to remove the words "to GS–16 and above or who are in merit pay positions as described in 5 U.S.C. 5401(b)(1)," and add, in their place, the words "to GS–16 and above or who are in positions covered by the Performance Management and Recognition System as described in 5 U.S.C. 5402(a),".

30. In § 20.735–24(b)(3) it is proposed to remove the words "except that they may acquire or retain such interests" and add, in their place, the words "except that they may retain such interests".

31. It is proposed that § 20.735–24 be amended by redesignating paragraphs (e)(2) as (e)(3), (e)(3) as (e)(4), and (e)(4) as (e)(5). Then it is proposed to add a new paragraph (e)(2) to read:

§ 20.735–24 Interests in Federal lands.

* * * * *

(e) * * *

(2) For employees identified in § 20.735–24(b), the Designated Agency Ethics Official may appprove the retention of an outside employment interest with an entity that has an interest in Federal lands when the general provisions on outside work and interests in § 20.735–23 are met and when:

(i) The outside employment is not prohibited by 43 U.S.C. 31(a), and

(ii) There is little or no relationship or appearance of conflict of interest between the employee's outside employment interest and the employee's official duties and responsibilities, and;

(iii) Any related commercial permit, lease or other right in Federal land is not directly held by the employee, and

VOL 52 ISS 193 OCT 6 1987 UMI

(iv) The outside employment interest does not result in a direct or indirect equity interest in an organization that has rights to Federal lands, and

(v) The outside employment interest of a Department employee is equally available to any member of the general public.

* * * * *

32. In newly redesignated § 20.735–24(e)(4)(i) it is proposed to remove the words "Designated Agency Ethics Official within 90 days from the effective date of these regulations, within 60 days of employment by the Department" and add, in their place, the words "Designated Agency Ethics Official within 60 days of employment by the Department".

33. In newly redesignated § 20.735–24(e)(4)(iv) it is proposed to remove the words "An explanation of why denial of the right" and add, in their place, the words "If applicable, an explanation of why denial of the right".

§ 20.735–26 [Amended]

34. In § 20.735–26(b)(1) it is proposed to remove the words "Assistant Secretary—Energy and Minerals," and add in their place, the words "Assistant Secretary—Land and Minerals Management,".

35. In § 20.735–27(b)(3) introductory text it is proposed to remove the words "to GS–16 and above or who are in merit pay positions as described in 5 U.S.C. 5401(b)(1)," and add, in their place, the words "to GS–16 and above or who are in positions covered by the Performance Management and Recognition System as described in 5 U.S.C. 5402(a),".

36. It is proposed that § 20.735–27 be amended by redesignating paragraphs (e)(2) as (e)(3), and (e)(3) as (e)(4). Then it is proposed to add a new paragraph (e)(2) to read:

§ 20.735–27 Interests in mining activities.

* * * * *

(e) * * *

(2) For employees identified in § 20.735–27(b), the Designated Agency Ethics Official may approve the retention of an outside employment interest in a mining activity that is under investigation or in a mining enterprise conducting mining activities that are under investigation, when the general provisions on outside work and interests in § 20.735–23 are met and when:

(i) The outside employment is not prohibited by 30 U.S.C. 6, and

(ii) There is little or no relationship or appearance of conflict of interest between the employee's outside employment interest and the employee's official duties and responsibilities, and

(iii) The outside employment interest does not result in a direct or indirect equity interest in an organization that has rights to mining activities, and

(iv) The outside employment interest of a Department employee is equally available to any member of the general public.

* * * * *

37. In newly redesignated § 20.735–27(e)(3)(i) remove the words "Designated Agency Ethics Official within 90 days from the effective date of these regulations, within 60 days of employment by the Department" and add, in their place, the words "Designated Agency Ethics Official within 60 days of employment by the Department".

38. In § 20.735–28(c)(1) introductory text it is proposed to remove the words "to GS–16 and above or who are in merit pay positions as described in 5 U.S.C. 5401(b)(1)" and add in their place, the words "to GS–16 and above or who are in positions covered by the Performance Management and Recognition System as described in 5 U.S.C. 5402(a)".

39. It is proposed that § 20.735–28 be amended by revising paragraph (e)(2) to read:

§ 20.735–28 Interests in trading with Indians.

* * * * *

(e) * * *

(2) Employees in Indian Affairs, the Office of the Secretary and Other Departmental Offices may be permitted to trade with Indians or Indian Organizations under regulations prescribed in 25 CFR Part 140.

* * * * *

40. It is proposed that § 20.735–29 be amended by revising paragraph (c)(1) to read:

§ 20.735–29 Indian and Alaska Native Organizations.

* * * * *

(c) * * *

(1) No person employed in Indian Affairs may hold a position on a tribal election board or on a tribal school board which oversees Bureau of Indian Affairs ept for line officers, personnel officers, contracting officers and contracting specialists, an eligile person employed in Indian Affairs, with the approval of the Deputy to the Assistant Secretary—Indian Affairs (Operations), for Central Office employees, or the appropriate Area Director for field employees, may become a condidate for office in his or her local tribe or may be appointed as a representative of his or her local tribe, if in the judgement of the Deputy to the Assistant Secretary, Area Directors or Assistant Directors, no real or apparent conflict of interest is created. The decisions of the above named officials are final and no further appeal is permitted.

* * * * *

41. In § 20.735–29 it is proposed to remove the words "Deputy Assistant Secretary—Indian Affairs" and add, in their place, the words "Deputy to the Assistant Secretary—Indian Affairs" in the following paragraphs:

(c)(2) introductory text

(c)(2)(i)

(c)(2)(ii)

42. In § 20.735–30(c) introductory text it is proposed to remove the words "the necessary form or forms to the employee" and add in their place, the words "the necessary form to the employee".

43. In § 20.735–30(d)(1) introductory text and (d)(2) it is proposed to remove the word "full-time".

44. It is proposed that § 20.735–30 be amended by revising paragraph (h) to read:

§ 20.735–30 Executive Order filing requirements.

* * * * *

(h) *Retention and disposal of statements.* All statements shall be destroyed six years from the date of filing unless the statement is needed in an ongoing investigation.

* * * * *

45. It is proposed that § 20.735–31 be amended by revising paragraphs (c)(2), (c)(3)(i) and (c)(3)(ii) to read:

§ 20.735–31 Ethics in Government Act filing requirements.

* * * * *

(c) * * *

(2) Within five days of the transmittal by the President to the Senate of the nomination of an individual to a position, appointment to which requires the advice and consent of the Senate, such individual shall file the required report in accordance with instructions received from the Executive Office of the President. The report shall be reviewed by the Designated Agency Ethics Official who shall sign approval or comment on the contents of the form before it is forwarded to the Office of Government Ethics. Also, such individual shall, not later than the first hearing to consider the nomination of such individual, make current the report filed pursuant to this section by filing the information required by section 202(a)(1)(A) of the Ethics in Government Act with respect to outside earned income and honoraria received as of the date which occurs five days before the date of such hearing. Nothing in these

regulations shall prevent any Congressional committee from requesting, as a condition of confirmation, any additional financial information from any Presidential nominee whose nomination has been referred to that committee.

(3) * * *

(i) The Deputy Ethics Counselor will grant an extension of time, not to exceed May 15, for filing the annual SF–278 form.

(ii) The Designated Agency Ethics Official may, for good cause shown, grant to any employee, an extension of time of up to 45 days beyond the May 15 deadline for the annual filing of the SF–278. This filing extension will only be considered in cases where the affected employee needs additional time to obtain tax, trust or investment information to complete his or her SF–278 form. Requests for such an extension shall be in writing to the Designated Agency Ethics Official through the employee's Deputy Ethics Counselor. Such requests must be filed no later than May 1st of the reporting year.

* * * * *

46. In § 20.735–31(e)(6) it is proposed to revise the second sentence to read as follows: "Incumbent employees shall report all positions held at any time during the applicable reporting period. *Refer to 5 CFR 734.301(f).*".

47. It is proposed that § 20.735–31 be amended by revising paragraphs (g)(1)(ii) through (vi) to read:

§ 20.735–31 Ethics in Government Act filing requirements.

* * * * *

(g) * * *

(1) * * *

(ii) Determine which, if any, conflict of interest prohibitions, in addition to Executive Order 11222 prohibitions, apply to each position (e.g., organic act prohibitions);

(iii) Review each SF–278 report for completeness and determine if any information disclosed reveals any conflict or appearance of a conflict of interest with the employee's official duties and whether any reported interest violates any applicable prohibition. For employees given filing extensions or being processed for remedial action, all SF–278's filed to satisfy the annual disclosure requirement must be submitted to the Department Ethics Office by the first Monday in April. For employees filing SF–278 new entrant or termination reports, these reports shall be reviewed and submitted to the Designated Agency Ethics Official within 15 working days after receipt by the respective bureau or office;

(iv) Sign the report indicating that the report has been reviewed and is recommended for certification. In cases where a SF–278 report is not recommended for certification, the bureau or office deputy ethics counselor shall not sign the report. The SF–278 report shall be filed with the Designated Agency Ethics Official along with a statement as to why the SF–278 should not be certified. For the submission of the SF–278's to satisfy the annual disclosure requirement, the bureau or office deputy ethics counselor shall also send a report to the Designated Agency Ethics Official listing the names of employees who were granted the May 15th filing extension.

(v) Take prompt action to resolve informally any potential conflicts, actual conflicts or apparent conflicts that exist; and

(vi) Take remedial action if informal resolution fails.

* * * * *

48. It is proposed that § 20.735–35 be amended by removing paragraph (b), redesignating paragraphs (c) and (d) as (b) and (c), and revising paragraphs (a)(1) through (3) and newly redesignated (b)(1) to read as follows:

§ 20.735–35 How to file.

* * * * *

(a)(1) Employees who are subject only to Executive Order 11222 filing requirements shall report all information required on form DI–212, Confidential Statement of Employment and Financial Interest.

(2) Employees who are in positions subject to Executive Order 11222 filing requirements and to the Surface Mining Control and Reclamation Act filing requirements shall report all information requirement on form DI–212A, Confidential Statement of Employment and Financial Interests for use by Federal employees who perform functions or duties under the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1211(f).

(3) Employees who are in positions subject only to the Ethics in Government Act of 1978 filing requirements shall report all information required on the Standard Form 278. Employees filing reports under the Ethics in Government Act will also satisfy the filing requirement of Executive Order 11222 or the Surface Mining Control and Reclamation Act by filing Form DI–278. Form DI–278 is an approved Departmental supplement to SF–278 and requests only that additional information required by Executive Order 11222 or the Surface Mining Act that is not requested on the SF–278. Newly appointed or elected officials and Presidential nominees to positions requiring the advice and consent of the Senate shall also file Standard Form 278.

(b) *Where to file.* (1) The Designated Agency Ethics Official and the Deputy Agency Ethics Official shall file statements with the Under Secretary.

* * * * *

49. In newly redesignated § 20.735–35(b)(2) it is proposed to remove the words "Assistants to the Secretary; Solicitor and Deputy Solicitors;" and add in their place, the words "Assistants to the Secretary; Inspector General; Solicitor and Deputy Solicitors;".

50. It is proposed that § 20.735–35 be amended by revising newly redesignated paragraphs (b)(4) and (b)(5) to read:

§ 20.735–35 How to file.

* * * * *

(b) * * *

(4) Covered employees in the Office of Inspector General (except for the Inspector General) shall file their statements with the Inspector General of the Deputy Ethics Counselor for the Office of Inspector General, as the Inspector General may direct.

(5) Covered employees in the Office of the Secretary and in Other Departmental Offices, except those employees mentioned in paragraphs (b)(1) through (b)(4) of this section shall file their statements with the Personnel Officer, Division of Personnel Services.

* * * * *

51. It is proposed that § 20.735–36 be amended by revising paragraph (b) introductory text to read:

§ 20.735–36 Certificates of disclaimer.

* * * * *

(b) Each employee covered by one or more of these restrictions shall sign a certificate of disclaimer upon entrance to or upon transfer to these bureaus or offices. Employees may also be required to periodically renew their certificate of disclaimer. The employee's signature will indicate that he or she:

* * * * *

52. It is proposed that § 20.735–37 be amended by revising paragraph (b)(1) to read:

§ 20.735–37 Review and analysis of statements.

* * * * *

(b) * * *

(1) Ensure that all necessary financial disclosure reports are filed in accordance with Department regulations.

* * * * *

53. It is proposed that § 20.735–37 be amended by revising paragraphs (c) and (e) to read:

* * * * *

(c) Each employee's annual statement shall be reviewed by the ethics counselor with whom it is filed to ensure that the employee is in compliance with these regulations. The ethics counselor may consult with the approriate Regional Solicitor, or the Associate Solicitor—General Law, in the conduct of the review.

* * * * *

(e) All DI–212 and DI–212A financial disclosure statements filed to satisfy the annual financial disclosure filing requirements shall be reviewed and certified by the bureau ethics counselor or his or her designee by July 31 of each year. With the exceptions noted in § 20.735–31(g)(1)(iv), all SF-278 financial disclosure reports filed to satisfy the annual financial disclosure requirements shall be reviewed and submitted to the Designated Agency Ethics Official by the first Monday in April of each year for certification or appropriate action.

54. It is proposed that § 20.735–43 be amended by revising paragraphs (a) and (c)(1) to read:

§ 20.735–43 Appeal procedures.

(a) *When and how to appeal.* An employee has the right to appeal an order for remedial action under § 20.735–40. In addition, an employee may appeal the decision of his or her bureau ethics counselor to require that employee to file a financial disclosure statement as provided under 43 CFR 20.735–30(b)(5) or 30 CFR 706.11. An employee shall have 30 days from the date of the remedial action order, or from the date on which he or she was notified of the filing requirement in 43 CFR 20.735–30(b)(5) or 30 CFR 706.11, to exercise this appeal right before any administrative action may be initiated. For appeals under this section the procedures described in 370 DM 771 may not be used in lieu of or in addition to those of this section. Each appeal shall be made in writing and shall contain:

(1) The basis for appeal,

(2) Facts supporting the basis, and

(3) The appellant's current duty station and telephone number.

* * * * *

(c) * * *

(1) Each appeal shall be considered by an Appeal Review Board consisting of a program Assistant Secretary selected by the Designated Agency Ethics Official, the Associate Solicitor—Division of General Law, and the Director or Deputy Director of the Office of Personnel. Assistant Secretaries may delegate authority to serve on the Review Board to a Deputy Assistant Secretary who has not been involved, and who has not advised or made a decision on the issue or on the order for remedial action. The Designated Agency Ethics Official shall serve as an alternate member of the Appeal Review Board in the event that an appeal case involves a member of the Appeal Review Board.

* * * * *

55. It is proposed that § 20.735–61 be amended by adding a new paragraph (d) to read:

§ 20.735–61 Post-employment restrictions.

* * * * *

(d) *Measurement of the two and one-year restriction periods.* (1) For 18 U.S.C. 207(b)(i), the statutory two-year period is measured from the date when the employee's responsibility in a particular area ends, not from the termination of Government service, unless the two occur simultaneously. The prohibition applies to all particular matters subject to such responsibility in the one-year period before termination of such responsibility.

(2) For 18 U.S.C. 207(c), the statutory one-year period is measured from the date when the individual's responsibility as a Senior Employee in a particular agency ends, not from the termination of Government service, unless the two occur simultaneously.

[FR Doc. 87–22862 Filed 10–5–87 8:45 am]
BILLING CODE 4310–RK–M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 63

[CC Docket No. 87–266; FCC 87–243]

Telephone Company; Cable Television Cross-Ownership Rules

AGENCY: Federal Communications Commission.

ACTION: Notice of inquiry.

SUMMARY: The Commission adopted a Notice of Inquiry on the possibility of presenting to the Congress proposals for modification of the Communications Act and Commission's Rules governing the provision of video programming by telephone common carriers within their operating areas. One party has filed a motion for 30 additional days in which to file comments and reply comments. Support of that request was filed by seven parties in the form of a joint filing and by one other party. Another party wishes to place restrictions on any extension of time the Commission may grant.

DATES: The motion was granted in an Order released under delegated authority by the Deputy Chief (Operations), Common Carrier Bureau, on September 22, 1987. Therefore, the final date for filing comments has been extended to November 2, 1987 and reply comments to December 2, 1987.

ADDRESSES: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: James F. Ferris, (202) 634–1830.

SUPPLEMENTARY INFORMATION: This is a summary of a Motion for Extension of Time and other related filings pertaining to the Commission's Notice of Inquiry (NOI) in CC Docket No. 87–266, released August 18, 1987. A summary of that NOI was published in the **Federal Register** on September 15, 1987 (52 FR 34818).

Summary of Motion for Extension of Time and Related Filings

The NOI required that comments filed by interested parties be received at the Commission on or before October 2, 1987. Reply comments could be filed no later than November 2, 1987. On September 4, Centel Corporation (Centel) filed a motion for a 30-day extension of the comment and reply comment dates. Centel states that the massive information requested by the Commission in this major proceeding will take substantial time to obtain from its numerous jurisdictions and to then collate into a coherent and comprehensive policy position. Subsequently, support of Centel's motion was filed by seven parties in a joint pleading, and further support was filed by the National Cable Television Association, Inc. The United States Telephone Association (USTA) recommends that any extension in this proceeding granted by the Commission carry certain limitations. By Order released September 22, 1987, the Commission grants Centel's motion and denies the recommendation of USTA. Accordingly, parties interested in the NOI now have until November 2, 1987 to file comments, and December 2, 1987 to file reply comments.

Gerald Vaughan,

Deputy Chief (Operations), Common Carrier Bureau, Federal Communications Commission.

BILLING CODE 6712–01–M

47 CFR Part 73

[MM Docket No. 87-385, RM-5804]

Radio Broadcasting Services; West Lafayette, IN

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition by Purdue University proposing the allotment of Channel *267A to West Lafayette, Indiana and its reservation for noncommercial use, as that community's second FM service.

DATES: Comments must be filed on or before November 19, 1987, and reply comments on or before December 4, 1987.

ADDRESS: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioners, or their counsel or consultant, as follows: David E. Hilliard, Esq., Wiley, Rein & Fielding, 1776 K Street NW., Washington, DC 20006 (Counsel to Petitioner).

FOR FURTHER INFORMATION CONTACT: D. David Weston, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rule Making, MM Docket No. 87-385, adopted August 25, 1987, and released September 28, 1987. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW, Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street, NW, Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1231 for rules governing permissible *ex parte* contact.

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1150

[Ex Parte No. 392; (Sub-No. 1)]

Class Exemption for the Acquisition and Operation of Rail Lines Under 49 U.S.C. 10901

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed reopening and modification of final rules.

SUMMARY: The Commission seeks comments on whether and, if so, how the class exemption rules filed in 49 CFR Part 1150, Subpart D, should be modified. While the agency believes the rules have worked very well, there has been concern in a limited number of cases that the rules do not allow sufficient opportunity for public comment. Issues of special concern—for which new rules are being considered—are whether the 7-day notice period should be lengthened for some or all transactions and whether more detailed information should be required.

DATE: Comments are due by November 5, 1987.

ADDRESS: Send comments to Office of the Secretary, Case Control Branch, Room 1324, Interstate Commerce Commission Building, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar, (202) 275–7245. TDD for hearing impaired: (202) 275–1721.

SUPPLEMENTARY INFORMATION: The Commission has not proposed specific implementing rules. However, parties are here put on notice that, following comments, final rules may be adopted.

Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to Office of the Secretary, Room 2215, Interstate Commerce Commission Building, Washington, DC 20423, or call (202) 275–7428, assistance for the hearing impaired is available through TDD services (202) 275–1721.

This action will not significantly affect either the quality of the human environment or energy conservation. This modification should not have a significant economic impact on a substantial number of small entities.

List of Subjects in 49 CFR Part 1150

Administrative practice and procedure, Railroads.

Authority: 49 U.S.C. 10321, 10505, and 10901; and 5 U.S.C. 553.

Decided: September 30, 1987.

By the Commission, Chairman Gradison, Vice Chairman Lamboley, Commissioners Sterrett, Andre, and Simmons.

Noreta R. McGee,

Secretary.

Notices

Federal Register
Vol. 52, No. 193
Tuesday, October 6, 1987

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

National Agricultural Statistics Service

Cattle Grazing Rates on Privately Owned Nonirrigated Land

Notice is hereby given that in response to data user requests, effective September 30, 1987, the National Agricultural Statistics Service (NASS) changed the publication date for cattle grazing rates on privately owned nonirrigated land.

The cattle grazing rates on privately owned nonirrigated land for 1986 and earlier years were published in the December 1986 issue of *Agricultural Prices*. The 1987 rates are published in the September 1987 issue of *Agricultural Prices* released September 30, 1987. The 1987 data will also be published in the December 1987 issue of *Agricultural Prices*.

For 1988 and succeeding years, NASS plans to publish the grazing rates in the July and December issues of *Agricultural Prices*.

For further information, contact Fred Thorp, Chief, Economic Statistics Branch, Estimates Division, NASS/USDA, Room 5912–S, Washington, DC 20250–2000; telephone (202) 447–3570.

Done at Washington, DC, this 1st day of October 1987.

Charles E. Caudill,

Administrator.

BILLING CODE 3410–20–M

DEPARTMENT OF COMMERCE

Agency Form Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Bureau of Economic Analysis
Title: Benchmark Survey of Foreign Direct Investment in the United States
Form Number: Agency—BE–12; OMB—NA
Type of Request: New collection
Burden: 12,000 respondents; 120,000 reporting hours
Needs and Uses: This survey is needed to collect data on foreign investment in the U.S. to be used in the formulation of Government policy and will serve as a base from which balance of payments and financial and operating data collected in sample surveys can be expanded to universe estimates. Required for balance of payments, international investment, and gross national product accounts of the U.S.
Affected Public: Farms, businesses or other for-profit institutions, small business or organizations
Frequency: Quinquennially
Respondent's Obligation: Mandatory
OMB Desk Officer: John Griffen, 395–7340

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Officer, Edward Michals, (202) 377–3271, Department of Commerce, Room H6622, 14th and Constitution Avenue, NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to John Griffen, OMB Desk Officer, Room 3228, New Executive Office Building, Washington, DC 20503.

Dated: September 29, 1987.

Edward Michals,

Departmental Clearance Officer, Office of Management and Organization.

BILLING CODE 3510–CW–M

[Docket No. 3640–60]

Order Restoring Export Privileges; Hi-Tech Air Transport Corp., Respondent

The Order of July 14, 1986 (51 FR 26030, July 18, 1986) affirmed the June 12, 1986 Decision and Order that terminated the February 28, 1983 Temporary Denial Order (48 FR 10108, March 10, 1983). Nevertheless, one Related Person has still been denied U.S. export privileges pursuant to that Temporary Denial Order, in consequence of an August 3, 1984 Amendment (49 FR 31933, August 9, 1984). Those U.S. export privileges are hereby restored to: Hi-Tech Air Transport Corporation, 110 Standard Street, El Segundo, California.

This restoration of U.S. export privileges to Hi-Tech Air Transport Corporation is effective immediately, and this Order Restoring export privileges shall be published in the **Federal Register**.

Hugh J. Dolan,

Administrative Law Judge.

Date: September 29, 1987.

[FR Doc. 87–23094 Filed 10–5–87; 8:45 am]

BILLING CODE 3510–BP–M

[Docket No. 4652–52]

Order Denying Temporary Denial Order; Nancy P. King, Respondent

Because each of the Principal Respondent's named in the Temporary Denial Order issued February 3, 1984 (49 FR 4958, February 9, 1984) have been deleted therefrom, that Temporary Denial Order is hereby terminated.

The single Related Person for whom U.S. export privileges are still being denied pursuant to that Temporary Denial Order hereby has these U.S. export privileges restored. That person is: Nancy P. King, 5122 Grandview Avenue, Yorba Linda, CA.

This termination of the February 3, 1984 Temporary Denial Order and this restoration of U.S. export privileges to Nancy P. King are effective immediately, and this Order terminating the Temporary Denial Order shall be published in the **Federal Register**.

Hugh J. Dolan,

Administrative Law Judge.

Date: September 29, 1987.

BILLING CODE 3510–BP–M

International Trade Administration

[A–549–601]

Amended Antidumping Duty Order; Malleable Cast Iron Pipe Fittings From Thailand

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice.

VOL 52 ISS 193 OCT 6 1987 UMI

SUMMARY: As a result of correcting a typographical error in the Department's antidumping duty order on malleable cast iron pipe fittings from Thailand (52 FR 31440, August 20, 1987), we are hereby amending the antidumping duty order and correcting the antidumping duty rate from 2.75 percent to 1.70 percent, the rate of our final determination (52 FR 29282, July 7, 1987). **Federal Register.**

EFFECTIVE DATE: October 6, 1987.

FOR FURTHER INFORMATION CONTACT: Charles Wilson (202) 377–5288 or James Riggs (202) 377–1766, Office of Investigations, International Trade Administration, United States Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION: The products covered by this investigation are malleable cast iron pipe fittings advanced in condition by operations or processes subsequent to the casting process other than with grooves, or not advanced, of cast iron other than alloy cast iron, as provided for in items 601.7000 and 610.7400 of the *Tariff Schedules of the United States Annotated (TSUSA).*

In accordance with section 733 of the Tariff Act of 1930, as amended (the Act) (19 U.S.C. 1673b), on February 5, 1987, the Department made its preliminary determination that there was reason to believe or suspect that pipe fittings from Thailand were being sold at less than fair value (52 FR 4837, February 13, 1987). On June 29, 1987, the Department made its final determination that these imports were being sold at less than fair value (52 FR 29282, July 7, 1987) and published a rate of 1.70 percent.

On August 12, 1987, in accordance with section 735(d) of the Act (19 U.S.C. 1673d(d)), the ITC notified the Department that such imports materially injure a United States industry.

On August 20, the Department published an antidumping duty order with respect to pipe fittings from Thailand (52 FR 31440) which erroneously reported a weighted-average antidumping duty margin of 2.75 percent instead of the 1.70 percent established in the final determination.

On and after the date of publication of this notice, United States Customs officers must require, at the same time as importers would normally deposit estimated duties on this merchandise, a cash deposit equal to the estimated weighted-average antidumping duty margin of 1.70 percent.

This determination constitutes an antidumping duty order with respect to pipe fittings from Thailand, pursuant to section 736 of the Act (19 U.S.C. 1673e) and 19 CFR 353.48. We have deleted from the Commerce Regulations, Annex I of 19 CFR Part 353, which listed antidumping duty findings and orders currently in effect. Instead, interested parties may contact the Central Records Unit, Room B–099, Import Administration, for copies of the updated list of orders currently in effect.

This notice is published in accordance with section 736 of the Act (19 U.S.C. 1673e) and § 353.48 of the Commerce Regulations (19 CFR 353.48).

October 1, 1987.

Joseph A. Spetrini,

Acting Deputy Assistant Secretary for Import Administration.

[FR Doc. 87–23081 Filed 10–5–87; 8:45 am]

BILLING CODE 3510–DS–M

[A–588–604]

Antidumping Duty Order; Tapered Roller Bearings and Parts Thereof, Finished and Unfinished, From Japan

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice.

SUMMARY: In separate investigations concerning tapered roller bearings and parts thereof, finished and unfinished (tapered roller bearings), from Japan, the United States Department of Commerce (the Department) and the United States International Trade Commission (the ITC) have determined that tapered roller bearings from Japan are being sold at less than fair value and that sales of tapered roller bearings from Japan are materially injuring a United States industry.

Suspension of liquidation will begin for all unliquidated entries, or warehouse withdrawals, for consumption of tapered roller bearings from Japan made on or after March 27, 1987, the date on which the Department published its preliminary determination notice in the **Federal Register.** These entries will be liable for the possible assessment of antidumping duties. Further, a cash deposit of estimated antidumping duties must be made on all such entries, and withdrawals from warehouse, for consumption on or after the date of publication of this antidumping duty order in the **Federal Register.**

EFFECTIVE DATE: October 6, 1987.

FOR FURTHER INFORMATION CONTACT: Mary S. Clapp (202) 377–1769, Office of Investigations, International Trade Administration, United States Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION: The products covered by this investigation are tapered roller bearings and parts thereof, currently classified under *Tariff Schedules of the United States* (TSUS) item numbers 680.30 and 680.39; flange, take-up cartridge, and hanger units incorporating tapered roller bearings, currently classified under TSUS item number 681.10; and tapered roller housings (except pillow blocks) incorporating tapered rollers, with or without spindles, whether or not for automotive use, and currently classified under TSUS item 692.32 or elsewhere in the TSUS. Products subject to the outstanding antidumping duty order covering certain tapered roller bearings from Japan (T.D. 76–227, 41 FR 34974) were not included within the scope of this investigation. This order does, however, include all tapered roller bearings and parts thereof, as described above, that are manufactured by NTN.

If the Department's recission of its revocation of the above cited antidumping duty order with respect to NTN is affirmed by final judicial order, this order would not apply to any bearings manufactured by NTN that would be covered by the outstanding antidumping duty order. This issue is being litigated in the Court of International Trade in *The Timken Co. v. United States,* Court No. 82–6–00890.

In accordance with section 733 of the Tariff Act of 1930, as amended (the Act) (19 U.S.C. 1673b), on March 23, 1987, the Department made its preliminary determination that there was reason to believe or suspect that tapered roller bearings from Japan were being sold at less than fair value (52 FR 9905, March 27, 1987). On August 10, 1987, the Department made its final determination that these imports were being sold at less than fair value (52 FR 30700, August 17, 1987).

On September 23, 1987, in accordance with section 735(d) of the Act (19 U.S.C. 1673d(d)), the ITC notified the Department that such imports materially injure a United States industry.

Therefore, in accordance with sections 736 and 751 of the Act (19 U.S.C. 1673e and 1675), the Department directs United States Customs officers to assess, upon further advice by the administering authority pursuant to section 736(a)(1) of the Act (19 U.S.C. 1673e(a)(1)), antidumping duties equal to the amount by which the foreign market value of the merchandise exceeds the United States price for all entries of tapered roller bearings from Japan not covered by antidumping duty order T.D.

76–227. These antidumping duties will be assessed on all unliquidated entries of tapered roller bearings entered, or withdrawn from warehouse, for consumption on or after March 27, 1987, the date on which the Department published its preliminary determination.

On and after the date of publication of this notice, United States Customs officers must require, at the same time as importers would normally deposit estimated duties on this merchandise, a cash deposit equal to the estimated weighted-average antidumping duty margins as follows:

Manufacturers/producers/exporters	Average margin percentage
Koyo Seiko Co., Ltd.	70.44
NTN Toyo Bearing Co., Ltd.	47.05
All Others	47.57

This determination constitutes an antidumping duty order with respect to tapered roller bearings from Japan, pursuant to section 736 of the Act (19 U.S.C. 1673e) and 19 CFR 353.48. We have deleted from the Commerce Regulations, Annex I of 19 CFR Part 353, which listed antidumping duty findings and orders currently in effect. Instead, interested parties may contact the Central Records Unit, Room B–099, Import Administration, for copies of the updated list of orders currently in effect.

This notice is published in accordance with section 736 of the Act (19 U.S.C. 1673e) and section 353.48 of the Commerce Regulations (19 CFR 353.48).

September 30, 1987.

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–M

Consolidated Decision on Applications for Duty-Free Entry of Scientific Instruments; U.S. Department of Commerce, NOAA, et al.

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897). Related records can be viewed between 8:30 A.M. and 5:00 P.M. in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, DC.

Docket No.: 86–280. Applicant: U.S. Department of Commerce, NOAA, La Jolla, CA 92038. Instrument: Pitch-roll Sensor, Model PIRO–120. Manufacturer: Datawell B.V., The Netherlands. Intended Use: See notice at 51 FR 29149, August 14, 1986. Reasons for this Decision: The foreign article is an accessory providing pitch and roll information into a Computer Automated Measurement and Control Center.

Docket No.: 87–011R. Applicant: VA Medical Center, Baltimore, MD 21218. Instrument: Electron Microscope, Model JEM–1200 EX/SEG.

Manufacturer: JEOL Ltd., Japan. Intended Use: See notice at 52 FR 7917, March 13, 1987. Reasons for this Decision: The foreign instrument provides a point-to-point resolution of 0.3 nanometers and an accelerating potential up to 120 kV.

Docket No.: 87–039R. Applicant: Colorado State University, Fort Collins, CO 80523. Instrument: Stopped-Flow UV-VIS Spectrophotometer, Model SF–41S/SU–40A. Manufacturer: Hi-Tech Scientific Ltd., United Kingdom. Intended Use: See notice at 52 FR 12220, April 15, 1987. Reasons for this Decision: The foreign instrument provides a temperature range of −40°C through +50°C and two cell pathlengths (2 and 10mm).

Docket No.: 87–072. Applicant: University of Colorado, Boulder, CO 80309. Instrument: Ultra-High Vacuum Freeze-Etching Unit, Model BAF 500-K. Manufacturer: Balzers Union, Liechtenstein. Intended Use: See notice at 52 FR 2126, January 20, 1987. Reasons for this Decision: The foreign article is capable of an ultimate vacuum of $5x10^{-10}$ mbar and a temperature range from ambient to −265°C.

Docket No.: 87–086. Applicant: The Pennsylvania State University, University Park, PA 16802. Instrument: Gas Isotope Ratio Mass Spectrometer, Model 251 EM with Accessories. Manufacturer: Finnigan MAT, West Germany.

Intended Use: See notice at 52 FR 5325, February 20, 1987. Reasons for this Decision: The foreign instrument provides a multi-element/multiple Faraday collector system, sample size capabity of 0.03 micro-mole and a precision of 0.002°/oo.

Docket No.: 87–089. Applicant: University of Rochester, Rochester, NY 14627. Instrument: Pulfrich Refractometer, Model PR2. Manufacturer: Jenoptik Jena GmbH, East Germany. Intended Use: See notice at 52 FR 5810, February 26, 1987. Reasons for this Decision: The foreign instrument provides a measurement sensitivity of $5x10^{-6}$ per 0.05′.

Docket No.: 87–096.Applicant: Department of the Interior, Menlo Park, CA 95025. Instrument: Borehole Tensor Strainmeter. Manufacturer: University of Queensland, Australia. Intended Use: See notice at 52 FR 7917, March 13, 1987. Reasons for this Decision: The foreign instrument is capable of strain measurements at depths to 300m and can resolve the components of plain strain at a sensitivity of 0.3 nanostrains while simultaneously providing tile at 0.3 nanoradius.

Docket No.: 87–117. Applicant: The Johns Hopkins University, Baltimore, MD 21218. Instrument: Electron Probe X-ray Microanalyzer, Model JXA–8600/3. Manufacturer: JEOL Ltd., Japan. Intended Use: See notice at 52 FR 8634, March 19, 1987. Reasons for this Decision: The foreign instrument provides the capability of x-ray analysis of material surfaces and scanning electron microscope (SEM) with a SEM spatial resolution of 6.0 nanometers.

Docket No.: 87–130. Applicant: Purdue University, West Lafayette, IN 47907. Instrument: FTI Spectrophotometer, Model DA3.26. Manufacturer: Bomem, Inc., Canada. Intended Use: See notice at 52 FR 12221, April 15, 1987. Reasons for This Decision: The foreign instrument provides an unapodized resolution of 0.002 cm^{-1}.

Docket No.: 87–167. Applicant: Miami University, Oxford, OH 45056. Instrument: Portable Ultraviolet Radiometer, Model UV 103. Manufacturer: Macam Photometrics, United Kingdom. Intended Use: See notice at 52 FR 18262, May 14, 1987. Reasons for This Decision: The foreign article can be used for measurement of ultraviolet radiation above and below water surface.

Docket No.: 87–170. Applicant: University of Chicago, Chicago, IL 60637. Instrument: FTI Spectrophotometer, Model DA2. Manufacturer: Bomem, Inc., Canada. Intended Use: See notice at 52 FR 18262, May 14, 1987. Reasons for This Decision: The foreign instrument provides an unapodized resolution of 0.013 cm^{-1}.

Docket No.: 87–172. Applicant: The Pennsylvania State University, University Park, PA 16802. Instrument: Spectroscopic Ellipsometer with Optical Multichannel Detection, Model ES2G. Manufacturer: SOPRA, France. Intended Use: See notice at 52 FR 18262, May 14, 1987. Reasons for This Decision: The foreign instrument provides an optical multi-channel analyzer for simultaneous measurement of wavelengths over the UV-visible and IR spectral range.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as each is intended to be used, is being manufactured in the United States. The capability of each of the foreign

instruments described above is pertinent to each applicant's intended purposes.

We know of no other instrument or apparatus being manufactured in the United States which is of equivalent scientific value to any of the foreign instruments.

Frank W. Creel,

Director, Statutory Import Programs Staff.

Consolidated Decision on Applications for Duty-Free Entry of Scientific Instruments; U.S. Department of Commerce, NOAA, et al.

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897). Related records can be viewed between 8:30 A.M. and 5:00 P.M. in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, DC.

Docket No.: 85-274R. Applicant: National Oceanic and Atmospheric Administration, Miami, FL 33149. Instrument: Mass Spectrometer System, Model MS 80 with Accessories. Manufacturer: Kratos Analytical, United Kingdom. Intended Use: See notice at 50 FR 36128, September 5, 1985. Reasons for This Decision: The foreign instrument provides (1) scan speeds to 0.1 second per decade, (2) metastable ion acquisition and processing and (3) chromatograph-driving software. Advice Submitted by: National Institutes of Health, June 4, 1987.

Docket No.: 86-135R. Applicant: Rutgers University, Piscataway, NJ 08854. Instrument: GC/Mass Spectrometer/Data System, Model 8230C. Manufacturer: Finnigan Corporation, West Germany. Intended Use: See notice at 51 FR 9500, March 19, 1986. Reasons for This Decision: The foreign instrument provides (1) resolution to 50,000, (2) rapid switching to positive/negative ion mode, (3) linked scanning to monitor neutral ion loss and (4) FAB and HPLC ion sources. Advice Submitted by: National Institutes of Health, June 4, 1987.

Docket No.: 86-251. Applicant: North Carolina State University, Raleigh, NC 27695. Instrument: Optical Furnace. Manufacturer: Leisk Engineering Ltd., United Kingdom. Intended Use: See notice at 51 FR 33282, September 19, 1986. Reasons for This Decision: The foreign article permits the use of highly toxic and volatile materials at elevated temperatures (1400°C). Advice Submitted by: Naval Research Laboratory, January 30, 1987.

Docket No.: 86-319R. Applicant: Yale University School of Medicine, New Haven, CT 06510. Instrument: Inverted Microscope with Attachments. Manufacturer: Zeiss Optical, West Germany. Intended Use: See notice at 51 FR 36738, October 15, 1986. Reasons for This Decision: The foreign instrument provides differential interference contrast optics and minimal electrical interference. Advice Submitted by: National Institutes of Health, June 4, 1987.

Docket No.: 87-073. Applicant: University of Alabama at Birmingham, Birmingham, AL 35294. Instrument: Motorized In Vitro Perfusion System. Manufacturer: Luigs & Neumann, West Germany. Intended Use: See notice at 52 FR 2126, January 20, 1987. Reasons for This Decision: The foreign instrument provides motorized advancement of four independent concentric pipettes for resistance and intracellular electrical measurements. Advice Submitted by: National Institutes of Health, May 8, 1987.

Docket No.: 87-076. Applicant: Boston University, Boston, MA 02215. Instrument: Three-Dimensional Digitizing System, Model WATSMART. Manufacturer: Northern Digital, Inc., Canada. Intended Use: See 52 FR 2250, January 21, 1987. Reasons for This Decision: The foreign instrument provides 3-dimensional digital recordings for motion analysis with a sampling rate up to 8000 markers per second per camera. Advice Submitted by: National Institutes of Health, May 8, 1987.

Docket No.: 87-090. Applicant: California State University, Long Beach, CA 90840. Instrument: Inductively Coupled Plasma/Mass Spectrometer, Model PlasmaQuad. Manufacturer: VG Isotopes Ltd., United Kingdom. Intended Use: See 52 FR 5810, February 26, 1987. Reasons for This Decision: The foreign instrument provides a detection limit to 0.1 nanogram per milliliter and an isotope ratio precision of 0.5 percent for silver. Advice Submitted by: National Institutes of Health, June 4, 1987.

Docket No.: 87-100. Applicant: Thomas Jefferson University, Philadelphia, PA 19107. Instrument: Genetic Analyzer, Model Cytoscan 110. Manufacturer: Shandon Southern Products, United Kingdom. Intended Use: See notice at 52 FR 7918, March 13, 1987. Reasons for This Decision: The foreign instrument can search microscopic slides to identify chromosomal metaphase and stores this information for electronic analysis. Advice Submitted by: National Institutes of Health, June 4, 1987.

Docket No.: 87-106. Applicant: Woods Hole Oceanographic Institution, Woods Hole, MA 02543. Instrument: Deep-Towed Pressure Compensated Boomer Seismic System. Manufacturer: Huntec 70 Ltd., Canada. Intended Use: See notice at 52 FR 7917, March 13, 1987. Reasons for This Decision: The foreign instrument provides (1) an acoustic projector with a pressure compensated boomer to produce an output pulse with a broad frequency bandwith (1400 to 5200 hertz between −3dB points) and (2) deep towing capability. Advice Submitted by: National Oceanic and Atmospheric Administration, June 23, 1987.

Docket No.: 87-107. Applicant: Goucher College, Towson, MD 21204. Instrument: Circular Dichroism Spectropolarimeter, Model J-600A with Accessories. Manufacturer: JASCO International Co. Ltd., Japan. Intended Use: See notice at 52 FR 7917. Reasons for This Decision: The foreign instrument provides rapid kinetics capabilities with circular dichroism measurements using a stopped-flow attachment. Advice Submitted by: National Institutes of Health, June 4, 1987.

Docket No.: 87-111. Applicant: University of Houston, Houston, TX 77004. Instrument: Mass Spectrometer System, Model 70SQ/11-250J. Manufacturer: VG Instruments Inc., United Kingdom. Intended Use: See notice at 52 FR 8495, March 18, 1987. Reasons for this decision: The foreign instrument provides (1) resolution to 40,000, (2) mass range to 4000 at 4kV, (3) tandem (MS/MS) operation and (4) FAB and HPLC ion sources. Advice Submitted by: National Institutes of Health, June 4, 1987.

Docket No.: 87-152. Applicant: University of Alaska, Fairbanks, AK 99775-0800. Instrument: Magnetic Susceptibility/Temperature System, Model M.S.2. Manufacturer: Bartington Instruments, United Kingdom. Intended Use: See notice at 52 FR 15527, April 29, 1987. Reasons For This Decision: The foreign instrument provides the capability of measuring magnetic susceptibility over a temperature range of −200 °C to +900 °C. Advice Submitted by: National Bureau of Standards, May 27, 1987.

Docket No.: 87-161. Applicant: Good Samaritan Hospital and Medical Center, Portland, OR 97209. Instrument: Micromanipulator, Model PM20H. Manufacturer: Biomedizinische Instrumente, West Germany. Intended Use: See notice at 52 FR 15528, April 29, 1987. Reasons For This Decision: The foreign instrument provides

piezoelectric step velocities greater than 4.0 micrometers per millisecond, lateral stabilization, and direct mounting on a microscope. Advice Submitted by: National Institutes of Health, July 9, 1987.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as each is intended to be used, is being manufactured in the United States. The National Institutes of Health, National Bureau of Standards, National Oceanic and Atmospheric Administration, and Naval Research Laboratory advise that (1) the capabilities of each of the foreign instruments described above are pertinent to each applicant's intended purpose and (2) they know of no domestic instrument or apparatus of equivalent scientific value for the intended use of each instrument.

We know of no other instrument or apparatus being manufactured in the United States which is of equivalent scientific value to any of the foreign instruments.

Frank W. Creel,

Director, Statutory Import Programs Staff.

Consolidated Decision on Applications for Duty-Free Entry of Scientific Instruments; U.S. Department of Energy, et al.

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 A.M. and 5:00 P.M. in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, DC.

Docket No.: 87-133. Applicant: U.S. Department of Energy, Argonne, IL 60439. Instrument: Oscilloscope, Model #7250. Manufacturer: Intertecnique, France. Intended Use: See notice at 52 FR 12221, April 15, 1987. Reasons for this Decision: The foreign instrument can digitize and display transient waveforms with a risetime down to 50 picoseconds. Advice Submitted By: National Institutes of Health, June 25, 1987. Instrument Ordered: January 9, 1987.

Docket No.: 86-297R. Applicant: Northwestern University, Evanston, IL 60201. Instrument: Circular Dichroism Spectropolarimeter, Model J-600. Manufacturer: Jasco, Japan. Intended Use: See notice at 51 FR 29954, August 21, 1986. Reasons for this Decision: The foreign instrument provides a wavelength scanning range to 1000 nanometers. Advice Submitted by: National Institutes of Health, May 8, 1987. Instrument Ordered: June 18, 1986.

Docket No.: 86-312R. Applicant: Harbor Branch Foundation, Inc., Fort Pierce, FL 33450. Instrument: Remotely Operated Vehicle System, HYSUB-40. Manufacturer: I.S.E. Gulf Inc., Canada. Intended Use: See notice at 51 FR 34679, September 30, 1986. Reasons for this Decision: The foreign instrument employs fiber-optic telemetry to provide high quality video signals (300 lines resolution; 35 lux sensitivity; 41 dB signal/noise ratio; and 525/60 H_z scan), and to handle several cameras simultaneously. Advice Submitted by: National Oceanic and Atmospheric Administration. Instrument Ordered: May 2, 1986.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as each is intended to be used, was being manufactured in the United States at the time the instrument was ordered.

Reasons: The National Oceanic and Atmospheric Administration and National Institutes of Health advises that (1) the capabilities of each of the foreign instruments described above are pertinent to each applicant's intended purpose and (2) they know of no domestic instrument or apparatus of equivalent scientific value to any of the foreign instruments for the applicant's intended use being manufactured at the time the foreign instrument was ordered.

We know of no other domestic instrument or apparatus of equivalent scientific value to the any of the foreign instruments being manufactured at the time it was ordered.

BILLING CODE 3510-DS-M

Decision on Application for Duty-Free Entry of Scientific Instrument; Midwest Stone Institute

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 AM and 5:00 PM in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, DC.

Docket No.: 85-281R. Applicant: Midwest Stone Institute, St. Louis, MO 63110. Instrument: Extracorporeal Shock Wave Lithotripter (ESWL). Manufacturer: Dornier System GmbH, West Germany. Intended Use: See notice at 52 FR 27040, July 17, 1987.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States.

Reasons: There is no domestic manufacturer of lithotripters or of comparable devices capable of noninvasively pulverizing kidney stones.

Our consultants in the National Institutes of Health have advised us with respect to this application that there are no known domestic instruments now available which are equivalent to the Dornier ESWL.

We know of no equivalent instrument that is being manufactured in the United States which is of equivalent scientific value to the foreign instrument for the purposes for which the instrument is intended to be used. (See also 52 FR 22512, June 12, 1987.)

Frank W. Creel,

Director, Statutory Import Programs Staff.

BILLING CODE 3510-DS-M

Consolidated Decision on Applications for Duty-Free Entry of Scientific Articles; Shadyside Hospital, et al.

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 AM and 5:00 PM in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, DC.

Decision: Denied. Applicants have failed to establish that domestic instruments of equivalent scientific value to the foreign instruments for the intended purposes are not available.

Reasons: Section 301.5(e) (4) of the regulations requires the denial of applications that have been denied without prejudice to resubmission if they are not resubmitted within the specified time period. This is the case for each of the listed dockets.

Docket No.: 87-022. Applicant: Shadyside Hospital, Pittsburgh, PA 15232. Instrument: Electron Microscope, Model CM 10 with Accessories. Manufacturer: N.V. Philips, The Netherlands. Denial Without Prejudice to Resubmission: February 5, 1987.

VOL 52 ISS 193 OCT 6 1987 UMI

Docket No.: 87–078. Applicant: National Oceanic & Atmospheric Administration, Boulder, CO 80303. Instrument: Ionosonde-Digital Unit, Model DBD–43. Manufacturer: KEL Aerospace, Australia. Denial Without Prejudice to Resubmission: February 20, 1987.

Docket No.: 87–006. Applicant: St. Jude Children's Research Hospital, Memphis, TN 38101. Instrument: Stopped-flow Apparatus. Manufacturer: Hi-Tech Scientific Limited, United Kingdom. Denial Without Prejudice to Resubmission: May 5, 1987.

Docket No.: 87–014. Applicant: University of Hawaii, Honolulu, HI 96822. Instrument: Rapid Kinetics Accessory for Spectrophotometers, Model SFA–11. Manufacturer: Hi-Tech Ltd., United Kingdom. Denial Without Prejudice to Resubmission: May 5, 1987.

Docket No.: 87–024. Applicant: Albion College, Albion, MI 49224. Instrument: Rapid Kinetics Accessory of UV/Vis Spectrophotometers, Model SFA–11. Manufacturer: Hi-Tech Scientific Limited, United Kingdom. Denial Without Prejudice to Resubmission: May 5, 1987.

Docket No.: 87–055. Applicant: Bates College, Lewiston, ME 04240. Instrument: Rapid Kinetics Accessory of UV/Vis Spectrophotometers, Model SFA–11. Manufacturer: Hi-Tech Scientific Limited, United Kingdom. Denial Without Prejudice to Resubmission: May 5, 1987.

Frank W. Creel,

Statutory Import Programs Staff.

[FR Doc. 87–23087 Filed 10–5–87; 8:45 am]

BILLING CODE 3510–DS–M

Applications for Duty-Free Entry of Scientific Instruments; Shriners Hospital for Crippled Children, et al.

Pursuant to section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89–651; 80 Stat. 897; 15 CFR Part 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with § 301.5(a) (3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, DC 20230. Applications may be examined between 8:30 A.M. and 5:00 P.M. in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, DC.

Docket No.: 87–248. Applicant: Shriners Hospital for Crippled Children, Shriners Burn Institue, Boston Unit, 51 Blossom Street, Boston, MA 02114. Instrument: Mass Spectrometer, SIRA 10. Manufacturer: VG Isogas, United Kingdom. Intended Use: The article will be used to further: (1) Studies of energy substrate, especially glucose and fatty acid metabolism to elucidate the responses of the metabolism of these substrates to burn injury in animals and human patients; (2) studies of nitrogen and amino acid metabolism in healthy adults and in burn patients; (3) methods for measuring the turnover of skin protein, collagen, and factors that modulate collagen turnover. Application Received by Commissioner of Customs: July 9, 1987.

Docket No.: 87–278. Applicant: George Mason University, Purchasing Office, 4400 University Drive, Fairfax, VA 22030. Instrument: Rapid Kinetics Accessory for UV/Vis Specrophotometer, Model SFA–11. Manufacturer: Hi-Tech Scientific, United Kingdom. Intended Use: The instrument is an accessory for existing uv-visible spectrophotometers used in undergraduate chemistry instructional laboratory classes, Chem 445, Inorganic Preparations and Techniques; Chem 463–464, Biochemistry Laboratory; Chem 336–337, Physical Chemistry Laboratory; Chem 451–452, Undergraduate Research. The instrument will be used for the rapid mixing of solutions in a spectrophotometric cell, so that the progress of rapid reactions can be monitored, particularly when used in conjunction with a diode-array spectrophotometer. Application Received by Commissioner of Customs: August 26, 1987.

Docket No.: 87–279. Applicant: University of Washington, Nuclear Physics Laboratory, Seattle, WA 98195. Instrument: Emittance Monitor. Manufacturer: Danfysik A/S, Denmark. Intended Use: The instrument will be used to measure the emittance of the beams of particles accelerated by the University's accelerator. Knowledge of the emittance will aid in troubleshooting the accelerator and ascertaining that the beam quality meets specifications for use in nuclear experiments. Application Received by Commissioner of Customs: September 8, 1987.

Docket No.: 87–280. Applicant: The Regents of the University of California, Material Management Department, Riverside, CA 92521. Instrument: Electron Microscope, Model EM 10CA/CR/C. Manufacturer: Carl Zeiss, West Germany. Intended Use: The instrument will be used in the following research programs:

A. Proteins involved in force transmission at cell membranes.

B. Use of thin protein sections in studies of crustacean and mammalian reproductive biology.

C. Post-translational modification, storage and secretion of prolactin.

D. Cellular interactions influencing B cell differentiation.

E. Localization of T cell adhesion proteins by immunoelectron microscopy.

F. Controls of protein synthesis in early development.

G. Excitation-contraction coupling in the heart.

Application Received by Commissioner of Customs: September 4, 1987.

Docket No.: 87–281. Applicant: University of Pennsylvania, Biochemistry/Biophysics Department, D501 Richards Building/6089, Philadelphia, PA 19104. Instrument: Room Temperature Bore Cargo Magnet System. Manufacturer: Magnex Scientific, Ltd., United Kingdom. Intended Use: The instrument will be used for investigations of animal models to evaluate the effect of various strengths of magnetic field, 0.5 T, 1 T, 2 T, 3 T, 4 T and 5 T on metabolic and behavioral changes. The objective of this research is to investigate the effect of high magnetic fields on intact living systems. In addition, the instrument will be used in the course Biophysics 601 to explain the theory and use of magnet systems and electromagnetic effects. Application Received by Commissioner of Customs: September 8, 1987.

Docket No.: 87–282. Applicant: Michigan State University, Crop and Soil Sciences Department, 540–B Plant and Soil Science Building, East Lansing, MI 48824–1325. Instrument: CN Analyzer-Isotope Ratio Mass Spectrometer, TRACERMASS. Manufacturer: Europa Scientific Ltd., United Kingdom. Intended Use: The instrument will be used to service the stable isotope analysis requirements of studies in the pathways, mechanisms and kinetics of carbon and nitrogen transformations in various biological systems (14 and 15N and 12 and 13). Application Received by Commission of Customs: September 8, 1987.

Docket No.: 87–284. Applicant: Naval Hospital San Diego, Park Boulevard, San Diego, CA 92134–5000. Instrument: Electron Microscope with Integrated Imaging Spectrometer CEM 902. Manufacturer: Carl Zeiss, West Germany. Intended Use: The instrument is intended to be used for the advanced high magnification ultrastructural studies and elemental analysis of biological tissues. The primary mission

is to support medical research on primarily non-human tissues. Application Received by Commissioner of Customs: September 8, 1987.

Docket No.: 87–285. Applicant: St. Joseph's Hospital, 3301 W. Buffalo Ave., Tampa, FL 33607. Instrument: Electron Microscope, H–300. Manufacturer: Hitachi Scientific Instruments, Japan. Intended Use: The instrument will be used for the study of the abnormality of cellular structure. Tumor cells will be investigated for cancer classification and interpretation of pathological tissue diagnosis. In addition, the instrument will be used as a training tool for medical students in their pathology residency and also for surgical diagnosis. Application Received by Commissioner of Customs: September 8, 1987.

Docket No.: 87–286 Applicant: Georgia Institute of Technology, School of Civil Engineering, Atlanta, GA 30332. Instrument: GDS Stress Path Triaxial Testing System. Manufacturer: GDS Instruments, Inc., United Kingdom. Intended Use: Studies of soil, crushed stone aggregates, asphalt concrete and gravels to determine the effect of different stress paths (i.e., combinations of axial and lateral pressure during the test) on the physical properties of a wide variety of soils and aggregates. The instrument will also be used in the course CE (Civil Engineering) 6172, Soil Testing to give graduate level students a firm understanding of the state-of-the-art methods for determining physical properties of soils. Application Received by Commissioner of Customs: September 8, 1987.

Docket No.: 87–288. Applicant: University of Alabama at Birmingham, University Station, Birmingham, AL 35294. Instrument: Nuclear Magnetic Resonance Spectrometer System, Biospec 4.2/400. Manufacturer: Bruker, West Germany. Intended Use: Studies of the living heart in both a clinical and experimental environment to obtain more noninvasive and nondestructive information on cardiovascular disease processes. The primary experiments will involve NMR multi-nuclear spectroscopy studies of cardiac metabolism in acute and chronic stages of cardiovascular diseases. Application Received by Commissioner of Customs: September 8, 1987.

Docket No.: 87–290. Applicant: Rutgers University, Procurement and Contracting, P.O. Box 1089, Piscataway, NJ 08854. Instrument: Dilution Refrigerator. Manufacturer: Oxford Instruments, United Kingdom. Intended Use: The instrument will be used in the research project Experimental Study of Quantum Chaos and Magnetic Solidification in a 2-dimensional Electron System which involves studies of microwave liberation of electrons bound to the liquid helium surface and studies of the magnetically induced Wigner transition in a 2–D electron system. Application Received by Commissioner of Customs: September 8, 1987.

BILLING CODE 3510–DS–M

Consolidated Decision on Applications for Duty-Free Entry of Scientific Instruments; The University of Oklahoma, et al.

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 A.M. and 5:00 P.M. in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, DC.

Docket No.: 87–010R. Applicant: The University of Oklahoma, Norman, OK 73019. Instrument: Mass Spectrometer, Model Delta E. Manufacturer: Finnigan MAT, West Germany. Intended Use: See notice at 52 FR 10395, April 1, 1987. Reasons for this Decision: The foreign instrument provides guaranteed internal precision of 0.01% for 10.0 microliter samples (STP) of carbon dioxide. Advice Submitted By: National Bureau of Standards, May 6, 1987.

Docket No.: 87–053. Applicant: University of Pennsylvania, Philadelphia, PA 19104. Instrument: 3-Dimensional Hydraulic Micromanipulator, Model MO–103M–R. Manufacturer: Narishige Scientific Instrument Laboratory, Japan. Intended Use: See notice at 51 FR 45792, December 22, 1986. Reason for this Decision: The foreign instrument provides precise and smooth movements in increments of 2.0 micrometers on any of three axes with a singly controlled variable-ratio hydraulic mechanism. Advice Submitted By: National Institutes of Health, April 9, 1987.

Docket No.: 87–063. Applicant: University of California, Berkeley, CA 94720. Instrument: Filter Photometer (Dual Wavelength), Model ZFP–22. Manufacturer: Sigma Instrumente, West Germany. Intended Use: See notice at 52 FR 1648, January 15, 1987. Reasons for this Decision: The foreign instrument provides different wavelength filtering capabilities at 336 and 405 nanometers. Advice Submitted By: National Institutes of Health, April 23, 1987.

Docket No.: 87–065. Applicant: University of California, Berkeley, CA 94720. Instrument: Cell Analyzer, Model DMIPS. Manufacturer: British Columbia Cancer Research Institute, Canada. Intended Use: See notice at 52 FR 1648, January 15, 1987. Reasons for this Decision: The foreign instrument provides periodic measurements of living cell characteristics in a prescribed region of a culture with a resolution of 1.0 micrometer and a scan rate of 1.0 square centimeter per minute. Advice Submitted By: National Institutes of Health, April 23, 1987.

Docket No.: 87–081. Applicant: University of Florida, Gainesville, FL 32611. Instrument: Precision Isotope Ratio Mass Spectrometer, Model PRISM. Manufacturer: VG Isogas Ltd., United Kingdom. Intended Use: See notice at 52 FR 4164, February 10, 1987. Reasons for this Decision: The foreign instrument can automatically treat small (milligram) samples of carbonate for direct introduction of carbon dioxide to the spectrometer inlet. Advice Submitted By: National Bureau of Standards, March 17, 1987.

Docket No.: 87–084. Applicant: University of Hawaii, Kaneohe, HI 96744. Instrument: Ultrasonic Transmitters for Monitoring Animal Movements, Model V3P–XX. Manufacturer: VEMCO, Canada. Intended Use: See notice at 52 FR 4164, February 10, 1987. Reasons for this Decision: The foreign instrument provides underwater acoustic telemetry of movement patterns from sensors attached to research animals. Advice Submitted By: National Oceanic and Atmospheric Administration, March 30, 1987.

Docket No.: 87–087. Applicant: The Pennsylvania State University, University Park, PA 16802. Instrument: Materials Preparation System for Top Seeded Flux Growth, Model MCGS3. Manufacturer: Crystalox Ltd., United Kingdom. Intended Use: See notice at 52 FR 5326, February 20, 1987. Reasons for this Decision: The foreign instrument provides an angular resolution of 10 000 steps per resolution for precise translation of crystal seed and slow growth rates. Advice Submitted By: Naval Research Laboratory, March 26, 1987.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as each is

BEST COPY AVAILABLE

intended to be used, is being manufactured in the United States. The National Institutes of Health, National Oceanic and Atmospheric Administration, National Research Laboratory and National Bureau of Standards advise that (1) the capabilities of each of the foreign instruments described above are pertinent to each applicant's intended purpose and (2) they know of no domestic instrument or apparatus of equivalent scientific value for the intended use of each instrument.

We know of no other instrument or apparatus being manufactured in the United States which is of equivalent scientific value to any of the foreign instruments.

Frank W. Creel,

Director, Statutory Import Programs Staff.

BILLING CODE 3510-DS-M

Consolidated Decision on Applications for Duty-Free Entry of Scientific Instruments; Wright State University, et al.

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub L. 89-651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 A.M. and 5:00 P.M. in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, DC.

Docket No.: 87-185. Applicant: Wright State University, Dayton, OH 45435. Instrument: Toroidal electrostatic analyzer. Manufacturer: High Voltage Engineering, the Netherlands. Intended Use: See Notice at 52 FR 27040, July 17, 1987. Reasons for this Decision: The foreign article provides for simultaneous detection of energy and angular distribution over a 30° angle in the energy range between 50 and 350 keV

Docket No.: 87-186. Applicant: Virginia Polytechnic and State University, Blacksburg, VA 24061 Instrument: Surface analysis System for X-ray Photoelectron Spectroscopy, Model LHS-12. Manufacturer: Leybold-Heraeus Vacuum Products, West Germany. Intended Use: See notice at 52 FR 27040, July 17, 1987. Reasons for this Decision: The foreign article provides a high pressure reactor for treating samples up to a pressure of 10 bar and a hot/cold sample probe with a temperature range from −196° C to 800°C.

Docket No.: 87-187. Applicant: University of Tennessee, Knoxville, TN 37996-1410. Instrument: Electron Microprobe. Manufacturer: Cameca Instruments Inc., France. Intended Use: See notice at 52 FR 27041, July 17, 1987. Reasons for this Decision: The foreign instrument is capable of simultaneous analysis of EDS and WOS signals and permits real time display of a spectral acquisition.

Docket No.: 87-189. Applicant: Washington State University, Pullman, WA 99164-4630. Instrument: High Pressure Stopped Flow Spectrometer. Manufacturer: Hi-Tech Scientific Ltd., United Kingdom. Intended Use: See notice at 52 FR 27041, July 17, 1987. Reasons for this Decision: The foreign article provides a rapid mixing time and operation to 2000 atmospheres.

Docket No.: 87-190. Applicant: University of Montana, Missoula, MT 59812. Instrument: Magnetic Susceptibility Meter System, Model M.S.2. Manufacturer: Bartington Instruments, United Kingdom. Intended Use: See notice at 52 FR 27041, July 17, 1987. Reasons for this Decision: The foreign article is capable of providing susceptibility measurements over a temperature range −200°C to +900°C.

Docket No.: 87-196. Applicant: University of California, Santa Barbara, CA 93106. Instrument: FTI Spectrometer, Model DA3. Manufacturer: Bomem, Canada. Intended Use: See notice at 52 FR 27038, July 17, 1987. Reasons for this Decision: The foreign article provides an unapodized resolution of 0.013cm^{-1}.

Docket No.: 87-203. Applicant: Indiana University, Bloomington, IN 47042. Instrument: Surface Analysis System, Model LHS-12. Manufacturer: Leybold-Heraeus, West Germany. Intended Use: See notice at 52 FR 27039, July 17, 1987. Reasons for this Decision: The foreign article provides combined UHV surface analytical chambers with a microreactor capable of a high pressure (>20 bar) for rapid transient measurements while maintaining constant sample temperature between −170°C to 1400°C.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as each is intended to be used, is being manufactured in the United States. The capability of each of the foreign instruments described above is pertinent to each applicant's intended purposes.

BILLING CODE 3510-DS-M

Minority Business Development Agency

Minority Business Development Center Program Applications; New York

AGENCY: Minority Business Development Agency, Commerce.

ACTION: Notice.

SUMMARY: The Minority Business Development Agency (MBDA) announces that it is soliciting competitive applications under its Minority Business Development Center (MBDC) Program to operate a MBDC for a three (3) year period, subject to available funds. The cost of performance for the first *twelve* months is estimated at *$260,000* for the project performance of *February 1, 1988 to January 31, 1989*. The MBDC will operate in the *New York City (Manhattan)* Standard Metropolitan Statistical Area (SMSA). The first year cost for the MBDC will consist of *$260,000* in Federal funds and a minimum of *$45,882* in Non-Federal funds (which can be a combination of cash, in-kind contribution and fees for services).

The funding instrument for the MBDC will be a cooperative agreement and competition is open to individuals, non-profit and for-profit organizations, local and state governments, American Indian tribes and educational institutions.

The MBDC will provide management and technical assistance to eligible clients for the establishment and operation of businesses. The MBDC program is designed to assist those minority businesses that have the highest potential for success. In order to accomplish this, MBDA supports MBDC programs that can: Coordinate and broker public and private sector resources on behalf of minority individuals and firms; offer them a full range of management and technical assistance; and serve as a conduit of information and assistance regarding minority business.

Applications will be judged on the experience and capability of the firm and its staff in addressing the needs of minority business individuals and organizations; the resources available to the firm in providing management and technical assistance; the firm's proposed approach to performing the work requirements included in the application; and the firm's estimated cost for providing such assistance. It is advisable that applicants have an existing office in the geographic region for which they are applying.

The MBDC will operate for a three (3) year period with periodic reviews culminating in annual evaluations to determine if funding for the project should continue. Continued funding will be at the discretion of MBDA based on such factors as an MBDC's satisfactory performance, the availability of funds, and Agency priorities.

CLOSING DATE: The closing date for applications is *November 6, 1987.* Applications must be postmarked on or before *November 6, 1987.*

ADDRESS: New York Regional Office, Minority Business Development Agency, Jacob K. Javits Federal Building, Room 3720, New York, New York 10278, (212) 264–3262.

FOR FURTHER INFORMATION CONTACT: Gina A. Sanchez, Regional Director, New York Regional Office at (212) 264–3262.

SUPPLEMENTARY INFORMATION: Questions concerning the preceding information copies of application kits and applicable regulations can be obtained at the above address.

Date: September 30, 1987.

Gina A. Snachez,

Regional Director, New York Regional Office.

BILLING CODE 3510–21–M

National Oceanic and Atmospheric Administration

Marine Mammals; Withdrawal of Permit Application; National Marine Fisheries Service, Southeast Fisheries Center (P77#30)

On August 17, 1987, notice was published in the **Federal Register** (52 FR 30710) that a permit application had been received from the Southeast Fisheries Center, National Marine Fisheries Service, 75 Virginia Beach Drive, Miami, Florida 33149–1099 for a Permit to take loggerhead sea turtles (*Caretta caretta*).

Notice is hereby given that this permit application was withdrawn, and the withdrawal request has been acknowledged and accepted.

Documents submitted in connection with the above permit application are available for review by interested persons in the following offices: Office of Protected Resources and Habitat Programs, National Marine Fisheries Service, Room 805, 1825 Connecticut Avenue, NW., Washington, DC; and Director, Southeast Region, National Marine Fisheries Service, 9450 Koger Boulevard, St. Petersburg, Florida 33702.

Date: October 1, 1987.

Dr. Nancy Foster,

Director, Office of Protected Resources and Habitat Programs, National Marine Fisheries Service.

BILLING CODE 3510–22–M

Marine Mammals; Receipt of Modification Request; Gerald G. Joyce (P385)

Notice is hereby given that Mr. Gerald G. Joyce, 826 NE. 80th Street, Seattle, Washington, 98115 requested a modification of Permit No. 570 issued on November 14, 1986 (51 FR 42127), under the authority of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407) and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

Permit No. 570 authorized harassment up to 100 minke whales (*Balaenoptera acutorostrata*) while attempting to tag up to 20 in Antarctic waters.

The Modification requests an additional 200 minke whales to be harrassed while attempting to radio tag up to 20 in Antarctic waters; and to extend the Permit until March 1988. Data will be collected on minke whale behavior in the Antarctic during the 1987/88 IWC/IDCR Southern Hemisphere minke whale assessment cruise.

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this modification request should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, DC 20235, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular request would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator of Fisheries.

All statements and opinions contained in this request are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review by interested persons in the following offices:

Office of Protected Resources and Habitat Programs, National Marine Fisheries Service, 1825 Connecticut Avenue, NW., Room 805, Washington, DC;

Director, Northwest Region, National Marine Fisheries Service, 7600 Sand Point Way NE., BIN C15700, Seattle, Washington 98115.

Dated: September 30, 1987.

Dr. Nancy Foster,

Director, Office of Protected Resources and Habitat Programs, National Marine Fisheries Service.

BILLING CODE 3510–22–M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjustment of Import Limits for Certain Wool and Man-Made Fiber Textile Products Produced or Manufactured in People's Republic of China

September 30, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on October 7, 1987. For further information contact Diana Solkoff, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port or call (202) 566–6828. For information on embargoes and quota re-openings, please call (202) 377–3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to increase the previously established restraint limits for wool and man-made fiber textile products in Categories 434 and 645/646, produced or manufactured in the People's Republic of China and exported during 1987. As a result, the limits for Categories 434 and 645/646, which are currently filled, will re-open.

Background

A CITA directive dated December 23, 1986 (51 FR 47041) established import restraint limits for certain cotton, wool and man-made fiber textile products, including Categories 434 and 645/646, produced or manufactured in the People's Republic of China and exported during the twelve-month period which

began on January 1, 1987 and extends through December 31, 1987.

Under terms of the bilateral textile agreement of August 19, 1983, as amended, and at the request of the Government of the People's Republic of China, the limits for Categories 434 and 645/646 are being increased by application of swing. An adjustment was made in a previous directive in Categories 331 and 659–S to account for swing.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the *Tariff Schedules of the United States Annotated (1987).*

Adoption by the United States of the Harmonized Commonity Code (HCC) may result in some changes in the categorization of textile products covered by this notice. Notice of any necessary adjustments to the limits affected by adoption of the HCC will be published in the **Federal Register.**

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

September 30, 1987.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive of December 23, 1986 concerning imports into the United States of certain cotton, wool and man-made fiber textile products, produced or manufactured in the People's Republic of China and exported during the twelve-month period which began on January 1, 1987 and extends through December 31, 1987.

Effective on October 7, 1987, the directive of December 23, 1986 is amended to include adjustments to the previously established restraint limits for the following categories, as provided under the terms of the bilateral agreement of August 19, 1983, as amended: [1]

Category	Adjusted 12-mo. limit [1]
434	12,532 dozen.
645/646	710,253 dozen.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1986.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

Federal Acquisition Regulation (FAR); Information Collection Under OMB Review

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice.

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection concerning Economic Purchase Quantities—Supplies.

ADDRESS: Send comments to Mr. Ed Springer, FAR Desk Officer, Room 3235, NEOB, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Mr. Frank Van Lierde, Office of Federal Acquisition and Regulatory Policy (202) 523–3781, or Mr. Owen Green, Defense Acquisition Regulatory Council, (703) 697–7268.

SUPPLEMENTARY INFORMATION:

a. Purpose

The provision at 52.207–4, Economic Purchase Quantities—Supplies, invites offerors to state an opinion on whether the quantity of supplies on which bids, proposals, or quotes are requested in solicitations is economically advantageous to the Government. Each offeror who believes that acquisitions in different quantities would be more advantageous is invited to (a) recommend an economic purchase quantity, showing a recommended unit and total price, and (b) identify the different quantity points where significant price breaks occur. This information is required by Pub. L. 98–577 and Pub. L. 98–525.

b. Annual Reporting Burden

The annual reporting burden is estimated as follows: Respondents, *2,252;* responses per respondent, *35;* total annual responses *78,820;* hours per response, *.83;* and total burden hours, *65,421.*

OBTAINING COPIES OF PROPOSALS: Requesters may obtain copies from General Services Administration, FAR Secretariat (VRS), Room 4041, Washington, DC 20405, telephone (202) 523–4755. Please cite OMB Control No. 9000–0082, Economic Purchase Quantity—Supplies.

Dated: September 24, 1987.

Margaret A. Willis,

FAR Secretariat.

BILLING CODE 6820–61–M

DEPARTMENT OF ENERGY

Bonneville Power Administration

Availability of the Bonneville Acquisition Guide (BAG)

AGENCY: Bonneville Power Administration (BPA), DOE.

ACTION: Notice of document availability.

SUMMARY: Copies of the BAG which establishes the procedures BPA uses in the solicitation, award, and administration of procurement contracts, and the Bonneville Power Assistance Instructions (BPAI) which establishes the procedures BPA uses in the solicitation, award, and administration of financial assistance instruments (principally grants and cooperative agreements) are available from BPA for $20 and $10 each, respectively. The 1987 edition of the BAG will be available October 15, 1987.

ADDRESSES: Copies of the BAG or BPAI may be obtained by sending a check for the proper amount to the General Accounting Section—DTKC, Bonneville Power Administration, P.O. Box 3621, Portland, Oregon 97208.

FOR FURTHER INFORMATION CONTACT: Norman L. Linscott, Contracts Manager, at (503) 230–4513.

SUPPLEMENTARY INFORMATION: BPA was established in 1937 as a Federal Power

VOL
52
ISS
193
OC
6
1987
UMI

Marketing Agency in the Pacific Northwest. BPA is a nonappropriated fund entity which finances its operations from power revenues. Its procurement operations are conducted under 16 U.S.C. 832 et seq. as well as 16 U.S.C. 474(d)(20). Pursuant to these special authorities, the BAG is promulgated as a statement of procurement policy and as a body of interpretative regulations governing the conduct of BPA procurement activities. It follows the format of the Federal Acquisition Regulations to assist offerors in locating pertinent policies. BPA's financial assistance operations are conducted under 16 U.S.C. 832 et seq. as well as 16 U.S.C. 839 et seq. The BPAI utilizes the special authorities referred to in the preceding sentence as a basis for establishing BPA's financial assistance policy. The BPAI also contains BPA's implementation of the principles provided in the following OMB circulars:

A–21 Cost principles applicable to grants, contracts, and other agreements with institutions of higher education.

A–87 Cost principles applicable to grants, contracts, and other agreements with State and local Governments.

A–102 Uniform administrative requirements for grants in aid to State and local governments.

A–110 Grants and agreements with institutions of higher education, hospitals, and other nonprofit organizations.

A–122 Cost principles applicable to grants, contracts, and other agreements with nonprofit organizations.

A–128 Audits of State and local governments.

All BPA solicitations include notice of applicability and availability of the BAG and the BPAI as appropriate for the information of offerors on particular procurements or financial assistance transactions.

Issued in Portland, Oregon, on September 24, 1987.

James J. Jura,

Administrator.

BILLING CODE 6450–01–M

Economic Regulatory Administration

[ERA Docket No. 87–49–NG]

Application To Import Natural Gas From Canada; Associated Natural Gas, Inc.

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of Application for blanket authorization to import natural gas from Canada.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of receipt on September 8, 1987, of an application from Associated Natural Gas, Inc. (ANGI), for blanket authorization to import, for its own account or for the account of others, Canadian natural gas for short-term and spot market sales to purchasers in the United States. Authorization is requested to import 100,000 Mcf per day of natural gas up to a maximum of 18 Bcf annually for a two-year period beginning on the date of the first delivery. ANGI is a Colorado corporation with its principal place of business in Denver, Colorado. ANGI states that it intends to use existing pipeline facilities for the transportation of the proposed imports.

The application is filed with the ERA pursuant to Section 3 of the Natural Gas Act and DOE Delegation Order No. 0204–111. Protests, motions to intervene, notices of intervention and written comments are invited.

DATE: Protests, motions to intervene, or notices of intervention, as applicable, and written comments are to be filed no later than November 5, 1987.

FOR FURTHER INFORMATION CONTACT:

Edward J. Peters, Jr., Natural Gas Division, Economic Regulatory Administration, Forrestal Building, Room GA–076, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–8162, and

Diane Stubbs, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, Room 6E–042, 1000 Independence Avenue Avenue, SW., Washington, DC 20585, (202) 586–6667.

SUPPLEMENTARY INFORMATION: ANGI has requested that the authorization be granted on an expedited basis in as much as its authorization request incorprorates all terms and conditions imposed by the ERA on existing blanket import authorizations.

The decision on this application will be made consistent with the DOE's gas import policy guidelines, under which the competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). Parties that may oppose this application should comment in their responses on the issue of competitiveness as set forth in the policy guidelines. The applicant asserts that this import arrangement is competitive. Parties opposing the arrangement bear the burden of overcoming this assertion.

All parties should be aware that if the ERA approves this requested blanket import, it may designate a total authorized volume for the term without fixing a daily or annual limit that can be imported in order to provide the applicant with maximum flexibility of operation.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protest and comments received from persons who are not parties will be considered in determining the appropriate procedural action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR Part 590. They should be filed with the Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Room GA–076, RG–23, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–9478. They must be filed no later than 4:30 p.m. e.d.t., November 5, 1987.

The Administrator intends to develop a decisional record on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comment, an oral presentation, a conference, or trail-type hearing. A request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, and show that it is material and relevant to a decision in the proceeding. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trail-type hearing must show that there are factual issues genuinely in dispute that

are relevant and material to a decision and that a trail-type hearing is necessary for a full and true disclosure of the facts. If an additional procedure is scheduled, the ERA will provide notice to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316. A copy of ANGI's application is available for inspection and copying in the Natural Gas Division Docket Room, GA–076 at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, September 29, 1987.

Constance L. Buckley,

Director, Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450–01–M

Office of Energy Research

Continuation of Solicitation for Special Research Grants and Program Announcement for Basic Research Contracts, No. 88–1

AGENCY: Department of Energy.

ACTION: Notice of Continuation of Availability of Research Grants and Contracts.

SUMMARY: The Office of Energy Research of the Department of Energy hereby announces its continuing interest in receiving applications/proposals for Special Research Grants or Basic Research Contracts supporting work in the following program areas: Basic Energy Sciences, Biological and Environmental Research, High Energy and Nuclear Physics, and Fusion Energy. The Catalog of Federal Domestic Assistance number is 81.049. Information about submission of applications/proposals, eligibility, limitations, evaluation and selection processes, and other policies and procedures are specified, for grants, in 10 CFR Part 605 which was published in the **Federal Register** on April 15, 1985 (50 FR 14856) and, for contracts, in the Program Announcement also published on April 15, 1985 at 50 FR 14865.

DATES: Applications and proposals may be submitted at any time. Generally, those applications and proposals received prior to April 1, 1988 will be considered for FY 1988 funding; those received on or after April 1, 1988, will generally be considered for future fiscal year funding.

ADDRESSES: Applicants/proposers may obtain forms and additional information from Director, Acquisition and Assistance Management Division, Office of Energy Research, ER–64, U.S. Department of Energy, Washington, DC 20545, (301) 353–5544. Completed applications or proposals must be sent to this same address.

SUPPLEMENTARY INFORMATION: As mentioned above, the solicitations for Special Research Grants and the Program Announcement for basic research contracts were published in the **Federal Register** on April 15, 1985. Those solicitations specify the policies and procedures which govern the application, evaluation, and selection processes for research grants and contracts. It is anticipated that approximately 332 million dollars will be available in FY 1988. DOE is under no obligation to pay for any costs associated with the preparation or submission of applications/proposals. DOE reserves the right to fund, in whole or in part, any, all, or none of the applications/proposals submitted in response to this notice.

Issued in Washington, DC, on October 1, 1987.

Ira M. Adler,

Deputy Director for Management, Office of Energy Research.

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

[Docket Nos. EL87–43–000 and EL87–59–000]

Electric Rates; Sale and Leaseback of Qualifying Facilities; Baltimore Refuse Energy System Co. and Wheelabrator Millbury, Inc.

September 30, 1987.

Before Commissioners: Martha O. Hesse, Chairman, Anthony G. Sousa, Charles G. Stalon, Charles A. Trabandt and C.M. Naeve.

On June 8, 1987, and August 20, 1987, respectively, Baltimore Refuse Energy Systems Company (BRESCO) and Wheelabrator Millbury, Inc. (WMI) (together, referred to as Petitioners) filed separate petitions for declaratory orders with the Commission. BRESCO's petition, filed in Docket No. EL87–43–000, involves the proposed sale and leaseback of a solid waste disposal and electric power generation facility certified by the Commission as a qualified small power production facility in Docket No. QF82–97–000. The petition filed by WMI in Docket No. EL87–59–000 [1] involves a transaction similar to the BRESCO proposal, covering a facility certified by the Commission as a qualified small power production facility in Docket No. QF86–175–000. Each petition seeks the following relief: (1) An order disclaiming Commission jurisdiction over the participants and the financing arrangements of a proposed sale and leaseback transaction of the electric generating facilities which constitute the qualifying facility (QF); (2) An order confirming the continued applicability of the rate schedule on file with the Commission covering sales of electricity to the electric utility from the QF; and (3) a determination that the contemplated change in ownership of the facility will not result in a loss QF status.

BRESCO states that its certified QF facility, located in Baltimore, Maryland, is operated as a solid waste disposal and electric power generation facility with a net power production capacity of 55 MW.[2] The facility was certified as a QF on June 7, 1982, and by letter order dated March 14, 1983, in Docket No. ER83–267–000, the Commission accepted for filing an initial rate schedule for electricity sales by BRESCO to Baltimore Gas & Electric Company (BG&E), designated as BRESCO Rate Schedule FERC No. 1. The filed rate is based upon BG&E's avoided cost.

In its petition, BRESCO states that the proposed sale and leaseback transaction will involve a sale of the facility and a sublease of the facility site to a trust to be established for the benefit of Ford Motor Credit Company (FMCC) (Owner Participant) by a bank or trust company (Owner Trustee) acting as trustee for the Owner Participant. Simultaneously with the sale and sublease, BRESCO will lease the entire facility back from the Owner Trustee for a term of approximately 19.5 years. At the conclusion of the lease term, BRESCO has the option to purchase the facility back from FMCC. BRESCO will make rent payments sufficient to enable the Owner Trustee to pay, when due, the principal, redemption price or sinking fund installments and interest on certain bonds,[3] and to provide a positive cash

[1] BRESCO and WMI filed additional information on September 29, 1987.

[2] This is an increase from the 47 MW originally certified by the Commission.

[3] BRESCO received a loan from the Northeast Maryland Waste Disposal Authority (Authority) in the amount of $190,765,000 provided in part by the issuance of certain tax-exempt bonds. BRESCO agreed to repay the loan in installments of principal

Continued

flow [4] to the Owner Participant. BRESCO will remain fully liable for the performance of existing and future waste disposal agreements, steam sales agreements and electric energy sales agreements.[5]

BRESCO states that the property to be transferred pursuant to its proposed transaction consists of three refuse combustion furnaces, three boilers, an approximately 62 MW turbine generator, the transformer switchyard (*i.e.*, related switch gear duct and substation equipment necessary for connection to BG&E's transmission system) [6] and air pollution control equipment.

WMI states in its petition that it is the successor in interest and ownership to a proposed solid waste small power production facility from S.E.S. Millbury Company, L.P.[7] The facility is located in Millbury, Massachusetts and will have a net power production capacity of 41 MW.[8] The Commission certified the facility as a QF on January 24, 1986, and in Docket No. ER87–372–000, the Commission accepted for filing the initial rate schedule for electricity sales by WMI to the New England Power Company (NEP), which is designated as SES Millbury Company, L.P. Rate Schedule FERC No. 1.[9] The filed rate is based upon NEP's avoided cost.

WMI states that the property to be transferred consists of waste receiving facilities, waste combustion facilities, two steam boilers, a steam turbine and electric generator, related pollution control and ash handling facilities, and the transformer switchyard which steps up the voltage from the electric generator to the voltage required by the NEP transmission lines.

WMI describes the proposed transaction as a sale of the facility and sublease of the facility's site [10] to Connecticut Bank and Trust Company (CBTC) (Owner Trustee) in trust for the benefit of FMCC (Owner Participant) with a subsequent leaseback of the facilities by WMI. The purchase price payable by CBTC to WMI will be funded by equity contributions from FMCC (in the amount of $60 million) and by the issuance of secured notes by CBTC (in the amount of $100 million) to certain loan participants, currently expected to be John Hancock Mutual Life Insurance Company and other lenders. WMI will make rent payments to CBTC over the term of the lease, and will remain fully liable for performance under existing and future waste disposal and energy sale agreements. In addition, as security for payment of lease rents, WMI will pledge to CBTC pursuant to a security agreement (Lessee Security Agreement) its rights under the waste disposal and energy sale agreements.[11]

WMI will hold an option to purchase the facility at the conclusion of the lease.

Notice of BRESCO's and WMI's petitions were published in the **Federal Register**, with comments due on or before June 29, 1987 [12] and September 9, 1987,[13] respectively. No comments have been received.

Discussion

The Requests for an Order Disclaiming Commission Jurisdiction

BRESCO and WMI request an order from the Commission finding that the proposed sale and leaseback transactions of the QF facilities and the Owner Participant and Owner Trustee are not subject to the Commission's jurisdiction pursuant to section 203 of the Federal Power Act (FPA).[14] Because these facilities are small power QFs over 30 MW, they ae subject to the Commission's jurisdiction under the Federal Power Act. *See*, 18 CFR 292.601 (1987). This case therefore is the first opportunity for the Commission to determine whether the disposition of a QF that is subject to FPA jurisdiction requires section 203 authorization.[15] We find that the instant transactions do require our authorization pursuant to section 203 and for the reasons set forth below we grant that authorization.

Section 203 states in pertinent part:

> No public utility shall sell, lease, or otherwise dispose of the whole of its facilities subject to the jurisdiction of the Commission, or any part thereof of a value in excess of $50,000, or by any means whatsoever, directly or indirectly, merge or consolidate such facilities or any part thereof with those of any other person, or purchase, acquire, or take any security of any other public utility, without first having secured an order of the Commission authorizing it to do so.

Section 201(e) defines a public utility as "any person who owns or operates facilities subject to the jurisdiction of the Commission" under Part II of the FPA.[16] Facilities over which the Commission has jurisdiction under Part II is defined in section 201 of the FPA as facilities used for the transmission of electric energy in interstate commerce or

---

and interest payments to the Bond Trustee. The Authority took back security for the loan covering BRESCO's receipts from its various service agreements.

[4] The term "provide a positive cash flow" as used here refers to the requirement in section 4(6) of IRS Revenue Procedure 75–21 that a lessor show that it expects to receive a profit from the lease transaction in order that the transaction be considered a lease for Federal income tax purposes The Revenue Procedure is generally followed in instances where no advance ruling is requested from IRS. Under section 4(6), the lessor must show that the aggregate amount to be paid by the lessee over the leave term plus the value of the residual investment exceeds by a reasonable amount of aggregate disbursements required to be paid by the lessor in connection with the ownership of the leased property. In other words, for the lease to qualify as a lease for tax purposes, the lessor must show that the revenues it will receive provide a profit, apart from the value or benefits obtained from tax deductions, allowances, credits and other tax attributes arising from the transaction.

[5] BRESCO is under contract with the Authority to dispose of waste for the City of Baltimore and Baltimore County. Additionally, BRESCO has agreements to service other municipalities and private waste haulers. BRESCO also sells steam to Thermal Resources of Baltimore, Inc.

[6] *See* BRECSO's petition at page 13.

[7] Concurrent with the filing of the instant petition for declaratory order, WMI filed a Notice of Succession in Ownership pursuant to § 35.16 of the Commission's regulations. By letter dated September 15, 1987, in Docket No. ER87–592–000, WMI's Notice of Succession was accepted for filing

[8] The facility was still under construction at the time the petition was filed. WMI expected to begin the generation of electricity for test and shakedown purposes on September 15, 1987.

[9] WMI's request that the filed rate be redesignated as Wheelabrator Millbury, Inc./Rate Schedule FERC No. 1 was granted. However, as the facility had yet to be completed when the sales contract was submitted for filing with the Commission by SES Millbury, the letter accepting the rate schedule for filing stated that the rates would become effective upon commencement of service.

[10] WMI currently owns the site upon which the facility is located. WMI intends to refinance the site through an issue of bonds by Millbury Industrial Development Finance Authority (MIDFA). In connection with that refinancing, WMI will sell the site to MIDFA and lease the site back from MIDFA WMI will then sublease the site to the Owner Trustee for a term equal to the estimated useful life to the facility. Therefore, the subject sale/leaseback transaction involves a sub-sublease of the facility site by the Owner Trustee to WMI.

[11] In its September 29, 1987 pleading, WMI stated that although under the granting clause of the Lessee Security Agreement an "assignment" of the power sales agreement is made, the intention of the parties is that such provision does not operate to create a present assignment of the contract. Actual transfer of the rights of WMI under the contract to the Owner Trustee or a third party will require foreclosure or similar proceedings under Article 9 of the Uniform Commercial Code, and would be subject to the receipt of any necessary governmental approvals. (A similar provision is expected to be part of the security agreement associated with the BRESCO transaction). Therefore, based upon WMI's representations, we conclude that the pledge currently does not constitute an action requiring oru approval; however, if and when WMI should default on its lease payments, invocation of the granting clause and subsequent action regarding the power sales agreement by the Owner Trustee may require Commission authorization.

[12] 52 FR 23339 (1987).

[13] 52 FR 32835 (1987).

[14] 16 U.S.C. 824b (1982).

[15] Although a sale of QF facilities was involved in *Resources Recovery (Dade County), Inc.*, 25 FERC ¶ 62,191 (1983), the applicant acquiesced to section 203 jurisdiction over the transaction. *See also Resources Recovery (Dade County), Inc.*, 31 FERC ¶ 62,356 (1985). In those applications, the applicant requested Commission authorization pursuant to section 203 to transfer ownership of the 240 kV switchyard which was part of the QF facility

[16] 16 U.S.C. 824(e) (1982).

the sale of electric energy at wholesale in interstate commerce. Our review indicates that both BRESCO's facility and WMI's facility include step-up transformers, which the Commission has held perform a transmission function, and therefore constitute transmission facilities,[17] subject to the Commission's Part II jurisdiction. Thus, both BRESCO and WMI are public utilities.[18] Since the subject QF facilities include transmission facilities, the disposition of the QFs by the Petitioners would therefore require section 203 approval to the extent that the step-up transformer facilities have a value in excess of $50,000.[19]

Having determined that the sale and leaseback transactions require section 203 authorization, the question arises whether authorization of such sales is consistent with the public interest. In order to minimize the burden on QFs subject to FPA jurisdiction, the Commission has granted waiver of the filing requirements under Part 33 of the Commission's regulations to permit QFs to file only minimal information in support of any transaction subject to Commission authorization pursuant to section 203. In *Resources Recovery, supra,* we granted section 203 authorization upon the filing of such minimal information. In our order ruling on the waiver requests in *Resources Recovery,* we stated:

> Congress has directed this Commission to provide rules which encourage the development of this industry. We therefore recognize the need to present as few regulatory impediments as possible. Congress has also specifically stated, however, that we may not exempt 30 to 80 megawatt qualifying small power production facilities from the provisions of the Federal Power Act.
>
> Section 203 of the FPA requires that the Commission issue notice and provide an opportunity for hearing before it may approve any of the subject transactions. These statutory requirements may not be waived. We do not believe, however, that it is necessary to impose the full filing requirements of Part 33 of our Regulations on RRD. Rather, we shall only require RRD to file such information as will satisfy the minimum requirements of Section 203 of the FPA. In this manner, we may balance the dual directives of Congress noted above.[20] We believe that the instant pleadings satisfy the minimal filing requirements granted by such waivers. Therefore, consistent with our order in *Resources Recovery,* we shall authorize the transactions as in the public interest pursuant to section 203 of the FPA.

We next turn to the requests in the petitions that the participants in the lease financing be found not subject to the Commission's section 203 jurisdiction because they will not become public utilities as a result of their participation in the transactions. In *Pacific Power & Light Co.,*[21] the Commission found that the owner participant and the owner trustee of a leveraged lease transaction were not to be considered public utilities. Our decision was based primarily on two factors. First, the financial institutions were not operating the facility, nor did they have any voice in or dominion over such operations. Second, none of the parties actually taking title was in the business of producing or selling electric power, and all had a principal business other than that of a public utility. They were involved in the transaction to obtain the tax benefits accruing from the transaction. The Commission stated that it would be inconsistent with the intent of the FPA to lable the parties public utilities and include them within the Commission's jurisdiction because the parties merely held either equitable or legal title to the subject facilities and were clearly removed from the actual operation of the facilities and the sale of power.[22]

In the instant transactions, the Owner Participant and the Owner Trustees are participating in roles similar to those found not to confer public utility status in *Pacific Power & Light.* Although the Owner Participant and Owner Trustees will hold either legal or equitable title to the facilities through their respective interests in the trust estates, the parties will not operate or have any control over the operation of the facilities. Furthermore, based on the representations contained in the petitions, neither the Owner Participant nor the Owner Trustees will be in the business of producing or selling electric power. The Owner Participant is merely a passive investor seeking a return on investment and certain tax benefits as a result of the transactions. The Owner Trustees are simply receiving a few for acting as trustee for the Owner Participant and have no individual interest in the transactions. Therefore, we find that the Owner Participant and Owner Trustees will not, as a result of their participation in the transactions, be deemed to be public utilities subject to the Commission's jurisdiction.

The Requests for an Order Confirming Continued Applicability of the Rate Schedules Presently on File

The Petitioners next request that the Commission find that the respective rate schedules on file with the Commission will remain effective following completion of the proposed transactions. The original rate schedules were accepted and made effective based upon the QF status of the facilities at the time of the applications. The proposed transactions should not affect the facilities' QF status. Further, the proposed changes in ownership do not appear to alter the rates, terms, or conditions of the electric power sale agreements or the principals to those agreements. BRESCO and WMI (as successor to SES Millbury) will continue to sell power to BG&E and NEP, respectively, at each utility's avoided cost. Accordinly, the Commission finds that the proposed transactions will not affect the applicability of the filed rate schedules.

The Requests for an Order Finding That the Change in Ownership Will Not Result in Loss of QF Status

The final issue raised is whether the facilities will retain their QF status following the transfer of ownership. Based on the representations of the parties, the Commission finds that the change of ownership as discussed above, does not make the Owner Trustees or Owner Participant public utilities. Thus, there are no utility ownership problems with the transactions. Also, it appears based upon the information submitted that both facilities will continue to satisfy the size, fuel-use and ownership criteria of Part 292. Thus, the change in ownership will not result in the loss of QF status.

The Commission Orders

(A) The Petitions for Declaratory Order filed in Docket Nos. EL87–43–000 and EL87–59–000 are hereby granted in part and denied in part to the extent discussed above.

(B) The requests for a disclaimer of jurisdiction over the Owner Participant and Owner Trustees are hereby granted.

(C) The proposed transactions are hereby authorized and approved upon

---

[17] *Otter Tail Power Co.,* 12 FERC ¶ 61,169 (1980).

[18] *See* section 210(e)(2) of the Public Utility Regulatory Policies Act of 1978 and § 292.601 of the Commission's regulations, 18 CFR 292.601 (1987).

[19] The finding of section 203 jurisdiction over these facilities does not affect the Commission's past determination that a QF facility may include transmission facilities where the facilities are used solely to transmit the QF energy to the purchasing utility and/or to transmit supplementary, back-up, maintenance or interruptible power from the purchasing utility to the QF. *See Kern River Corporation Co.,* 31 FERC ¶ 61,183 (1985) and *Clarion Power Company,* 39 FERC ¶ 61,317 (1987). We note that the subject step-up transformers will be used for identical transmission purposes by the Petitioners.

BILLING CODE 6717–01–M

ENVIRONMENTAL PROTECTION AGENCY

[FRL–3267–4]

Ambient Air Monitoring Reference and Equivalent Methods; Reference Method Designation

Notice is hereby given that EPA, in accordance with 40 CFR Part 53 as amended on July 1, 1987 (52 FR 24727), has designated a new reference method for the determination of ambient concentrations of particulate matter measured as PM_{10}. The new reference method is a gravimetric manual method which utilizes a specially-designed PM_{10} sampler for particle collection. The new designated method is identified as follows:

RFPS–1087–062, "Wedding & Associates' PM_{10} Critical Flow High-Volume Sampler", consisting of the following components:

- Wedding PM_{10} Inlet
- Wedding & Associates' Critical Flow Device
- Wedding & Associates' Anodized Aluminum Shelter
- 115, 220 or 240 VAC Motor Blower Assembly
- Mechanical Timer or optional Digital Timer
- Elapsed Time Indicator
- Filter Cartridge/Cassette

This method is available from Wedding & Associates, Inc., P.O., Box 1756, Fort Collins, Colorado 80522. A notice or receipt of application for this method appeared in the **Federal Register**, Volume 52, August 6, 1987, page 29254.

Test samplers representative of this method have been tested by the applicant, in accordance with the test procedures specified in 40 CFR Part 53. After reviewing the results of these tests and other information submitted by the applicant, EPA has determined, in accordance with Part 53, that this method should be designated as a reference method. The information submitted by the applicant will be kept on file at EPA's Environmental Monitoring Systems Laboratory, Research Triangle Park, North Carolina, and will be available for inspection to the extent consistent with 40 CFR Part 2 (EPA's regulations implementing the Freedom of Information Act).

As a designated reference method, this method is acceptable for use by states and other control agencies under requirements of 40 CFR Part 58, Ambient Air Quality Surveillance. For such purposes, the method must be used in strict accordance with the operation or instruction manual associated with the method and subject to any limitations specified in the applicable designation (see description of the method above). Vendor modifications of a designated method used for purposes of Part 58 are permitted only with prior approval of EPA, as provided in Part 53. Provisions concerning modification of such methods by users are specified under section 2.8 of Appendix C to 40 CFR Part 58 (Modifications of Methods by Users).

In general, the designation applies to any Wedding & Associates' PM_{10} sampler that is identical to the sampler described in the designation. Similar Wedding-designed PM_{10} samplers (or PM_{10} inlets) manufactured prior to the designation may be readily upgraded to be covered under this designation. Earlier versions of the Wedding PM_{10} inlet were not equipped with an easy-access port for inlet maintenance, and some used a different perfect absorber surface than that used in the current sampler. Owners of earlier versions of Wedding-designed samplers (or inlets) should contact Wedding & Associates, Inc., to determine the specific requirements of upgrading the samplers to be covered under this designation.

Part 53 requires that sellers of designated methods comply with certain conditions. These conditions are given in 40 CFR 53–9 and are summarized below:

(1) A copy of the approved operation or instructional manual must accompany the PM_{10} sampler when it is delivered to the ultimate purchaser.

(2) The PM_{10} sampler must not generate any unreasonable hazard to operators or to the environment.

(3) The PM_{10} sampler must function within the limits of the performance specifications given in Table D–1 of Part 53 for at least 1 year after delivery when maintained and operated in accordance with the operation manual.

(4) Any PM_{10} sampler offered for sale as a reference or equivalent method must bear a label or sticker indicating that it has been designated as a reference or equivalent method in accordance with Part 53.

(5) An applicant who offers PM_{10} sampler for sale as reference or equivalent methods is required to maintain a list of ultimate purchasers of such samplers and to notify them within 30 days if a reference or equivalent method designation applicable to the sampler has been cancelled or if adjustment of the samplers is necessary under 40 CFR 53.11(b) to avoid a cancellation.

(6) An applicant who modifies a PM_{10} sampler previously designated as a reference or equivalent method is not permitted to sell the sampler (as modified) as a reference or equivalent method (although he may choose to sell it without such representation), not to attach a label or sticker to the sampler (as modified) under the provisions described above, until he has received notice under 40 CFR 53.14(c) that the original designation or a new designation applies to the method as modified or until he has applied for and received notice under 40 CFR 53.8(b) of a new reference or equivalent method determination for the sampler as modified.

Aside from occasional breakdowns or malfunctions, consistent or repeated noncompliance with any of these conditions should be reported to: Director, Environmental Monitoring Systems Laboratory, Department E (MD–77), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

Designation of this reference method will provide assistance to the states in establishing and operating their air quality surveillance systems under Part 58. Additional information concerning this action may be obtained by writing to the address given above. Technical questions concerning the method should be directed to the manufacturer.

Erich Bretthaur,

Acting Assistant Administrator for Research and Development.

BILLING CODE 6560–50–M

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collection Requirements Submitted to the Office of Management and Budget for Review

September 29, 1987.

The Federal Communications Commission has submitted the following information collection requirements to OMB for review and clearance under the Paperwork Reduction Act of 1980, 44 U.S.C. 3507.

Copies of these submissions may be purchased from the Commission's duplicating contractor, International Transcription Service, 2100 M Street NW., Suite 140, Washington, DC 20037, or telephone (202) 857–3815. Persons wishing to comment on an information collection should contact J. Timothy Sprehe, Office of Management and Budget, Room 3235 NEOB, Washington, DC 20503, telephone (202) 395–4814. Copies of these comments should also be sent to the Commission. For further information contact Terry Johnson, Federal Communications Commission, telephone (202) 632–7513.

OMB No.: 3060–0020
Title: Application for Ground Station Authorization in the Aviation Services
Form No.: FCC 406
Action: Revision
Respondents: Individuals, State or local governments, Business, Small Business, Non-profit Institutions
Frequency of Response: On occasion
Estimated Annual Burden: 3,225 Responses; 4,031 Hours.
Needs and Uses: Filing is required to apply for a new, modified, or renewal of a ground station authorization. The data is used to update the database, determine eligibility, and issue licenses.

OMB No.: 3060–0034
Title: Application for Construction Permit for Noncommercial Educational Broadcast Station
Form No.: FCC 340
Action: Revision
Respondents: Non-profit institutions
Frequency of Response: On occasion
Estimated Annual Burden: 263 Responses; 20,468 Hours.
Needs and Uses: Filing is required to apply for authority to construct a new noncommercial educational FM or TV broadcast station, or to make changes in the existing facilities of such a station. The data is used to determine whether the applicant meets basic statutory requirements to become a Commission licensee.

William J. Tricarico,
Secretary.

BILLING CODE 6712–1–M

Public Information Collection Requirements Submitted to the Office of Management and Budget for Review

September 30, 1987.

The Federal Communications Commission has submitted the following information collection requirements to OMB for review and clearance under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Copies of these submissions may be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037. For further information on these submissions contact Terry Johnson, Federal Communications Commission, (202) 632–7513. Persons wishing to comment on these information collections should contact J. Timothy Sprehe, Office of Management and Budget, Room 3235 NEOB, Washington, DC 20503, (202) 395–4814.

OMB Number: 3060–0165
Title: Part 41 Franks, § 41.31, Records to be maintained and reports to be filed
Action: Extension
Respondents: Business
Frequency of Response: Recordkeeping requirement
Estimated Annual Burden: 68 Recordkeepers; 408 hours
Needs and Uses: Subject carriers are required to maintain records in such manner so that if ordered by the FCC the carriers could furnish a report showing every person holding a telephone or telegraph frank. This data reports every person who has received free service. This information helps too ensure that franks are being addressed fairly. Failure to have the information recorded would prohibit the Commission from being able to respond to complaints and from generally being able to police activities. The regulated carriers are the affected public.

OMB Number: 3060–0147
Title: Section 64.804, Extension of Unsecured Credit for Interstate and Foreign Communications to Candidates for Federal Office
Action: Extension
Respondents: Business
Frequency of Response: On occasion
Estimated Annual Burden: 26 responses; 208 hours
Needs and Uses: Section 64.804 requires communications common carriers with operating revenues exceeding $1 million who extend unsecured credit to a political candidate or person on behalf of such candidate for Federal office to report to the FCC, twice a year, data including dues and outstanding balances. This information is used by the FCC to monitor the extent of credit extended to candidates for Federal office.

William J. Tricarico,
Secretary.

BILLING CODE 6712–01–M

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreements(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No: 224–001839–C.

Title: South Louisiana Port Commission Lease Agreement.

Parties:

South Louisiana Port Commission (Lessor)

Louis Dreyfus Corporation (Dreyfus)

Synopsis: The proposed agreement (1) provides that 75% of all vessel fees shall be the property of, and shall inure to the benefit of Dreyfus, its successors and assigns; and (2) authorizes Dreyfus, its successors and assigns to collect all vessel fees in respect to all vessels, ships and other water vehicles docking at or along the real property covered by the Lease, except bulk-grain carrying barges (approximately 35 feet in width) on the Mississippi River.

By Order of the Federal Maritime Commission.

Dated: October 1, 1987.

Joseph C. Polking,

Secretary.

[FR Doc. 87–23046 Filed 10–5–87; 8:45 am]

BILLING CODE 6730–01–M

[Docket No. 87–20]

Filing of Complaint and Assignment; Delaware River Port Authority v. The 8900 Lines

Notice is given that a complaint filed by the Delaware River Port Authority ("Port") against a conference of water carriers operating under FMC Agreement No. 8900 (hereinafter "The 8900 Lines") was served October 1, 1987. The Port alleges that The 8900 Lines, through the publication of certain "Arbitrary Rates" in the conference Freight Tariff No. 14, and more particularly, 2nd Revised Page 45, has violated various sections of the Shipping Act of 1984 by applying a rate which is unfairly and/or unjustly discriminatory and which "[s]ubjects the Port of Philadelphia and all persons within it to undue and unreasonable prejudice or disadvantage with respect to cargo comprehended in said tariff."

This proceeding has been assigned to Administrative Law Judge Norman D. Kline ("Presiding Officer"). Hearing in this matter, if any is held, shall commence within the time limitations prescribed in 46 CFR 502.61. The hearing shall include oral testimony and cross-examination in the discretion of the Presiding Officer only upon proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matter in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record. Pursuant to the further terms of 46 CFR 502.61, the initial decision of the Presiding Officer in this proceeding shall be issued by October 3, 1988, and the final decision of the Commission shall be issued by February 3, 1989.

Joseph C. Polking,

Secretary.

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

Enforcement of Nondiscrimination on the Basis of Handicap in Programs and Activities Conducted by the Federal Mine Safety and Health Review Commission

AGENCY: Federal Mine Safety and Health Review Commission.

ACTION: Notice of self-evaluation; request for comments.

SUMMARY: The Federal Mine Safety and Health Review Commission is evaluating its current policies and practices to ensure that discrimination against handicapped persons does not occur in its programs and activities. This evaluation is being conducted to comply with the Commission's regulations concerning Enforcement of Nondiscrimination on the Basis of Handicap in Programs or Activities Conducted by the Federal Mine Safety and Health Review Commission, 29 CFR Part 2706, which requires the Commission to perform this self-evaluation and to permit interested parties to participate in the project. Accordingly, this notice summarizes the results of the Commission's self-evaluation to date and requests public comment from interested parties concerning that evaluation or any aspect of Commission policies and practices with respect to handicapped persons.

DATE: Comments must be received on or before November 5, 1987.

ADDRESSES: Written comments should be addressed to Richard Baker, Executive Director, Federal Mine Safety and Health Review Commission, 1730 K Street NW, 6th Floor, Washington, DC 20006. The Commission's self-evaluation to date and all comments received will be available for public inspection in the Commission's Office of General Counsel, Room 630, at the above address, between the hours of 9:00 a.m. and 4:00 p.m.

FOR FURTHER INFORMATION CONTACT: L. Joseph Ferrara, General Counsel, Office of the General Counsel, 1730 K Street NW, 6th Floor, Washington, DC 20006, 202–653–5610 (202 566–2673 for TDD Relay). These are not toll-free numbers.

SUPPLEMENTARY INFORMATION: The Commission's regulations concerning Enforcement of Nondiscrimination on the Basis of Handicap in Federally Conducted Programs are found at 29 CFR Part 2706 and were issued pursuant to section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 794), which prohibits discrimination on the basis of handicap in executive agency programs. Section 2706.110(a) requires the Commission to evaluate its current policies and practices, and the effects thereof, in order to ensure that they do not result in discrimination against handicapped persons in employment, accessibility to facilities, communication, or otherwise. Section 2706.110(b) requires that the Commission "provide an opportunity to interested persons, including handicapped persons or organizations representing handicapped persons, to participate in this self-evaluation process by submitting comments (both oral and written)."

The Commission conducts all adjudicative proceedings and hearings required by the Federal Mine Safety and Health Act of 1977, as amended (30 U.S.C. 801 *et seq.*). Cases are assigned for hearing before a Commission administrative law judge. Decisions by Commission administrative law judges are subject to review by the full Commission.

The Commission currently has 53 employees. With regard to the Commission's employment practices, during the last two years the Commission has not received any requests for accommodation nor has it received any complaints from its employees on the basis of handicap. Likewise, during the same period there have been no requests for accommodation and no complaints from applicants for employment. Concerning the accessibility of the Commission's programs and activities, during the past two years there have been no requests for accommodation and no complaints from parties, participants, or the public on the basis of handicap, involving participation in the Commission's proceedings or otherwise.

Facilities

The Commission leases three facilities from the General Services Administration (GSA): (1) 1730 K Street, NW, 6th Floor, Washington, DC 20006, where the Commissioners meet, and where most of the Commission's employees are stationed; (2) 5203 Leesburg Pike, Falls Church, VA 22041, where most of the Commission's administrative law judges are located; and (3) 333 W. Colfax Avenue, Suite 400, Denver, CO 80204, where the remainder of the Commission's administrative law judges are located. Each of these facilities has been examined for physical barriers and impediments. The Commission believes there are some impediments to some handicapped persons at the Washington, DC, facility. As a result, the Commission is requesting that GSA take appropriate action in order to assure full compliance with the requirements of section 504 and the Commission's regulations.

Commission notices of public Commission meetings request that any person who intends to attend, and who requires special accessibility features, inform the Commission in advance so that appropriate arrangements may be made. The Commission also includes in the announcement of any administrative law judge hearing a notice that persons desiring to attend should notify the agency in advance of any accessibility features they may require. In the past two years there have been no requests for accommodation or complaints from parties, participants, or the public on the basis of handicap about the accessibility of the Commission's facilities or hearing facilities.

Communication

Commission notices of public Commission meetings also indicate that any person who intends to attend and who requires special auxiliary aids, such as sign language interpreters, should inform the Commission in advance. Commission notices of administrative law judge hearings have similar language. The Commission does not have a telecommunication device for the deaf (TDD). However, it has obtained access to a TDD relay service provided by the Architectural and Transportation Barriers Compliance Board. In the past two years there have been no requests for accommodation and no complaints involving auxiliary aids for purposes of communication.

Compliance

The Commission's compliance procedures have not been utilized because, to date, there have been no complaints. The Commission assumes the effectiveness of its compliance procedures until experience shows otherwise.

In sum, the Commission believes that it has been operating its programs and activities so that, when viewed in their entirety, such programs and activities are in general readily accessible to and usable by handicapped persons.

Comments on the Commission's programs and policies as they affect handicapped persons or on the Commission's self-evaluation, a summary of which is set forth above, are invited. Please send written comments to Richard Baker, Executive Director, Federal Mine Safety and Health Review Commission, 1730 K Street, NW., 6th Floor, Washington, DC 20006. Oral comments may be submitted to

Executive Director Baker at 202–653–5625 (202–566–2673 for TDD Relay). These are not toll-free numbers.

Upon completion of the comment period, the Commission will review all comments and take appropriate steps to address matters brought to the Commission's attention to the extent warranted. In addition, the Commission will maintain on file its self-evaluation, comments received, a description of any areas examined and any problems identified, and a description of any modifications made. This file will be maintained for a period of three years following the completion of this evaluation, and will be made available for public inspection upon request.

Dated: September 22, 1987.

Ford B. Ford,

Chairman of the Federal Mine Safety and Health Review Commission.

[FR Doc. 87–22991 Filed 10–5–87; 8:45 am]

BILLING CODE 6735–01–M

FEDERAL RESERVE SYSTEM

Formations of; Acquisitions by; and Mergers of Bank Holding Companies; First Missouri Bancorporation, Inc., et al.

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than October 26, 1987.

A. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. First Missouri Bancoporation, Inc., Columbia, Missouri; to acquire at least 50 percent of the voting shares of Montgomery Bancshares, Inc., Columbia Missouri, and thereby indirectly acquire Jonesburg State Bank, Jonesburg, Missouri.

2. Golden Bancshares, Inc., Golden, Illinois; to become a bank holding company by acquiring at least 80 percent of the voting shares of Golden State Bank, Golden, Illinois.

3. Shelby Bancshares, Inc., Bartlett, Tennessee; to become a bank holding company by acquiring 100 percent of the voting shares of Shelby Bank, Bartlett, Tennessee, a *de novo* bank.

Board of Governors of the Federal Reserve System, September 30, 1987.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 87–22987 Filed 10–5–87; 8:45 am]

BILLING CODE 6210–01–M

Formation of, Acquisition by, or Merger of Bank Holding Companies; and Acquisition of Nonbanking Company; First National Agency, Inc. of Cold Spring

The company listed in this notice has applied under § 225.14 of the Board's Regulation Y (12 CFR 225.14) for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) to become a bank holding company or to acquire voting securities of a bank or bank holding company. The listed company has also applied under § 225.23(a)(2) of Regulation Y (12 CFR 225.23(a)(2)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies, or to engage in such an activity. Unless otherwise noted, these activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than October 21, 1987.

A. Federal Reserve Bank of Minneapolis James (Mr. Lyon, Vice President) 250 Marquettes Avenue, Minneapolis, Minnesota 55480:

1. First National Agency, Inc. of Cold Spring, Cold Spring, Minnesota; to become a bank holding company by acquiring 37.64 percent of the voting shares of First BancShares, Inc. of Cold Spring, Cold Spring, Minnesota, and thereby indirectly acquire First National Bank of Cold Spring, Cold Spring, Minnesota. Applicant also proposes to engage directly in general insurance agency activities in a place with a population of less than 5,000 pursuant to § 225.25(b)(8)(iii) of the Board's Regulation Y. This activity will be conducted in townships of Rockville and Wakefield, Minnesota.

In connection with this application First Banchshares, Inc. of Cold Spring, Cold Spring, Minnesota, has applied to become a bank holding company by acquiring 100 percent of the voting shares of First National Bank of Cold Spring, Cold Spring, Minnesota.

Board of Governors of the Federal Reserve System, September 30, 1987.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 87D-0187]

Environmental Assessment Technical Handbook; Availability

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of the Environmental Assessment Technical Handbook. The handbook was prepared to provide a central source of information to persons gathering environmental data and preparing environmental assessments for proposed actions which would result in the marketing of chemical entities regulated by FDA. The handbook was prepared by the Center for Food Safety and Applied Nutrition (CFSAN) and the Center for Veterinary Medicine (CVM).

ADDRESSES: Copies of the handbook may be obtained from the National Technical Information Service, 5285 Port Royal Rd., Springfield, VA 22161 (703-487-4650). The handbook is available for public examination at, and written comments should be addressed to, the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

Buzz L. Hoffmann, Center for Food Safety and Applied Nutrition (HFF-304), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-485-0277,

or

John C. Matheson III, Center for Veterinary Medicine (HFV-152), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-1880.

SUPPLEMENTARY INFORMATION: The National Environmental Policy Act of 1969 (NEPA), the Council on Environmental Quality (CEQ) regulations (40 CFR Parts 1500-1508), and FDA's regulations implementing NEPA (21 CFR Part 25) require that Federal decisionmaking include an objective consideration of the environmental impacts expected from proposed actions. The public participates in the decisionmaking by reviewing NEPA documents and providing comments, information, and analysis concerning environmental impacts overlooked, inadequately defined, or not properly considered in the decisionmaking.

Persons submitting applications and petitions to the agency requesting actions, such as the approval of a food additive or new animal drug, must also submit environmental information sufficient for the agency to determine whether an environmental impact statement will be required. The CEQ regulations, 40 CFR 1506.5, state that, in such cases, "the agency should assist the applicant by outlining the types of information required." The purpose of the Environmental Assessment Technical Handbook is to provide such assistance and to improve the quality and consistency of NEPA documents submitted to the agency. In addition, the

handbook should save time and resources for preparers of environmental documents and for agency personnel reviewing the information submitted.

The handbook has been developed over the past 7 years. Peer review was provided by numerous outside scientists with specific subject expertise, representing industry, academia, and government agencies. Due to demand for test protocol assistance, drafts of the handbook have been in circulation and use by applicants and petitioners over the past few years. Their experiences with these drafts have served to improve the reliability of the test methods described in the handbook. The updated handbook supersedes any previous drafts.

The handbook is organized into four sections consisting of individual technical assistance documents. Section 2.00 describes a strategy for the efficient use of FDA's policies and procedures implementing NEPA and for the collection of information to establish an adequate environmental record for FDA actions. Section 3.00 contains 12 documents which provide methods useful in predicting the environmental fate of a chemical, i.e., the persistence, mobility, and exposure levels of a chemical. Section 4.00 contains nine documents which provide methods useful in estimating the sensitivity of representative species of organisms to chemicals. These environmental effects tests are used to determine chemical levels which would or, by extrapolation, might significantly affect organisms in the environment. The last section, 5.00, consists of two documents which describe methods commonly used for data analysis of environmental effects tests.

The technical assistance documents in sections 3.00 and 4.00 include information on the appropriate methods for specific cases and the features of test design to be considered in planning and conducting tests. In some cases the documents provide sufficient detail to serve as test instructions. In all cases, however, comprehensive protocols published by other organizations or individuals are cited for further reference.

Environmental test protocols other than those described in the handbook may also be acceptable, provided they are based upon scientifically valid methodology. Applicants and petitioners are urged to confer with agency personnel when any testing is anticipated in order to develop a suitable and acceptable environmental testing plan. For proposed actions requiring the collection of environmental information through experimental studies, no individual action is expected to require all the environmental tests contained in the handbook.

Because methods for assessing the environmental fate and effects of chemicals are under continuous development and refinement, CFSAN and CVM intend to make revisions or supplements to the technical assistance documents, as appropriate. Comments on individual technical assistance documents will be welcomed and carefully considered. CFSAN and CVM will provide copies of any revised technical assistance document to any person who requests an updated version. Requests for revised copies should be made to the offices identified above under the section entitled "**FOR FURTHER INFORMATION CONTACT.**" At a future date, when sufficient revisions have been made in each of the various technical assistance documents, CFSAN and CVM will revise the entire handbook and a notice will be published in the **Federal Register** announcing the availability of the revised handbook.

The handbook is available for purchase from the National Technical Information Service (NTIS) (address above). The NTIS Order number is PB 87–175345/AS. The price codes are: A17 for paper copy ($30.95) and A01 for microfiche ($6.50).

Interested persons may submit written comments on the handbook to the Dockets Management Branch (address above). Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Comments received may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: September 29, 1987.

John M. Taylor,

Associate Commissioner for Regulatory Affairs.

[FR Doc. 87–23036 Filed 10–5–87; 8:45 am]

BILLING CODE 4160–01–M

[Docket No. 87D–0275]

Import Alert Detention of Noncertified Television Receivers Labeled for Export (Revised); Availability of Import Alert

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of an Import Alert 94–01 entitled "Detention of Noncertified Television Receivers Labeled for Export." The alert, which was prepared by FDA's Center for Devices and Radiological Health (CDRH), addresses the requirement of certification for television receivers for exportation purposes as regulated by the Federal Performance Standard for Television Receivers. This guidance does not limit the agency's enforcement discretion to refuse or permit admission of a particular lot offered for import after an evaluation of the relevant facts.

ADDRESS: Single copies of the alert are available from the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857. (Send two self-addressed labels to assist in processing your requests.).

FOR FURTHER INFORMATION CONTACT: Edwin A. Miller, Center for Devices and Radiological Health (HFZ–310), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7175.

SUPPLEMENTARY INFORMATION: Until recently, importers have been permitted to import noncertified Consultative Committee for International Radio (CCIR) standard 220-volt television receivers for exportation purposes when the requirements as stated in section 358(a)(3) of the Radiation Control for Health and Safety Act (42 U.S.C. 263f(a)(3)) and FDA Compliance Program Circular 7382.007A were met. These receivers were not originally designed to receive television signals from within the United States or operate on standard 60 HZ, 110–120 VAC power sources unless extensive reconditioning was performed. Thus, these receivers were permitted to enter the United States without certification.

Now, however, the television industry has made it possible for most sets designed for CCIR broadcast standard to be capable of operation within the United States. FDA considers these receivers to be subject to the Federal Performance Standard for Television Receivers (21 CFR 1020.10), and they must be certified before admission into the United States.

FDA has become aware of widespread abuse of the for-exportation exemption in that importers have been claiming this exemption from certification for products which were adaptable to receipt of United States television signals. Due to the unlawful diversion of some such receivers into the United States market, FDA field personnel have been given discretion to detain all shipments of uncertified receivers until the importer establishes

VOL 52 ISS 193 OCT 6 1987 UMI

that the product in question has been labeled for export only and cannot receive the NTSC 3.58 broadcast signal. Prior to importation for any purpose, receivers which can receive the NTSC 3.58 broadcast signal and are thus capable of use in the United States must be certified and properly labeled in accordance with FDA's television performance standard.

The authority for FDA's detention of all shipments of noncertified receivers which are capable of use within the United States is section 360B(a)(1) of the Radiation Control for Health and Safety Act (the act) (42 U.S.C. 263j (a)(1)), which makes it unlawful for any manufacturer to introduce or deliver for introduction into commerce or to import into the United States any electronic product which does not comply with an applicable standard prescribed pursuant to the Radiation Control for Health and Safety Act. Also, under section 360B(a)(5)(A) of the act (42 U.S.C. 263j (a)(5)(A)), it is unlawful for any person to fail to issue a certification as required by section 358(h) of the act (42 U.S.C. 263f(h)).

Requests for single copies of the import alert should refer to the docket number found in brackets in the heading of this notice and should be addressed to the Dockets Management Branch (address above).

Dated: September 29, 1987.

John M. Taylor,

Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

Health Care Financing Administration

Medicaid Program; Hearing; Reconsideration of Disapproval of Two New York State Plan Amendments

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Notice of hearing.

SUMMARY: This notice announces an administrative hearing on November 4, 1987 in New York, New York to reconsider our decision to disapprove New York State Plan Amendments 86-6 and 86-23.

DATES: Closing Date: Requests to participate in the hearing as a party must be received by the Docket Clerk on or before October 21, 1987.

FOR FURTHER INFORMATION CONTACT: Docket Clerk, Hearing Staff, Bureau of Eligibility, Reimbursement and Coverage, 300 East High Rise, 6325 Security Boulevard, Baltimore, Maryland 21207, Telephone: (301) 594-8261.

SUPPLEMENTARY INFORMATION: This notice announces an administrative hearing to reconsider our decision to disapprove two New York State Plan Amendments.

Section 1116 of the Social Security Act and 45 CFR Parts 201 and 213 establish Department procedures that provide an administrative hearing for reconsideration of a disapproval of a State plan or plan amendment. HCFA is required to publish a copy of the notice to a State Medicaid Agency that informs the agency of the time and place of the hearing and the issues to be considered. (If we subsequently notify the agency of additional issues which will be considered at the hearing, we will also publish that information in a notice.)

Any individual or group that wants to participate in the hearing as a party must petition the Hearing Officer within 15 days after publication of this notice, in accordance with the requirements contained in 45 CFR 213.15(b)(2). Any interested person or organization that wants to participate as amicus curiae must petition the Hearing Officer before the hearing begins in accordance with the requirements contained in 45 CFR 213.15(c)(1).

If the hearing is later rescheduled, the Hearing Officer will notify all participants.

The issue in this matter is whether the malpractice costs included in New York's proposed plan amendments are reimbursable as inpatient hospital services under section 1902(a)(13)(A) of the Act and Federal regulations at 42 CFR Part 447, Subpart C.

The State of New York has proposed two plan amendments, 86-6 and 86-23, which revise its plan for Medicaid reimbursement of inpatient hospital services. Transmittal 86-6 covers the period January 1, 1986 to June 30, 1986, and transmittal 86-23 covers the period July 1, 1986 to June 30, 1987. These amendments allow a component to be added to each hospital's inpatient rate to reflect the cost of providing excess medical malpractice coverage for physicians affiliated with that hospital and who provide emergency care in the institution.

HCFA has determined the malpractice costs included in these amendments are not reimbursable as an inpatient hospital cost under section 1902(a)(13)(A) of the Act and the regulations set forth at 42 CFR Part 447, Subpart C. The costs included in these amendments are for physicians' services, which are governed by section 1902(a)(30) of the Act and regulations set forth at 42 CFR Part 447, Subparts A, B, and D. HCFA believes costs should be claimed and included under the appropriate program and not under 42 CFR Part 447, Subpart C.

HCFA believes the State's administrative decision to add the malpractice costs for physicians as allowable costs in determining inpatient hospital rates does not alter the fundamental nature of the costs or the Federal rules governing this reimbursement. The payments that the hospital makes for excess malpractice coverage are solely for the benefit of the physician. In the event of a malpractice recovery pursuant to a suit or claim of a patient, the subsequent insurance company payments protect the liability of the physician and not the hospital. Therefore, the insurance premiums are clearly a physician and not a hospital cost. Therefore, HCFA has determined the amendment violates section 1902(a)(13)(A) and Federal regulations at 42 CFR Part 447, Subpart C since the costs are an inappropriate component of an inpatient hospital rate in the context of the statutory requirements.

The notice to New York announcing an administrative hearing to reconsider the disapproval of its State plan amendments reads as follows:

Mr. David Emil,

Deputy Commissioner and General Counsel, New York State Department of Social Services, 40 North Pearl Street, Albany, New York 12243.

Dear Mr. Emil: This is to advise you that your request for reconsideration of the decision to disapprove New York State Plan Amendments 86-6 and 86-23 was received on September 2, 1987.

New York State Plan Amendments 86-6 and 86-23 would amend the New York reimbursement plan for payment of inpatient hospital services. You have requested a reconsideration of whether the malpractice costs included in these amendments are reimbursable as inpatient hospital costs under section 1902(a)(13)(A) of the Social Security Act and regulations at 42 CFR Part 447, Subpart C.

I am scheduling a hearing on your request to be held on November 4, 1987 at 10:00 a.m. in Room 2226, 26 Federal Plaza, New York, New York. If this date if not acceptable, we would be glad to set another date that is mutually agreeable to the parties.

I am designating Mr. Lawrence Ageloff as the presiding official. If these arrangements present any problems, please contact the Docket Clerk. In order to facilitate any communication which may be necessary between the parties to the hearing, please notify the Docket Clerk of the names of the individuals who will represent the State at the hearing. The Docket Clerk can be reached at (301) 594-8261.

Sincerely,
William L. Roper, M.D.,
Administrator.

(Section 1116 of the Social Security Act (42 U.S.C. 1316))

(Catalog of Federal Domestic Assistance Program No. 13.714, Medicaid Assistance Program)

Dated: September 29, 1987.

William L. Roper, M.D.,
Administor, Health Care Financing Administration.

BILLING CODE 4120-03-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. N-87-1742]

Submission of Proposed Information Collection to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirements described below have been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposals.

ADDRESS: Interested persons are invited to submit comments regarding these proposals. Comments should refer to the proposal by name and should be sent to: John Allison, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street SW., Washington, DC 20410, telephone (202) 755-6050. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposals described below for the collection of information to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the description of the need for the information and its proposed use; (4) the agency form number, if applicable; (5) what members of the public will be affected by the proposal; (6) how frequently information submissions will be required; (7) an estimate of the total number of hours needed to prepare the information submission; (8) whether the proposal is new, an extension, reinstatement, or revision of an information collection requirements; and (9) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Copies of the proposed forms and other available documents submitted to OMB may be obtained from David S. Cristy, Reports Management Officer for the Department. His address and telephone number are listed above. Comments regarding the proposal should be sent to OMB Desk Officer at the address listed above.

The proposed information collection requirements are described as follows:

Proposal: Application for Approval as a Coinsuring Lender—Category A Documentation.

Office: Housing.

Description of the Need For the Information and Its Proposed Use: Under Section 221 Coinsurance Program, HUD must review lender's financial, technical, and organizational capacity to be approved as a coinsuring lender. This information is needed to review the lender's capacity to carry out the functions of the program.

Form Number: Various.

Respondents: Businesses or Other For-Profit and Non-Profit Institutions.

Frequency of Response: On Occasion.

Estimated Burden Hours: 6,400.

Status: Reinstatement.

Contact: James L. Hamernick, HUD, (202) 755-6500 or John Allison, OMB, (202) 395-6880.

Authority: Sec. 3507, Paperwork Reduction Act, 44 U.S.C. 3507; sec. 7(d), Department of Housing and Urban Development Act 42 U.S.C. 3535(d).

Proposal: Financial Statement (Claims collection).

Office: Administration.

Description of the Need for the Information and Its Proposed Use: Each office of HUD is authorized to have a claims collection officer to establish and maintain a file regarding each claim for which collection activities are undertaken. This information is needed by the claims collection officer to make judgments concerning the likelihood of being able to collect a claim.

Form Number: HUD-27041.

Respondents: Individuals or Households.

Frequency of Response: On Occasion.

Estimated Burden Hours: 300.

Status: New.

Contact: Ronald A. Nelson, HUD, (202) 755-1446 or John Allison, OMB, (202) 395-6880.

Authority: Sec. 3507, Paperwork Reduction Act, 44 U.S.C. 3507; sec. 7(d), Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Proposal: Project Applications and Review of Application-Category B Documentation.

Office: Housing.

Description of the Need for the Information and Its Proposed Use: Under Section 221 Coinsurance Program, HUD must review approved coinsuring lender's processing of applications. This must be done to ensure adherence to underwriting and processing guidelines and also to monitor compliance with program standards.

Form Number: Various.

Respondents: Businesses or Other For-Profit and Non-Profit Institutions.

Frequency of Response: On Occasion.

Estimated Burden Hours: 92,000.

Status: Reinstatement.

Contact: James L. Hamernick, HUD, (202) 755-6500 or John Allison, OMB, (202) 395-6880.

Authority: Sec. 3507, Paperwork Reduction Act, 44 U.S.C. 3507; sec. 7(d), Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Proposal: Property Survey Instructions and Certificate.

Office: Housing.

Description of the Need for the Information and Its Proposed Use: A survey and surveyor's certificate are required to assure uniformity of certification and the exact description of the property to be mortgaged. The information is provided by a private registered civil engineer or land surveyor before initial and final endorsement and is essential to both conventional mortgages and federally assisted mortgage insurance.

Form Number: FHA-2457.

Respondents: Businesses or Other For-Profit and Small Businesses or Organizations.

Frequency of Response: On Occasion.

Estimated Burden Hours: 1,000.

Status: Reinstatement.

Contact: Richard E. Murray, HUD (202) 755-5743 or John Allison, OMB, (202) 395-6880.

Authority: Sec. 3507, Paperwork Reduction Act, 44 U.S.C. 3507; sec. 7(d), Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Proposal: Emergency Shelter Grants Program.

Office: Community Planning and Development.

Description of the Need for the Information and Its Proposed Use: The Emergency Shelter Grants Program provides grants to cities, counties, and states for renovation, rehabilitation, or conversion of buildings; supportive

VOL 52 ISS 193 OCT 6 1987 UMI

services; and maintenance, operation, insurance, utilities, and furnishings in relation to emergency shelter for the homeless. Information collected will be used to ensure grantees comply with the program's statutory and regulatory requirements.

Form Number: SF–424 and SF–269.

Respondents: State or Local Governments and Non-Profit Institutions.

Frequency of Response: On Occasion and Annually.

Estimated Burden Hours: 14,000.

Status: Revision.

Contact: James R. Broughman, (202) 755–5977 or John Allison, OMB (202) 395–6880

Authority: Sec. 3507, Paperwork Reduction Act, 44 U.S.C. 3507; sec. 7(d), Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Proposal: Rent Increase Worksheet.

Office: Housing.

Description of the Need for the Information and Its Proposed Use: Owners of certain subsidized, cooperative, and Section 202 projects submit this form annually when requesting an adjustment to project rents. HUD uses the form to evaluate owners' expense estimates and to calculate allowable rents and utility allowances.

Form Number: HUD–92547B.

Respondents: Business or Other For-Profit and Federal Agencies or Employees.

Frequency of Response: Annually.

Estimated Burden Hours: 50,000.

Status: Extension.

Contact: James J. Tahash, HUD, (202) 426–3970 or John Allison, OMB, (202) 395–6880

Authority: Sec. 3507, Paperwork Reduction Act, 44 U.S.C. 3507; sec. 7(d), Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: September 28, 1987.

Oregon, Medford District Office; Off-Highway Vehicle Designation

AGENCY: Bureau of Land Management, Interior.

ACTION: Medford District Office; Notice given relating to off-highway motorized vehicle use on public lands.

SUMMARY: Notice is hereby given relating to the use of off-highway vehicles on certain public lands in accordance with the authority and requirements of Executive Orders 11644 and 11989, and regulations contained in 43 CFR Part 8340.

The following lands under the administration of the Bureau of Land Management are changed from the existing open designation and are hereby redesignated as limited, under Interim Management Policy and Guidelines for Lands under Wilderness Review, or closed to off-highway motor vehicle use.

The areas affected by the designations are managed by the Medford District and are located in Jackson, Josephine, and Klamath Counties, Oregon.

These designations are published as final until such time that changes in resource management warrant modifications.

FOR FURTHER INFORMATION CONTACT: Fred Tomlins, Outdoor Recreation Planner, Bureau of Land Management, 3040 Biddle Road, Medford, Oregon 97504, telephone (503) 776–3767, FTS 424–3767.

A. Limited Designations

Two Wilderness Study Areas (WSAs), comprising 5,974 acres, will be managed in accordance with the nonimpairment criteria of the Wilderness Interim Management Policy which allows off-highway vehicle use to continue in the manner and degree on ways and trails where such use was occurring on October 21, 1976.

WSA Unit No.	WSA Name	Acres
11–1	Mountain Lakes	334
11–17	Soda Mountain	5,640

These limited vehicle use designations will remain in effect until Congressional release of WSAs, or if actual or unforeseeable use levels cause the nonimpairment criteria to be violated, in which case more restrictive designations may be made.

B. Closed Designations

The Eight Dollar Mountain Area of Critical Environmental Concern, comprising 1,240.6 acres is designated closed to motorized vehicle use to protect resource values.

These designations become effective upon publication in the **Federal Register** and will remain in effect until rescinded or modified by the Medford District Manager. Information and maps of the above areas are available at the Bureau of Land Management, Medford District Office, 3040 Biddle Road, Medford, Oregon 97504, Telephone (503) 776–4174.

David A. Jones,

District Manager.

Date Signed: September 28, 1987.

BILLING CODE 4310–70–M

INTERNATIONAL TRADE COMMISSION

[TA–503(a)–15 and 332–249]

President's List of Articles Which May Be Designated or Modified as Eligible Articles for Purposes of the U.S. Generalized System of Preferences

AGENCY: United States International Trade Commission.

ACTION: Change in scope of investigation.

EFFECTIVE DATE: September 30, 1987.

SUMMARY: Following receipt of a request from the Office of the U.S. Trade Representative (USTR) dated September 16, 1987, the Commission has expanded the scope of the above referenced investigation to include examination of the probable effect on U.S. industries producing like or directly competitive articles and on consumers of (1) the complete removal of Generalized System of Preferences (GSP) duty-free status for leather cut into soles for footwear, classified in item 791.28 of the Tariff Schedules of the United States (TSUS), and in item 6406.99.60 of the proposed Harmonized Tariff Schedule (HS) of the United States and (2) the removal only of these products of Argentina from GSP duty-free treatment.

Background

The Commission published the initial notice of institution of its investigation in the **Federal Register** of August 26, 1987 (52 FR 32179).

Public Hearing

A public hearing in connection with the investigation is already scheduled to be held in the Commission Hearing Room, 701 E Street NW., Washington, DC 20436, beginning at 9:30 a.m. on October 7, 1987, and continuing as required on October 8 and 9. Persons wishing to appear at the public hearing in connection with the product being added to the investigation should file requests to appear and should file prehearing briefs (original and 14 copies) with the Secretary, United States International Trade Commission, 701 E Street NW., Washington, DC 20436, not later than noon, October 2, 1987. Post-hearing briefs are required by October 16, 1987.

Written Submissions

In lieu of or in addition to appearances at the public hearing, interested persons are invited to submit

written statements concerning the investigation. Written statements for the product being added to this investigation must be received by the close of business on October 20, 1987. Commercial or financial information which a submitter desires the Commission to treat as confidential must be submitted on separate sheets of paper, each clearly marked "Confidential Business Information" at the top. All submissions requesting confidential treatment must conform with the requirements of § 201.6 of the Commission's *Rules of Practice and Procedure* (19 CFR 201.6). All written submissions, except for confidential business information, will be made available for inspection by interested persons. All submissions should be addressed to the Secretary at the Commission's office in Washington, DC.

Hearing-impaired individuals are advised that information on this matter can be obtained by contacting our TDD terminal on (202) 724–0002.

By order of the Commission.

Kenneth R. Mason,

Secretary.

Issued: September 30, 1987.

BILLING CODE 7020–02–M

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 31111]

Exemption; Joint Project for Relocation of a Line of Railroad; Burlington Northern Railroad Co. and Southern Pacific Transportation Co.

On September 18, 1987, Burlington Northern Railroad Company (BN) filed a notice of exemption under 49 CFR 1180.2(d)(5) for a joint project with the Southern Pacific Transportation Company (SP) to relocate a line of railroad.

BN and SP both own lines of railroad in Washington County, OR. The joint project involves: (1) BN's acquisition of overhead trackage rights from SP between SP milepost 756.94 at St. Marys and SP milepost 765.71 at Hillsboro; and (2) the discontinuance of BN's overhead trackage rights over SP between SP milepost 774.77 at Banks and SP milepost 765.50 at Hillsboro.

SP had previously granted bridge trackage rights to Oregon Electric Railway Company (OE) between the above-mentioned SP mileposts at Banks and Hillsboro. BN has since succeeded OE as the grantee of those trackage rights.

Now, BN and SP intend to substitute the new overhead trackage rights between St. Marys and Hillsboro for the existing overhead trackage rights between Banks and Hillsboro. The trackage rights granted to BN between St. Marys and Hillsboro and BN's discontinuance of service between Banks and Hillsboro are effective on September 28, 1987.

SP service is not affected by the transaction. The relocation will provide BN with a shorter route to and from Hillsboro, and will result in more efficient and economical operations. BN has filed a petition for waiver of the environmental reporting requirements since the subject transaction will have no significant physical impact on the environment. The waiver request has been granted by decision served October 6, 1987.

The joint project involves the relocation of a line of railroad that does not disrupt service to shippers. Accordingly, it falls within the class of transactions identified at 49 CFR 1180.2(d)(5). The Commission categorically exempted these transactions under 49 U.S.C. 10505 in *Railroad Consolidation Procedures*, 366 I.C.C. 75 (1982). The Commission determined that line relocations embrace trackage rights transactions such as the one proposed here. *See D.T.&I.R.—Trackage Rights*, 363 I.C.C. 878 (1981).

Use of this exemption will be conditioned on appropriate labor protection. Any employees affected by the trackage rights agreement will be protected by the conditions in *Norfolk and Western Ry. Co.—Trackage Rights—BN*, 354 I.C.C. 605 (1978), as modified by *Mendocino Coast Ry., Inc.—Lease and Operate*, 360 I.C.C. 653 (1980). Any employees affected by the discontinuance will be protected by the conditions in *Oregon Short Line R. Co.—Abandonment—Goshen*, 360 I.C.C. 91 (1979).[1]

Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction.

Decided: September 28, 1987.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

[FR Doc. 87–22927 Filed 10–5–87; 8:45 am]

BILLING CODE 7035–01–M

[1] The Railway Labor Executives' Association filed a request for labor protection. Since this transaction involves an exemption from 49 U.S.C. 11343, whereby the imposition of labor protective conditions is mandatory, labor protective conditions have been imposed.

[Finance Docket No. 31110]

Exemption, Acquisition and Operation—Rail Line of Chicago and North Western Transportation Co. Between Harvard and Chemung in McHenry County, IL; Chicago-Chemung Railroad Corp.

Chicago-Chemung Railroad Corporation (CCRC) has filed a notice of exemption to acquire and operate a 3.5-mile line of the Chicago and North Western Transportation Company (CNW) between milepost 64.0 near Harvard, IL, and milepost 67.5 near Chemung, IL, and 0.5 miles of incidental trackage rights between milepost 64.0 and milepost 63.5. The trackage rights are to enable CCRC to use the CNW passing track for interchanging trainloads of grain. Comments must be filed with the Commission and served on: Thomas F. McFarland, Jr., Belnap, Spencer, McFarland, Emrich & Herman, 20 North Wacker Drive, Chicago, IL 60606, (312) 236–0204.

This notice is filed under 49 CFR 1150.31. If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time.[1] The filing of a petition to revoke will not automatically stay the transaction.

Decided: September 23, 1987.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

BILLING CODE 7035–01–M

[Docket No. AB–6 (Sub-No. 294X)]

Exemption; Abandonment in King and Kittitas Counties, WA; Burlington Northern Railroad Co.

Applicant has filed a notice of exemption under 49 CFR Part 1152 Subpart F—*Exempt Abandonments* to abandon its 36.56-mile line of railroad between milepost 2137.25 near Cedar Falls and milepost 2100.69 near Cabin Creek, in King and Kittitas Counties, WA.

Applicant has certified that: (1) No local traffic has moved over the line for at least 2 years and that any overhead traffic may be rerouted; and (2) no formal complaint filed by a user of rail service on the line (or by a State or local

[1] On September 22, 1987, the Commission denied a petition for stay filed by Patrick W. Simmons, Illinois Legislative Director for the United Transportation Union.

VOL 52 ISS 193 OCT 6 1987 UMI

governmental entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Commission or any U.S. District Court, or has been decided in favor of the complainant within the 2-year period. The appropriate State agency has been notified in writing at least 10 days prior to the filing of this notice.

Applicant has filed an environmental report which shows that no significant environmental or energy impacts are likely to result from this abandonment.

As a condition to use of this exemption, any employee affected by the abandonment shall be protected pursuant to *Oregon Short Line R. Co.—Abandonment—Goshen*, 360 I.C.C. 91 (1979).

The exemption will be effective November 5, 1987 (unless stayed pending reconsideration). Petitions to stay must be filed by October 16, 1987, and petitions for reconsideration, including environmental, energy, and public use concerns, must be filed by October 26, 1987, with:

Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any petition filed with the Commission should be sent to applicant's representative:

Peter M. Lee, Assistant General Counsel, Burlington Northern Railroad Company, 3800 Continental Plaza, 777 Main Street, Fort Worth, TX 76102.

If the notice of exemption contains false or misleading information, use of the exemption is void *ab initio*.

A notice to the parties will be issued if use of the exemption is conditioned upon environmental or public use conditions.

Decided: September 22, 1987.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF LABOR

Employment and Training Administration

[TA-W-19, 958 et al.]

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance; Kimberly Clark Corp.

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period September 21, 1987—September 25, 1987.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-19,958; Kimberly Clark Corp., Spotswood, NJ

TA-W-19,906; Texas Industries, Inc., Midlothian, TX

TA-W-19,871; Deena Products Co., Arlington, KY

TA-W-19,918; Precise Metals & Plastic, Inc., Cumberland Div., Cumberland, MD

TA-W-19,932; General Motors Corp., Central Foundry, Saginaw, MI

TA-W-19,933; General Motors Corp., Central Foundry, Pontiac, MI

TA-W-19,935; General Motors Corp., CPC Grand Rapids, Grand Rapids, MI

TA-W-19,936; General Motors Corp., CPC Marion, Marion, IN

TA-W-19,940; General Motors Corp., Fisher Guide Div., Flint, MI

TA-W-19,941; General Motors Corp., Hydramatic Div., Muncie, IN

TA-W-19,942; General Motors Corp., Inland Div., Euclid, OH

TA-W-19,943; General Motors Corp., Inland Div., Livonia, MI

TA-W-19,945; General Motors Corp., Saginaw Div., Athens, AL

TA-W-19,946; General Motors Corp., Saginaw Div., Buffalo, NY

TA-W-19,947; General Motors Corp., Saginaw Div., Detroit Gear & Axle, Detroit, MI

TA–W–19,937; General Motors Corp., Detriot Diesel-Allison Div., Indianapolis, IN

TA–W–19,938; General Motors Corp., Electro-Motive Div., La Grange, IL

In the following cases the investigation revealed that criterion (3) has not been met for the reasons specified.

TA–W–19,927; General Motors Corp., CPC Bowling Green, Bowling Green, KY

Increased imports did not contribute importantly to workers separations at the firm.

TA–W–19,957; General Motors Corp., BOC Leeds, Kansas City, MO

Increased imports did not contribute importantly to workers separations at the firm.

TA–W–19,924; General Motors Corp., BOC Lansing, Lansing, MI

Increased imports did not contribute importantly to workers separations at the firm.

TA–W–19,999; R.E., Schall Mining Co., Inc., Raymond Schall Trucking, Kittaning, PA

Imports of coal are negligible.

TA–W–20,025; Vandrill, Inc., Edmond, OK

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA–W–19,994; Daco, Inc., Borger, TX

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA–W–19,923; General Motors Corp., BOC Hamtramck, Detroit, MI

Increased imports did not contribute importantly to workers separations at the firm.

TA–W–19,926; General Motors Corp., BOC Wentzville Assembly Center, Wentzville, MO

Increased imports did not contribute importantly to workers separations at the firm.

TA–W–19,925; General Motors Corp., BOC Orion Assembly, Orion Township, MI

Increased imports did not contribute importantly to workers separations at the firm.

TA–W–19,944; General Motors Corp., Rochester Products Grand Rapids, MI

Increased imports did not contribute importantly to workers separations at the firm.

TA–W–19,948; General Motors Corp., Saginaw Div., Saginaw, MI

Increased imports did not contribute importantly to workers separations at the firm.

TA–W–19,922; General Motors Corp., BOC Buick Assembly, Flint, MI

The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period as required for certification.

Affirmative Determinations

TA–W–19,928; General Motors Corp., CPC Pontiac Fiero, Pontiac, MI

A certification was issued covering all workers of the firm separated on or after July 16, 1986.

TA–W–20,026; Al Tech Specialty Steel Corp., Toledo Tool Steel Depot, Walbridge, OH

A certification was issued covering all workers of the firm separated on or after July 29, 1986.

TA–W–19,955; Finkel Outdoor Products, Garfield, NJ

A certification was issued covering all workers of the firm separated on or after June 17, 1986.

TA–W–19,909; A & L Seaman, Bayshore, NY

A certification was issued covering all workers of the firm separated on or after July 1, 1986.

TA–W–19,953; Everything is Jake, Inc., Allentown, PA

A certification was issued covering all workers of the firm separated on or after July 13, 1986.

TA–W–19,949; Ajax Frock, Inc., New York, NY

A certification was issued covering all workers of the firm separated on or after July 16, 1986.

TA–W–19,018; Moseley Petroleum Corp., Dallas, TX

A certification was issued covering all workers of the firm separated on or after August 6, 1986.

TA–W–19,931; General Motors Corp., Central Foundry-Defiance, Defiance, OH

A certification was issued covering all workers of the firm separated on or after July 16, 1986.

TA–W–19,934; General Motors Corp., CPC Flint Engine, Flint MI

A certification was issued covering all workers of the firm separated on or after July 16, 1986 and before September 1, 1987.

TA–W–19,939; General Motors Corp., Fisher Guide Div., Anderson, IN

A certification was issued covering all workers of the firm separated on or after July 16, 1986.

TA–W–19,991; Barad & Company, Thayer, MO

A certification was issued covering all workers of the firm separated on or after July 29, 1986 and before September 7, 1987.

I hereby certify that the aforementioned determinations were issued during September 21, 1987–September 25, 1987. Copies of these determinations are available for inspection in Room 6434, U.S. Department of Labor, 601 D Street, NW., Washington, DC 20213 during normal business hours or will be mailed to persons who write to the above address.

Marvin M. Fooks,

Director, Office of Trade Adjustemnt Assistance.

Dated: September 29, 1987.

BILING CODE 4510–30–M

Mine Safety and Health Administration

Establishment of Advisory Committee

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice of Establishment of Advisory Committee.

SUMMARY: The Secretary of Labor has determined that it is in the public interest to establish an Advisory Committee to review standards and regulations related to the approval and use of diesel-powered equipment in underground coal mines. The Committee would provide a collective expertise not otherwise available to the Secretary to address the complex and sensitive issues involved. The Secretary is considering promulgation of diesel standards and regulations for underground coal mines under sections 101 and 508 of the Federal Mine Safety and Health Act of 1977 (Mine Act).

DATE: Comments must be received on or before October 21, 1987.

ADDRESS: Send comments to the Office of Standards, Regulations, and Variances; Mine Safety and Health Administration; Room 631; Ballston Tower #3; 4015 Wilson Boulevard; Arlington, Virginia 22203.

FOR FURTHER INFORMATION CONTACT: Patricia W. Silvery, Acting Associate Assistant Secretary for Mine Safety and Health, MSHA, (703) 235–1910.

SUPPLEMENTARY INFORMATION: Over the past decade, diesel-powered equipment has been introduced into the underground coal mining industry in increasing numbers. MSHA does not have standards or regulations applicable

VOL 52 ISS 193 OC 6 1987 UMI

to diesel-powered equipment in underground coal mines. MSHA's existing regulations (30 CFR Part 36) address diesel-powered equipment for noncoal mines. MSHA encourages underground coal mine operators to use equipment approved under Part 36; however, equipment without explosion-proof features is being used.

The internal-combustion engines of diesel-powered equipment present potentially serious fire and explosion hazards from, for example, the escape of flame and high surface temperatures. To be safe in the potentially explosive atmosphere of underground coal mines, this equipment needs to be specially designed to protet against these hazards. In addition, the combustion products of diesel engines may contain potentially harmful airborne contaminants which when released into the mine atmosphere could endanger the health of miners.

In accordance with the provisions of the Federal Advisory Committee Act and after consultation with the General Services Administration; the Secretary of Labor has determined that the establishment of the Advisory Committee on Standards and Regulations for Diesel-Powered Equyipment in Underground Coal Mines is in the public interest in connection with performance of the duties imposed on the Department by section 101 of the Mine Act.

The Committee will advise the Secretary of Labor on safety and health standards related to the use of diesel-powered equipment in underground coal mines. It will also review related data and information and make recommendations to the Secretary of Labor regarding regulations. The appropriateness of diesel equipment use in underground coal mines will not be an issue to be addressed by the Committee.

As required by section 102(c) of the Mine Act, the majority of the Committee will be composed of individuals who have no economic interests in the mining industry and who are not operators, miners, or officers or employees of the Federal Government or any State, or local government. There will be nine committee members: Two representing labor, two representing industry, and five persons with no economic interests in the industry.

The Committee will function solely as an advisory body and in compliance with the provisions of the Federal Advisory Committee Act. Its charter will be filed under that Act fifteen days from the date of this publication.

Interested persons are invited to submit comments regarding the establishment of the Committee on Standards and Regulations for Diesel-Powered Equipment in Underground Coal Mines to Patricia W. Silvey, Acting Associate Assistant Secretary for Mine Safety and Health, at the aforementioned address.

Date: October 1, 1987.

William E. Brock,

Secretary of Labor.

[FR Doc. 87-23076 Filed 10-5-87; 8:45 am]

BILLING CODE 9510-43-M

[Docket No. M-87-16-M]

Petition for Modification of Application of Mandatory Safety Standard; Van Dyke Minerals, Ltd.

Van Dyke Minerals, Ltd., 17233 East Kenyon Drive, Aurora, Colorado 80013 has filed a petition to modify the application of 30 CFR 57.4533 (mine opening vicinity)— to its Bueno Mine (I.D. No. 05-02404) located in Boulder County, Colorado. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that surface buildings or other similar structures within 100 feet of mine openings used for intake air or within 100 feet of mine opoenings that are designated escapeways in exhaust air be constructed of noncombustible materials; or constructed to meet a fire resistance rating of no less than one hour; or provided with an automatic fire suppression system; or covered on all combustible interior and exterior structural surfaces with noncombustible material, such as five-eighth inch, type "X" gypsum wall-board.

2. As an alternate method, petitioner proposes to locate the shed 85 feet from the portal in lieu of the 100 feet as required.

3. In support of this request, petitioner states that the portal is covered with fire retardant paint, there is virtually no flammable vegetation between the portal and the shed, the air flows out of the portal, and there is a secondary exit.

4. For these reasons petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before November 5, 1987. Copies of the petition are available for inspection at that address.

Patricia W. Silvey,

Acting Associate Assistant Secretary for Mine Safety and Health.

Date: September 22, 1987.

BILLING CODE 4510-43-M

Pension and Welfare Benefits Administration

Advisory Council on Employee Welfare and Pension Benefits Plans; Work Group Meeting

Pursuant to the authority contained in section 512 of the Employee Retirement Income Security Act of 1974 (ERISA), 29 U.S.C. 1142, a public meeting of the Work Group on Employee Stock Ownership Plans (ESOP) of the Advisory Council on Employee Welfare and Pension Benefit Plans will be held at 10:30 a.m., Tuesday, October 27, 1987, in Room N-3437B,C, U.S. Department of Labor Building, Third and Constitution Avenue, NW., Washington, DC 20210.

This nine-member work group was formed by the Advisory Council to study various ERISA issues relating to employee stock ownership plans (ESOP's).

The purpose of the October 27 meeting is to review and consider a draft report on the use of ESOPs in conjunction with leveraged buyouts involving multiple investors.

Individuals, or representatives or organizations, wishing to address the work group should submit written requests on or before October 22, 1987 to Charles W. Lee, Jr., Executive Secretary, ERISA Advisory Council, U.S. Department of Labor, Room N-5677, 200 Constitution Avenue, NW., Washington, DC 20210. Oral presentations will be limited to ten minutes, but witnesses may submit an extended statement for the record.

Organizations or individuals may also submit statements for the record without testifying. Twenty (20) copies of such statements should be sent to the Executive Secretary of the Advisory Council at the above address. Papers will be accepted and included in the record of the meeting if received on or before October 22, 1987.

Signed at Washington, DC, this 1st day of October, 1987.

David M. Walker,

Assistant Secretary-Designate for Pension and Welfare Benefits Administration.

Pursuant to the authority contained in 10 CFR 2.721, the Atomic Safety and Licensing Board for *Advanced Medical Systems, Inc.*, Docket No. 30–16055–0M, is hereby reconstituted by appointing Administrative Judges Robert M. Lazo, Ernest E. Hill and Harry Foreman in place of Administrative Law Judge Ivan W. Smith, who is unable to serve.

As reconstituted, the Board is comprised of the following Administrative Judges: Dr. Robert M. Lazo, Chairman; Mr. Ernest E. Hill; Dr Harry Foreman.

All correspondence, documents and other material shall be filed with the Board in accordance with 10 CFR 2.701 (1980). The addresses of the new Board members are:

Administrative Judge Dr. Robert M. Lazo, Chairman, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555

Administrative Judge Ernest E. Hill, Hill Associates, 210 Montego Drive, Danville, California 94526.

Administrative Judge Harry Foreman, 1564 Burton Avenue, St. Paul, Minnesota 55108

Issued at Bethesda, Maryland, this 29th day of September 1987.

Robert M. Lazo

Acting Chief Administrative Judge, Atomic Safety and Licensing Board Panel.

BILLING CODE 7590-01-M

[Source Material License No. SUA-917; Docket No. 40-3453-SP; ASLBP No. 87-557-05-SP]

Designation of Presiding Officer; Atlas Minerals Division of Atlas Corp.

Pursuant to delegation by the Commission dated December 29, 1972, published in the **Federal Register**, 37 FR 28710 (1972) and §§ 2.105, 2.700, 2.702, 2.714, 2.714a, 2.717 and 2.721 of the Commission's Regulations, all as amended, a presiding officer is designated in the following proceeding:

Atlas Mineral Division of Atlas Corp.

Source Material License No. SUA-917

The presiding officer is being designated pursuant to an Order of the Commission, dated September 25, 1987, granting a request for a hearing by Atlas Minerals Division of Atlas Corporation regarding the Regional Administrator's denial of its application to renew Source Material License No. SUA-917.

The presiding officer in this proceeding is Administrative Judge John H Frye.

Following consultation with the Panel Chairman, pursuant to the provisions of 10 CFR 2.722, the Presiding Officer has appointed Administrative Judge James H. Carpenter to assist the Presiding Officer in taking evidence and in preparing a suitable record for review.

All correspondence, documents and other materials shall be filed with Judge Frye and Judge Carpenter in accordance with 10 CFR 2.701. There addresses are:

Administrative Judge John H Frye, Presiding Officer, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555

Administrative Judge James H Carpenter, Special Assistant, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555

Issued at Bethesda, Maryland, this 29th day of September 1987.

Robert M. Lazo,

Acting Chief Administrative Judge, Atomic Safety and Licensing Board Panel.

BILLING CODE 7590-01-M

OFFICE OF PERSONNEL MANAGEMENT

Proposed Extension of Forms Submitted to OMB for Clearance

AGENCY: U.S. Office of Personnel Management.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1980 (Title 44, U.S.C., Chapter 35), this notice announces a proposed extension of forms which collect information from the public. The Establishment Information Form, the Wage Data Collection Form, and the Continuation Form are wage survey forms developed by the Office of Personnel Management and used by three lead agencies, the Department of Defense, the Veterans Administration, and the National Aeronautics and Space Administration, to survey private sector business establishments. The surveys are conducted annually to determine the level of wages paid by private enterprise establishments for representative jobs which are common to both private industry and Government. The lead agencies use this information to establish rates of pay for Federal Wage System employees, competitive with the private sector. For copies of this proposal, call William C. Duffy, Agency Clearance Officer, on (202) 632-7714.

DATE: Comments on this proposal should be received on or before October 20, 1987.

ADDRESSES: Send or deliver comments to—

William C. Duffy, Agency Clearance Officer, U.S. Office of Personnel Management, 1900 E Street NW., Room 6410, Washington, DC 20415

and

Joseph Lackey, Information Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3002, New Executive Office Building, NW., Washington, DC 20503

FOR FURTHER INFORMATION CONTACT: William C. Duffy, (202) 632-7714.

U.S. Office of Personnel Management.

James Colvard,

Deputy Director.

BILLING CODE 6325-01-M

SECURITIES AND EXCHANGE COMMISSION

Forms Under Review By Office of Management and Budget

Agency Clearance Officer: Kenneth A. Fogash, (202) 272-2142

Upon Written Request Copy Available from: Securities and Exchange Commission, Office of Consumer Affairs, 450 Fifth Street, NW., Washington, DC 20549

New File No. 270-313, Rule 10b-6

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission has submitted for clearance on an emergency basis a proposal to require certain members of the International Stock Exchange of the United Kingdom and the Republic of Ireland, Limited ("ISE") to notify the ISE and the Commission and retain certain transaction information for two years as conditions to relying on an exemption from Rule 10b-6 under the Securities Exchange Act of 1934. The exemption would allow an ISE member firm to engage in "passive market making" transactions whenever it is participating in a multinational offering of a security designated 'alpha" or "beta" by the ISE, with a portion to be distributed in the U.S., or whenever the ISE firm's U.S. affiliates are participating in a distribution in the U.S. of such security. Rule 10b-6 prohibits persons participating in a distribution from bidding for or purchasing the security being distributed, or a related security, during the distribution. Rule 10b-6(h) permits the Commission to exempt transactions from Rule 10b-6 either unconditionally or on specified terms or conditions. The omnibus exemption should result in considerable cost savings to affected ISE member firms and to Commission staff, since a written exemption request will not have to be made by individual firms, and reviewed and responded to by the staff, each time a multinational offering of a U.K. security occurs. It is estimated that approximately 15 broker-dealers will rely on the exemption during FY 1988 at an estimated annual average of 26.4 hours.

Submit comments to OMB Desk Officer: Mr. Robert Neal, (202) 395-7340, Office of Information and Regulatory Affairs, Office of Management and

Budget, Room 3228 NEOB, Washington, DC 20503.

Jonathan G. Katz,

Secretary.

September 29, 1987.

BILLING CODE 8010-01-M

[Release No. 34—24948; File No. SR-AMEX-87-22]

Self-Regulatory Organization's; Proposed Rule Change by the American Stock Exchange, Inc. Relating to Long-term Options

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on September 4, 1987 the American Stock Exhange, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The American Stock Exchange, Inc. ("AMEX" or "Exchange") proposes to amend Rule 903C as set forth below. *Underlining* indicates material proposed to be added; [brackets] indicate material proposed to be deleted.

Rule 903C—Series of Stock Index Options

(a) After a particular class of stock index options has been approved for listing and trading on the Exchange, the Exchange shall from time to time open for trading series of options therein. Within each approved class of stock index options, the Exchange may open for trading series of options expiring in consecutive calendar months ("consecutive month series"), as provided in subparagraph (i) of this paragraph (a), [and/or] series of options expiring at three-month intervals ("cycle month series"), as provided in subparagraph (ii) of this paragraph (a)[.] *and/or series of options having up to thirty-six months to expiration ("long-term options series") as provided in subparagraph (iii) of this paragraph (a).* Prior to the opeining of trading in any series of stock index options, the Exchange shall fix the expiration month and exercise price of option contracts included in each such series.

(i) No change.

(ii) No change.

(iii) Long-term Option Series—The Exchange may list, with respect to any class of stock index options, series of opitons having up to thirty-six months to expiration. Such series of options may be opened for trading simultaneously with series of options trading consecutive month series (as provided in subparagraph (i)) and/or with series of options trading on the cycle month series (as provided in subparagraph (ii)).

(b) No change.

(c) No Change.

The Exchange has indicated by letter that the listing of these long term stock index opitons will affect normal trading rules [1] and for that reason, clarifications will be made to the rules before their adoption.

The Exchange states that such long term series—series longer than current "normal" expirations—will be opened for trading either when there is buying or selling interest, or 40 minutes prior to the close, whichever occurs first. No quotations will be posted for such long term option series until they are opened for trading. When these option series come within the "normal expiration series", they will be treated like any other non-long term option for all trading procedures, including opening rotations.

The Exchange states that with respect to strike price intervals, bid/ask differentials and continuity rules, such rules will not apply to long term option series until the time to expiration "normalizes". However, such waiver will not prevent the potential of an Exchange finding of inadequate market-maker performance should a specialist and/or registered trader enter into transactions or make bids of offers in long term opitons that are inconsistent with the maintenance or a fair and orderly market.

The Exchange intends to monitor the trading in long term options closely and will re-examine the applicability of these rules to such options in one year's time.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The Exchange proposes to list long-term options on its broad-based indices. These long-term options would expire in either one, two or three years, however, the Exchange seeks to retain the right to also list options with intervening six month expirations (e.g. 1½, 2½ years). Initially, the Exchange plans to list long term options on only the Institutional Index ("XII") with initial long term expirations in December. In addition, strike price intervals may be wide than those currently being used and may be as wide as twenty five or fifty points.

For example, upon approval of this rule change and assuming an index level of 350, XII long term options could be introduced with expirations of December 1988, 1989 and/or 1990 with strike prices of 300 and/or 325; 350; and/or 375/400. Intervening expirations of June 1989 and/or June 1990 could also be listed.

Portfolio managers and other institutional customers have expressed a need for longer-term portfolio hedges. Currently, institutional investors can insure their portfolios with either futures positions or off-exchange customized options. Long-term options, as proposed by the Exchange, will give institutional investors an alternative by providing standardized options that have the benefit of issuance and clearance by the Options Clearing Corporation and a centralized, regulated secondary market on the Exchange.

The proposed change is consistent with the requirements of the Securities Exchange Act of 1934 ("1934 Act") and the rules and regulations thereunder applicable to the Exchange since it will add liquidity to the market by allowing institutional investors to hedge the risks of their stock portfolios over a longer period of time and with a known and limited cost.

Therefore, the proposed rule change is also consistent with section 6(b)(5) of the 1934 Act, which provides in pertinent part, that the rules of the Exchange be designed to promote just and equitable principles of trade and to protect the investing public.

[1] Letter from Howard A. Baker, Senior Vice President, American Stock Exchange to Joseph Furey, Division of Market Regulation, SEC, dated September 21, 1987.

VOL 52 ISS 193 OC 6 1987 UMI

D. Self-Regulatory Organization's Statement on Burden on Competition

The AMEX believes that the proposed rule change will not impose a burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

The Options Committee, a committee of the AMEX Board of Governors comprised of members and representatives of member firms, has endorsed the proposed rule change.

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the Submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted within 21 days after the date of this publication.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: September 29, 1987.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

Self-Regulatory Organizations; Applications for Unlisted Trading Privileges and of Opportunity for Hearing; Midwest Stock Exchange, Inc.

September 30, 1987.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to section 12(f) (1) (B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the following securities:

Allstate Municipal Income Trust
Shares of Beneficial Interest (File No. 7-0502)
Firstfed Financial Corp.
Common Stock, $.01 Par Value (File No. 7-0503)
Dixons Group PLC
American Depositary Shares Each Representing 3 Ordinary Shares of 10P Each (File No. 7-0504)
Dreyfus Strategic Municipals Inc.
Common Stock, $.001 Par Value (File No. 7-0505)
Charles Schwab Corporation (The)
Common Stock, $.01 Par Value (File No. 7-0506)
Union Texas Petroleum Holdings Inc.
Common Stock, $.01 Par Value (File No. 7-0507)
Champion Enterprises Inc.
Common Stock, $1.00 Par Value (File No. 7-0508)
Battle Mountain Gold Co.
Common Stock, $.10 Par Value (File No. 7-0509)

These securities are listed and registered on one or more other national securities exchange and is reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before October 21, 1987 written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Release No. IC-16016; File No. 812-6777]

Application for Exemption; Delaware Group Premium Fund, Inc.

September 29, 1987.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 (the "1940 Act").

Applicant: Delaware Group Premium Fund, Inc.

Relevant 1940 Act Sections: Exemption requested under section 6(c) from sections 9(a), 13(a), 15(a), and 15(b) and Rules 6e-2(b)(15) and 6e-3(T)(b)(15).

Summary of Application: Applicant requests an exemption permitting it to offer its shares to a class of life insurers ("Participating Insurance Companies") in connection with variable annuity contracts and variable life insurance policies offered by the Participating Insurance Companies. Such Participating Insurance Companies may or may not be affiliated with each other.

Filing Date: The application was filed on June 26, 1987 and amended on September 2, 1987.

Hearing or Notification: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any request must be received by the SEC no later than 5:30 p.m., on October 26, 1987. Request a hearing in writing, giving the nature of your interest, the reasons for the request, and the issues you contest. Applicant should be served with a copy of the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for attorneys, by certificate. Notification of the date of a hearing should be requested by writing to the Secretary of the SEC.

ADDRESS: Secretary, Securities and Exchange Commission, 450 5th Street, NW., Washington, DC 20549. Delaware Group Premium Fund, Inc., 10 Penn Center Plaza, Philadelphia, PA 19103.

FOR FURTHER INFORMATION CONTACT: Jeffrey M. Ulness, Attorney, at (202) 272-2026, or Lewis B. Reich, Special Counsel, (Division of Investment Management).

SUPPLEMENTARY INFORMATION: Following is a summary of the application. The complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's Commercial Copier at (800) 231-3282 (in Maryland (301) 258-4300).

Applicant's Representations

1. Applicant is registered under the 1940 Act as an open end diversified management investment company of the series type. It currently has four Portfolios (Series): Equity/Income Series, High Yield Series, Capitol Reserves Series and Multiple Strategy Series.

2. Applicant proposes to offer its shares to the separate accounts of Participating Insurance Companies which issue either variable annuity contracts or scheduled or flexible premium variable life insurance contracts (together, "variable life insurance"). The use of a common investment management company as the investment medium of both variable annuities and variable life insurance is referred to herein as "mixed funding." The use of a common investment management company as the investment medium for separate accounts of unaffiliated insurance companies is referred to herein as "shared funding."

3. Rules 6e-2 and 6e-3(T) under the Act provide certain exemptions from the Act in order to permit insurance company separate accounts to issue variable life insurance. Rule 6e-2(b)(15), however, precludes mixed and shared funding and Rule 6e-3(T)(b)(15) precludes shared funding. Applicant has requested exemptive relief to the extent necessary to permit shares of the Applicant to be sold for mixed funding and shared funding. Applicant proposes that the requested relief extend to a class consisting of life insurers and variable life separate accounts investing in Applicant (and principal underwriters and depositors of such separate accounts) which would otherwise be precluded from investing in Applicant by virtue of Applicant offering its shares to variable annuity separate accounts or unaffiliated separate accounts.

4. Applicant asserts that granting the request for relief to engage in mixed and shared funding will benefit variable contract owners by: (1) Eliminating a significant portion of the costs of establishing and administering separate funds; (2) allowing for the development of larger pools of assets resulting in greater cost efficiencies; and (3) encouraging more insurance companies to offer variable contracts, which should result in increased competition and lower contract charges. Applicant asserts that the Portfolios will not be managed to favor or disfavor any particular insurer or type of insurance product.

Disqualification

5. Applicant requests relief from section 9(a) and Rules 6e-2(b)(15) and 6e-3(T)(b)(15) to the extent necessary to permit mixed and shared funding. Applicant proposes that the relief granted by paragraph (b)(15) of Rules 6e-2 and 6e-3(T) from section 9(a) be extended to Participating Insurance Companies and variable life separate accounts which may use Applicant as an investment medium to fund variable life insurance contracts, subject to the conditions regarding conflicts set out below.

6. In support of this request for relief, Applicant asserts that the same policies that led the Commission to limit the provisions of section 9(a) to those employees of an insurance company engaged in managing the separate account are applicable to insurance companies and their separate accounts that are funded by a fund offering mixed and shared funding. Thus, Applicant argues that it would serve no regulatory purpose to apply the provisions of section 9(a) to the many employees of the Participating Insurance Companies whose separate accounts may utilize Applicant as a funding medium for variable life insurance contracts. Moreover, Applicant submits that applying the requirements of section 9(a) in such cases would increase the costs of monitoring for compliance with that section, which would reduce the net rates of return realized by contractowners. Under the relief requested, section 9 would still be in effect and would insulate Applicant from those individuals who are disqualified under the Act.

Voting

7. Applicant requests relief from sections 13(a), 15(a), and 15(b) of the Act and Rules 6e-2(b)(15) and 6e-3(T)(b)(15) thereunder to the extent necessary to permit mixed and shared funding: i.e., Applicant proposes that the relief granted by paragraph (b)(15) of Rules 6e-2 and 6e-3(T) from sections 13(a), 15(a) and 15(b) be extended to the Participating Insurance Companies and their variable life separate accounts which use Applicant as an investment medium to fund variable life contracts subject to the conditions regarding conflicts set out below.

8. In support of this request for relief, Applicant states that all variable annuity and variable life contractowners will be provided pass-through voting rights with respect to shares of the Applicant. Because paragraphs (b)15) of both Rule 6e-2 and

VOL 52 ISS 193 OC 6 1987 UMI

Rule 6e–3(T) permit the insurance company to disregard these voting instructions in certain limited circumstances. Applicant acknowledges that this may cause an irreconcilable conflict to develop among the separate accounts. Applicant proposes to resolve these potential conflicts through certain undertakings it propose as conditions to receipt of exemptive relief set out below. Thus, according to Applicant, if a particular Participating Insurance Company's disregard of voting instructions conflicted with the voting instructions of a majority of the contractowners, or precluded a majority vote, the insurer may be required, at Applicant's election, to withdraw its separate account's investment in Applicant. The Participating Insurance Companies will vote shares for which they have not received voting instructions, as well as shares attributable to them, in the same proportion as they vote shares for which they have received instructions.

Applicant's Conditions

Applicant states that it will comply with the following conditions:

1. A majority of the Board of Directors of Applicant ("Board") shall consist of persons who are not interested persons of Applicant, as defined by the 1940 Act.

2. The Board will monitor Applicant for the existence of any material irreconcilable conflict between the interests of the contractowners of all separate accounts investing in Applicant.

An irreconcilable material conflict may arise for a variety of reasons, including: (a) An action by any state insurance regulatory authority; (b) a change in applicable federal or state insurance tax, or securities law or regulations, or a public ruling, private letter ruling, or any similar action by insurance, tax, or securities regulatory authorities; (c) an administrative or judicial decision in any relevant proceeding; (d) the manner in which the investments of any Portfolio are being managed; (e) a difference in voting instructions given by variable annuity contractowners and variable life insurance contractowners or by contractowners of different Participating Insurance Companies; or (f) a decision by an insurer to disregard the voting instructions of contractowners.

3. Participating Insurance Companies and the Investment Adviser will report any potential or existing conflicts to Applicant's Board. Participating Insurance Companies will be responsible for assisting the Board in carrying out its responsibilities by providing the Board with all information reasonably necessary for the Board to consider any issues raised including information as to a decision by an insurer to disregard voting instructions of contractowners. The responsibility to report such information and conflicts and to assist the Board will be contractual obligations of all insurers investing in Applicant under their agreements governing participation in Applicant.

4. If it is determined by a majority of the Board of Applicant or a majority of its disinterested trustees that a material irreconcilable conflict exists, the relevant Participating Insurance Companies shall, at their expense, take whatever steps are necessary to remedy or eliminate the irreconcilable material conflict, which steps could include: (a) Withdrawing the assets allocable to some or all of the separate accounts from Applicant or any Series (Portfolio) and reinvesting such assets in a different investment medium, including another Portfolio of Applicant, or submitting the question of whether such segregation should be implemented to a vote of all affected contractowners and, as appropriate, segregating the assets of any particular group (i.e., annuity contractowners, life insurance contractowners, or variable contractowners of one or more Participating Insurance Companies) that votes in favor of such segregation, or offering to the affected contractowners the option of making such a change; and (b) establishing a new registered management investment company or managed separate account. If a material irreconcilable conflict arises because of a Participating Insurance Company's decision to disregard contractowner voting instructions and that decision represents a minority position or would preclude a majority vote, the Participating Insurance Company may be required, at Applicant's election, to withdraw its separate account's investment in Applicant, and no charge or penalty will be imposed against a separate account as a result of such a withdrawal. The responsibility to take remedial action in the event of a Board determination of an irreconcilable material conflict and to bear the cost of such remedial action shall be a contractual obligation of all Participating Insurance Companies under their agreements governing participation in Applicant and those responsibilities will be carried out with a view only to the interests of their contractowners. For purposes of this condition 4, a majority of the disinterested members of the Board shall determine whether or not any proposed action adequately remedies any irreconcilable conflict, but in no event will Applicant be required to establish a new funding medium for any variable contract. No Participating Insurance Company shall be required by this condition 4 to establish a new funding medium for any variable contract if an offer to do so has been declined by vote of a majority of affected contractowners.

5. The Board's determination of the existence of an irreconcilable material conflict and its implications shall be made known promptly to all Participating Insurance Compnies.

6. Participating Insurance Companies shall provide pass-through voting privileges to all variable contractowners so long as the Commission continues to interpret the Act to require pass-through voting privileges for variable contractowners. Paticipating Insurance Companies shall be responsible for assuring that each of their separate accounts participating in Applicant calculates voting privileges in a manner consistent with other Participating Insurance Companies. The obligation to calculate voting privileges in a manner consistent with all other separate accounts investing in Applicant shall be contractual obligation of all present and future Participating Insurance Companies under their agreements governing participation in Applicant. Participating Insurance Companies will vote shares for which they have not received voting instructions, as well as shares attributable to them, in the same proportion as they vote shares for which they have received instructions.

7. All reports received by the Board of potential or existing conflicts, determining the existence of a conflict, notifying Participating Insurance Companies of a conflict, and determining whether any proposed action adequately remedied a conflict, will be properly recorded in the minutes of the Board or other appropriate records, and such minutes or other records shall be made available to the Commission upon request.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–15–M

[Rel. No. IC-16015; 812-6802]

Application for Exemption; ICN Pharmaceuticals, Inc.

September 29, 1987.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 ("1940 Act").

Applicant: ICN Pharmaceuticals, Inc.

Relevant 1940 Act Section: Exemption requested under section 3(b)(2) or, alternatively, under section 6(c) of the 1940 Act.

Summary of Application: Applicant is seeking an order declaring that it is not an investment company under the 1940 Act or, in the alternative, an order exempting Applicant from all provisions of the 1940 Act until July 23, 1988. Applicant further requests a temporary order exempting Applicant from all provisions of the 1940 Act until a final determination is made on the application.

Filing Date: The application was filed on July 23, 1987.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on October 23, 1987. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for attorneys, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Applicant, 375 Park Avenue, New York 10152, Attention: Lawrence H. Penitz, Esq.

FOR FURTHER INFORMATION CONTACT: Sherry A. Hutchins, Staff Attorney, (202) 272–3026, or Brion R. Thompson, Special Counsel, (202) 272–3016 (Division of Investment Management.)

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier who can be contacted at (800) 231–3282 in Maryland (301) 358–4300).

Applicant's Representations

1. Applicant is a pharmaceutical and biomedical company primarily engaged, through majority-owned subsidiaries, in the development, manufacture, distribution and sale of pharmaceutical and biomedical products and services in the United States and several foreign countries. Applicant's pharmaceuticals group manufactures, distributes and sells over 300 pharmaceutical products in the United States and abroad. Through a joint venture, Applicant also conducts research and development on compounds derived from nucleic acids. Applicant's biomedical subsidiary manufactures and distributes research chemicals and radioactive and stable isotape labelled products and biochemicals and offers radiation monitoring services.

2. Applicant was incorporated in 1960 and engaged initially in the marketing and thereafter in the production of research chemicals. In 1968, Applicant began to carry out research into drugs for the treatment of viral diseases. By the early 1970's, this research had led to the synthesis of between 5,000 and 6,000 chemical compounds. A decision was made to concentrate further research and development on one of those compounds, ribavirin.

3. Since 1982, Applicant has pursued a program of acquiring compatible pharmaceutical and biomedical companies in order to expand its pharmaceutical and biomedical businesses. During this five-year period, Applicant acquired 13 pharmaceutical or biomedical companies at an aggregate cost of approximately $58,394,000. Ten of these acquisitions, with an aggregate purchase price of approximately $56,219,000, occurred within the last three and one-half years, with the latest aquisition having been completed in June, 1987. Additionally, Applicant currently is engaged in negotiations for the acquisition of additional pharmaceutical and biomedical companies. Applicant has retained the services of the investment banking firm of PaineWebber Incorporated ("PaineWebber") to assist Applicant in its efforts to acquire compatible companies.

4. Applicant's acquisition program is financed primarily through offerings of its equity and debt securities. In July 1986, Applicant sold 2,330,000 shares of its common stock and $115,000,000 principal amount of its debentures (the "Debentures") in simultaneous underwritten public offerings (the "1986' Offerings") from which it received aggregate net proceeds of approximately $148,000,000 on July 24, 1986. Additional issuances of Applicant's equity and debt securities during the period from 1983 through March 1987 in the United States and abroad resulted in additional net proceeds to Applicant of approximately $342,585,000. The stated used of proceeds of the 1986 Offerings focused on the acquisition of compatible pharmaceutical or biomedical companies by Applicant.

5. In order to preserve the value of the proceeds from the 1986 Offerings and to offset the debt service costs resulting from the issuance of the Debentures, Applicant purchased interest-bearing obligations with the proceeds of the 1986 offerings, pending application of those funds to the acquisition of pharmaceutical or biomedical companies. Approximately three weeks after the receipt of the proceeds of the 1986 Offerings, more than 40% of the value of Applicant's total assets (on an unconsolidated basis and exclusive of government securities and cash items) were comprised of positions in "investment securities" as defined in section 3(a)(3) of the 1940 Act. At May 31, 1987, the date of the last fiscal quarter for which financial statements are available, Applicant's positions in investment securities approximated 55.8% of the value of its total unconsolidated assets and 52.6% of the value of its total consolidated assets. This contrasts with the very substantial percentage of Applicant's total assets (excluding cash items and government securities), which historically has been represented by property, plant, equipment, inventory, receivables and other non-investment securities assets essential to its pharmaceutical and biomedical businesses as soon as reasonably practicable.

6. Applicant states that a substantial portion of its assets continue to be comprised of property, plant and equipment essential to its pharmaceutical and biomedical businesses. Applicant has represented in its Annual Reports to Shareholders, press releases and other public documents that it is engaged in the pharmaceutical and biomedical businesses. Applicant's eight directors and twelve elected officers dedicate substantially all of their working time in operational and administrative activities related to its pharmaceutical and biomedical businesses. Applicant's Board of Directors adopted a resolution declaring Applicant's continuing intention to be engaged primarily in noninvestment company businesses.

7. A very substantial portion of Applicant's consolidated reserve and income for recent periods has been

derived from its operations in the pharmaceutical and biomedical businesses. From November 30, 1984 through August 31, 1986, Applicant did not derive any net income from its securities positions. However, for the six months ended May 31, 1987, Applicant realized net income of $10,720,000, primarily from disposition of equity positions in former acquisition candidates, representing 20.7% of total revenue and 272.6% of total income. Further, its securities positions were assumed to, among other things, facilitate the expansion of its operating businesses.

8. From July 24, 1986, Applicant relied on the one year exemption provided by Rule 3a–2 under the 1940 Act for transient investment companies. Applicant's inability to expend substantially all of the funds from its 1986 Offerings within one year was in large measure due to factors beyond Applicant's control. The continued acquisition of pharmaceutical and biomedical businesses companies, the retention of PaineWebber to provide advice concerning acquisition candidates, the time managements spends on decisions relating to its acquisition program and the resolution adopted by Applicant's Board of Directors reflect Applicant's good faith efforts to primarily be engaged in noninvestment company business as soon as practicable.

Applicant's Legal Analysis

1. Applicant submits that its historical development, the nature of its assets, its public representations of policy, the activities of its officers and directors and the sources of its income demonstrate that Applicant is primarily engaged in the pharmaceutical and biomedical businesses and is not primarily engaged in the business of investing, reinvesting, owning, holding or trading in securities within the meaning of section 3(b)(2) of the 1940 Act and, therefore, is entitled to an order of the SEC under that provision.

2. In the alternative, Applicant submits that an order pursuant to section 6(c) of the 1940 Act exempting Applicant until July 23, 1988 is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policies and provisions of the 1940 Act. Applicant maintains that its contemplated operations are not susceptible to abuses of the sort that the 1940 Act was designed to remedy.

3. Applicant further submits that a temporary order exempting Applicant from all provisions of the 1940 Act pursuant to section 6(c) until a final determination is made on the application is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policies and provisions of the 1940 Act.

Applicant's Conditions

Applicant undertakes that during the period for which an exemption is provided.

1. Applicant will not engage in trading in securities for short-term speculative purposes, and

2. Applicant will continue to seek to acquire, as soon as reasonably possible, compatible pharmaceutical and biomedical businesses companies.

Temporary Order

The request for temporary exemptive relief pending a final determination on the application by the SEC has been considered, and its is found that, in view of the circumstances set forth above and in the application, that it is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act to grant an immediate temporary order as requested by Applicant. Accordingly.

It is ordered, pursuant to section 6(c) of the 1940 Act, that the application for a temporary order exempting Applicant from all provisions of the 1940 Act, be and hereby is, granted, during the period from September 21, 1987 until the SEC shall make a final determination upon the application, subject to the undertakings to which Applicant has consented and which are set forth above and in the application.

For the SEC, by the Division of Investment Management pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[Rel. No. IC–16017; (812–6168)]

Application for Exemption: Morgan Guaranty Trust Co. of New York

DATE: September 29, 1987.

AGENCY: Securities and Exchange Commission (SEC).

ACTION: Notice of amended application for exemption under the Investment Company Act of 1940. ("1940 Act").

Applicant: Morgan Guaranty Trust Company of New York.

Relevant 1940 Act Sections: Exemption requested under section 6(c) from section 17(f).

Summary of Application: Applicant seeks an order to permit maintenance of securities and other assets of investment companies registered under the 1940 Act other than an investment company registered under section 7(d) of the 1940 Act ("Investment Companies") for which Applicant serves as custodian or subcustodian with (i) Morgan Bank Nederland ("MBN"), Morgan Guaranty Australia Limited ("MGAL") or MGAL's nominee J.P. Morgan Nominees Pty. Limited ("JPMN"), all of which are indirect wholly-owned subsidiaries of J.P. Morgan & Co. Incorporated ("Foreign Subsidiaries") and (ii) Frankfurter Kassenverein, one of the central systems for the handling of securities in West Germany.

Filing Dates: Applicant's original application was filed on July 31, 1985, and amended on August 14, 1985, and an order granting that application was issued on September 11, 1985 (Investment Company Act Release No. 14713). The amendments to which this notice relates were filed on September 2 and 22, 1987.

Hearing or Notification of Hearing: If no hearing is ordered, the requested exemption will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on October 26, 1987. Request a hearing in writing, giving the nature of your interest, the reasons for your request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for in the case of an atorney-at-law, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 Fifth Street NW., Washington, DC 20549; Morgan Guaranty Trust Company of New York, Margaret M. Foran, Assistant Resident Counsel, 23 Wall Street, New York, NY 10015.

FOR FURTHER INFORMATION CONTACT: Thomas Mira, Staff Attorney, (202) 272–3033, or Brion R. Thompson, Special Counsel, (202) 272–3016 (Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier (800) 231–3282 (in Maryland (301) 258–4300).

Applicant's Representations

1. MBN is an indirect wholly-owned subsidiary of J.P. Morgan & Co.

Incorporated ("J.P. Morgan") and is regulated as a banking institution by the Central Bank of the Netherlands. MBN has been providing custody services for over 55 years and currently serves as subcustodian for Applicant's New York and European branches.

2. MGAL is an indirect wholly-owned subsidiary of J.P. Morgan and is an Australian merchant bank. As such, MGAL provides traditional merchant bank services to its clients including domestic short term money market operations, foreign exchange trading, international finance transactions and portfolio investment management.

3. JPMN is an indirect wholly-owned subsidiary of J.P. Morgan and is MGAL's nominee. Under this arrangement all securities purchased for MGAL or its clients are held by, and in the name of, JPMN. MGAL and JPMN have been providing custody services for over 30 years.

4. Frankfurter Kassenverein is one of the central systems for the handling of securities or equivalent book-entries in West Germany. It is the depository and clearing agency which services the Frankfurt Stock Exchange.

Applicant's Legal Analysis

1. MBN, MGAL and JPMN each do not have shareholders' equity in excess of U.S. $100 million and thus, Applicant may not rely upon the exemption from section 17(f) afforded by Rule 17f–5 in connection with the proposed foreign custody arrangements. Applicant submits that the Foreign Subsidiaries are experienced, capable and well qualified to provide custody services to Investment Companies, and that under the proposed foreign custody arrangements, the protection of investors will not be diminished.

2. With respect to the deposit of securities with Frankfurter Kassenverein, Applicant notes that it cannot rely upon the exemption afforded by provision (c)(2)(iii) of Rule 17f–5 because there is no single central system for handling securities in West Germany as contemplated by that provision. Applicant asserts that similar relief has been granted to other major U.S. banks and, for the same reasons described in those applications, Applicant seeks the same exemptive relief. Accordingly, Applicant submits that permitting the deposit of securities with Frankfurter Kassenverein and the Foreign Subsidiaries is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act.

Applicant's Conditions

If the requested order is granted, Applicant expressly consents to the following conditions:

1. The foreign custody arrangements proposed with respect to MBN, MGAL and JPMN will satisfy the requirements of Rule 17f–5 in all respects except the shareholders' equity requirement.

2. The foreign custody arrangements proposed with respect to Frankfurter Kassenverein will satisfy the requirements of Rule 17f–5 in all respects other than the requirement that securities depositors, to be eligible foreign custodians, must be the central system or a transnational system for the handling of securities or equivalent book-entries in the relevant country.

3. Securities of Investment Companies will be maintained with MBN, MGAL or JPMN, as the case may be, only in accordance with an agreement, required to remain in effect at all times during which each of the Foreign Subsidiaries fails to satisfy all the shareholders' equity requirement of Rule 17f–5, among the Investment Companies or custodians for which Applicant serves as custodian or subcustodian, Applicant, and the Foreign Subsidiaries, pursuant to the terms of which, (i) Applicant would act as the custodian or subcustodian of the securities of the Investment Company, (ii) Applicant would delegate to the Foreign Subsidiaries such of Applicant's duties and obligations as would be necessary to permit the Foreign Subsidiaries to hold in custody, in the country in which they operate, the securities of the Investment Company or custodian. The agreement would further provide that Applicant's delegation of duties to the Foreign Subsidiaries would not relieve Applicant of any responsibility to the Investment Company or custodian for any loss due to such delegation, except such loss as may result from (i) political risk (*e.g.*, exchange control restrictions, confiscation, expropriation, nationalization, insurrection, civil strife or armed hostilities), and (ii) other risks of loss (excluding bankruptcy or insolvency of MBN, MGAL or JPMN) for which neither Applicant nor MBN, MGAL, or JPMN would be liable under Rule 17f–5 (*e.g.*, despite the exercise of reasonable care, loss due to acts of God, nuclear incident and the like).

For the SEC, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8025–01–M

[Application No. 03/03–0185]

Application for License To Operate as a Small Business Investment Company; Morgan Investment Corp.

Notice is hereby given that an application has been filed with the Small Business Administration pursuant to § 107.102 of the Regulations governing

small business investment companies (13 CFR 107.102 (1985)) by Morgan Investment Corporation, 902 Market Street, Wilmington, Delaware 19801 (Applicant), with the Small Business Administration (SBA) pursuant to 13 CFR 107.102 (1987).

The officers, directors and sole shareholder of the Applicant are as follows:

Name	Title or relationship	Percentage of shares owned
William Edward Pike, 4 Carnage Road, Greenville, Delaware 19807.	Chairman of the Board of Directors and President.	
Rushton Leigh Ardrey, Jr., 70 East 96th Street, New York, New York 10028.	Director	
Donald Richard Brunner, 614 Black Gates Road, Wilmington, Delaware 19803.	Director	
Miriam Raney, 424 West End Avenue, Apartment 20E, New York, New York 10024.	Director	
Frank John Corrado, Jr., 21 Hillstream Road, Newark, Delaware 19711.	Treasurer	
James Dale Goodpasture, 117 Montchan Drive, Greenville, Delaware 19807	Secretary	
Morgan Holdings Corporation, 902 Market Street, Wilmington, Delaware 19801.		100

Morgan Holdings Corporation is a Delaware bank holding company which is wholly owned by J.P. Morgan & Co. Incorporated, 23 Wall Street, New York, New York 10015.

The Applicant, a Delaware Corporation, will begin operations with $30,000,000 paid in capital and paid in surplus. The Applicant will conduct its activities primarily in the State of Delaware but will consider investments in business in other areas in the United States.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the company under their management, including adequate profitability and financial soundness, in accordance with the Small Business Investment Act of 1958, as amended, and the SBA Rules and Regulations.

Notice is further given that any person may, not later than 30 days from the date of publication of this Notice, submit written comments on the proposed Applicant. Any such communication should be addressed to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street NW., Washington, DC 20416.

A copy of this notice shall be published in a newspaper of general circulation in Wilmington, Delaware.

DEPARTMENT OF STATE

[Public Notice CM-8/1124]

Study Groups A and C of the U.S. Organization for the International Telegraph and Telephone Consultative Committee (CCITT); Meeting

The Department of State announces that Study Groups A and C of the U.S. Organization for the International Telegraph and Telephone Consultative Committee (CCITT) will meet on November 5, 1987 beginning at 10:00 a.m. in Room 1912, Department of State, 2201 C Street NW., Washington, DC.

Study Group A deals with international telecommunications policy and services; Study Group C will deal with CCITT structure, Special "S" and Study Group II issues.

The purpose of the meeting will be a debriefing of recent meetings of CCITT Study Groups/Working Parties I, III and preparation for the upcoming meeting of CCITT Study Groups, Special "S" and III.

Members of the general public may attend the meeting and join in the discussion, subject to the instructions of the Chairman. Admittance of public members will be limited to the seating available. In that regard, entrance to the Department of State building is controlled and entry will be facilitated if arrangements are made in advance of the meeting. Prior to the meeting, persons who plan to attend should so advise the office of Mr. Earl Barbely, State Department, Washington, DC, telephone (202) 653-6102. All attendees must use the C Street entrance to the building.

Date: September 21, 1987.

Earl S. Barbely,

Director, Office of Technical Standards and Development, Chairman, U. S. CCITT National Committee.

Federal Aviation Administration

Proposed Advisory Circular on Modified Seats and Berths Initially Approved Under a Technical Standard Order

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of availability of proposed advisory circular and request for comments.

SUMMARY: The Federal Aviation Administration has proposed an advisory circular to provide information and procedural guidance for the approval and installation of modified seats and berths initially approved under a technical standard order in the U.S. type certificated aircraft. The Federal Aviation Regulations require design and installation approval of modifications to each seat or berth. The proposed advisory circular will provide information and procedural guidance concerning the approval and installation of modified technical standard order (TSO) seats and berths in U.S. type certificated aircraft.

DATE: Commenters must identify File AC No. 21– (AWS–120/ASW–150) and submit comments in duplicate on or before November 20, 1987.

ADDRESSES: Send all comments on the proposed advisory circular (AC) to: Technical Analysis Branch, AWS–120, Aircraft Engineering Division, Office of Airworthiness, File AC No. 21– (AWS–120/ASW–150), Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; or deliver comments to: Room 335D, 800 Independence Avenue SW., Washington, DC 20591.

FOR FURTHER INFORMATION CONTACT: Mr. Arthur J. Hayes, Technical Analysis Branch, AWS–120, Telephone (202) 267–9937.

SUPPLEMENTARY INFORMATION: Any interested person not receiving copies of this proposed AC should contact the person named under **"FOR FURTHER INFORMATION CONTACT."**

Comments Invited

Interested persons are invited to comment on the proposed AC by submitting such written data, views, or arguments as they may desire. All comments received on or before the closing date for comments specified above will be considered by the Director of Airworthiness before issuing the final AC. The proposed AC and comments received may be examined in Room 335D, FAA Headquarters Building (FOB–10A), 800 Independence Avenue SW., Washington, DC 20591, between 8:30 a.m. and 4:30 p.m. weekdays, except Federal holidays.

Issued in Washington, DC, on September 28, 1987.

M.C. Beard,

Director of Airworthiness.

Modified Seats and Berths Initially Approved Under A Technical Standard Order

1. Purpose.

This advisory circular provides information and procedural guidance concerning the approval and installation of modified technical standard order (TSO) seats and berths in U.S. type certificated aircraft.

2. Related Federal, Aviation Regulations (FAR) Sections

Sections 21.101, 21.305, 21.601, 21.611, 23.785 (former CAR 3.390), 23.853, 25.785 (former CAR 4b.358), 25.853, 27.785, 27.853, 29.785, 29.853, and 43.13 and Part 25, Appendix F, Parts I and II.

VOL 52 ISS 193 OCT 6 1987 UMI

3. Background

Minimum performance standards for aircraft seats and berths are established by TSO-C39b in conjunction with National Aircraft Standards (NAS) Specification NAS 809. Because owners or operators of air carriers, air taxi, and general aviation aircraft often prefer use of different features (such as their own upholstery), seats and berths approved under TSO procedures may be modified prior to installation. The FAR require FAA approval of each seat or berth after any design change. Therefore, the installer has the responsibility to assure that the modified seat or berth is approved prior to installation in an aircraft. FAR 21.305 states that whenever a material, part, process, or appliance is required to be approved, it may be done under a parts manufacturer approval, under a TSO, in conjunction with type certification procedures, or in any other manner approved by the Administrator.

4. Discussion

a. Approval Considerations

1. (1) *Applicable Regulations.* Each applicant seeking approval of a modified TSO seat or berth for installation in an aircraft must show that the article meets the design alteration requirements of FAR Part 43, the applicable airworthiness requirements for that aircraft as specified in paragraphs (a) and (b) of FAR 21.101, or the requirements of FAR 21.305(b) if the applicant is the seat or berth manufacturer and elects to show that the modified article still meets the TSO standards.

(2) *General Design.* The modified seat or berth, as installed, should not have design features or details that experience has shown to be hazardous.

(3) *Material and Workmanship.* The materials used on the modified seat or berth should continue to be of a quality that meets the TSO standards. Workmanship also should be consistent with high-grade aircraft manufacturing practice. In addition, all material contained in the article should be protected against deterioration or loss of strength that may result in service from weather, corrosion, abrasion, or other causes.

(4) *Structural Tests.* For each seat or berth previously produced, tested, and certified to structural specifications (i.e., NAS 809), the effect of the modification on the validity of those tests should be addressed. For example, in NAS 809, subparagraph 4.3.1, side-load and up-load tests assume seat and back cushions are in place and the seat cushion is compressed 2 inches for the location of the load application. Modification of a seat cushion may necessitate an analysis to verify that the NAS 809 specifications are still met. If the specifications are not met, additional tests or analysis will be necessary.

(5) *Fire and Flammability Tests.* The modified seat or berth assembly should be demonstrated to meet the fire and flammability requirements for the aircraft for which installation approval is desired. In addition, consideration should be given to the flammability requirements that may be applicable, based on the type of operations (i.e., FAR 91, 121, or 135).

(6) *Marking.* (i) If the modified seat or berth incorporates only a minor change by the manufacturer holding the TSO authorization, the provisions of FAR 21.611(a) apply, and the TSO marking need not be changed, except as the manufacturer elects with respect to changed part numbers.

(ii) If the modified seat or berth incorporates a major change by the manufacturer holding the TSO authorization and if the modified seat or berth continues to meet the TSO requirements, the provisions of FAR 21.611(b) apply. The manufacturer must re-mark the modified article to show the new type or model designation and must obtain a new TSO authorization.

(iii) If a person other than the original manufacturer incorporates any design change in a previously TSO'd seat or berth, the provisions of FAR 21.611(c) apply. If that person is a manufacturer, that manufacturer must apply for a separate TSO authorization to obtain TSO approval under FAR Part 21. Marking of the modified article would be the same as for any other newly-authorized TSO article, with all previous markings deleted. Persons, other than manufacturers seeking TSO authorization, may obtain approval for design changes under Part 43 or under the applicable airworthiness regulations (Parts 23, 25, 27, 29, etc.), in which case, articles for which approval is obtained will have no TSO markings.

(iv) If a modified seat or berth does not continue to meet TSO standards, the TSO identification on the original manufacturer's nameplate should be permanently removed in a manner such that it cannot be restored. A seat or berth so modified and installed in an aircraft should be approved as part of the aircraft type design in conjunction with the type certification procedures of FAR Part 21.

b. Documentation

After successfully showing compliance with the applicable regulations, the installer should receive approval from the FAA for the design change and receive manufacturing authorization under one of the methods specified in FAR 21.305.

BILLING CODE 4910-13-M

National Highway Traffic Safety Administration

[Docket No. IP 87-12; Notice 1]

Receipt of Petition for Determination of Inconsequential Noncompliance; General Motors Corp.

General Motors Corporation of Warren, Michigan, has petitioned to be exempted from the notification and remedy requirements of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1381 *et seq.*) for an apparent noncompliance with 49 CFR 571.101, Federal Motor Vehicle Safety Standard No. 101, "Controls and Displays," on the basis that it is inconsequential as it related to motor vehicle safety.

This notice of receipt of a petition is published under section 157 of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1417) and does not represent any agency decision or other exercise of judgment concerning the merits of the petition.

Standard No. 101 specifies individual identifying symbols for the windshield washer control and the windshield washer and wiper combined control. These controls are required by Standard No. 101 to be capable of being illuminated whenever the headlights are activated. General Motors has determined that a total of forty-eight 1987 Brigadier trucks were manufactured with the windshield washer controls incorrectly identified. The symbol for windshield washer and wiper combined was used instead of the identifying symbol for windshield washer. General Motors supports its petition with the following:

1. "The washer control in question is properly identified on the control itself with the symbol specified in FMVSS 101. The incorrect symbol usage is limited to an adjacent identification which is present for purposes of meeting the illumination requirement of FMVSS 101.

2. The Owner's Manual clearly illustrates and describes the washer control and its function.

3. A driver will easily and readily recognize this control, especially the skilled professional driver of heavy duty commercial vehicles such as the Brigadier."

Interested persons are invited to submit written data, views and arguments on the petition of General Motors Corporation described above. Comments should refer to the Docket Number and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5109, 400 Seventh Street SW., Washington, DC 20590. It is requested but not required that five copies be submitted.

All comments received before the close of business on the closing date indicated below will be considered. The application and supporting materials, and all comments received after the closing date will also be filed and will be considered to the extent possible. When the petition is granted or denied, a Notice will be published in the **Federal Register** pursuant to the authority indicated below:

Comment Closing date: November 5, 1987.

(Sec. 102, Pub. L. 83-492, 88 Stat. 1470 (15 U.S.C. 1417); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8)

Issued on: October 1, 1987.

Barry Felrice,

Associate Administrator for Rulemaking.

[FR Doc. 87-23078 Filed 10-5-87; 8:45 am]

BILLING CODE 4910-59-M

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

Date: September 29, 1987.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2224, 15th and Pennsylvania Avenue, NW., Washington, DC 20220.

Internal Revenue Service

OMB Number: 1545-0274.
Form Number: 2163(c).
Type of Review: Extension.
Title: Employment—Reference Inquiry.
Description: Form 2163 is used by IRS to verify past employment history and to question listed and developed references as to the character and integrity of current or potential IRS employees. The information received is incorporated into a report on which a security determination is based.
Respondents: Individuals or households, State or local governments, Farms, Businesses or other for-profit, Federal agencies or employees, Non-profit institutions, Small businesses or organizations.
Estimated Burden: 4,000 hours.
OMB Number: 1545-0491.
Form Number: 6243.
Type of Review: Extension.
Title: Small Business Tax Workshop Registration Form.
Description: The forms are necessary for the promotion of the SBW Program. Form 6243 is prepared mainly to record walk-in and telephone inquiries or for taxpayers to mail in to District Offices.
Respondents: Individuals or households, Federal agencies or employees, Small businesses or organizations.
Estimated Burden: 20,000 hours.
OMB Number: 1545-0805.
Form Number: 5472.
Type of Review: Revision.
Title: Information Return of a Foreign Owned Corporation.
Description: Form 5472 is used to report the activities between domestic corporations and foreign corporations that have a trade or business in the U.S. and that are owned by foreign persons. The form is used to report the activities between the foreign owned foreign corporation and foreign persons related to the activities. The IRS uses Form 5472 to determine if there are any income tax liabilities for the persons related to the activity.
Respondents: Businesses or other for-profit.
Estimated Burden: 337,554 hours.
Clearance Officer: Garrick Shear, (202) 535-4297, Internal Revenue Service, Room 5571, 1111 Constitution Avenue, NW., Washington, DC 20224.
OMB Reviewer: Milo Sunderhauf, (202) 395-6880, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, DC 20503.

Comptroller of the Currency

OMB Number: New.
Form Number: None.
Type of Review: New Collection.
Title: Regional Bank Fact Book Questionnaire.
Description: This information is needed to insure and evaluate the safety and soundness and to identify trends concerning the financial condition of regional national banks. It is a pilot program. This voluntary information collection is sent to the 20 largest regional banking companies in OCC's Northeastern District.
Respondents: Businesses or other for-profit.
Estimated Burden: 160 hours.
Clearance Officer: Eric Thompson, (202) 447-1632, Comptroller of the Currency, 5th Floor, L'Enfant Plaza, Washington, DC 20219.
OMB Reviewer: Robert Fishman, (202) 395-7340, Office of Management and Budget, Room 3228, New Executive Office Building, Washington, DC 20503.

Financial Management Service

OMB Number: 1510-0006.
Form Number: TFS 6312.
Type of Review: Extension.
Title: Current Federal Process Agent Appointments.
Description: Information is collected from Treasury certified insurance companies to provide Treasury with a listing of judicial districts in which a process agent has been appointed for service of process for a civil action by a Federal agency.
Respondents: Businesses or other for-profit.
Estimated Burden: 306 hours.
Clearance Officer: Hector Leyva, (301) 436-5300, Financial Management Service, Room 100, 3700 East West Highway, Hyattsville, MD 20782.
OMB Reviewer: Milo Sunderhauf, (202) 395-6880, Office of Management and Budget, Room 3208, New Executive Office Building, Washington DC 20503.

Dale A. Morgan,

Departmental Reports Management Officer.

Fiscal Service

Financial Guidelines for Qualification of Surety Companies

AGENCY: Financial Management Service, Treasury.

ACTION: Proposed guideline; extension of comment period.

SUMMARY: The Department of the Treasury published a notice of proposed financial guideline on August 5, 1987, at 52 FR 29115. The comment deadline on the financial guideline was October 4, 1987.

The Department of the Treasury has received a request to extend this comment period. In order to ensure that Treasury is able to consider comments form all interested parties, the comment deadline is being extended to October 19, 1987.

DATES: The proposed additional financial guideline for companies seeking or holding Treasury Authority is

VOL
52
ISS
193
OC

VETERANS ADMINISTRATION

Agency Form Letter Under OMB Review

AGENCY: Veterans Administration.

ACTION: Notice.

The Veterans Administration has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). This document contains an extension and lists the following information: (1) The department or staff office issuing the form letter, (2) the title of the form letter, (3) the agency form letter number, if applicable, (4) a description of the need and its use, (5) how often the form letter must be filled out, (6) who will be required or asked to report, (7) an estimate of the number of responses, (8) an estimate of the total number of hours needed to fill out the form letter, and (9) an indication of whether section 3504(h) of Public Law 96–511 applies.

ADDRESSES: Copies of the form letter and supporting documents may be obtained from Patti Viers, Agency Clearance Officer (732), Veterans Administration, 810 Vermont Avenue NW., Washington, DC 20420, (202) 233–2146. Comments and questions about the items on the list should be directed to the VA's OMB Desk Officer, Joseph Lackey, Office of Management and Budget, 726 Jackson Place, NW., Washington, DC 20503, (202) 395–7316.

DATES: Comments on the information collection should be directed to the OMB Desk Officer within 60 days of this notice.

Dated: September 30, 1987.

By direction of the Administrator.

Frank E. Lalley,

Director, Office of Information Management and Statistics.

Extension

1. Office of Personnel and Labor Relations.
2. Inquiry Concerning Applicant for Employment.
3. VA Form Letter 5–127.
4. This information is used to determine fitness and qualifications for employment.
5. On occasion.
6. Individuals or households, State or local governments, Businesses or other for-profit, Federal agencies or employees.
7. 12,500 responses.
8. 3,125 hours.
9. Not applicable.

Sunshine Act Meetings

Federal Register
Vol. 52, No. 193
Tuesday, October 6, 1987

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

U.S. CONSUMER PRODUCT SAFETY COMMISSION

"FEDERAL REGISTER" ANNOUNCEMENT OF PREVIOUS CITATION: Vol. 52, P. 37042.

PREVIOUSLY ANNOUNCED TIME AND DATE OF MEETING: October 7, 1987.

Changes: Item Concerning Bunk Beds deleted. Item concerning 16 CFR 1015.12 added.

Listed below is the Revised Agenda:

Commission Meeting, Wednesday, October 7, 1987, 10:00 a.m., Room 556, Westwood Towers, 5401 Westbard Avenue, Bethesda, Md.

Open to the Public

1. *FY 88 Operating Plan.* The Commission will consider the Fiscal Year 1988 Operating Plan.

2. *16 CFR 1015.12:* The Commission will discuss the prvisions of CPSC's Freedom of Information Act regulation concerning Congressional requests for Commission documents.

Agenda revised 10/1/87 to delete previous item 1 concerning bunk beds and add present item 2 concerning 16 CFR 1015.12.

For a recorded message containing the latest agenda information, call: 301–492–5709.

CONTACT PERSON FOR ADDITIONAL INFORMATION: Sheldon D. Butts, Office of the Secretary, 5401 Westbard Ave., Bethesda, Md. 20207, 301–492–6800.

Sheldon D. Butts,
Deputy Secretary.
October 2, 1987.

FARM CREDIT ADMINISTRATION

Farm Credit Administration; Correction of Sunshine Act Notice.

SUMMARY: Pursuant to the Government in the Sunshine Act (5 U.S.C. 552b(e)(3)), the Farm Credit Administration gave notice on September 18, 1987 (52 FR 35349) of a special meeting of the Farm Credit Administration Board (Board) which was held on September 22, 1987. This notice is to reflect a revision to the agenda for that meeting to include two additional items to the closed portion.

FOR FURTHER INFORMATION CONTACT: David A. Hill, Secretary to the Farm Credit Administration Board, 1501 Farm Credit Drive, McLean, Virginia 22102–5090, (703) 833–4010.

ADDRESS: Farm Credit Administration, 1501 Farm Credit Drive McLean, Virginia 22102–5090.

SUPPLEMENTARY INFORMATION: The following portions of the meeting were closed to the public:

1. Litigative Strategy; [1] and

2. Prior Approval Matters Relating to Farm Credit System Employee Programs and Policies.[2]

Dated: October 2, 1987.

David A. Hill,
Secretary, Farm Credit Administration Board.

FEDERAL DEPOSIT INSURANCE CORPORATION

Change in Subject Matter of Agency Meeting

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at its open meeting held at 2:00 p.m. on Tuesday, September 29, 1987, the Corporation's Board of Directors determined, on motion of Chairman L. William Seidman, seconded by Director C.C. Hope, Jr. (Appointive), concurred in by Director Robert L. Clarke (Comptroller of the Currency), that Corporation business required the addition to the agenda for consideration at the meeting, on less than seven days' notice to the public, of the applications of Northwest Florida State Bank, Pensacola, Florida, a proposed State nonmember bank, which it to be a successor institution to First Mutual Savings and Loan Association, a Stock Corporation, Pensacola, Florida, for Federal deposit insurance; for consent to merge with First Mutual Bank, Pensacola, Florida, a State nonmember bank, in organization, under the charter and title of First Mutual Bank; and for consent to establish the fifteen branches of Northwest Florida State Bank as branches of the resultant bank.

[1] Session closed to the public—exempt pursuant to 5 U.S.C. 552b(c)(10).

[2] Session closed to the public—exempt pursuant to 5 U.S.C. 552b(c)(4) and (6).

By the same majority vote, the Board further determined that no earlier notice of the change in the subject matter of the meeting was practicable.

Dated: October 1, 1987.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,
Executive Secretary.

BILLING CODE 6714–01–M

FEDERAL DEPOSIT INSURANCE CORPORATION

Changes in Subject Matter of Agency Meeting

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at its closed meeting held at 2:30 p.m. on Tuesday, September 29, 1987, the Corporation's Board of Directors determined, on motion of Chairman L. William Seidman, seconded by Director C.C. Hope, Jr. (Appointive), concurred in by Director Robert L. Clarke (Comptroller of the Currency), that Corporation business required the addition to the agenda for consideration at the meeting, on less than seven days' notice to the public, of the following matters:

Recommendation regarding the Corporation's assistance agreement with an insured bank.

Matters relating to certain financial institutions.

Memorandum regarding the Corporation's corporate activities.

The Board further determined, by the same majority vote, that no earlier notice of the changes in the subject matter of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(2), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2), (c)(9)(A)(ii), and (c)(9)(B)).

Dated: October 1, 1987.

Federal Deposit Insurance Corporation.

Hoyle R. Robinson,
Executive Secretary.

PAROLE COMMISSION

Record of Vote of Meeting Closure

I, Benjamin F. Baer, Chairman of the United States Parole Commission, presided at a meeting of said Commission which started at 1:40 p.m. (EDT) on Thursday, October 1, 1987, by conference telephone call initiated at 5550 Friendship Boulevard, Chevy Chase, Maryland 20815. The meeting ended at or about 2:00 p.m. (EDT). The purpose of the meeting was to decide an application for a certificate of exemption under 29 U.S.C. section 504(a). Six Commissioners were present, constituting a quorum, when the vote to close the meeting was submitted.

Public announcements further describing the subject matter of the meeting and a certification of General Counsel that this meeting may be closed by vote of the Commissioners present were submitted to the Commissioners prior to the conduct of any other business. Upon motion duly made, seconded, and carried, the following Commissioners voted that the meeting be closed: Saundra Brown Armstrong (Belmont, California); Vincent J. Fechtel (Chevy Chase, Maryland); Daniel R. Lopez (Philadelphia, Pennsylvania); G. MacKenzie Rast (Atlanta, Georgia); Cameron M. Batjer (Chevy Chase, Maryland) and Benjamin F. Baer (Chevy Chase, Maryland). The Commissioners and two attorneys from the Commission's legal staff attended.

In Witness Whereof, I make this official record of the vote taken to close this meeting and authorize this record to be made available to the public.

Dated: October 1, 1987.

Benjamin F. Baer,

Chairman, United States Parole Commission.

BILLING CODE 4410–01–M

SECURITIES AND EXCHANGE COMMISSION

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meetings during the week of October 5, 1987:

Closed meetings will be held on Thursday, October 8, 1987, at 10:30 a.m. and following the 2:30 p.m. open meeting. An open meeting will be held on Thursday, October 8, 1987, at 2:30 p.m., Room 1C30.

The Commissioners, Counsel to the Commissioners, the Secretary of the Commission, and recording secretaries will attend the closed meetings. Certain staff members who are responsible for the calendared matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c) (4), (8), (9) (A) and (10) and 17 CFR 200.402(a) (4), (8), (9)(i) and (10), permit consideration of the scheduled matters at closed meetings.

Commissioner Grundfest, as duty officer, voted to consider the items listed for the closed meetings in closed session.

The subject matter of the closed meeting scheduled for Thursday, October 8, 1987, at 10:30 a.m., will be:

Application for Commission order involving commencement of administrative proceeding.

Subpoena enforcement action.

Institution of injunctive actions.

Settlement of administrative proceeding of an enforcement nature.

The subject matter of the open meeting scheduled for Thursday, October 8, 1987, at 2:30 p.m., will be:

Oral argument on an appeal by RFG Options Co., a registered broker-dealer, and Eugene V. Rintels, Andor A. Fleischman, and Dennis G. Guy, the firm's general partners, from an administrative law judge's initial decision. For further information, please contact Daniel J. Savitsky at (202) 272–7400.

The subject matter of the closed meeting scheduled for Thursday, October 8, 1987, following the 2:30 p.m. open meeting, will be:

Post oral argument discussion.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Brent Taylor at (202) 272–2014.

Jonathan G. Katz,

Secretary.

September 29, 1987.

State of Illinois Fee on Transportation of Spent Nuclear Fuel; Inconsistency Ruling; Wisconsin Electric Power Co. et al.

Correction

In notice document 87-22128 beginning on page 36200 in the issue of Friday, September 25, 1987, make the following corrections:

1. On page 36200, in the first column, in the **SUPPLEMENTARY INFORMATION**, in the first paragraph, in the 8th line, "HHMR" should read "HMR", and in the 11th line, "set" should read "sets".

2. On the same page, in the second column, in designated paragraph 1, in the sixth line, "fee" should read "fees".

3. On page 36201, in the second column, in the third paragraph, in the 12th line, "HMNTA" should read "HMTA".

4. On page 36202, in the third column, in the second complete paragraph, in the fifth line, delete "to".

5. On page 36204, in the second column, in the first complete paragraph, in the eighth line, "Surrey" was misspelled.

6. In the same column, in the second complete paragraph, in the 16th line, "licenses" should read "licensees".

7. In the same column, in the fourth complete paragraph, in the eighth line, "prenotification" was misspelled.

8. On page 36205, in the first column, in the fifth complete paragraph, in the 16th line, the second "of" should read "or".

9. On page 36206, in the first column, in the last line, "cite" should read "cites".

10. On the same page, in the second column, in the second line, insert a comma after "Co."

11. In the same column, in the first complete paragraph, in the 17th line, "accomplished" should read "accomplish".

Unfair Immigration-Related Employment Practices; Final Rule

VOL 52 ISS 193 OCT 6 1987 UMI

DEPARTMENT OF JUSTICE

28 CFR Part 44

[Order No. 1225–87]

Unfair Immigration-Related Employment Practices

AGENCY: Department of Justice.

ACTION: Final rule.

SUMMARY: This rule establishes standards and procedures for the enforcement of section 102 of the Immigration Reform and Control Act of 1986 (IRCA), which prohibits certain unfair immigration-related employment practices.

EFFECTIVE DATE: November 5, 1987.

ADDRESS: Comments received on the Notice of Proposed Rulemaking will remain available for public inspection in the Office of the Special Counsel for Immigration-Related Unfair Employment Practices, 1100 Connecticut Avenue, NW., Suite 800, Washington, DC 20036, from 9:00 A.M to 5:00 P.M., Monday through Friday, except legal holidays, until December 7, 1987.

FOR FURTHER INFORMATION CONTACT: Mary E. Mann, Acting Special Counsel for Immigration-Related Unfair Employment Practices, Office of the Special Counsel, U.S. Department of Justice, P.O. Box 65490, Washington, DC 20035–5490; (202) 653–8121 (Voice) or (202) 724–7678 (TDD). These are not toll free numbers.

SUPPLEMENTARY INFORMATION: The Immigration Reform and Control Act of 1986 (Pub. L. 99–603, 100 Stat. 3359), prohibits employers from knowingly hiring, or recruiting or referring for a fee, any alien not authorized to work in the United States. Out of concern that this prohibition and the sanctions created by the Act to enforce it might lead to employment discrimination against "foreign looking" or "foreign sounding" persons or against persons who, although not citizens, are legally in the United States, Congress in section 102 of the Act (8 U.S.C. 1324b) outlawed certain unfair immigration-related employment practices and established enforcement procedures to enforce these prohibitions.

Section 102 of the Act, with specified exceptions, makes it an unfair immigration-related employment practice to discriminate against an individual in hiring, discharging, or recruiting or referring for a fee because of an individual's national origin or, in the case of a citizen or intending citizen, because of that individual's citizenship status.

In order to prevent the occurrence of these practices and to provide redress for persons injured by them, section 102 establishes enforcement measures and provides for appointment of a "Special Counsel for Immigration-Related Unfair Employment Practices" within the Department of Justice. Among the Special Counsel's statutory responsibilities is the investigation of unfair immigration-related employment practices either on his or her own initiative or in response to charges filed with the Office of the Special Counsel by aggrieved individuals, their representatives, or officers of the Immigration and Naturalization Service (INS).

Where there is reasonable cause to believe that such practices have occurred, the Special Counsel may file a complaint with an administrative law judge. The Special Counsel may also seek to intervene in proceedings involving complaints brought directly before administrative law judges. (The statute provides that a charge filed with the Special Counsel may be brought directly before an administrative law judge by a private party, if the Special Counsel fails to file a complaint with an administrative law judge within 120 days of receipt of the charge.) Once the administrative law judge issues an order, the Special Counsel may seek judicial enforcement of the judge's order in the appropriate Federal district court or judicial review of the order in the appropriate Federal court of appeals.

This final rule in three subparts implements section 102 of the Act. Subpart A states the purpose of the regulation and defines certain key terms; Subpart B provides substantive guidance as to the meaning of the term, "unfair immigration-related employment practices;" and Subpart C establishes procedures specifying how private individuals may file charges with the Special Counsel and the manner in which the Special Counsel will proceed to investigate these charges.

On March 23, 1987, the Department of Justice published a Notice of Proposed Rulemaking (NPRM). In response to this NPRM the Department received 66 comments, some signed by more than one individual or organization. Twenty-two of these comments came from persons or organizations in the District of Columbia, 23 from California, 7 from New York, and the remaining 14 comments came from 11 other States. Of the 66 comments, 19 came from civil rights groups, church organizations, or associations representing the interests of aliens; 16 came from employers or organizations representing the interests of employers; 19 came from individual members of the general public; 8 came from Federal, State, or local governments; and 4 came from members of the United States Congress.

The Department read and considered each comment. The decisions that the Department made in response to these comments were not made on the basis of the number of commenters addressing any one point but on a thorough consideration of the merits of the points of view expressed in the comments.

The purposes of this preamble are to highlight key features of the final rule, indicate changes from the NPRM, and address various issues raised in the comments.

I. Counting Employees for Jurisdictional Purposes

Section 44.200 of the rule prohibits unfair immigration-related employment practices in accordance with the terms of the statute. Paragraph (b) of § 44.200 codifies the Act's exceptions to this general prohibition. Among the exceptions is an exclusion from coverage of employers with three or fewer employees (§ 44.200(b)(1)(i)). In addition, if the national origin discrimination is covered under section 703 of title VII of the Civil Rights Act of 1964 (42 U.S.C. 2000e–2), there is no overlapping jurisdiction under the Immigration Reform and Control Act (§ 44.200(b)(1)(ii)). In this regard, it is noted that section 703 of title VII only applies to employers with 15 or more employees "for each working day in each of twenty or more calendar weeks in the current or preceding calendar year" (42 U.S.C. 2000e(b))

Unlike title VII, section 102 does not contain the 20 calendar week durational minimum. In light of the language and legislative history of the IRCA antidiscrimination provisions, the Special Counsel will calculate the number of employees referred to in paragraph (b)(1)(i) of § 44.200 by counting all part-time and full-time employees employed on the date that the alleged discrimination occurred. The Department, therefore, will not use the 20 calendar week requirement contained in title VII in counting employees for purposes of determining coverage by section 102. The Department will, however, use the 20 calendar week requirement for purposes of determining whether the exception of paragraph (b)(1)(ii) of § 44.200 applies, and will refer to EEOC charges of national origin discrimination that the Special Counsel determines are covered by section 703 of title VII. This is the same position that the Department took in its NPRM.

Another exception to the citizenship discrimination prohibitions of section 102 is codified in § 44.200(b)(1)(iii). Under that exception, an employer is permitted to discriminate on the basis of citizenship status if such discrimination (a) is required to comply with law, regulation, or executive order, or (b) is required by Federal, State, or local government contract, or (c) if it is determined by the Attorney General to be essential for an employer to do business with an agency or department of the Federal, State, or local government. Therefore, an employer may not impose a blanket citizenship requirement for all jobs in its workforce unless such a requirement can be justified for each job under this exception.

II. Standard of Proof

The general rule prohibiting unfair immigration-related employment practices in section 102 of the Act is codified in § 44.200(a) of the final rule.

Most of the comments that the Department received concerned the proposed standard of proof in § 44.200(a). These comments were provided by civil rights groups, Members of Congress, employer representatives, and others. The Department has reviewed these comments carefully. The Department concludes that its original determination that the statute prohibits intentional discrimination rather than neutral conduct with an unintended disparate impact is sound.

Commenters made several points in setting forth the case for a disparate impact standard in this area that should be addressed.

Some commenters stated that section 102, containing the antidiscrimination provisions, was intended to fill gaps in coverage under title VII of the Civil Rights Act of 1964 (42 U.S.C. 2000e to 2000e–16) and that section 102 was intended to broaden title VII. Indeed, some commenters made reference to a remark in the House Conference Report: "The bill broadens the title VII protections against national origin discrimination * * *." H.R. Rep. No. 99–1000, 99th Cong., 2d Sess. 87 (1986). This remark in full context, however, obviously has no reference to the standard of proof to be satisfied under the new statute. Rather, the "broadened" protections in the national origin area refer to the increase in the number of employers subject to a ban on national origin discrimination (i.e., those who have 4 employees to 14 employees and employers who may have 15 or more employees, but for less than 20 weeks in a calendar year) and to the coverage of certain employers not covered by title VII, such as certain businesses located on or near Indian reservations (42 U.S.C. 2000e–2(i)) (thus expanding the scope of the ban on national origin discrimination).

With respect to the substantive standards of the antidiscrimination provisions, they, in turn, are discerned from the operative portions of IRCA's antidiscrimination provisions themselves, 8 U.S.C. 1324b(a), and, to the extent necessary, resort to the legislative history. That history reflects that the concern giving rise to the adoption of the antidiscrimination provisions was the fear that employers seeking to avoid sanctions would simply refuse to hire, or would fire, persons who look or sound foreign. Such practices are necessarily reflective of intentional discrimination. By tying the antidiscrimination provisions of the bill closely to the sanctions provisions and in identifying the concerns that underlie the antidiscrimination provisions in the Act, as is reflected throughout the legislative history, it is quite clear that Congress was attempting to reach intentional discrimination and was expanding the scope of such an existing ban in the national origin context. Indeed, as mentioned earlier, the Conference Report notes that the bill only provides such protection while sanctions are in effect. H.R. Rep. No. 99–1000, *supra*, at 87 (1986).

It is also anomalous to claim that Congress intended to expand broadly the substantive standards of title VII rather than the scope of coverage of one form of discrimination prohibited by title VII. Not only did Congress not amend title VII itself, but also Congress did not go as far as title VII in substance when it banned national origin discrimination in IRCA: Section 102 of this Act does not prohibit discrimination in compensation, promotions, or any other term or condition of employment other than hiring, firing, and recruitment or referral for a fee. This difference in the types of employment practices covered buttresses the view that references to "broadening" the scope of title VII reflects the increase in the number of employers subject to a ban on intentional national origin discrimination, rather than the incorporation of a substantive disparate impact standard.

Some commenters have taken out of context statements in the legislative record that Members of Congress were concerned that the sanctions provisions would "result" in discrimination. For example, the Conference Report notes that the anti-discrimination provisions would be repealed if Congress adopts a joint resolution approving a GAO finding "that the sanctions had resulted in no significant discrimination * * *." *Id.* Congressman Rodino said, following the Report of the Conference, "[the anti-discrimination] provision is a direct response to the fears and concerns expressed by many Hispanic organizations that sanctions would automatically result in discrimination based on national origins." 131 Cong. Rec. H10,584 (daily ed. Oct. 15, 1986).

Some commenters noted, in addition, the following comments: "Conferees wish to emphasize that the anti-discrimination provision has been included in order to respond to the fears and concerns expressed by many that the sanctions will result in employment discrimination based on national origin or citizenship status." H.R. Rep. No. 99–1000, *supra*, at 87–88. The report of the House Committee on Education and Laobr "strongly endorses this [antidiscrimination] provision and * * * expresse[s] its fear that the imposition of employer sanctions will give rise to employment discrimination against Hispanic Americans and other minority group members. It is the committee's view that if there is to be sanctions enforcement and liability there must be an equally strong and readily available remedy if resulting employment discrimination occurs. In the last Congress, the full House of Representatives recognized the potential for this unfortunate cause and effect relationship between sanctions enforcement and resulting employment discrimination * * *" and adopted the "so-called 'Frank Anti-discrimination' amendment." H.R. Rep. No. 99–682, 99th Cong., 2d Sess., pt. 2, at 12.

These excerpts from the legislative history reflect the concern of some members of Congress that IRCA's sanctions provisions could lead to (or "result in") discrimination—not what some might call statistical discrimination or numerical imbalances, but intentional discrimination. The term "result," as used in the referenced colloquies or passages, was never offered as a legislative standard of proof, but was only mentioned to express possible consequences that might flow from the imposition of sanctions. The post hoc suggestion that the word should be wrenched from the context in which it was obviously used, and recast in terms of a legal standard that tolerates a finding of wrongdoing on less than a demonstration of intentional discrimination, cannot be accomplished grammatically, let alone legally.

Some commenters have suggested that the disjunctive use of the phrase

"pattern or practice of discriminatory activity" (8 U.S.C. 1324b(d)(2)) as an alternative to "knowing and intentional discrimination" provides sufficient latitude to read into the "pattern or practice" phrase activity having an unintended disparate impact. But, as discussed in the preamble to the NPRM (52 FR 9275), Congress unambiguously expressed its view that the phrase "pattern or practice" embraced only intentional discrimination. The House Judiciary Committee in its section-by-section analysis of section 274B(d) (8 U.S.C. 1324b(d)) noted that it "[a]uthorizes private action where the Special Counsel has not filed a complaint within 120 days based on a charge alleging knowing and intentional discriminatory activity or a pattern or practice of *such* activity." H.R. Rep. No. 99-682, 99th Cong., 2d Sess., pt. 1 at 93 (1986) (emphasis added). Moreover, in explaining its use of the term "pattern or practice" in a different portion of the Act dealing with criminal sanctions against employers, the House Judiciary Committee emphasized that "pattern or practice" refers to intentional activities and noted that this interpretation should apply in the unfair immigration-related employment practices context as well.

> [T]he term "pattern or practice" has its generic meaning and shall apply to regular, regular, repeated and intentional activities, but does not include isolated, sporadic or accidental acts. The same interpretation of "pattern or practice" shall apply when that term is used in this bill with regard to the injunctive remedy that may be sought by the Attorney General for recruitment, referral or employment violations, as well as for certain unfair immigration-related employment practices.

Id. at 59. By including this phrase in 8 U.S.C. 1324b (d) (2) Congress undertook to make plain that a private party could not only bring a case alleging isolated or sporadic acts of intentional discriminatory discrimination but could also bring a case of repeated, intentionally activities with many victims.

Some commenters responded to the analogy drawn between section 102 of the Act and section 703(a)(1) of title VII. They noted that some courts, *e.g., Wambheim* v. *J.C. Penney Co., Inc.*, 705 F.2d 1492 (9th Cir. 1983), *Colby* v. *J.C. Penney Co., Inc.*, 811 F.2d 1119 (7th Cir. 1987), have indicated that a case of disparate impact can be brought under section 703(a)(1), and, therefore, assert that our analogy to title VII is faulty. These comments misconstrue the point made in the Notice of Proposed Rulemaking. The NPRM stated that the language of section 102 is analogous to language in section 703(a)(1) upon which the disparate treatment prong of title VII is generally based. Section 703(a)(2), which speaks of "adversely affecting" employees, is generally the basis for the impact standard. That a minuscule number of cases (*Colby* is inapt as an indicator of congressional intent since it was decided after IRCA's enactment) suggest section 703(a)(1) may support use of a disparate impact standard when the overwhelming number of intent cases under title VII at the time of IRCA's enactment are premised on section 703(a)(1), *see, e.g., McDonnell Douglas Corp.* v. *Green*, 411 U.S. 792 (1973); *City of Los Angeles Department of Water and Power* v. *Manhart*, 435 U.S. 702 (1977), and the overwhelming number of title VII impact cases are premised on section 703(a)(2), *see, e.g., Griggs* v. *Duke Power Co.*, 401 U.S. 424 (1971), *Connecticut* v. *Teal*, 457 U.S. 440 (1982), does not suggest the analogy is invalid in discerning the meaning of these IRCA provisions, as intended by Congress.

Because Congress did not amend title VII itself to encompass alienage discrimination and a broader range of employers engaging in national origin discrimination, and in light of Congress' general purposes in enacting section 102, Congress' reliance on language analogous to section 703(a)(1), from which the intent standard is generally derived, rather then section 703(a)(2), from which the impact standard is generally derived, amply supports the position taken by the Department in the NPRM.

If Congress had wanted to use an "effects" standard, it certainly could have done so, either directly or by incorporating language analogous to section 703(a)(2), which has been repeatedly construed in title VII discrimination law to provide for such a standard. It chose not to do so and all of the relevant indicators in the legislative history reinforce the conclusion that the reason rested on a considered legislative judgement to prohibit only intentional discrimination.

Some commenters have erroneously asserted that, while a refusal to hire anyone with accented speech or dark skin, hair and eyes falls within the intentional discrimination prong of employment discrimination law, facially neutral policies, such as "English-only" rules, lengthy residence requirements, or a hierarchy of preferred documents for employee verification can only be challenged under the disparate impact theory. This is untrue. The intent standard makes illegal facially neutral policies which are intended to discriminate on prohibited bases and have that effect. Indeed, this has been true in American jurisprudence since at least the case of *Yick Wo* v. *Hopkins*, 118 U.S. 356 (1886), wherein the Supreme Court ruled that the discriminatory application of a facially neutral policy requiring special approval for the operation of laundries made of a material other than brick or stone was illegal under the 14th Amendment because those who enforced it applied it deliberately to put only Chinese-owned laundries operating in buildings of wood out of business while similarly situated laundries owned by non-Chinese were not denied the right to continue to conduct business. Further, a facially neutral policy neutrally applied, but adopted for the purpose of discriminating on a prohibited basis and having that effect, is similarly prohibited. Indeed, this misconception of the intent standard may be a substantial part of the reason for concern over the use of this standard in the context of the immigration reform effort.

While the preamble to the Notice of Proposed Rulemaking touched upon the operation of the intent standard, further elaboration on that discussion would be useful. Discriminatory intent may be shown by both direct and circumstantial evidence. Thus, the discriminatory intent standard encompasses more than just cases where employers have made bigoted remarks or openly engage in facilally disparate treatment. In order for an individual to prevail in a case of disparate treatment, the model of proof in *McDonnell Douglas Corp.* v. *Green*, 411 U.S. 792 (1973), and *Texas Department of Community Affairs* v. *Burdine*, 450 U.S. 248 (1981), is applicable. Thus, an individual would make a *prima facie* showing by proving that he or she is part of a national origin or citizenship status group, that he or she applied for a job and was rejected, that the job was kept open and given to another individual of similar qualifications. At this point, the burden of production shifts to the employer to come forward with a nondiscriminatory explanation for the rejection of the charging party. If an explanation is produced, the charging party then has the opportunity to show that this reason was a pretext and that the employer's refusal to hire him or her is because of national origin or citizenship status. Moreover, while under this standard it is not sufficient to allege that an action results in disproportionate impact, statistics may be used in appropriate cases to aid in proving discriminatory intent. Courts and administrative

agencies at all levels of government routinely infer intentional discrimination in employment, as well as in other areas of discrimination law.

Indeed, without suggesting how individual cases will be handled by the Special Counsel, an example concerning an "English-only" rule is instructive. If an employer who has been in business for several years and has successfully obtained satisfactory employees without the use of an "English-only" rule, adopts such a rule after November 6, 1986, when this Act became law, and if the adoption of that rule falls with disproportionate impact on a particular citizenship stastus group or national origin group, the Special Counsel is well justified under the intent standard in pursuing an investigation to seek an explanation for the adoption of such a rule. While it is feasible that an employer will have a legitimate, nondiscriminatory reason for the adoption of an English language rule during this particular period, the circumstances surrounding the adoption of this new rule may well give rise to a determination by the Special Counsel of a violation of the anti-discrimination provisions in a number of cases.

At least one commenter suggested that it was irrational and illogical to subject employers to different liability standards based solely on their size. The Department disagrees with this observation. Congress clearly desired to prevent employers from protecting themselves from sanctions by refusing to hire persons who look and sound foreign, i.e., from engaging in intentional discrimination. Congress also wished to reach employers with four or more employees. It was not irrational or illogical for Congress to rely upon an existing enforcement mechanism for employers already prohibited from intentional national origin discrimiantion i.e., title VII, even through title VII also proscribes additional conduct, and to create a new mechanism, under section 102 of IRCA, to cover those additional employers and the citizenship discrimination claims it sought to reach.

One commenter suggested that there is an inconsistency in the Department's supposedly taking the position that Congress only prohibited intentional discrimination flowing from fear of sanctions yet covering all intentional discrimination under section 102, whether or not flowing from an employer's desire to avoid sanctions, but refusing to extend the antidiscrimination provisions to disparate impact discrimination. The Department believes there is no inconsistency at all in Congress' banning all intentional discrimination because of its fear that employers desire to avoid sanctions would lead to intentional discrimination in light of the likely difficulty for a charging party or the Special Counsel to prove that such discrimination stemmed directly from an employer's desire to avoid sanctions. It is substantively far different, however, to expand the provisions of the Act through administrative action to a wholly different theory of discrimination, i.e., disparate impact.

Moreover, the preamble to the NPRM did not state that Congress only wished to prohibit international discrimination flowing from sanctions. Rather it said: "Congress' purposes in enacting section 102 is clearly to address intentional discrimination" (52 FR 9275). It then went on to note that the legislative history clearly reflected Congress' desire to prohibit intentional discrimination flowing from sanctions, but it did not state that that was the only species of intentional discrimination prohibited by the Act. The language of section 102 is broad enough to cover all intentional discrimination because of national origin or citizenship status.

The legislative history is also replete with the close connection between the sanctions provisions and the antidiscrimination provisions. Indeed, as mentioned earlier, the sunset provision in the antidiscrimination provisions is also tied to the sunset of the sanctions provisions. Congress' purpose in enacting section 102 was to address employer discrimination caused by the Act, i.e., employer efforts to avoid sanctions by refusing to hire, recruit or refer for a fee, or firing someone because the person looked or sounded "foreign." Congress was not talking about antidiscrimination provisions based on a past history of discrimination. Indeed, Congressman Rodino stated: "Antidiscrimination legislation of this nature is unprecedented in that it is based upon anticipated discrimination, rather than an historical pattern of past discrimination." 131 Cong. Rec. H10, 584 (daily ed. Oct. 15, 1986).

The Department reiterates that, with the easy means available to verify both identity and authorization to work, there is no excuse for any employer to discriminate on the basis of appearance or accent in a misguided effort to avoid sanctions. Indeed, INS rules reflect the statute's clear provision that, so long as the documentation appears reasonable on its face, and the employer does not knowingly hire a person not authorized to work, no sanctions will be imposed if an individual is later determined to be an alien unauthorized to work.

III. Procedures

Section 102 of the Act provides procedures for enforcement of its provisions. The final rule implements the statutory requirements and provides supplemental material where necessary.

Section 44.300 Filing a charge.

In accordance with the statute, charges of unfair immigration-related employment practices may be filed with the Special Counsel by aggrieved individuals, their authorized representatives, or by officers of the Immigration and Naturalization Service (§ 44.300(a)). A charge may be filed against any "person or entity" that engages in an unfair immigration-related employment practice. The regulation uses the statutory phrase "person or entity" in the definition of respondent in § 44.101(f), rather than "employer" because the statute covers practices by entities that may not be in an employment relationship to the aggrieved individual, e.g., recruitment or referral agencies, or unions or other organizations performing I–9 employment verification functions for employers.

One commenter indicated that the definition of charging party in the NPRM implied that only individuals, and not organizations, could file a charge on behalf of an injured party. The definition and related sections (§§ 44.101(b), 44.300(a)(1)) have been revised to clarify that private organizations may file on behalf of individuals. State or local government agencies or organizations, however, are not authorized to be complainants before administrative law judges because the statute speaks only of "private actions" (8 U.S.C. 1324b(d)(2)). Accordingly, they are also not included in the definition of charging party. Information provided to the Special Counsel by Federal, State, or local government organizations, of course, can form the basis of an investigation on the Special Counsel's own initiative. Federal officials, other than officers of the Immigration and Naturalization Service (who are authorized by statute to file charges), may not be charging parties. To permit other Federal officials to file charges would undermine the central Federal enforcement role contemplated by Congress for the Special Counsel.

The NPRM specified that the filing of a charge on another person's behalf must be authorized in writing. Some commenters urged that the injured party

VOL

1987
UMI

not be required to sign the charge in cases where he or she has authorized another individual or an organization to be the charging party. The Department agrees that it is not necessary to have the injured party's written authorization or signature on the charge, so long as the charging party affirms that he or she is authorized to file a charge on the injured party's behalf. The signature requirement of § 44.101(a) (10)(ii), therefore, has been deleted.

If a charging party is alleging the occurrence of an unfair immigration-related employment practice adversely affecting directly more than one person, only one injured person need be identified in the charge. As required by the statute, the regulation mandates that charges be filed within 180 days of the alleged discrimination. Thus, in the case of charges where more than one person has arguably been subjected to discrimination, only those persons who have been discriminated against within 180 days of the filing of the charge will be entitled to be protected by the anti-discrimination provisions.

Several commenters urged that the 180-day filing requirement not be made effective until the Office of Special Counsel is fully operational. We believe it would be illegal to toll the running of the 180-day period for this reason. Even though Congress made section 102 effective immediately upon its enactment and knew that an administrative enforcement structure could not be established immediately, it nevertheless established an unqualified 180-day filing requirement. It should be noted that an Acting Special Counsel was named by President Reagan on April 16, 1987. Further, a postal address was established for the receipt of charges within 180 days of the effective date of the statute. Charges should be sent to: Office of the Special Counsel for Immigration-Related Unfair Employment Practices, U.S. Department of Justice, P.O. Box 65490, Washington, DC 20035–5490.

Section 44.300(d) of the final rule, which was not included in the NPRM, delineates the exclusive spheres of jurisdiction of the Office of the Special Counsel and EEOC over charges of unfair immigration-related employment practices in accordance with 8 U.S.C. 1324(b)(2).

The definition of "charge" lists information that the Special Counsel must have before proceeding with an investigation. The definition of charge as amended in the final rule requires an alien to disclose his or her alien registration number and date of birth. This information will enable the Special Counsel to verify whether an alien is authorized to work and, thus, protected by section 102.

If the injured party is an alien authorized to work, the regulation also requires the charging party to provide information concerning whether the alien: Is lawfully admitted for permanent residence, is granted the status of an alien lawfully admitted for temporary residence under 8 U.S.C. 1255a(a)(1), is admitted as a refugee under 8 U.S.C. 1157, or has been granted asylum under 8 U.S.C. 1158; has applied for naturalization and the date of such application; and has completed a declaration of intention to become a citizen and the date of such declaration. This information is required in order for the Special Counsel to determine whether the alien meets the statutory definition of "intending citizen" protected by the antidiscrimination provisions of the Act where the charge is based on citizenship status. (Authorized aliens need not establish "intending citizen" status in order to file a charge alleging national origin discrimination.) This information, which is required for a non-citizen or non-national injured party to assert a citizenship discrimination claim under the Act, should be within the injured party's knowledge and its disclosure will save time in the Special Counsel's investigations. Such information will also be useful even in cases where an alien alleges only national origin discrimination because the Special Counsel may determine that there has been discrimination on the basis of citizenship. However, if the charging party alleges only national origin discrimination, the omission of this information will not render the charge incomplete.

The definition of "citizen or intending citizen" requires that aliens make timely application for naturalization in order to acquire "intending citizen" status. We wish to emphasize that this requirement does not bar aliens who are not yet eligible to apply for naturalization, but who otherwise satisfy the requirements of the definition, from achieving "intending citizen" status and, thus, protection from citizenship discrimination under the statute.

The Department received a number of specific comments on the definition of "charge." One commenter argued that it is unreasonable to require injured parties or their representatives, particularly when they are not attorneys, to identify the alleged discrimination as citizenship or national origin discrimination. We believe that this information is important for the Special Counsel to be able to determine whether it has jurisdiction over part or all of the charge and, thus, whether to refer to the charge to EEOC for investigation under title VI when appropriate. Nothing in the rule forecloses a charging party from identifying the discrimination as both citizenship and national origin discrimination. A charging party, however, before he or she has filed a charge, must believe some form of prohibited discrimination occurred or the charge would not have been filed.

Several commenters urged that the definition of "citizen or intending citizen" in § 44.101(c) and the charge form be expanded to include aliens granted temporary resident status under the Special Agricultural Worker Program or the Replenishment Agricultural Worker Program. Expanding the definition, however, would contravene the express language of the statute. Of the myriad categories of aliens in the United States, Congress specifically chose to confer protection only on those four categories mentioned in the statute.

Aliens who are authorized to work by INS as a result of the amnesty application process may assert national origin discrimination claims and, upon meeting criteria for the status of "intending citizen," may file citizenship claims as well. In the case of an alien not authorized to work, but who indicates he or she intends to apply for amnesty, such an alien is regarded as authorized to work through September 1, 1987, and is protected by section 102 through September 1, 1987. Such an individual who, by September 1, 1987, has applied for amnesty and is authorized by INS to work during the pendency of the application will continue to be protected under relevant provisions of section 102. Of course, if authorization to work is withdrawn, the protections of section 102 cease.

One commenter queried whether the charge requirements would be satisfied if the declaration of intention to become a citizen were completed at some point after the occurrence of the alleged discrimination. In addition, several commenters urged that the declaration of intention requirement not become effective until a form evidencing this intent becomes widely available. It was asserted that the form currently used for this purpose (INS Form N–315, "Declaration of Intention") has fallen into disuse and that it could be executed only by legal permanent resident aliens.

We believe that the statute affords protection from citizenship discrimination only to those individuals who meet the statutory definition of "citizen or intending citizen" at the time

of the alleged discriminatory acts. Therefore, the written declaration of intention must be completed prior to the occurrence of the alleged discrimination acts. However, because of the initial unavailability of the new INS Form I–772, "Declaration of Intending Citizen," this requirement will not apply to acts of discrimination occurring prior to December 1, 1987. Therefore, for purposes of determining whether individuals are "intending citizens," the Special Counsel will deem them to have completed the new INS Form I–772 prior to any discriminatory act occurring between November 6, 1986, and December 1, 1987, if such individuals: (1) Complete the new INS Form I–772 on or before December 1, 1987, and (2) assert in a charge that, prior to the alleged act of discrimination, they intended to become U.S. citizens, and would have completed this form had it been available. "Completion" of a declaration of intention to become a citizen means that an INS Form N–315, "Declaration of Intention," has been filed with any court exercising naturalization jurisdiction (8 CFR 334a.1) or that an INS Form I–772, "Declaration of Intending Citizen," has been filed with the Immigration and Naturalization Service.

An alien authorized to work in the United States who is not an intending citizen can, of course, avail himself of the Act's protections against national origin discrimination.

In order to conform the regulation to the statute, the final rule contains a technical amendment to § 44.101(a)(6) that requires that a charge indicate whether the injured party is an alien "authorized to work in the United States." The proposed rule merely required the injured party to indicate whether he or she is an alien.

To facilitiate the filing of charges, the Department has prepared the following charge form that, if completed, would provide the Special Counsel with the information necessary to proceed with an investigation of the charge.

Department of Justice Office of the Special Counsel for Immigration-Related Unfair Employment Practices

Post Office Box 65490, Washington, DC 20035–5490

Charge Form for Unfair Immigration-Related Employment Practices

(1) Charging Party:

Full Name:_____
Other Names Ever Used: _____
Address: _____
City, State and Zip Code: _____
Telephone Number:_____
(Area Code)

Injured Party (if injured party is same as charging party, write "same")

Full Name:_____
Other Names Ever Used: _____
Address: _____
City, State and Zip Code: _____
Telephone Number:_____
(Area Code)

(2) Individual, business, or organization which you believe has discriminated:

Full Name:_____
Address: _____
City, State and Zip Code: _____
Telephone Number:_____
(if known) (Area Code)

(3) Individual, business, or organization has (check one):

____ Less than 15 employees, but more than 3 employees.
____ 15 or more employees.
____ Unable to estimate number of employees

(4) Injured party was discriminated against because of (check one or both):

____ National Origin
____ Citizenship

(5) Injured party is:

____ Citizen or national of the United States
____ Alien authorized to work in the United States
(Date of birth: _____)
(Alien registration number(s): _____)

If an alien authorized to work in the United States, injured party (check one, if applicable):

____ Is lawfully admitted for permanent residence
____ Has status of alien lawfully admitted for temporary residence under 8 U.S.C. 1255a(a)(1)
____ Is admitted as a refugee under 8 U.S.C. 1157
____ Has been granted asylum under 8 U.S.C. 1158.

If an alien authorized to work in the United States, injured party:

____Has applied for naturalization
Date of Application: _____
____Has not applied for naturalization

If an alien authorized to work in the United States, injured party:

____Has completed a declaration of intention to become a citizen
Date of Declaration: _____

(6) When did the discrimination occur:

_____
(Date)

(7) Where did the discrimination occur:

_____
(Place)

(8) Describe the discrimination:

(Use additional sheets if necessary)

_____
_____
_____

(9) Has a charge based on this set of facts been filed with EEOC?

____ Yes
____No

If yes, which office?

Address: _____
City, State and Zip Code: _____
Telephone: _____
(Area Code)
Contact Person (if known): _____
Date filed: _____

(10) Affirmation and Signature of Charging Party:

(a) If this charge is being filed by the injured party:

As a person alleging that I have been injured by an unfair immigration-related employment practice, I understand that the Office of the Special Counsel may find it necessary to reveal my identity and other information during the conduct of the investigation of my charge, during any hearing or other proceeding as a result of my charge, or in limited circumstances in response to inquiries under the Freedom of Information Act. I give my consent. I affirm that, to the best of my knowledge, the information provided on this form is true.

_____
(Signature of injured Party)

_____
(Date)

(b) If this charge is being filed by an authorized representative of the injured party:

I affirm that, to the best of my knowledge, the information provided on this form is true and that I am authorized to file this charge on behalf of the injured party. I understand that the Office of the Special Counsel may find it necessary to reveal my identity during the conduct of the investigation of this charge, during a hearing or other proceeding as a result of this charge, or in limited circumstances in response to inquires under the Freedom of Information Act. I give my consent.

_____
(Signature of Authorized Representative)

_____
(Date)

(c) If this charge is being filed by an INS officer:

I affirm that, to the best of my knowledge, the information provided on this form is true. I understand that the Office of the Special Counsel may find it necessary to reveal my identity during the conduct of the investigation of this charge, during a hearing or other proceeding as a result of this charge, or in limited circumstances in response to inquires under the Freedom of Information Act. I give my consent.

_____
(Signature of INS Officer)

_____
(Date)

VOL 52 ISS 193 OCT 6 1987 UMI

Although the Department encourages use of the form, its use is optional. The Department intends to have copies of this form made available across the United States—at Offices of the Immigration and Naturalization Service, at Offices of the United States Attorneys, and at district, area, and local offices of the Equal Employment Opportunity Commission. This charge form will be available in both English and Spanish. If used, responsibility for filing it with the Office of the Special Counsel rests with the charging party.

Section 44.301 Acceptance of charge.

As required by the Act, the regulation requires that respondents be notified of charges against them filed with the Special Counsel (§ 44.301(a),(e)). In addition, it supplements the Act by requiring notice to the charging party upon receipt of his or her charge by the Special Counsel (§ 44.301(a),(b)). If the charging party's submission lacks information necessary for it to constitute a "charge" as defined in § 44.101(a), the regulation requires the Special Counsel to notify the charging party that the submission is inadequate and to specify the additional information that is needed for it to be considered a complete charge (§ 44.301(c)). In the final rule, however, § 44.301 has been revised to make clear that if a written submission does not contain all of the information necessary to constitute a charge, the Special Counsel may in his or her discretion treat it as a filed charge and collect the rest of the needed information during his or her investigation. The Department does not intend through its charge requirement to erect technical barriers to the filing of charges. Nevertheless, charging parties should include all of the information specified in the definition of charge to the best of their abilities. Indeed, the rule retains the authority of the Special Counsel to request in writing the additional information necessary to constitute a charge. This flexible approach best serves the interest of effective enforcement of section 102.

The 120-day statutory period in which the Special Counsel must undertake to investigate the charge and determine whether or not to file a complaint with an administrative law judge does not begin to run until a "charge," as defined by the regulation (§ 44.101(a)), or a submission deemed to be a filed charge under § 44.301(c)(2), has been received by the Special Counsel. In the case of inadequate submissions that are later deemed charges upon the receipt of additional information requested by the Special Counsel, the date from which the 120-day period begins to run is the date when the Special Counsel receives the additional information (§ 44.301(c)(1)). A submission deemed to be a charge under § 44.301(c)(1) meets the 180-day filing requirement of § 44.300(b) so long as the original submission is filed within 180 days of the alleged occurrence of an unfair immigration-related employment practice, and any additional information is provided either within the 180-day period or within 45 days of the date on which the charging party receives the Special Counsel's request for additional information, whichever is later.

The Special Counsel's notice to the charging party will specify the date on which the charge was received and inform the charging party, other than an officer of the Immigration and Naturalization Service, that he or she has the right to file a compliant directly before an administrative law judge if the Special Counsel does not do so within 120 days of the date of the Special Counsel's receipt of the charge (§ 44.301(b)). As required by the statute, notice of the charge will also be served by certified mail on the respondent within 10 days of the Special Counsel's receipt of the charge (§ 44.301(e)).

Section 44.302 Investigation.

In accordance with the statute, the Special Counsel must, within 120 days of receipt of a charge, undertake an investigation of the charge and determine whether a complaint with respect to the charge will be brought before an administrative law judge (§ 44.303(a)). Section 44.302(b) specifies that any person or entity being investigated shall permit access to its books, records, accounts, and other pertinent information during normal business hours. The authority for this provision can be found in 8 U.S.C. 1324b(f)(2), which specifies that the Special Counsel must be provided reasonable access to examine the evidence of any person or entity being investigated (§ 44.302(b)). On-site investigations may be conducted at the discretion of the Special Counsel.

One commenter urged that respondents be permitted to engage in discovery upon acceptance of a charge by the Special Counsel. We believe, however, that such discovery would be inappropriate while the Special Counsel is discharging his or her investigatory responsibilities under the Act. Respondents, of course, may be entitled to discovery once a complaint is filed with an administrative law judge.

Section 44.303 Determination.

As provided in the statute, the regulation allows the charging party, other than an officer of the Immigration and Naturalization Service, to file a complaint with an administrative law judge if the Special Counsel fails to do so within 120 days (§ 44.303)c)). We emphasize that, although the complaint must allege the same unfair immigration-related employment practice as alleged in the charge, complete identity of facts between the charge and the complaint is not required and new information may be added. Section 44.101(d), defining "complaint" has been reworded to clarify this point.

The statute sets no limitation on the period of time that the complainant has to file his or her own action. It is reasonable, however, to limit this time period in some way in order to avoid the filing of stale complaints. Consequently, the regulation gives the complainant 90 days from the end of the 120-day period to bring an action directly (§ 44.303(c)). This 90-day limit is analogous to the statutory 90-day period provided under section 706 of title VII of the Civil Rights Act of 1964 (42 U.S.C. 2000e–5) during which a charging party may file a civil action against the respondent after receipt of a right to sue letter. The period of time in which the Special Counsel may file a complaint in the absence of a filing by the charging party is similarly limited to 90 days from the end of the 120-day period (§ 44.303(d)(1)).

The regulation also allows the Special Counsel, if he or she desires to notify the charging party even before the end of the 120-day period that a complaint will not be brought before an administrative law judge (§ 44.303(b)). If such a letter of determination is issued, the final rule allows the charging party, other than an officer of the Immigration and Naturalization Service, 90 days from the end of the 120-day period to file his or her own complaint directly with an administrative law judge (§ 44.303(c)). The NPRM had only permitted the charging party 90 days from the issuance of the letter to file a complaint.

Even after the expiration of the 120-day period, the regulation permits the Special Counsel to file a complaint within 90 days so long as the individual has not yet filed his or her own complaint (§ 44.303(d)(1)). The reference to a "letter of determination" in § 44.303(d)(1), which appeared in the NPRM, has been deleted from the final rule. The Special Counsel also remains free at any time to seek intervention in any proceeding brought before an administrative law judge by the charging party (§ 44.303(d)(2)).

Section 44.304 Special Counsel acting on own initiative.

Section 44.304(b) has been amended in the final rule to limit the period of time in which the Special Counsel on his or her own initiative may investigate and file a complaint of an unfair immigration-related employment practice. We believe that requiring a complaint to be filed within 180 days of the occurrence of an unfair immigration-related employment practice is a reasonable implementation of the desire of Congress reflected in 8 U.S.C. 1324b(d)(1), (3), to place a time limit on the actions of the Special Counsel.

IV. Deletion of Administrative Law Judge Procedures

The Executive Office of Immigration Review is issuing a detailed procedural regulation to govern hearings by administrative law judges under both the antidiscrimination and employer sanctions provisions of IRCA. This regulation, which will be codified as 28 CFR Part 68, will include provisions covering the same procedural issues addressed in the Department's proposed rule. In order to avoid duplication, those sections of the proposed rule containing procedures relating to the conduct of administrative enforcement proceedings (§§ 44.306–44.310) have been deleted from this final rule. The Executive Office of Immigration Review procedural rule will be published as an interim final rule. Thus, the public will be given another chance to comment on the procedures that will be used to conduct hearings and, at the same time, the Department will have in place a functioning set of procedures so that there will be no delay in enforcing section 102 of the Act.

V. New Provision Prohibiting Intimidation or Retaliation

The final rule includes a new § 44.201 which prohibits certain acts of interference with rights secured by this part and intimidation or retaliation against persons seeking vindication or their rights under this part. Although the statute does not include such a provision, we believe that § 44.201 is reasonably related to the purposes of the Act and that its absence could eviscerate the effectiveness of section 102. The prohibitions contained in this section are not limited to persons or entities against whom a charge has been filed. They would also apply, for example, to an employer who refuses to hire an applicant because that individual has filed a charge against another employer.

This rule is not a major rule within the meaning of Executive Order 12291 (46 FR 13193, 3 CFR 1981 Comp., p. 127). Moreover, a regulatory flexibility analysis has not been prepared under the Regulatory Flexibility Act (5 U.S.C. 601-612), because the rule is unlikely to have a significant economic impact on a substantial number of small entities.

List of Subjects in 28 CFR Part 44

Administrative practice and procedure, Aliens, Citizenship and naturalization, Civil rights, Discrimination in employment, Employment, Equal employment opportunity, Immigration, Investigations, Law enforcement officers, Minority groups, Nationality, Naturalization, Nondiscrimination, Refugees.

For the reasons set forth in the preamble, Chapter I of Title 28 of the Code of Federal Regulations is amended by adding Part 44 to read as follows:

PART 44—UNFAIR IMMIGRATION-RELATED EMPLOYMENT PRACTICES

Subpart A—General

Sec.
44.100 Purpose.
44.101 Definitions.
44.102–44.199 [Reserved].

Subpart B—Prohibited Practices

44.200 Unfair immigration-related employment practices.
44.201 Intimidation or retaliation prohibited.
44.202–44.299 [Reserved].

Subpart C—Enforcement Procedures

44.300 Filing a charge.
44.301 Acceptance of charge.
44.302 Investigation.
44.303 Determination.
44.304 Special Counsel acting on own initiative.
44.305 Regional offices.

Authority: 8 U.S.C. 1324b

Subpart A—General

§ 44.100 Purpose.

The purpose of this part is to effectuate section 102 of the Immigration Reform and Control Act of 1986, which prohibits certain unfair immigration-related employment practices.

§ 44.101 Definitions.

(a) "Charge" means a written statement under oath or affirmation that—

(1) Identifies the charging party's name, address, and telephone number;

(2) Identifies the injured party's name, address, and telephone number, if the charging party is not the injured party;

(3) Identifies the name and address of the person or entity against whom the charge is being made;

(4) Includes a statement sufficient to describe the circumstances, place, and date of an alleged unfair immigration-related employment practice;

(5) Indicates whether the basis of the alleged discrimination is national origin, citizenship status, or both;

(6) Indicates whether the injured party is a U.S. citizen, U.S. national, or alien authorized to work in the United States;

(7) Indicates, if the injured party is an alien authorized to work, whether the injured party—

(i) Has been—

(A) Lawfully admitted for permanent residence;

(B) Granted the status of an alien lawfully admitted for temporary residence under 8 U.S.C. 1255a(a)(1);

(C) Admitted as a refugee under 8 U.S.C. 1157; or

(D) Granted asylum under 8 U.S.C. 1158; and

(ii) Has completed a declaration of intention to become a citizen (INS Form N–315, "Declaration of Intention"; or INS Form I–772, "Declaration of Intending Citizen") and, if so, indicates the date of the declaration; and

(iii) Has applied for naturalization (and if so, indicates the date of the application);

(8) Identifies, if the injured party is an alien authorized to work, the injured party's alien registration number and date of birth.

(9) Indicates, if possible, the number of persons employed on the date of the alleged discrimination by the person or entity against whom the charge is being made;

(10) Is signed by the charging party and, if the charging party is neither the injured party nor an officer of the Immigration and Naturalization Service, indicates that the charging party has the authorization of the injured party to file the charge.

(11) Indicates whether a charge based on the same set of facts has been filed with the Equal Employment Opportunity Commission, and if so, the specific office, and contact person (if known); and

(12) Authorizes the Special Counsel to reveal the identity of the injured or charging party when necessary to carry out the purposes of this part.

(b) "Charging party" means—

(1) An individual who files a charge with the Special Counsel that alleges that he or she has been adversely affected directly by an unfair immigration-related employment practice;

(2) An individual or private organization who is authorized by an individual to file a charge with the

VOL 52 ISS 193 OCT 6 1987 UMI

Special Counsel that alleges that the individual has been adversely affected directly by an unfair immigration-related employment practice; or

(3) An officer of the Immigration and Naturalization Service who files a charge with the Special Counsel that alleges that an unfair immigration-related employment practice has occurred.

(c) "Citizen or intending citizen" means an individual who—

(1) Is a citizen or national of the United States; or

(2) Is an alien who—

(i) Is lawfully admitted for permanent residence, is granted the status of an alien lawfully admitted for temporary residence under 8 U.S.C. 1255a(a)(1), is admitted as a refugee under 8 U.S.C. 1157, or is granted asylum under 8 U.S.C. 1158; and

(ii) Evidences an intention to become a citizen of the United States through completing a declaration of intention to become a citizen (INS Form N–315, "Declaration of Intention"; or INS Form I–772, "Declaration of Intending Citizen"). As used in this definition it does not include an alien who—

(3) Fails to apply for naturalization within six months of the date the alien first becomes eligible (by virtue of period of lawful permanent residence) to apply for naturalization or, if later, by May 6, 1987; or

(4) Has applied on a timely basis, but has not been naturalized as a citizen within two years after the date of the application, unless the alien can establish that he or she is actively pursuing naturalization, except that time consumed in the Immigration and Naturalization Service's processing of the application shall not be counted toward the two-year period.

(d) "Complaint" means a written submission filed with an administrative law judge by the Special Counsel or the charging party, other than an officer of the Immigration and Naturalization Service, that is based on the same charge filed with the Special Counsel.

(e) "Injured party" means a person who claims to have been adversely affected directly by an unfair immigration-related employment practice or, in the case of a charge filed by an officer of the Immigration and Naturalization Service or by a charging party other than the injured party, is alleged to be so affected.

(f) "Respondent" means a person or entity against whom a charge of an unfair immigration-related employment practice has been filed.

(g) "Special Counsel" means the Special Counsel for Immigration-Related Unfair Employment Practices appointed by the President under section 102 of the Immigration Reform and Control Act of 1986, or his or her designee.

Subpart B–Prohibited Practices

§ 44.200 Unfair immigration-related employment practices.

(a) *General.* It is an unfair immigration-related employment practice for a person or other entity to knowingly and intentionally discriminate or engage in a pattern of practice of knowing and intentional discrimination against any individual (other than an unauthorized alien) with respect to the hiring, or recruitment or referral for a fee, of the individual for employment or the discharging of the individual from employment—

(1) Because of such individual's national origin; or

(2) In the case of a citizen or intending citizen, because of such individual's citizenship status.

(b) *Exceptions.* (1) Paragraph (a) of this section shall not apply to—

(i) A person or other entity that employs three or fewer employees;

(ii) Discrimination because of an individual's national origin if the discrimination with respect to that person or entity and that individual is covered under 42 U.S.C. 2000e–2; or

(iii) Discrimination because of citizenship which—

(A) Is otherwise required in order to comply with law, regulation, or Executive order; or

(B) Is required by Federal, State, or local government contract; or

(C) Which the Attorney General determines to be essential for an employer to do business with an agency or department of the Federal, State, or local government.

(2) Notwithstanding any other provision of this part, it is not an unfair immigration-related employment practice for a person or other entity to prefer to hire, recruit or refer for a fee an individual who is a citizen or national of the United States over another individual who is an alien if the two individuals are equally qualified.

§ 44.201 Intimidation or retaliation prohibited.

No person or other entity subject to § 44.200(a) shall intimidate, threaten, coerce, or retaliate against any individual for the purpose of interfering with any right or privilege secured by this part or because he or she intends to file or has filed a charge or a complaint, testified, assisted, or participated in any manner in an investigation, proceeding, or hearing under this part.

Subpart C—Enforcement Procedures

§ 44.300 Filing a charge.

(a) *Who may file.* (1) Any individual who believes that he or she has been adversely affected directly by an unfair immigration-related employment practice, or any individual or private organization authorized to act on such person's behalf, may file a charge with the Special Counsel.

(2) Any officer of the Immigration and Naturalization Service who believes that an unfair immigration-related employment practice has occurred or is occurring may file a charge with the Special Counsel.

(b) *When to file.* Charges shall be filed within 180 days of the alleged occurrence of an unfair immigration-related employment practice. For purposes of determining when a charge is timely under this paragraph, a charge mailed to the Special Counsel shall be deemed filed on the date it is postmarked.

(c) *How to file.* Charges may be (1) mailed to: Office of the Special Counsel for Immigration-Related Unfair Employment Practices, P.O. Box 65490, Washington, DC 20035–5490 or (2) delivered to the Office of the Special Counsel at 1100 Connecticut Avenue, NW., Suite 800, Washington, DC 20036.

(d) *No overlap with EEOC complaints.* No charge may be filed respecting an unfair immigration-related employment practice described in § 44.200(a)(1) if a charge with respect to that practice based on the same set of facts has been filed with the Equal Employment Opportunity Commission under title VII of the Civil Rights Act of 1964, unless the charge is dismissed as being outside the scope of such title. No charge respecting an employment practice may be filed with the Equal Employment Opportunity Commission under such title if a charge with respect to such practice based on the same set of facts has been filed under this section, unless the charge is dismissed by the Special Counsel as being outside the scope of this part.

§ 44.301 Acceptance of charge.

(a) The Special Counsel shall notify the charging party of receipt of a charge as defined in § 44.101(a) or receipt of a submission deemed to be a charge under paragraph (c)(2) of this section.

(b) The notice to the charging party shall specify the date on which the charge was received, state that the charging party, other than an officer of the Immigration and Naturalization Service, may file a complaint before an administrative law judge if the Special Counsel does not do so within 120 days

of receipt of the charge, and state the last date on which such a complaint may be filed.

(c)(1) Subject to paragraph (c)(2) of this section, if a charging party's submission is inadequate to constitute a charge as defined in § 44.101(a), the Special Counsel shall notify the charging party that specified additional information is needed. As of the date that adequate information is received in writing by the Special Counsel, the charging party's submission shall be deemed a filed charge and the Special Counsel shall issue the notices required by paragraphs (b) and (e) of this section.

(2) In the Special Counsel's discretion, the Special Counsel may deem a submission to be a filed charge as of the date of its receipt even though it is inadequate to constitute a charge as defined in § 44.101(a). The Special Counsel may then obtain the additional information specified in §44.101(a) in the course of investigating the charge.

(d)(1) If the Special Counsel receives a charge after 180 days of the alleged occurrence of an unfair immigration-related employment practice, the Special Counsel shall dismiss the charge with prejudice.

(2) In adequate submissions that are later deemed charges under paragraph (c)(1) of this section are timely filed as long as—

(i) The original submission is filed within 180 days of the alleged occurrence of an unfair immigration-related employment practice; and

(ii) Any additional information requested by the Special Counsel pursuant to paragraph (c)(1) of this section is provided in writing to the Special Counsel within the 180-day period or within 45 days of the date on which the charging party received the Special Counsel's notification pursuant to paragraph (c) of this section, whichever is later.

(e) The Special Counsel shall serve notice of the charge on the respondent by certified mail within 10 days of receipt of the charge. The notice shall include the date, place, and circumstances of the alleged unfair immigration-related employment practice.

§ 44.302 Investigation.

(a) The Special Counsel may propound interrogatories, requests for production of documents, and requests for admissions.

(b) The Special Counsel shall have reasonable access to examine the evidence of any person or entity being investigated. The respondent shall permit access by the Special Counsel during normal business hours to such of its books, records, accounts, and other sources of information, as the Special Counsel may deem pertinent to ascertain compliance with this part.

§ 44.303 Determination.

(a) Within 120 days of the receipt of a charge, the Special Counsel shall undertake an investigation of the charge and determine whether a complaint with respect to the charge will be brought before an administrative law judge specially designated by the Attorney General to hear cases under section 102 of the Act.

(b) The Special Counsel may, within the 120-day period, issue a letter of determination notifying the charging party and respondent of the Special Counsel's determination that there is no reasonable cause to believe that the charge is true and that a complaint will not be brought by the Special Counsel before an administrative law judge.

(c)(1) If the Special Counsel does not issue a letter of determination pursuant to § 44.303(b) and fails to bring a complaint before an administrative law judge within 120 days of the date specified in the notice provided under § 44.301(b), the charging party, other than an officer of the Immigration and Naturalization Service, may bring his or her complaint directly before an administrative law judge within 90 days of the end of the 120-day period.

(2) If the Special Counsel issues a letter of determination indicating there is no reasonable cause to believe that the charge is true, pursuant to § 44.303(b), the charging party, other than an officer of the Immigration and Naturalization Service, may immediately, or any time within 90 days of the end of the 120-day period, file a complaint directly before an administrative law judge.

(d) The Special Counsel's failure to bring a complaint before an administrative law judge within 120 days shall not affect the right of the Special Counsel—

(1) At any time during the 90-day period defined in paragraph (c)(1) of this section, but before the charging party files a complaint of his or her own, to bring the complaint before an administrative law judge; or

(2) To seek to intervene at any time in any proceeding before an administrative law judge brought by the charging party.

§ 44.304 Special Counsel acting on own initiative.

(a) The Special Counsel may, on his or her own initiative, conduct investigations respecting unfair immigration-related employment practices when there is reason to believe that a person or entity has engaged or is engaging in such practices.

(b) The Special Counsel may file a complaint with an administrative law judge where there is reasonable cause to believe that an unfair immigration-related employment practice has occurred within 180 days from the date of the filing of the complaint.

§ 44.305 Regional offices.

The Special Counsel, in consultation with the Attorney General, shall establish such regional offices as may be necessary to carry out his or her duties.

Edwin Meese III,

Attorney General.

Date: September 30, 1987.

Department of Education

Perkins Loan (formerly National Direct Student Loan), College Work-Study, and Supplemental Educational Opportunity Grant Programs; Notice of Closing Date for Institutions To File "Request for Institutional Eligibility for Programs"

VOL 52 ISS 193 OCT 6 1987 UMI

DEPARTMENT OF EDUCATION

Perkins Loan (formerly National Direct Student Loan) College Work-Study, and Supplemental Educational Opportunity Grant Programs; Closing Date for Institutions To File "Request for Institutional Eligibility for Programs"

AGENCY: Department of Education.
ACTION: Notice of closing date for Institutions to file "Request for Institutional Eligibility for Programs" to participate in the Perkins Loan, College Work-Study, and Supplemental Educational Opportunity Grant Programs for the 1988–89 Award Year.

SUMMARY: The Secretary invites currently ineligible institutions of higher education that wish to participate in the "campus-based programs" in the 1988–89 award year to submit to the Secretary an institutional eligibility application form.

The campus-based programs are the Perkins Loan Program, the College Work-Study Program, and the Supplemental Educational Opportunity Grant Program and are authorized by Title IV of the Higher Education Act of 1965. The 1988–89 award year is July 1, 1988 through June 30, 1989.

(20 U.S.C. 1087aa–1087ii; 42 U.S.C. 2751–2756b; and 20 U.S.C. 1070b–1070b–3)

Closing Date For Filing Application. To participate in a campus-based program in the 1988–89 award year, an institution must mail or hand deliver its "Request for Institutional Eligibility for Programs" form to the address indicated below on or before January 15, 1988.

Applications Delivered by Mail. An institutional eligibility application delivered by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention: DEC/DCMAS/OPE, 400 Maryland Avenue, SW., Washington, DC 20202.

An applicant must show proof of mailing consisting of one of the following: (1) A legibly dated U.S. Postal Service postmark; (2) a legible mail receipt with the date of mailing stamped by the U.S. Postal Service; (3) a dated shipping label, invoice, or receipt from a commercial carrier; (4) any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) A private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method an applicant should check with its local post office.

An applicant is encouraged to use registered or at least first class mail. Institutions which submit eligibility applications that are received after the closing date will not be considered for funding under the campus-based programs for award year 1988–89.

Applications Delivered by Hand. An institutional eligibility application that is hand-delivered must be taken to the U.S. Department of Education, Application Control Center (ACC), Room 3633, Regional Office Building 3, 7th and D Streets SW., Washington, DC. The Application Control Center will accept hand-delivered applications between 8:00 a.m. and 4:30 p.m. (Eastern Standard Time) daily, except Saturdays, Sundays, and Federal holidays. An application for the 1988–89 award year eligibility that is hand-delivered will not be accepted after 4:30 p.m. on the closing date.

Supplementary Information

Under the three campus-based programs, the Secretary allocates funds to eligible institutions of higher education. The Secretary will not allocate funds under the campus-based programs for award year 1988–89 to any currently ineligible institution unless the institution files its "Request for Institutional Eligibility for Programs" form (ED Form 1059) by the closing date. If the institution submits its institutional eligibility application after the closing date, the Secretary will use this application in determining the institution's eligibility to participate in the campus-based programs beginning with the 1989–90 award year.

Ineligible institutions include:

(1) An institution that has not been designated as an eligible institution by the Secretary.

(2) A location of an eligible institution that is currently not included in the Department's eligibility certification but has been included in the institution's Fiscal-Operations Report and Application to Participate (FISAP).

(3) A branch campus that is currently part of an eligible institution but has filed its own FISAP and is seeking eligibility as a separate institution of higher education. (ED Form 1059, OMB #1840–0098 approved through August 31, 1987).

The Secretary wishes to advise institutions that the institutional eligibility form "Request for Institutional Eligibility for Programs" (ED Form 1059) should not be confused with the FISAP (ED Form 646–1) that institutions were required to submit by September 25, 1987, in order to receive funds under the campus-based programs for the 1988–89 award year.

Applicable Regulations

The following regulations apply to the campus-based programs:

(1) Student Assistance General Provisions, 34 CFR Part 668.

(2) National Direct Student Loan Program, 34 CFR Part 674.

(3) College Work-Study Program, 34 CFR Part 675.

(4) Supplemental Educational Opportunity Grant Program, 34 CFR Part 676.

For Further Information Contact. For information concerning designation of eligibility, contact: Dr. Joan E. Duval, Director, Division of Eligibility and Certification, Office of Postsecondary Education, U.S. Department of Education, 400 Maryland Avenue, SW., (Mail Stop 3329, ROB–3), Washington, DC 20202. Telephone (202) 732–4906.

For technical assistance concerning the FISAP and/or other operational procedures of the campus-based programs, contact: Robert R. Coates, Chief, Campus-Based Programs Branch, Division of Program Operations, 400 Maryland Avenue, SW., (Mail Stop 4621, ROB–3), Washington, DC 20202. Telephone: (202) 732–3715.

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Final Rule to Determine Glaucocarpum suffrutescens (Toad-flax Cress) to be an Endangered Species

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The Service determines a plant, *Glaucocarpum suffrutescens* (toad-flax cress), to be an endangered species under the authority of the Endangered Species Act of 1973, as amended. It is endemic in the Uinta Basin of northeastern Utah on shale barrens of the Green River Formation, in or adjacent to the Hill Creek drainage in southern Uintah County, and at the base of the Badland Cliffs in adjacent Duchesne County. The nine known populations of the species total about 3,000 individuals and have experienced a range and population decline since its discovery 50 years ago. The reasons for the decline are not fully understood, and may be due to habitat alteration, possibly from building stone removal, localized historic overgrazing and oil and gas development. Oil, gas, and oil shale development could significantly jeopardize the species in the future. This rule implements protection provided by the Endangered Species Act of 1973, as amended. A proposal to designate critical habitat for this species is withdrawn.

DATE: The effective date of this rule is November 5, 1987.

ADDRESSES: The complete file for this rule is available for public inspection, by appointment, during normal business hours at the Service's Regional Office, 134 Union Boulevard, 4th floor, Lakewood, Colorado; or Salt Lake City Field Office, Room 2078 Administration Building, 1745 West 1700 South, Salt Lake City, Utah 84104.

FOR FURTHER INFORMATION CONTACT: Mr. John L. England, Botanist, at the Salt Lake City address above, (801/524–4430 or FTS 588–4430).

SUPPLEMENTARY INFORMATION:

Background

Glaucocarpum suffrutescens was first discovered in 1935 by Edward Graham and described by Reed Rollins as *Thelypodium suffrutescens* (Graham 1937). Following further research, Dr. Rollins erected the monotypic genus *Glaucocarpum* for this species (Rollins 1938). The species has also been treated in the genus *Schoenocrambe* (Welsh and Chatterley 1985). The toad-flax cress is a member of the mustard family (Brassicaceae); it is a perennial herb from a deep woody root and forms a clump of several slender simple stems, with elongated loose inflorescence and yellow flowers.

Glaucocarpum suffrutescens is one of several endemics limited to the Green River Formation in the Uinta Basin of eastern Utah. It survives with a few other species primarily on one calcareous shale stratum strongly resistant to erosion. The habitat of this plant is disjunct knolls and benches resembling small extremely dry desert islands surrounded by sagebrush or pinyon-juniper woodland. *Cryptantha barnebyi* (Barneby cat's-eye), another candidate plant under review for threatened or endangered status (50 FR 39526), occurs, at least in part, in the habitat of *Glaucocarpum*.

Glaucocarpum occurs in two main population groups near each other in Uintah County. One group is centered in the Gray Knolls between the Green River and Hill Creek, with 800–1,000 plants in 3 populations. The other group is centered on Little Pack Mountain and along the flanks of Big Pack Mountain between Hill Creek and Willow Creek, with about 2,000 individuals in 5 populations. A small third population center, about 20 miles to the west in Duchesne County, has 107 known plants. The individual populations range in size from 3 to perhaps 1,000 plants. Most of the populations occur on Federal land under the jurisdiction of the Bureau of Land Management (BLM) and the Department of Energy (DOE) and on Indian land under the jurisdiction of the Bureau of Indian Affairs (BIA) and the Ute Indian tribe.

From 1977 to 1986, field work was undertaken on this species by Karl Wright, Larry England, Kathy Mutz, Elizabeth Neese, Scott Peterson, and John and Leila Shultz. This work documented range, specific occurrences, approximate number of individuals, and recommended areas of critical habitat for *Glaucocarpum* (Shultz and Mutz 1979, England 1982).

The toad-flax cress habitat is underlain by oil shale deposits. Building stone collecting may have significantly altered the habitat of the species and decreased its range and population. Historic heavy grazing may also have had an impact on some of the species' populations. Oil shale and oil and gas development without adequate provision for the species could destroy it in the future.

Section 12 of the Endangered Species Act of 1973 (Act) directed the Secretary of the Smithsonian Institution to prepare a report on those plants considered to be endangered, threatened, or extinct. This report, designated as House Document No. 94–51, was presented to Congress on January 9, 1975. On July 1, 1975, the Service published a notice in the **Federal Register** (40 FR 27823) of its acceptance of the report as a petition to list the taxa named therein under section 4(c)(2) of the 1973 Act (petition acceptance is now governed by section 4(b)(3) of the Act), and of its intention to review the status of those plants. *Glaucocarpum suffrutescens* was included in the July 1, 1975, notice and was proposed by the Service for listing as endangered along with some 1,700 other vascular plant taxa on June 16, 1976 (41 FR 24523). General comments received in relation to the 1976 proposal are summarized in an April 26, 1978, **Federal Register** publication (43 FR 17909).

The Endangered Species Act amendments of 1978 required that all proposals over 2 years old be withdrawn; proposals already over 2 years old were subject to a 1-year grace period. On December 10, 1979, the Service published a notice of withdrawal of that portion of the June 16, 1976, proposal that had not been made final, along with four other proposals that had expired (44 FR 70796). The July 1975, notice was replaced on December 15, 1980, by the Service's publication in the **Federal Register** (45 FR 82480) of a new notice of review for plants, which included *Glaucocarpum suffrutescens* as a category 1 species. Category 1 comprises taxa for which the Service presently has significant biological information to support their being proposed to be listed as endangered or threatened species.

The Endangered Species Act amendments of 1982 required that all petitions pending as of October 13, 1982, be treated as having been newly submitted on that date. The deadline for a finding on such petitions, including that for *Glaucocarpum suffrutescens*, was October 13, 1983. On October 13, 1983, and again on October 12, 1984, a petition finding was made that listing this species was warranted but precluded by other listing actions, in accordance with section 4(b)(3)(B)(iii) of the Act. The Service published a proposed rule to list *Glaucocarpum suffrutescens* as an endangered species on September 5, 1985, constituting the next 1-year finding that would have been required on or before October 13, 1985.

Summary of Comments and Recommendations

In the September 5, 1985, proposed rule (50 FR 36118) and associated notifications, all interested parties were requested to submit factual reports or information that might contribute to the development of a final rule. The Service extended the initial comment period on November 4, 1985 (50 FR 45846), to accommodate a requested public hearing. In addition, the Service reopened the comment period on December 11, 1985 (50 FR 50646), at the request of a private landowner whose property had been proposed as critical habitat. The reopening of the comment period was needed to provide additional time for the private landowner and others to formulate recommendations concerning the listing of the species and its critical habitat designation. Appropriate State agencies, county governments, Federal agencies, scientific organizations, and other interested parties were contacted and requested to comment. Newspaper notices were published in the *Vernal Express*, *The Uintah Basin Standard*, *The Deseret News*, and *The Salt Lake Tribune* during the period of September 27 to October 23, 1985. Fifteen written comments were received and are discussed below. A public hearing was held on November 21, 1985, in Vernal, Utah. Thirteen verbal comments were received at that hearing. The public hearing is summarized with the written comments below.

Four comments, one from the BLM, one from the Utah State University Cooperative Extension Service (USU Extension Service), one from the Uinta Basin Association of Governments, and one from the agent of the private landowner whose property had been proposed as critical habitat, stated that the Service has not proven that grazing and building stone removal have caused the decline in the range and abundance of *Glaucocarpum suffrutescens*.

The Service believes that the causes of the decline of the range and abundance of the *Glaucocarpum* are not understood and probably are a complex interaction of various factors affecting the species' habitat and populations. Observations by E.H. Graham and R.C. Rollins indicate that the population of *Glaucocarpum* along the east flank of Big Pack Mountain was essentially continuous on a narrow band about 20 feet wide on one stratum of highly calcareous soil for the entire distance of their initial survey (over 3 miles). Extrapolating from the densities observed by Graham and Rollins and corroborated with recent observations by Shultz and Mutz (1979) and England (1982), it appears that the population along the east flank of Big Pack Mountain harbored in excess of 3,000 individuals in 1935. This population now comprises fewer than 1,000 individuals. Currently, in habitat similar to the east Big Pack Mountain habitat, the west flank of Big Pack Mountain supports a *Glaucocarpum* population of fewer than 200 individuals. Populations at Little Pack Mountain and in the Gray Knolls total no more than 1,600 plants between them. The Service, in an effort to determine what factors may have caused such a population decline, looked for human-induced changes in the habitat of *Glaucocarpum* since the first observation of the species 50 years ago. Heavy grazing and removal of the surface stone peculiar to the calcareous outcrops to which *Glaucocarpum* is endemic occurred concurrently with the decline of the species. While neither of these factors may have been solely responsible for the species' decline, there is a distinct possibility of their effect having led to the current endangered status of *Glaucocarpum*.

Three comments, one from the BLM, one from the USU Extension Service and one from the private landowner stated that listing of *Glaucocarpum suffrutescens* should be deferred until the reasons causing the decline of the species are known.

Service data indicate that the decline of the population and range of *Glaucocarpum suffrutescens* in absolute terms is well established as described above. Given the rarity of *Glaucocarpum suffrutescens*, its consequent vulnerability to even trivial disturbance of its habitat, and the potential for that habitat disturbance, the Fish and Wildlife Service believes it is appropriate to protect *Glaucocarpum suffrutescens* under the Endangered Species Act despite uncertainty as to the reasons for its decline.

Two comments, one from the BLM and one from the private landowner, stated that oil and gas and oil shale development are not likely to be threats to *Glaucocarpum suffrutescens* under current energy market conditions. The Service acknowledges that apparent fact. The future development of oil and gas and oil shale energy resources on the habitat of *Glaucocarpum suffrutescens*, however, does remain a potential threat to the species and its habitat. Recently portions of two populations of *Glaucocarpum* have been lost directly to energy development activity. Private land on which the species occurs was patented from the public domain to private ownership because of its oil shale value; other land supporting the species was set aside as a portion of the DOE's Naval Oil Shale Reserve No. II; and the entire area of the population under Federal jurisdiction is under executive withdrawal for mineral entry because of its oil shale value (Executive Order 5327). The Service continues to believe that some potential for oil, gas, and shale development exists and that this potential is properly considered as a contributing basis for listing the species.

The BLM commented that *Glaucocarpum suffrutescens* is receiving consideration as a sensitive plant species in the BLM's environmental planning documents (BLM 1984) and that the BLM will protect it under its land management authority as long as the species is under review by the Service for official status under the Endangered Species Act. The Service acknowledges the conservation measures the BLM has extended the *Glaucocarpum* and other rare and sensitive species within the Vernal BLM District.

Six written comments and eight oral comments from the public hearing—one from the private landowner, three from regional economic development agencies, eight from private individuals, one from a county commissioner, and one from a livestock production group—stated that listing *Glaucocarpum suffrutescens* would adversely affect economic development of energy resources in Duchesne and Uintah Counties, Utah. The Service expects that from time to time *Glaucocarpum suffrutescens* may be the subject of interagency consultations regarding such development. The Service is confident that the species can be conserved and that energy development with proper safeguards for the species may also take place. The Act, through the section 7 interagency consultation provision is designed to address and resolve such conflicts between listed threatened and endangered species and actions that may adversely affect them.

Two comments—one written and one oral—stated that *Glaucocarpum suffrutescens* is a weed common in Utah. The Service disagrees; the species' localized area is in the southern Uinta Basin in Utah, and based on best current knowledge it is found nowhere else in the world.

Four written comments—two from conservation organizations, one from a professional botanist, and one from a private citizen—supported the proposal of endangered status and stated that *Glaucocarpum suffrutescens* is a very rare, narrowly distributed species that is highly vulnerable to habitat disturbance.

Three comments—one from the State of Utah, one from a conservation organization and one from a private citizen—were in general agreement with the Service's position in the proposed rule.

Additional comments relating solely to the proposed designation of critical habitat are noted below in the Critical Habitat section of this rule.

Summary of Factors Affecting the Species

After a thorough review and consideration of all information available, the Service has determined that *Glaucocarpum suffrutescens* (toad-flax cress) should be classified as an endangered species. Procedures found in section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations (50 CFR Part 424) promulgated to implement the listing provisions of the Act were followed. A species may be determined to be an endangered or a threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to *Glaucocarpum suffrutescens* (Rollins) Rollins (toad-flax cress) are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* Over the 50 years since its original discovery, there has been a decline in the population and range of this species. During repeated fieldwork at the type locality, the most recent by Karl Wright and Larry England in 1987, no individuals have been found (England 1982; Rollins, Harvard University, pers. comm., 1983, 1986). A population between the type locality and the Little Pack Mountain population has been found (BLM, pers. comm., 1987). Removal of building stone and localized heavy grazing in a portion of the species' range are possible factors that may have contributed to the extirpation of this population (England 1982). Current livestock grazing, as now managed by the BLM in the habitat area of *Glaucocarpum suffrutescens,* is not expected to adversely affect the species. Any grazing threat would be a consequence of localized uncontrolled use by insects, rodents, rabbits, and wild horses.

The entire range of this monotypic genus is underlain by oil shale, which may be mined when economic conditions favor it, and by conventional oil and gas deposits that have begun to be developed. The largest population is partly on Naval Oil Shale Reserve No. II of the DOE, and partly on the Uintah and Ouray Indian Reservation, which is held in trust by the U.S. Department of the Interior for the Ute Indian tribe. The other four populations with 70 or more plants are partly under BLM, private, State, or Indian tribal management, while the three smallest populations are solely managed by one of the above entities. Portions of the species habitat are also now under lease by an oil shale development company. Without a concerted effort and coordinated planning to provide for its conservation during any energy development that may take place, this monotypic genus could inadvertently be brought to extinction (England 1982).

B. *Overutilization for commercial, recreational, scientific, or educational purposes.* None known.

C. *Disease or predation.* Sheep and cattle grazing may have had an impact on this species historically, but, with current levels of grazing management by BLM, domestic livestock are not expected to further impact the species. Grazing by wildlife, particularly rabbits and wild horses, may adversely affect some populations of this species.

D. *The inadequacy of existing regulatory mechanisms.* There are no Federal, State, or local laws or regulations that address this species specifically or directly provide for protection of its habitat. The BLM is aware of this plant and has considered it in its environmental planning of the resource area on which it occurs (BLM 1984). No Federal agencies are under current legal obligation for the conservation of *Glaucocarpum.* The Act offers possibilities for additional protection of this species through section 7 (interagency cooperation) and section 9 (prohibiting removal and reduction to possession of a listed plant from an area under Federal jurisdiction).

E. *Other natural or manmade factors affecting its continued existence.* The estimated total number of individuals of toad-flax cress that currently exist is fewer than 3,000. Only 5 of the 9 populations consist of 170 individuals or more, and 3 consist of fewer than 30 plants each. Only the largest populations may have sufficient genetic variability to provide for long-term adaptation to natural changes in environmental conditions.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species in determining to make this rule final. Based on this evaluation, the preferred action is to list *Glaucocarpum suffrutescens* as endangered. With fewer than 3,000 individuals known in nine populations and the risk of damage to the toad-flax cress and its habitat, endangered status seems an accurate assessment of the plant's condition. For reasons explained below, the proposal to designate critical habitat for this species is withdrawn.

Critical Habitat

Critical habitat, as defined by section 3 of the Act, means: (i) The specific areas within the geographical area occupied by a species, at the time it is listed in accordance with the Act, on which are found those physical or biological features (I) essential to the conservation of the species and (II) that may require special management considerations or protection; and (ii) specific areas outside the geographical area occupied by a species at the time it is listed, upon a determination that such areas are essential for the conservation of the species.

Section 4(a)(3) of the Act requires that critical habitat be designated to the maximum extent prudent and determinable concurrently with the determination that a species is endangered or threatened. Critical habitat was proposed to be designated for *Glaucocarpum suffrutescens.* However, the Service no longer believes such designation would be prudent. The area originally proposed as critical habitat was quite large (over 7,000 acres) in relation to the number of individual plants known. Several comments noted this fact and recommended that the extent of critical habitat be reduced or that critical habitat not be designated. While the Service could designate inclusive boundaries for critical habitat that would encompass several scattered small populations or individuals of the species, it no longer finds that the entire area proposed can be supported as critical habitat. At the same time, designating more narrowly focused areas surrounding individual local populations of the species could expose these populations to a significant risk of vandalism. The proposed designation is therefore withdrawn because no benefit to this species has been identified that would be provided by the designation and that would overbalance the inherent risk of precisely identifying its location. Careful coordination with the other involved Federal agencies will be no less feasible in the absence of designated critical habitat, and will be equally effective in the conservation of the species.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for

Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. Such actions are initiated by the Service following listing. The protection required of Federal agencies and the prohibitions against taking are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR Part 402. Section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of a listed species or to destroy or adversely modify its critical habitat. If a Federal action may adversely affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service. The Bureau of Land Management, the Department of Energy, and the Bureau of Indian Affairs have jurisdiction over portions of the habitat of the toad-flax cress. If resident and transient human populations in the Uintah Basin increase as a consequence of energy development, these agencies may find it necessary, in order to comply with section 7, to increase regulation of activities that could have detrimental effects on the species.

The Act and its implementing regulations found at 50 CFR 17.61, 17.62, and 17.63 set forth a series of general trade prohibitions and exceptions that apply to all endangered plants. All trade prohibitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.61, apply. These probibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to import or export any endangered plant, transport it in interstate or foreign commerce in the course of a commercial activity, sell or offer it for sale in interstate or foreign commerce, or to remove it and reduce it to possession from areas under Federal jurisdiction. Certain exceptions can apply to agents of the Service and State conservation agencies. The Act and 50 CFR 17.62 and 17.63 also provide for the issuance of permits to carry out otherwise prohibited activities involving endangered species under certain circumstances. No trade in *Glaucocarpum suffrutescens* is known. It is anticipated that few trade permits would ever be sought or issued, since this species is not common in the wild or in cultivation and is of no known commercial interest. Requests for copies of the regulations on plants and inquiries regarding them may be addressed to the Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, DC 20240 (703/235–1903).

National Environmental Policy Act

The Fish and Wild Service has determined that an Environmental Assessment, as defined by the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

BILLING CODE 4310-55-M

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Determination of the Black-capped Vireo To Be an Endangered Species

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The Service determines the black-capped vireo (*Vireo atricapillus*) to be an endangered species. This bird formerly bred from Kansas through Oklahoma and Texas to central Coahuila, Mexico. The vireo no longer occurs in Kansas, is gravely endangered in Oklahoma, and is no longer found in several parts of its formerly extensive range in Texas. The black-capped vireo is threatened by brown-headed cowbird (*Molothrus ater*) nest parasitism and loss of habitat due to such factors as urbanization, grazing, range improvement, and succession. This rule implements the protection provided by the Endangered Species Act of 1973, as amended, for *Vireo atricapillus*.

DATES: The effective date of this rule is November 5, 1987.

ADDRESSES: The complete file for this rule is available for public inspection during normal business hours, by appointment, at the Service's Regional Office of Endangered Species, 500 Gold Avenue SW., Room 4000, Albuquerque, New Mexico 87103.

FOR FURTHER INFORMATION CONTACT: J. Allen Ratzlaff, Endangered Species Biologist, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, New Mexico 87103 (505/766-3972 or FTS 474-3972).

SUPPLEMENTARY INFORMATION:

Background

The black-capped vireo is a 4½ inch (11 centimeter), insectivorous bird. Woodhouse (1852) discovered the species when he collected two specimens on May 26, 1851, along the Rio San Pedro (now called Devil's River) in Sutton County, Texas (Deignan 1961).

Adult male black-capped vireos are olive green on the upper surface and white beneath and have faintly yellowish green flanks. The crown and upper half of the head is black with a partial white eye-ring and lores; this pattern is unique in the family Vireonidae. The iris is brownish red, the bill black. Adult females are duller colored, with the crown slate gray instead of black and the underparts washed with greenish yellow (Marshall *et al.* 1985).

The black-capped vireo formerly bred from Kansas through Oklahoma and Texas to central Coahuila, Mexico with an outlying, possibly temporary, colony in Nuevo Leon, Mexico. Winter residents ranged from Sonora to Oaxaca, Mexico, but occurred mostly in Sinaloa and Nayarit. The species disappeared from Kansas after 1953 (Grzybowski *et al.* 1984, Marshall *et al.* 1985). Graber (1961) believed that land use (grazing) and climatic conditions (drought) had made former habitat in southern Kansas unsuitable. The northernmost breeding areas found by Graber, from 1954 to 1956, were in northern Oklahoma. The present breeding range is from Blaine County, central Oklahoma south through Dallas, the Edwards Plateau, and Big Bend National Park, Texas to at least Sierra Madera in Central Coahuila, Mexico (Marshall *et al.* 1985).

In 1986, only 44–51 adult birds were located in Oklahoma and were limited to three small areas (Grzybowski 1987). Only 35–39 birds were found at these sites in 1985 when limited cowbird control measures were initiated (Grzybowski 1985a). A total of 280 adults were found at 33 sites in Texas in 1985. Though several Texas sites had slightly higher numbers of vireos in 1986, some sites experienced notable decreases (Grzybowski 1986). An estimated 24 adults were found in breeding areas in Mexico in 1983–1984 (Marshall *et al. 1985).*

Black-capped vireos and their habitat in the U.S. occur on Federal, State, and private land. The vireo's habitat consists of scattered trees and brushy areas. Woody vegetation occurs in clumps and is separated by bare ground, rocks, grasses, or wildflowers (Marshall *et al.* 1985); over 55 percent of black-capped vireo habitat is composed of non-woody elements (Grzybowski 1986). Foliage that extends to ground level is the most important requirement for nests. Most nests (90%) are found 16 to 49 inches (0.4 to 1.25 meters) above ground (Grzybowski 1986) and are screened from view by foliage (Grzybowski *et al.* 1984). Marshall *et al.* (1985) summarized known nest sites and found that 63 percent of all 164 documented nests were located in four species of woody vegetation: *Quercus marilandica, Q. shumardii texana, Q. stellata,* and *Rhus virens.* The remaining 37 percent were found in some 20 other species of plants. Grzybowski (1986) noted similar preferences but also noted variation between sites that depended on woody plant species availability.

Many black-capped vireo territories are located on steep slopes, such as the heads of ravines or along the sides of arroyos. On such areas, the shallow soils slow succession, and the microclimates provided by the rugged terrain perpetuate clumping of vegetation, thus sustaining an area suitable for the vireo (Graber 1961). On level terrain, vireo habitat tends to change through succession to prairie-grass, closed-canopy hardwood forest, or cedar brakes so dense that the necessary understory is suppressed (Grzybowski *et al.* 1984). Black-capped vireo habitat, under natural conditions, was maintained by wildfires and wildlife grazing that kept the vegetation in an early successional stage.

The black-capped vireo was included as a category 2 species on the Service's December 30, 1982, Notice of Review (47 FR 58454), but was changed to a category 1 species in the September 18, 1985, Notice of Review (50 FR 37958). Category 1 includes those species for which the Service currently has substantial information to support the biological appropriateness of proposing to list the species. In the December 12, 1986, **Federal Register** (51 FR 44808–44812), the Service published a proposed rule to determine endangered status for this species.

Summary of Comments and Recommendations

In the December 12, 1986, proposed rule and associated notifications, all interested parties were requested to

submit factual information that might contribute to the final rule. Appropriate State agencies, county governments, Federal agencies, scientific organizations, and other interested parties were contacted and requested to comment. Newspaper notices, inviting general public comment, were published in the *Express-News* in San Antonio, Texas on January 13, 1987; the *American-Statesman* in Austin, Texas on January 20, 1987; the *Oklahoman* in Oklahoma City on January 10, 1987; and the *Pioneer* in Fort Stockton, Texas on January 11, 1987. Seventeen responses were received in support of the proposal and six responses expressed neither support nor opposition. Summaries of the comments follow:

The National Wildlife Federation, the Sportsmen's Clubs of Texas, Inc., the Bureau of Economic Geology (University of Texas, Austin), the City of Austin, the Texas Natural Heritage Program, the Oklahoma Department of Wildlife Conservation, the Oklahoma City Audubon Society, Dr. Keith Arnold (Curator of Birds, Texas A & M University), Dr. Frederick Gehlbach (Dept. of Biology, Baylor University), Col. L.R. Wolfe, Richard Spotts (Defenders of Wildlife), and seven private individuals supported the proposal. The Texas Parks and Wildlife Department did not respond to the proposed rule. In response to a pre-proposal notification letter, that agency supported listing the black-capped vireo, though only as threatened. Letters that expressed neither support nor opposition were received from Big Bend National Park, Texas, the editor of *American Birds*, the Texas Air Control Board, Dr. F. Bryant (Texas Tech University, Lubbock, Texas), and Dr. A.R. Phillips.

Issue 1: Commentors recommended critical habitat be designated. *Service response:* Because the black-capped vireo occurs in scattered, small areas, critical habitat would be difficult to delineate and would offer no benefit to its recovery. Furthermore, due to the dynamic nature of its habitat (changes through succession), the location of the patches of optimal habitat will not necessarily be the same from year to year or decade to decade. The Service also believes that, due to the popularity of the bird, publication of critical habitat maps in the **Federal Register** would increase the likelihood of harassment that could affect reproductive success. In the future the Service could publish a proposal in the **Federal Register** to designate critical habitat.

Issue 2: Dr. W. M. Pulich (Associate Professor of Biology, University of Dallas Station, Texas) though not opposed to listing, questioned the extent of previous black-capped vireo status work. The Texas Parks and Wildlife Department also suggested that more habitat for the vireo likely exists on private land. *Service response:* Though it is impossible to search everywhere, over 700 areas of "suitable" black-capped vireo habitat have been surveyed over the last several years. Almost all private range lands are presently being grazed by introduced herbivores (e.g., goats, cattle), and thus the bulk of any remaining vireo habitat is not very likely to continue in suitable condition. The number of vireos on private range land (which represents the vast majority of its historic habitat) is expected to be relatively low. Undoubtedly more vireos exist than have been noted, but the marked decline and/or complete absence of the black-capped vireo over the majority of its historic range warrants the actions being taken.

Issue 3: The Texas Parks and Wildlife Department also suggested that the Service has the technology and personnel to manage cowbirds over the range of the vireo. *Service response:* Cowbird control is very labor intensive and can only offer relief to the vireos in a very limited area. Further research is needed to find more efficient and effective long term management techniques. The Animal Damage Control Program was transferred to the Department of Agriculture about 2 years ago.

Issue 4: In response to a pre-proposal notification letter, the Texas Parks and Wildlife Department thought the vireo only warranted threatened status, as the State of Texas was then proposing to add to its own list of endangered and threatened species. *Service response:* The Service has reviewed the status of the vireo throughout its range, not just Texas, and finds that the species does warrant endangered status because it is in danger of extinction over a significant portion of its range in the next several decades, unless appropriate management occurs.

Summary of Factors Affecting the Species

After a thorough review and consideration of all information available, the Service has determined that the black-capped vireo (*Vireo atricapillus*) should be classified as an endangered species. Procedures found at section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.)* and regulations (50 CFR Part 424) promulgated to implement the listing provisions of the Act were followed. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to the black-capped vireo are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* Major threats to black-capped vireo habitat include possible development; grazing by sheep, goats, and other exotic herbivores (which remove vegetative cover near ground level that is necessary for vireo nesting); and range improvement that involves the removal of broad-leaved, low woody vegetation (Marshall *et al.* 1985). In addition, any activity that divides habitat into narrow strips can make vireo nests more vulnerable to cowbird parasitism (Grzybowski *et al.* 1984).

In the Austin area, which contains the largest known concentration of black-capped vireos, 88 percent of the vireo population is presently threatened with extirpation because of development activity and road construction (J. Carrasco, City Manager of Austin, *in litt.*). The City of Austin's Department of Planning and Growth Management estimates that most of the habitat for this population will be lost in less than 10 years, if the anticipated rate of development is realized. The Austin City Manager further states that "Proposed development plans and roadway improvement *presently* before the City of Austin for consideration could eliminate 20 pairs in the immediate (1 to 5 years) future" (J. Carrasco *in litt.*).

In addition, extensive evidence of heavy grazing, trampling and browsing exists on the Edwards Plateau. Besides a substantial Angora goat enterprise, the Plateau contains a variety of herbivorous, exotic game species (Marshall *et al.* 1985).

B. *Overutilization for commercial, recreational, scientific, or educational purposes.* The black-capped vireo is especially attractive to ornithologists and amateur birders. Nests have failed or been abandoned due to excessive activities of photographers; one territory was possibly abandoned because of frequent harassment from tape-recorded songs (Marshall *et al.* 1985).

C. *Disease or predation.* Black-capped vireos are remarkably free of disease and ectoparasites (Graber 1961). However, eggs and young vireos are subject to some predation. Of 134 eggs lost, Graber (1961) found 12 (9 percent) lost to predators, including snakes and a fox squirrel. Graber also found 16 of 95 hatchlings (17 percent) lost to predators, including snakes and ants. Grzybowski

(1986) also noted that scrub jays (*Aphelocoma coerulescens*) may be depredating vireo nests. Little evidence of predation on adults exists. The first known instance of predation on an adult occurred in 1985: A female brooding young on a low nest was eaten during the night by an unknown predator (Marshall *et al.* 1985).

D. *The inadequacy of existing regulatory mechanisms.* The Migratory Bird Treaty Act (16 U.S.C. 703 *et seq.*) protects this species from being killed or taken captive. However, this Act does not provide any protection to the species' habitat. The state of Texas listed the black-capped vireo as a threatened species on March 1, 1987, but this action provides no protection to the habitat of the vireo.

E. *Other natural or manmade factors affecting its continued existence.* Graber (1961) found that 55.1 percent of all black-capped vireo eggs laid were lost before hatching and, of this loss, 72.3 percent was due to brown-headed cowbird (*Molothrus ater*) nest parasitism. During the nestling period, the major loss was also due to cowbird activity. Cowbirds lay their eggs in vireo nests before the vireo clutch is complete. Cowbird eggs hatch 2–4 days before vireo eggs, and, by the time the vireos hatch, the cowbird nestlings outweigh them tenfold. In all cases where a cowbird occupied the nest, no vireo chicks survived (Graber 1961). Grzybowski (1986) summarized cowbird nest parasitism from 1983 to 1986 and found that overall cowbird nest parasitism on black-capped vireos was 80 percent in study areas in Texas and Oklahoma. However, when cowbird trapping was initiated in those same areas, nest parasitism dropped to as low as 22 percent (Grzybowski 1985b).

Manmade changes in landscape and land use patterns, in particular the opening up of forested areas and the spred of cattle over the past 150 years or so, have apparently favored the brown-headed cowbird. The brown-headed cowbird is an "edge species" and appears to have increased in abundance, range, and the number of species it parasitizes. Cowbirds feed near cattle and agricultural areas and commute daily to areas where they search for nests; therefore, host populations nesting in extensive unbroken tracts may escape parasitism entirely (May and Robinson 1985). Because of brush clearing and the consequent interspersion of scrub habitats with potentially more suitable cowbird feeding habitats, the vireos may be more accessible to cowbirds than in the past (Grzybowski 1985b).

Vegetational succession may also lead to a reduction in vireo habitat. On level terrain with good soil, succession will convert vireo habitat either to prairie grass, closed-canopy hardwood forest, or cedar brakes so dense that the necessary understory is suppressed (Grzybowski *et al.* 1984).

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species in determining to make this rule final. Based on this evaluation, the preferred action is to list the black-capped vireo (*Vireo atricapillus*) as endangered. A decision to take no action would exclude it from protection provided by the Endangered Species Act. A decision to list as threatened would not adequately reflect the severity of the threats facing this species throughout a significant portion of its range and the resulting danger of this species becoming extinct. For the reasons given below, no critical habitat has been designated for this species.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that to the maximum extent prudent and determinable, the Secretary designate any habitat of a species that is considered to be critical habitat at the time the species is determined to be endangered or threatened. For this particular situation, however, the Service has concluded that there is no demonstrable benefit to the vireo in designating critical habitat and therefore such an action is not prudent. The habitat of the black-capped vireo occurs in scattered, small patches; occupied habitat would be difficult to delineate and may vary over time due to succession. Service recovery actions will continuously update and address the vireo's habitat management needs. In addition, as mentioned under "B" in "Summary of Factors Affecting the Species", the black-capped vireo is popular among bird-watchers. Possible increased harassment could occur due to the publication of critical habitat maps. Should that Service receive additional information on this subject, which would warrant reconsideration of this decision, the Service could propose critical habitat in the furture. Future proposal of critical habitat would require an additional **Federal Register** publication.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species.

These recovery actions are initiated by the Service following listing. Such actions may also be initiated prior to listing if circumstances permit. Probable recovery actions will likely include continued monitoring of known populations, additional work to locate other populations, cowbird trapping in nesting areas, and land management practices to maintain black-capped vireo habitat in a suitable successional stage. Also, additional information will likely be collected on the ecology of the species to further identify possible life history parameters that can be enhanced to aid in the species' recovery.

The protection required of Federal agencies and the prohibitions against taking and harm are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR Part 402. Section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of a listed species. If a Federal action may affect a listed species, the responsible Federal agency must enter into formal consultation with the Service.

Federal lands on which vireos have been reported recently include the National Park Service (NPS), the Fish and Wildlife Service, and two military installations (Fort Hood and Fort Sill). Fort Hood and Fort Sill personnel have expressed an interest in protecting this species, and NPS and refuges are responsible for protecting natural resources; therefore, little adverse Federal involvement is expected. Kerr State Wildlife Management Area, Kerrville, Texas, was purchased partially with Federal Aid monies and State and Federal Aid monies are used in the management of the area. Current management plans for the area are under review. Federally supported highway improvement in the Austin, Texas area, and proposed actions by the Navarro County Electric Cooperative, Inc. have potential to affect black-

capped vireo habitat. Should it be determined that the above proposed actions "may affect" the black-capped vireo, section 7 consultation, as described above, will be required. No other Federal activities are known to be presently occurring on State and private lands containing black-capped vireos.

The Act and implementing regulations found at 50 CFR 17.21 set forth a series of general prohibitions and exceptions that apply to all endangered wildlife. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to take, import or export, ship in interstate commerce in the course of a commercial activity, or sell or offer for sale in interstate or foreign commerce any listed species. It also is illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken illegally. Certain exceptions apply to agents of the Service and State conservation agencies.

Permits may be issued to carry out otherwise prohibited activities involving endangered wildlife species under certain circumstances. Regulations governing permits are at 50 CFR 17.22 and 17.23. Such permits are available for scientific purposes, to enhance the propagation or survival of the species, and/or for incidental take in connection with otherwise lawful activities.

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Proposed Reclassification of the Gila Trout (Salmo gilae) From Endangered to Threatened

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Service proposes to reclassify the Gila trout (*Salmo gilae*), a species endemic to New Mexico and Arizona, from endangered to threatened under provisions of the Endangered Species Act (Act) of 1973, as amended. *Salmo gilae* was originally listed as endangered on March 11, 1967 (32 FR 4001). Based on a 1986 review of status information, the Service has determined that reclassification of the Gila trout to threatened status is warranted because the five original populations have been restored, replicated, and biologically secured, and because seven additional populations have been established within the historic range of this fish. These accomplishments also fulfill criteria for reclassification as given in the species' recovery plan. Included with this proposal is a special rule, which, if made final, will enable the New Mexico Department of Game and Fish to promulgate special regulations allowing public sport fishing for the species. The Service is requesting comments and information pertaining to this proposed reclassification.

DATES: Comments from all interested parties must be received by December 7, 1987. Public hearing requests must be received by November 20, 1987.

ADDRESSES: Comments and materials concerning this proposal should be sent to the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, New Mexico 87103. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the Service's Regional Office of Endangered Species, 500 Gold Avenue SW., Room 4000, Albuquerque, New Mexico.

FOR FURTHER INFORMATION CONTACT: Gerald Burton, Endangered Species Biologist, Albuquerque, New Mexico (see **ADDRESSES** above) (505/766–3972 or FTS 474–3972).

SUPPLEMENTARY INFORMATION: .

Background

The Gila trout (*Salmo gilae*) is native to relatively undisturbed, high altitude mountain streams in Arizona and New Mexico. Historically, Gila trout occurred in the Verde and Agua Fria drainages, Arizona, and in the upper Gila drainage in New Mexico. Gila trout may also have been indigenous to Eagle Creek, Arizona, and some tributaries of the San Francisco River, New Mexico.

When the Gila trout was listed as endangered (March 11, 1967; 32 FR 4001), its range had been reduced to five streams within the Gila National Forest, New Mexico. These five streams were Iron, McKenna, and Spruce Creeks in the Gila Wilderness Area, and Main Diamond and South Diamond Creeks in the Aldo Leopold Wilderness Area. Reasons for the drastic decline of the species included hybridization and competition with and/or predation by non-native rainbow trout (*Salmo gairdneri*), cutthroat trout (*Salmo clarki*), and brown trout (*Salmo trutta*).

Recovery actions initiated after listing have included chemically treating streams within the historic range of the species to remove exotic competitive and predatory fish species, and constructing physical barriers to prevent reinvasion of exotics. The five indigenous populations were thus secured, and seven additional populations were established by replicating these populations. Replication involved moving adults from each successfully reproducing indigenous population and releasing them into the closest suitable renovated stream. The seven populations established in this manner occur in Gap Creek, Prescott National Forest, Arizona; and Trail Canyon, Little, McKnight, Big Dry, Iron, and Sheep Corral Creeks in the Gila National Forest, New Mexico. The populations in Sheep Corral, McKnight, and Gap Creeks represent replications of the morphotype in Main Diamond Creek. The South Diamond Creek population has been replicated in Trail Canyon Creek, and Spruce Creek has been replicated in Big Dry Creek. The Little Creek population is a replication of McKenna Creek. The Iron Creek population has been essentially replicated (or expanded) in Iron Creek by renovating a reach of the creek downstream from the indigenous population and establishing a population there. In summary, twelve secure populations presently exist, including five indigenous and seven reintroduced populations. These stream renovation and transplantation efforts have been accomplished jointly by the Service, U.S. Forest Service, New Mexico Department of Game and Fish, and New Mexico State University.

Surveys of the twelve existing populations indicate that the recovery efforts have been successful. Presently, all five indigenous populations are secure and occupy their habitat to its maximum carrying capacity. Reintroduced populations that have been surveyed are successfully reproducing and will soon fill their habitat to carrying capacity (Turner 1986).

By replicating the five indigenous populations to establish seven additional populations, the Service has fulfilled criteria for reclassifying the Gila trout as threatened as outlined by the Gila Trout Recovery Plan (USFWS 1984). The Plan states that "the species could be considered for downlisting from its present endangered status to a threatened status when survival of the five original ancestral populations is secured and when all morphotypes are successfully replicated or their status is otherwise appreciably improved." The Service has determined that the recovery efforts have improved the status of the Gila trout such that the species is no longer "in danger of extinction throughout all or a significant portion of its range" (i.e., endangered), but that hybridization and/or competition with non-native salmonids still threatens this fish below stream barriers (see Factors "C" and "E" in the "Summary of Factors Affecting the Species" section). Therefore, the Service believes that reclassification to a threatened status is appropriate.

Summary of Factors Affecting the Species

Section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations (50 CFR Part 424) promulgated to implement the listing provisions of the Act set forth the procedures for reclassifying species on the Federal Lists. A species may be listed or reclassified as threatened or endangered due to one or more of the five factors described in section 4(a)(1). These factors and their application to the Gila trout (*Salmo gilae* Miller) are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* In the past, Gila trout populations were threatened by habitat destruction due to timber harvesting, mining, and other watershed disturbances. These factors compounded the threats posed by non-native salmonids (see Factors "C" and "E" in the "Summary of Factors Affecting the Species" section for discussions on non-native salmonids). Presently, ten of the eleven creeks that

contain Gila trout occur in Forest Service Wilderness Areas within the Gila National Forest, New Mexico, or the Prescott National Forest, Arizona. The Gila Wilderness Area contains Sheep Corral, Big Dry, Little, McKenna, Spruce, Trail Canyon and Iron Creeks, and the Aldo Leopold Wilderness Area contains South Diamond and Main Diamond Creeks. Gap Creek is within the Cedar Bench Wilderness Area in the Prescott National Forest, Arizona. Habitat protection provided by Wilderness Area regulations will prevent or minimize future habitat destruction.

B. *Overutilization for commercial, recreational, scientific, or educational purposes.* Presently all stream reaches that contain Gila trout are closed to sport fishing. While some illegal fishing takes place, the Service believes that the amount of take is small and has a minimal effect on populations. Most illegal fishing is done by backpackers who are unaware the stream is closed to fishing and who only take a few fish.

Some Gila trout are taken for scientific or educational proposes, but the take is small and controlled through the Federal and State permitting processes.

C. *Disease and predation.* Gila trout are not known to be impacted by various disease and parasites that affect other trout species. The species' lack of parasitism is probably the result of extreme isolation and pristine habitat conditions.

Predation of Gila trout by brown trout has been a serious problem, and continues to be a problem for fish below stream barriers. The brown trout, a non-native salmonid, preys on small Gila trout and is able to severely depress Gila trout populations. In Gila trout streams that were restored, the predation threat was eliminated by chemically removing all fish and reintroducing only native species. Physical stream barriers constructed by the U.S. Forest Service prevent brown trout from moving upstream and preying on Gila trout. However, downstream from these barriers, brown trout and other non-native species remain a threat.

D. *The inadequacy of existing regulatory mechanisms.* Prior to 1967, when the Gila trout was Federally listed as endangered, the species had no legal protection. Listing the species provided recognition, protection, and prohibitions against certain practices (such as take), and also stimulated recovery actions. In response to the Federal listing action, the States of New Mexico and Arizona officially recognized the declining status of the species. Arizona designated the Gila trout as a threatened species (Group 1), which includes species that are known or suspected to have been extirpated from Arizona but that still exist elsewhere. New Mexico designated the Gila trout as an endangered species (Group 1) on January 24, 1975 (NM State Game Commission Regulation No. 563). Group 1 species are those whose prospects of survival or recruitment in New Mexico are in jeopardy. The designation provides the protection of the New Mexico Wildlife Conservation Act (Sections 17–2–37 through 17–2–46 NMSA 1978) and prohibits taking of such species except under a scientific collecting permit. New Mexico also has a limited ability to protect the habitat of the species through the Habitat Protection Act (Sections 17–6–1 through 17–6–11), through water pollution legislation, and tangentially through a provision which makes it illegal to dewater areas used by game fish (Section 17–4–14).

E. *Other natural or manmade factors affecting its continued existence.* When the Gila trout was listed as endangered, the most important reason for the species' decline was hybridization and competition with and/or predation by non-native salmonids. Due to declining native fish populations, the New Mexico Department of Game and Fish maintained propagation and stocking programs of Gila trout, rainbow trout, cutthroat trout, and brown trout during the early 1900's to improve fishing success. Gila trout were propagated from 1923 to 1935 (USFWS 1984) at the Jenks Cabin Hatchery in the Gila Wilderness, but the program was abandoned because of the hatchery's poor accessibility and low productivity. After early stocking programs were discontinued, the non-native trout species persisted and seriously threatened the genetic purity and survival of the few remaining populations of Gila trout. Recent efforts to recover the species have included eliminating non-native salmonids from the species' historic habitat and building barriers to prevent their reinvasion. Presently, twelve viable populations of Gila trout exist in the absence of non-native salmonids.

Other factors that will continue to affect the Gila trout and its habitat include forest fires, flash floods, and droughts. Flash floods can displace the trout and alter its habitat. A particularly severe flash flood has the potential to displace fifty percent or more of an existing trout population. In the process, many fish are killed or injured and those that do survive are often swept downstream into areas occupied by rainbow and brown trout with which they are unable to compete. Low water conditions caused by droughts reduce the amount of available habitat and increase the trout's susceptibility to predators such as birds and racoons. Forest fires have affected and continue to threaten the habitat by causing removal of vegetative cover and declines in water quality due to siltation.

Prior to the introduction of non-native salmonids, forest fires, droughts, and floods probably were not major threats to the species. However, these factors presently are threats because the Gila trout's reduced range and abundance and presumably lowered genetic potential makes the species more vulnerable to catastrophes.

The Service believes that reclassifying the Gila trout from endangered to threatened status is consistent with the Act and that the action will further the conservation and recovery of this species. Threatened status seems appropriate because the number of populations has increased from five to twelve since recovery efforts began. Ten of these populations occur on Forest Service Wilderness Areas, which have regulations providing habitat protection and which are relatively remote from human disturbance. Threatened status also seems appropriate for the Gila trout because the major threats have been reduced by recovery efforts and by the legal protection given under State laws and the Act. Non-native salmonids, which were the major threat to the species, have been removed from the eleven streams that currently support Gila trout. However, non-native trout species remain a threat because the majority of historic Gila trout habitat remains dominated by these species. State and Federal regulations limit the take of Gila trout. Currently, few Gila trout are taken for scientific or educational purposes, and this take is controlled through the State and Federal permitting process. Current State and Federal regulations prohibit taking this species for commercial or sporting purposes. Threats due to natural disasters remain, but are unavoidable risks. Therefore, the Service believes that, given continued careful management, reclassification to a threatened status is appropriate.

Critical Habitat

Section 4(a)(3) of the Act requires that to the maximum extent prudent and determinable, the Secretary designate critical habitat at the time a species is determined to be endangered or threatened. The Gila trout, however,

was listed as endangered (32 FR 4001), prior to passage of the Act. Subsequently, no critical habitat was designated because the habitat was included in Forest Service Wilderness Areas and was believed to be adequately protected. Because the same protection remains, the Service finds that no net benefit to the conservation of this species would accrue from designating critical habitat at this time.

Effects of Rule

This rule, if made final, would change the status of the Gila trout from endangered to threatened. The final rule would formally recognize that this species is no longer in danger of extinction in the foreseeable future. Reclassifying the species will have no effect on regulations regarding protection and recovery of the species. Protection given to threatened species under sections 7 and 9 of the Act is essentially the same as that given to endangered species. Recovery provisions are the same for threatened species as for endangered species.

An important effect of reclassifying the Gila trout as threatened is that the Secretary would then have the option of promulgating a special rule under section 4(d) of the Act, an option not available for species listed as endangered. The special rule included with this proposal would enable the New Mexico Department of Game and Fish to promulgate special regulations allowing sport fishing for Gila trout. This action has been determined to be necessary and advisable to provide for the conservation of the species, and has been identified in the Gila trout recovery plan as an important recovery effort. Developing a sport fishery for Gila trout will help to reduce the number of fish in streams that have reached or are near carrying capacity. By allowing regulated take, the Service hopes to garner public support for species recovery by showing that Gila trout can provide the same quality of sport fishing as non-native trouts. A sport fishery for Gila trout will be combined with an angler education program and will instruct the public about the value and identifying features of this native species of trout. After a more favorable public impression of Gila trout as a sport fish is attained, the Service hopes to renovate larger streams and establish more populations. The Service believes there will be no adverse effects of sport fishing on Gila trout because the restored populations are reproducing successfully and are near carrying capacity.

This action will not be an irreversible commitment on the part of the Service. The action is reversible, and reclassifying the Gila trout to endangered would be possible should changes occur in management, habitat, or other factors which alter the present threats to the species' survival and recovery.

Public Comments Solicited

The Service intends that any final action resulting from this proposal will be as accurate and as effective as possible. Therefore, comments or suggestions from the public, other concerned government agencies, the scientific community, industry, or other interested parties concerning any aspect of this proposal are hereby solicited. Comments are particularly sought regarding:

(1) Biological, commercial trade, or other relevant data concerning any threat (or lack thereof) to Gila trout;

(2) Information on environmental impacts that would result from the rule; and

(3) Possible alternatives to this proposed rule.

Final promulgation of the regulations on Gila trout will take into consideration the comments and any additional information received by the Service, and such communications may lead to adoption of final regulations that differ from this proposal.

The Endangered Species Act provides for a public hearing on this proposal, if requested. Requests must be filed within 45 days of the date of the proposal. Such requests must be made in writing and addressed to the Regional Director (see **ADDRESSES** section).

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Endangered and threatened wildlife, Fish, Marine mammals, Plants (agriculture).

Proposed Regulations Promulgation

Accordingly, it is hereby proposed to amend Part 17, Subchapter B of Chapter I, Title 50 of the Code of Federal Regulations, as set forth below:

PART 17—[AMENDED]

1. The authority citation for Part 17 continues to read as follows:

Authority: Pub. L. 93–205, 87 Stat. 884; Pub. L. 94–359, 90 Stat. 911; Pub. L. 95–632, 92 Stat. 3751; Pub. L. 96–159, 93 Stat. 1225; Pub. L. 97–304, 96 Stat. 1411 (16 U.S.C. 1531 *et seq.*); Pub. L. 99–625, 100 Stat. 3500 (1986), unless otherwise noted.

2. It is proposed to amend § 17.11(h) by revising the entry for Gila trout under "Fishes" to read as follows:

§ 17.11 Endangered and threatened wildlife.

* * * * *

(h) * * *

Species		Historic range	Vertebrate population where endangered or threatened	Status	When listed	Critical habitat	Special rules
Common name	Scientific name						
FISHES							
Trout, Gila	*Salmo gilae*	U.S.A. (NM,AZ)	Entire	T	1, ___	N/A	17.44(u)

3. It is further proposed to add the following new paragraph (u) as a special rule to § 17.44:

§ 17.44 Special rules—fishes.

* * * * *

(u) Gila trout, *Salmo gilae.*

(1) No person shall take the species, except in accordance with applicable State fish and wildlife conservation laws and regulations in the following instances: (i) For educational purposes, scientific purposes, the enhancement of propagation or survival of the species, zoological exhibition, and other conservation purposes consistent with the Act, (ii) during a designated open season, or (iii) incidental to State permitted recreational fishing activities for other species or for Gila trout outside the permitted season, provided that the individual Gila trout taken is immediately returned to its habitat.

(2) Any violation of applicable State fish and wildlife conservation laws or regulations with respect to the taking of this species will also be a violation of the Endangered Species Act.

(3) No person shall possess, sell, deliver, carry transport, ship, import, or export, by any means whatsoever, any such species taken in violation of these regulations or in violation of applicable State fish and wildlife laws or regulations.

(4) It is unlawful for any person to attempt to commit, solicit another to commit, or cause to be committed, any offense defined in paragraphs (u)(1) through (u)(3) of this section.

Dated: September 22, 1987.

Susan Recce,

Acting Assistant Secretary for Fish and Wildlife and Parks.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register.**

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 52 FR 12345.

The President

Proclamation 5720 of October 5, 1987

Polish American Heritage Month, 1987

By the President of the United States of America

A Proclamation

During October the people of the United States recognize and rejoice in the many accomplishments of generations of Polish Americans. From the founding of our Republic to the present day, Poles have enriched, strengthened, and defended our Nation. Millions of Polish Americans have attained great success in the arts, sciences, scholarship, and every other field of endeavor, but perhaps their most special gifts to America have been the faith and love of liberty Poles have cherished through the centuries.

That Polish love of liberty manifested itself in the hard, early days of the American Revolution when Polish freedom fighters such as Kosciuszko and Pulaski stood with us for independence. They knew the profound truth that freedom's cause is universal, that in struggling for our freedom they were working for Poland's freedom and for all mankind's. They knew that once America had fired "the shot heard 'round the world" no tyrant could ever again rest easy.

Today, as always, Americans stand in solidarity with the continuing Polish struggle for political, religious, and economic liberty. By advocating these precious freedoms so eloquently and forthrightly, His Holiness John Paul II and Lech Walesa have come to symbolize hope, justice, and human dignity to all Americans and to countless millions around the world. Their idealism, self-sacrifice, and devotion inspire us as we express our thanks to Polish Americans and our pride in our country's Polish heritage.

The Congress, by Senate Joint Resolution 135, has designated the month of October 1987 as "Polish American Heritage Month" and authorized and requested the President to issue a proclamation in observance of this event.

NOW, THEREFORE I, RONALD REAGAN, President of the United States of America, do hereby proclaim October 1987 as Polish American Heritage Month. I urge all Americans to join their fellow citizens of Polish descent in observance of this month.

IN WITNESS WHEREOF, I have hereunto set my hand this fifth day of October, in the year of our Lord nineteen hundred and eighty-seven, and of the Independence of the United States of America the two hundred and twelfth.

Ronald Reagan

Proclamation 5721 of October 5, 1987

Benign Essential Blepharospasm Awareness Week, 1987

By the President of the United States of America

A Proclamation

A little-known but debilitating neuromuscular disease produces functional blindness in thousands of Americans. The disorder, benign essential blepharospasm, causes involuntary and usually uncontrollable spasms of the muscles around the eyes that force the eyelids shut. As the disease progresses, the spasms become almost continuous.

Approximately 30,000 Americans suffer from benign essential blepharospasm. Most of them first experience symptoms in their fifth or sixth decade, although younger people are also affected. In the early stages of the disease, when the patient experiences an occasional extra wink or blink, there is only a slight impact on the quality of life. But when the spasms are more frequent, the patient cannot perform simple tasks such as reading or cooking, and ordinary activities such as driving a car become dangerous.

Treatment with drugs or surgery can temporarily relieve the symptoms of benign essential blepharospasm, but as yet there is no cure. Scientists are attempting to find improved treatments and to learn more about the causes of this condition. Three biomedical research agencies—the National Institute of Neurological and Communicative Disorders and Stroke, the National Eye Institute, and the National Institute of Mental Health—lead the Federal research attack. Support for research is also provided by the Benign Essential Blepharospasm Research Foundation, Inc., a voluntary agency known for its efforts to assist patients and their families.

To increase public awareness of benign essential blepharospasm, the Congress, by House Joint Resolution 224, has designated the week of October 18 through October 24, 1987, as "Benign Essential Blepharospasm Awareness Week" and authorized and requested the President to issue a proclamation in observance of that week.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the week beginning October 18, 1987, as Benign Essential Blepharospasm Awareness Week, and I call upon the people of the United States to observe that week with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this fifth day of October, in the year of our Lord nineteen hundred and eighty-seven, and of the Independence of the United States of America the two hundred and twelfth.

Proclamation 5722 of October 5, 1987

Leif Erikson Day, 1987

By the President of the United States of America

A Proclamation

Our Nation sets aside October 9 each year to honor Leif Erikson and to celebrate our country's Nordic heritage. Almost a thousand years ago this young Viking explorer set out from Norway to convert Greenlanders to Christianity. He eventually reached North America and brought back reports of places he called Helluland, Markland, and Vinland. The explorers, missionaries, settlers, and adventurers who followed him in later centuries shared his bold spirit. The memory of Leif Erikson continues to inspire all who would chart new territory for the good of mankind.

Many who settled in North America were Nordics. Like "Leif the Lucky" they displayed great determination and courage as they came to a new world. They and their descendants have truly contributed much to our national heritage; the strength of character and spirit of adventure they trace to their ancestors, including Leif Erikson, are traits Americans will always revere as quintessentially American.

In honor of Leif Erikson and our Nordic American heritage, the Congress, by a joint resolution approved on September 2, 1964 (78 Stat. 849, 36 U.S.C. 169c), has authorized the President to proclaim October 9 of each year as "Leif Erikson Day."

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim October 9, 1987, as Leif Erikson Day, and I direct the appropriate government officials to display the flag of the United States on all government buildings on that day. I also invite the people of the United States to honor Leif Erikson and our Nordic American heritage by holding appropriate exercises and ceremonies in suitable places throughout our land.

IN WITNESS WHEREOF, I have hereunto set my hand this fifth day of October, in the year of our Lord nineteen hundred and eighty-seven, and of the Independence of the United States of America the two hundred and twelfth.

Rules and Regulations

Federal Register
Vol. 52, No. 194
Wednesday, October 7, 1987

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

7 CFR Part 2

Revision of Delegations of Authority

AGENCY: Office of the Secretary, USDA.

ACTION: Final rule.

SUMMARY: This document amends the delegations of authority from the Secretary of Agriculture and General Officers of the U.S. Department of Agriculture (USDA) to designate the Assistant Secretary for Governmental and Public Affairs as the central printing authority and the central public information authority in the USDA.

EFFECTIVE DATE: October 7, 1987.

FOR FURTHER INFORMATION CONTACT: Robert L. Siegler, Deputy Assistant General Counsel, USDA, Washington, DC, (202) 447–6035.

SUPPLEMENTARY INFORMATION: In 1977, the Secretary of Agriculture designated the Assistant Secretary for Governmental and Public Affairs as the central printing authority in the USDA. In addition, the Assistant Secretary by virtue of his responsibilities is the central public information authority in the USDA. The purpose of this document is to reflect those responsibilities in the delegations made to the Assistant Secretary.

This rule relates to internal agency management. Therefore, pursuant to 5 U.S.C. 553, notice of proposed rulemaking and opportunity for comment are not required and this rule may be made effective less than 30 days after publication in the **Federal Register.**

Further, since this rule relates to internal agency management, it is exempt from the provisions of Executive Order 12291. Finally, this action is not a rule as defined by the Regulatory Flexibility Act, and thus, is exempt from the provisions of that Act.

List of Subjects in 7 CFR Part 2

Authority delegations (Government agencies).

Accordingly, Part 2, Subtitle A, Title 7, Code of Federal Regulations is amended as follows:

PART 2—DELEGATIONS OF AUTHORITY BY THE SECRETARY OF AGRICULTURE AND GENERAL OFFICERS OF THE DEPARTMENT

1. The authority for Part 2 continues to read as follows:

Authority: 5 U.S.C. 301 and Reorganization Plan No. 2 of 1953, unless otherwise noted.

Subpart C—Delegations of Authority to the Deputy Secretary, the Under Secretary for International Affairs and Commodity Programs, the Under Secretary for Small Community and Rural Development, and Assistant Secretaries

2. Section 2.29 is amended by revising paragraphs (c)(4) and (c)(5) to read as follows:

§ 2.29 Delegations of authority to the Assistant Secretary for Governmental and Public Affairs.

* * * * *

(c) * * *

(4) Serve as the central public information authority in the USDA, with the authority to determine policy for all USDA communication activities and agency information activities in order to provide leadership and centralized operational direction for USDA and agency information activities so that all material shall effectively support USDA policies and programs, including the defense program.

(5) Serve as the central printing authority in the USDA, with authority to represent the USDA with Joint Committee on Printing of the Congress, the Government Printing Office, and other Federal and State agencies on information matters.

* * * * *

For Subpart C:

Date: October 2, 1987.

Richard E. Lyng,

Secretary of Agriculture.

FEDERAL RESERVE SYSTEM

12 CFR Part 201

[Regulation A]

Extensions of Credit by Federal Reserve Banks; Change in Discount Rates

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The Board of Governors has ameded its Regulation A, "Extensions of Credit by Federal Reserve Banks," for the purpose of increasing discount rates.

The action reflects the intent of the Federal Reserve to deal effectively and in a timely way with potential inflationary pressure.

The Board acted on requests submitted by the Boards of Directors of the twelve Federal Reserve Banks. The discount rate is the interest rate that is charged depository institutions when they borrow from their district Federal Reserve Banks.

EFFECTIVE DATE: The changes were effective on the dates specified below.

FOR FURTHER INFORMATION CONTACT: William W. Wiles, Secretary of the Board (202/452–3257); for the hearing impaired *only*, Telecommunications Device for the Deaf (TTD) (202/452–3544), Earnestine Hill or Dorothea Thompson, Board of Governors of the Federal Reserve System, Washington, DC 20551.

SUPPLEMENTARY INFORMATION: Pursuant to the authority of sections 10(b), 13, 14, 19, et al., of the Federal Reserve Act, the Board has amended its Regulation A to incorporate changes in discount rates on Reserve Bank extensions of credit. Further, under the authority of 5 U.S.C. 553(b)(3)(B) and (d)(3), these amendments are being published without prior general notice of proposed rulemaking, public participation, or deferred effective date. The Board has for good cause found that current economic and financial considerations require that these amendments be adopted immediately.

List of Subjects in 12 CFR Part 201

Banks, banking, Credit, Federal Reserve System.

For the reasons outlined above, the Board of Governors amends 12 CFR Part 201 as set forth below:

PART 201—[AMENDED]

1. The authority citation for 12 CFR Part 201 continues to read as follows:

Authority: Secs. 10(a), 10(b), 13, 13a, 14(d) and 19 of the Federal Reserve Act (12 U.S.C. 347a, 347b, 343 et seq., 347c, 348 et seq., 357, 374, 374a and 461); and sec. 7(b) of the International Banking Act of 1978 (12 U.S.C. 347d).

2. Section 201.51 is revised to read as follows:

§ 201.51 Short-term adjustment credit for depository institutions.

The rates for short-term adjustment credit provided to depository institutions under § 201.3(a) of Regulation A are:

Federal Reserve Bank	Rate	Effective
Boston	6	Sept. 9, 1987.
New York	[illegible]	Sept. 4, 1987.
Philadelphia	[illegible]	Do.
Cleveland	6	Do.
Richmond	6	Sept. 5, 1987.
Atlanta	[illegible]	Sept. 4, 1987.
Chicago	6	Do
St. Louis	[illegible]	Sept. 9, 1987.
Minneapolis	[illegible]	Sept. 8, 1987.
Kansas City	6	Sept. 4, 1987
Dallas	[illegible]	Sept. 11, 1987.
San Francisco	[illegible]	Sept. 9, 1987.

3. Section 201.52 is revised to read as follows:

§ 201.52 Extended credit for depository institutions.

(a) Seasonal credit. The rates for regular seasonal credit extended to depository institutions under § 201.3(b)(1) of Regulation A are:

Federal Reserve Bank	Rate	Effective
Boston	6	Sept. 9, 1987.
New York	6	Sept. 4, 1987.
Philadelphia	6	Do.
Cleveland	6	Do.
Richmond	6	Sept. 5, 1987.
Atlanta	6	Sept. 4, 1987.
Chicago	6	Do.
St. Louis	6	Sept. 9, 1987.
Minneapolis	6	Sept. 8, 1987.
Kansas City	6	Sept. 4, 1987.
Dallas	6	Sept. 11, 1987.
San Francisco	6	Sept. 9, 1987.

(b) Temporary seasonal credit program. At the option of the borrower, interest on credit advanced under the temporary simplified seasonal credit program as revised on February 18, 1986, can be either at the basic discount rate (see § 201.51) or at a rate that is one-half percentage point above the basic rate and that will remain fixed during the time the credit is outstanding. The fixed rate for new loans may be changed as the basic discount rate and extended credit rates are changed. In no case should such borrowing, including renewals, be outstanding beyond February 1988.

(c) Other extended credit. The rates for other extended credit provided to depository institutions under sustained liquidity pressures or where there are exceptional circumstances or practices involving a particular institution under § 201.3(b)(2) of Regulation A are:

Federal Reserve Bank	Rate	Effective
Boston	[illegible]	Sept. 9, 1987.
New York	[illegible]	Sept. 4, 1987.
Philadelphia	[illegible]	Do.
Cleveland	6	Do.
Richmond	[illegible]	Sept. 5, 1987.
Atlanta	[illegible]	Sept. 4, 1987.
Chicago	6	Do.
St. Louis	6	Sept. 9, 1987.
Minneapolis	[illegible]	Sept. 8, 1987.
Kansas City	6	Sept. 4, 1987.
Dallas	[illegible]	Sept. 11, 1987.
San Francisco	[illegible]	Sept. 9, 1987.

These rates apply for the first 30 days of borrowing. For credit outstanding for more than 30 days, a flexible rate will be charged which takes into account rates on market sources of funds, but in no case will the rate charged be less than the basic discount rate plus one-half percentage point. Where credit provided to a particular depository institution is anticipated to be outstanding for an unusually prolonged period and in relatively large amounts, the 30-day time period may be shortened.

By order of the Board of Governors of the Federal Reserve System, October 1, 1987.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

EXPORT-IMPORT BANK OF THE UNITED STATES

12 CFR Part 404

Freedom of Information Reform Act of 1986; Revision of Fees, Fee Waiver Policy and Other Changes

AGENCY: Export-Import Bank of the United States.

ACTION: Final rule.

SUMMARY: The Export-Import Bank of the United States (Eximbank) is amending and updating its regulations which govern the processing of requests under the Freedom of Information Act, as amended (FOIA). These changes are necessary to implement certain provisions of the Freedom of Information Reform Act of 1986 (Pub. L. 99-570). Pursuant to Pub. L. 99-570, these amendments are written to follow the Uniform Freedom of Information Act Fee Schedule and Guidelines, published in the **Federal Register** in final form by the Office of Management and Budget on March 27, 1987.

DATE: Effective date: November 6, 1987.

FOR FURTHER INFORMATION CONTACT: Gregory Beams, (202) 566-8194 or Steven E. Hendrix, (202) 566-4784, Office of the General Counsel, Export-Import Bank of the United States, 811 Vermont Avenue, NW., Washington, DC 20571.

SUPPLEMENTARY INFORMATION: The Freedom of Information Reform Act of 1986 ("Reform Act") required the Office of Management and Budget to develop and issue a schedule of fees and guidelines applicable to the processing of FOIA requests. After publication of the proposed schedule and guidelines in the **Federal Register** on January 16, 1987, and consideration of numerous comments received, OMB issued its final rule regarding fees and relevant guidelines in the **Federal Register** on March 27, 1987. The Department of Justice provided agencies with advisory fee waiver policy guidance in a Memorandum dated April 2, 1987, issued by the Assistant Attorney General. The following amendments to 12 CFR Part 404 conform to OMB's schedule and guidelines, and utilize the Department of Justice guidance respecting fee waiver policy. Technical changes have also been made to reflect changess in the titles of Eximbank officers, and requirements for the use of specific forms have been deleted.

Eximbank published notice of these amendments to its regulations regarding Disclosure of Information on June 8, 1987, (52 FR 21569). Eximbank received comments from two organizations on the proposed rules. One organization submitted its comments after the comment period had closed. Eximbank fully considered the comments submitted by the organization despite the fact that they were submitted after the comment period had closed. Responses to the comments are provided on a section-by-section basis as follows:

Responses to Comments

Section 404.6(a)(8) Definitions: Representatives of the News Media.

Both commenters requested Eximbank to reexamine and change its definition of "representative of the news media." Eximbank, following OMB's guidelines, proposed to define "a representative of the news media" as "any person actively gathering news for an entity that is organized and operated to publish or broadcast news to the

public," with "news" defined pursuant to the OMB guidelines as information that is about current events or that would be of current interest to the public. The commenters felt the definition of news should be dropped to preclude determinations by agency officials of what is news.

OMB concluded in the Sectional analysis to its final guidelines that it is reasonable to give some weight to the term "news" when developing the definition of a representative of the news media. Eximbank agrees with OMB's conclusion on this point. Therefore, in the final rule, "news media" is limited to those persons or organizations who disseminate information that is about current events or would be of current interest to the public.

Section 404.6(a)(8) Definitions: Freelance Journalist.

One commeter asked that the proposed definition of "freelance journalist" be deleted. The commenter suggested that the criterion in Eximbank's proposed rule for freelancer eligibility—i.e., "demonstrates a solid basis for expecting publication"—is at variance with the way many freelancers work in selling their project only after completion. Further, the commenter asserted that the criterion would work against first-time freelancers.

Eximbank's criteria for freelancer eligibility are taken directly from OMB's final guidelines to the agencies. OMB addressed the issues raised by the commenter in the supplementary information section and sectional analysis accompanying its final guidelines.

Eximbank believes that the OMB concept strikes a workable balance in expanding the "news media" to include freelance journalists but not just anyone calling himself or herself a freelance journalist. For these reasons, Eximbank is retaining the definition of "freelance journalist."

Section 404.6(e) Charges for Unsuccessful Search.

One commenter stated that this section omitted the opportunity for the requester to consult with the agency with the object of reformulating the request to meet his or her needs at a lower cost, as provided in the OMB guidelines. Eximbank agrees with this suggestion and has modified its rule accordingly.

Section 404.6(f) Aggregating Requests.

One commenter claimed that the proposed rule failed to note the presumption against aggregation when the requests have been made more than 30 days apart as noted in the OMB guidelines. The presumption described by the commenter is different from the presumption in the OMB guidelines, which contain a presumption in favor of aggregation when requests have been made less than 30 days apart. For requests made more than 30 days apart, the OMB guidelines state that "For requests made over a longer period, however, such a presumption becomes harder to sustain and agencies should have a solid basis for determining that aggregation is warranted in such cases." The only presumption noted in the OMB guidelines is in favor of aggregation and consequently, Eximbank does not believe that any presumption against aggregation need be incorporated into its final rule.

Section 404.6(i) Fee Waivers and Appeals.

The Freedom of Information Reform Act requires that individual agency regulations set forth procedures and guidelines for determining when FOIA fees should be waived or reduced. Both commenters objected to Eximbank's provision to implement this requirement, which Eximbank based upon the policy guidelines for fee waiver standards issued by the Department of Justice on April 2, 1987. The OMB Guidelines do not provide guidance on when fees should be waived, or address the statutory standard governing the waiver of FOIA fees, 5 U.S.C. 552(a)(4)(A)(iii).

The commenters felt that the Department of Justice guidance restricts the granting of fee waivers beyond what Congress intended in enacting the statute. One commenter recommended that Eximbank simply reiterate the language of the statute regarding waiver of fees, and the other commenter recommended that the fee waiver section be revised relying exclusively on original intent rather than on the Justice Department policy guidance. The commenters also suggested that the Justice guidance requires an agency to judge the newsworthiness of the requested material, or required an agency to assess the intentions of the requester.

Eximbank does not regard the Department of Justice guidance as expanding or restricting the availability of waivers under the statute. In the words of the Memorandum, "The Department of Justice stands committed to encouraging agencies to waive fees under the FOIA whenever the statutory fee waiver standard is met. By the same token, of course, agencies also are expected to respect the balance drawn in the statute, safeguarding federal funds by granting waivers or reductions only where it is determined that the statutory standard is satisfied."

The Department of Justice guidance as incorporated in Eximbank's regulations provides for a consistent analysis of fee waiver requests by breaking down the statutory standard (5 U.S.C. 552(a)(4)(A)(iii)) into a logical sequence of steps. The information requested as well as the requester's intentions must be considered in determining whether disclosure of the information is or is not, in the words of the Reform Act, "primarily in the commercial interest of the requester." For these reasons, Eximbank believes that its provisions regarding fee waiver are appropriate and consistent with the legislative intent and purpose, and that substantive changes in its fee waiver provisions are not warranted. The language has been slightly modified to clarify the manner in which the provisions will be applied to an individual fee waiver request.

Eximbank has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in:

(1) An annual effect on the economy of $100 million or more:

(2) A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or

(3) Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Eximbank has certified that this rule will not have a significant economic impact on a substantial number of small entities because only a very small percentage of that group will likely be affected by this regulation—i.e., those entities that choose to submit requests for records under the Freedom of Information Act, 5 U.S.C. 552. As a result, neither an initial nor final Regulatory Flexibility Analysis has been or will be prepared. This rule does not contain a collection of information for purposes of the Paperwork Reduction Act.

List of Subjects in 12 CFR Part 404

Disclosure of information.

For the reasons set forth in the preamble, 12 CFR Part 404 is amended as set forth below:

PART 404—[AMENDED]

1. The authority citation for Part 404 is revised to read as follows:

VOL 52 ISS 194 OC 7 1987 UMI

Authority: 5 U.S.C. 552; 12 U.S.C. 635; Freedom of Information Reform Act of 1986, Pub. L. 99–570; Debt Collection Act of 1982, Pub. L. No. 97–365.

§ 404.3 [Amended]

2. Amend 12 CFR 404.3(d) by removing "Public Affairs Office in Room 1267" and adding in lieu thereof "Office of the Secretary in Room 933".

§ 404.4 [Amended]

3. Amend 12 CFR 404.4(c)(1) by removing "Senior Vice President-Research and Communications" wherever it appears and adding in lieu thereof "Office of the General Counsel".

4. Amend 12 CFR Part 404.4(c)(1) by removing "EIB Form 73–5, described in paragraph (d) of this section, may be used in lieu of a letter for purposes of making the request."

5. Amend 12 CFR 404.4(c)(3) by removing "Senior Vice President-General Counsel" and adding in lieu thereof "General Counsel".

6. Amend 12 CFR Part 404.4(c)(4) by removing "Senior Vice President-General Counsel" and adding in lieu thereof "General Counsel".

7. Remove § 404.4(c)(6) and § 404.4(c)(7) in their entirety, and amend § 404.4(c)(8) by renumbering it as § 404.4(c)(6).

8. Remove 12 CFR 404.4(d).

9. Revise § 404.6 to read as follows:

§ 404.6 Schedule of fees.

(a) *Definitions.* (1) The term "direct costs" means those expenditures which Eximbank actually incurs in searching for and duplicating (and in the case of commercial requesters, reviewing) documents to respond to a FOIA request. Direct costs include, for example, the salary of the employee performing the work (the basic rate of pay for the employee plus 16 percent of that rate to cover benefits) and the cost of operating duplicating machinery.

(2) The term "search" includes all time spent looking for material that is responsive to a request, including page-by-page or line-by-line identification of material within documents. Searches may be done manually or by computer using existing programming.

(3) The term "duplication" refers to the process of making a copy of a document necessary to respond to a FOIA request. Such copies can take the form of paper copy, microform, audio-visual materials, or machine readable documentation (e.g., magnetic tape or disk), among others. The copy provided must be in a form that is usable by requesters.

(4) The term "review" refers to the process of examining documents located in response to a request that is for a commericial use to determine whether any portion of any document located is permitted to be withheld. It also includes processing any documents for disclosure, e.g., doing all that is necessary to excise them and otherwise prepare them for release. Review does not include time spent resolving general legal or policy issues regarding the application of exemptions.

(5) The term " 'commercial' request" refers to a request from or on behalf of one who seeks information for a use or purpose that furthers the commercial, trade, or profit interests of the requester or the person on whose behalf the request is made. In determining whether a requester belongs in this category, Eximbank must determine the use to which a requester will put the documents requested. Where Eximbank has reasonable cause to doubt the use to which a requester will put the records sought, or where that use is not clear from the request itself, Eximbank may seek additional clarification before assigning the request to a specific category.

(6) The term "educational institution" refers to a preschool, a public or private elementary or secondary school, an institution of graduate higher education, an institution of undergraduate higher education, an institution of professional education, and an institution of vocational education, which operates a program or programs of scholarly research.

(7) The term "non-commercial scientific institution" refers to an institution that is not operated on a "commercial" basis as that term is referenced in paragraph (a)(5) of this section, and which is operated solely for the purpose of conducting scientific research the results of which are not intended to promote any particular product or industry.

(8) The term "representative of the news media" refers to any person actively gathering news for an entity that is organized and operated to publish or broadcast news to the public. The term "news" means information that is about current events or that would be of current interest to the public. Examples of news media entities include television or radio stations broadcasting to the public at large, and publishers of periodicals (but only in those instances when they can qualify as disseminators of "news") who make their products available for purchase or subscription by the general public. These examples are not intended to be all-inclusive. As traditional methods of news delivery evolve (e.g., electronic dissemination of newspapers through telecommunications services), such alternative media would be included in this category. "Freelance" journalists may be regarded as working for a news organization if they can demonstrate a solid basis for expecting publication through that organization, even though not actually employed by it. A publication contract would be the clearest proof, but Eximbank may also look to the past publication record of a requester in making this determination.

(b) *Fees to be charged—general.* Eximbank will charge fees that recoup the full allowable direct costs it incurs, and will use the most efficient and least costly methods to comply with requests for documents made under the FOIA. Eximbank may contract with private sector services to locate, reproduce and disseminate records in response to FOIA requests when that is the most efficient and least costly method, and does not result in an ultimate cost to the requester greater than it would be if Eximbank had performed these tasks. Eximbank will not contract out responsibilities which the FOIA provides that it alone may discharge, such as determining applicability of an exemption, or determining whether to waive or reduce fees. When documents responsive to a request are maintained for distribution by agencies operating statutory-based fee schedule programs, such as the Government Printing Office or the National Technical Information Service, Eximbank will inform requesters of the steps necessary to obtain records from those sources.

(1) *Manual searches for records.* Eximbank will charge for search and review work performed by its employees according to the following fee schedule:

Clerical, hourly rate—$12.00
Professional, hourly rate—$24.00

(2) *Computer searches for records.* Eximbank will charge the actual direct cost of providing the service. This will include the cost of operating the central processing unit for that portion of operating time that is directly attributable to searching for records responsive to a FOIA request and operator/programmer salary apportionable to the search. Operator/programmer salary will be calculated at basic pay plus 16 percent. Average rates for CPU operating costs and operator-programmer salaries involved in FOIA searches will be established and periodically revised to reflect actual direct costs. These rates will be available upon request.

(3) *Review of records.* Only requesters who are seeking documents for commercial use will be charged for time

Eximbank spends reviewing records to determine whether they are exempt from mandatory disclosure. Charges will be assessed only for the initial review, i.e., the review undertaken the first time Eximbank analyzes the applicability of a specific exemption to a particular record or portion of a record. Eximbank will not charge for review at the administrative appeal level of an exemption already applied. However, records or portions of records withheld in full under an exemption which is subsequently determined not to apply may be reviewed again to determine the applicability of other exemptions not previously considered. The costs for such a subsequent review may be assessed. Eximbank will charge for employee time spent in review according to the rates set forth in paragraph (b)(1) of this section.

(4) *Duplication of records.* The per page charge for paper copy reproduction of documents is $.25. For copies prepared by computer, such as tape or printouts, or for other methods of reproduction or duplication, Eximbank will charge according to their actual direct cost. If Eximbank estimates that duplication charges are likely to exceed $25.00, it will notify the requester of the estimated amount of fees, unless the requester has indicated in advance his willingness to pay fees as high as those anticipated. Such notice will offer a requester the opportunity to confer with Eximbank personnel with the object of reformulating the request to meet his or her needs at a lower cost.

(5) *Other charges.* Complying with requests for special services such as those listed below is entirely at the discretion of Eximbank. Eximbank will recover the full costs of providing services such as those enumerated below to the extent that it elects to provide them:

(i) Certifying that records are true copies;

(ii) Sending records by special methods such as express mail, etc. (Charges will not be made for ordinary packaging and mailing.)

(6) *Restrictions on assessing fees.* With the exception of requesters seeking documents for a commercial use, Eximbank will provide the first 100 pages of duplication and the first two hours of search time without charge. Except for commercial use requesters, Eximbank will not begin to assess fees until after it has provided the free search and reproduction, and will not charge a fee in any case of $6.00 or less. For example, for a request that involved two hours and ten minutes of search time and resulted in 105 pages of documents, Eximbank would determine the cost of only 10 minutes of search time and only five pages of reproduction. If this cost was equal to or less than $6.00, no charges would result. For searches made by computer, when the cost of the search (including the operator time and the cost of operating the computer to process a request) equals the equivalent dollar amount of two hours of the salary of the person performing the search, Eximbank will begin to assess charges for computer search.

(c) *Fees to be charged—categories of requesters.* There are four categories of FOIA requesters, with specific levels of fees for each category prescribed by law. Requesters in each category must reasonably describe the records sought.

(1) *Commercial use requesters.* When Eximbank receives a request for documents for commercial use, it will assess charges which recover the full direct costs of searching for, reviewing for release, and duplicating the records sought. Inclusion in this fee category is determined not by the identity of the requester, but by the use to which the information will be put. Commercial use requesters are not entitled to two hours of free search time nor 100 free pages of reproduction of documents. Eximbank will recover the cost of searching for and reviewing records even if there is ultimately no disclosure of records.

(2) *Educational and non-commercial scientific institution requesters.* Eximbank will provide documents to requesters in this category for the cost of reproduction alone, excluding charges for the first 100 pages. To be eligible for inclusion in this category, requesters must show that the request is being made as authorized by and under the auspices of a qualifying institution and that the records are not sought for a commercial use, but are sought in furtherance of scholarly (if the request is from an educational institution) or scientific (if the request is from a non-commercial scientific institution) research. To be included in this category it must be apparent from the nature of the request that the request serves a scholarly research goal of the institution, rather than an individual goal.

(3) *Requesters who are representatives of the news media.* Eximbank will provide documents to requesters in this category for the cost of reproduction alone, excluding charges for the first 100 pages. To be eligible for inclusion in this category, a requester must meet the criteria in paragraph (a)(8) of this section, and his or her request must not be made for a commercial use. A reqeust for records supporting the news dissemination function of the requester will not be considered to be a request that is for a commercial use.

(4) *All other requesters.* Eximbank will charge requesters who do not fit into any of the categories above fees which recover the full reasonable direct cost of searching for and reproducing records that are responsive to the request, except that the first 100 pages of reproduction and the first two hours of search time will be furnished without charge. Requests from record subjects for records about themselves filed in Eximbank systems of records will continue to be treated under the fee provisions of the Privacy Act of 1974 which permit fees only for reproduction.

(d) *Charging interest—notice and rate.* Eximbank will begin assessing interest charges on an unpaid bill starting on the 31st day following the day on which the billing was sent. Receipt of the fee at Eximbank will stay the accrual of interest. Interest will be at the rate prescribed in Section 3717 of Title 31 U.S.C. and will accrue from the date of the billing.

(e) *Charges for unsuccessful search.* Eximbank will assess charges for time spent searching, even if it fails to locate the records or if records located are determined to be exempt from disclosure. Prior to undertaking a search, if Eximbank estimates that search fees are likely to exceed $25.00, it will notify the requester of the estimated amount of the fees, unless the requester has indicated in advance his willingness to pay fees as high as those anticipated. The notice will offer the requester the opportunity to consult with agency personnel with the object of reformulating the request to meet the requester's needs at lower cost.

(f) *Aggregating requests.* A requester may not file multiple requests at the same time each seeking a portion of a document or documents, solely in order to avoid payment of fees. When Eximbank reasonably believes that a requester or a group of requesters acting in concert is attempting to break a request down into a series of requests for the purpose of evading the assessment of fees, Eximbank may aggregate any such requests and charge accordingly. In no case will Eximbank aggregate multiple requests on unrelated subjects from one requester.

(g) *Method of payment and advance payments.* All payments to Eximbank shall be in the form of cash, check, or money order payable to the Export-Import Bank of the United States. Eximbank will not require a requester to make an advance payment—i.e., payment before work is commenced or continued on a request, unless:

VOL 52 ISS 194 OCT 7 1987 UMI

(1) Eximbank estimates or determines that allowable charges that a requester may be required to pay are likely to exceed $250.00, in which case Eximbank will notify the requester of the likely cost and obtain satisfactory assurance of full payment where the requester has a history of prompt payment of FOIA fees, or require an advance payment of an amount up the full estimated charges in the case of requesters with no history of payment or;

(2) A requester has previously failed to pay a fee charged in a timely fashion (i.e., within 30 days of the date of the billing), in which case Eximbank will require the requester to pay the full amount owed plus any applicable interest or demonstrate that he has, in fact, paid the fee, and to make an advance payment of the full amount of the estimated fee before Eximbank begins to process a new request or a pending request from the requester. The administrative time limits prescribed in subsection (a)(6) of the FOIA (i.e., 10 working days from receipt of initial requests and 20 working days from receipt of appeals from initial denial, plus permissible extensions of these time limits) will begin only after Eximbank has received fee payments described above.

(h) *Effect of the Debt Collection Act of 1982 (Pub. L. 97–365).* In accordance with the provisions and authorities of the Debt Collection Act of 1982, Eximbank reserves the right to disclose information to consumer reporting agencies and to use collection agencies, where appropriate, to encourage payment of fees.

(i) *Fee waivers and appeals.* (1) Eximbank will waive or reduce applicable fees upon request, only if it determines that in the particular instance, disclosure of the information is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the government, and the disclosure is not primarily in the commercial interest of the requester.

(i) In determining whether disclosure of the information is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the government, Eximbank will consider the following factors:

(A) The subject of the request: Whether the subject of the requested records concerns the operations or activities of the government;

(B) The informative value of the information to be disclosed: Whether the disclosure is likely to contribute to an understanding of government operations or activities;

(C) The contribution to an understanding of the subject by the general public likely to result from disclosure: Whether disclosure of the requested information will contribute to public understanding and;

(D) The significance of the contribution to public understanding: Whether the disclosure is likely to contribute significantly to public understanding of government operations or activities.

(ii) In determining whether disclosure of the information is not primarily in the commercial interest of the requester, Eximbank will consider the following factors:

(A) The existence and magnitude of a commercial interest: Whether the requester has a commercial interest that would be furthered by the requested disclosure; and, if so

(B) The primary interest in disclosure: Whether the magnitude of the identified commercial interest of the requester is sufficiently large, in comparison with the public interest in disclosure, that disclosure is primarily in the commercial interest of the requester.

(2) The requester in all cases has the burden of presenting sufficient evidence or information to justify the requested waiver or reduction. The requester may use the procedures set forth in § 404.5 to appeal the denial of a waiver request under this section.

Hart Fessenden,

General Counsel.

BILLING CODE 6690-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 87–ACE–09]

Alteration of Control Zone; Hutchinson, KS

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final Rule.

SUMMARY: The nature of this action is to correct the legal description of the Hutchinson, Kansas, Municipal Airport control zone. The latitude coordinates contain an error and should read "lat. 38°03'56" N." This action will not increase the size of the existing airspace.

EFFECTIVE DATE: October 14, 1987.

FOR FURTHER INFORMATION CONTACT: Dale Carnine, Airspace Specialist, Traffic Management and Airspace Branch, Air Traffic Division, ACE–540, FAA, Central Region, 601 East 12th Street, Kansas City, Missouri 64106, Telephone (816) 374–3408.

SUPPLEMENTARY INFORMATION: The FAA has determined that the latitude coordinates for the Hutchinson, Kansas, Municipal Airport control zone are incorrectly cited in the published description. Action is taken herein to correct this error. The latitude coordinates cited as "lat. 38°06'56" N." should be changed to read "lat. 38°03'56" N." Since this action does not increase the size of the Hutchinson control zone and only corrects a typographical error, notice and public procedure hereon are unnecessary and good cause exists for making this amendment effective in less than thirty (30) days. Section 71.171 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6C, dated January 2, 1987.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Control zones.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration (FAA) amends Part 71 of the FAR (14 CFR Part 71) as follows:

PART 71—[AMENDED]

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 71.171 [Amended]

2. By amending § 71.171 as follows:

Hutchinson, Kansas [Revised]

Within a 5-mile radius of Hutchinson Municipal Airport (lat. 38°03'56" N., long.

97°51'37" W.). This control zone is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Airport/Facility Directory.

This amendment becomes effective 0901 U.t.c. October 14, 1987.

Issued in Kansas City, Missouri, on September 22, 1987.

Clarence E. Newbern,

Assistant Manager, Air Traffic Division.

[FR Doc. 87-23121 Filed 10-6-87; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 71

[Airspace Docket No. 87-ACE-05]

Designation of Control Zone; Fort Leavenworth, KS

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this action is to designate a part-time control zone at the Sherman Army Airfield, Fort Leavenworth, Kansas, based on a request from the Department of the Army. The effective dates and times of the control zone, when established, will be published in the Airport/Facility Directory.

EFFECTIVE DATE: 0901 U.t.c., January 14, 1988.

FOR FURTHER INFORMATION CONTACT: Dale Carnine, Airspace Specialist, Traffic Management and Airspace Branch, Air Traffic Division, ACE-540, FAA, Central Region, 601 East 12th Street, Kansas City, Missouri 64106, Telephone (816) 374-3408.

SUPPLEMENTARY INFORMATION: The Department of the Army has requested that a part-time control zone be established for the Sherman Army Airfield, Fort Leavenworth, Kansas. This control zone will be effective during the specific dates and times established in advance by a Notice to Airmen and will be continuously published in the Airport/Facility Directory. Control zones are designed to contain IFR operations in controlled airspace to the surface around airports within a specified radius and along the final approach course to the IAP. Section 71.171 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6C, dated January 2, 1987.

Discussion of Comments

On page 27824 of the **Federal Register** dated July 24, 1987, the Federal Aviation Administration published a Notice of Proposed Rulemaking which would amend § 71.171 of Part 71 of the Federal Aviation Regulations so as to designate a control zone at Fort Leavenworth, Kansas. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. One comment was received. The Aircraft Owners and Pilots Association (AOPA) stated that although they did not specifically object to the proposal, they had concerns about access problems pilots would experience when operating to/from the Elton Airport. AOPA advised that they had determined that the Elton Airport would be encompassed by the control zone. The FAA has determined that the Elton Airport is over 5.9 statute miles from the Sherman Army Airfield and is therefore outside of the existing airport traffic area and control zone. Accordingly, the FAA has determined that this action will not place any additional burden on the users of the Elton Airport and the rule is hereby adopted as proposed.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Control zones.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, the Federa1 Aviation Administration (FAA) proposes to amend Part 71 of the FAR (14 CFR Part 71) as follows:

PART 71—[AMENDED]

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.171 [Amended]

2. By amending § 71.171 as follows:

Fort Leavenworth, Sherman Army Airfield, Kansas [New]

Within a five mile radius of Sherman Army Airfield (latitude 39°22'06" N., longitude 94°54'52" W.), excluding that portion which overlies the Kansas City, Missouri International Airport Control Zone. This control zone is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the airport/facility directory.

Issued in Kansas City, Missouri, on September 23, 1987.

Clarence E. Newbern,

Assistant Manager, Air Traffic Division.

Establishment of a Transition Area at Herlong, CA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action establishes a new transition area at Herlong, CA. This transition area will provide controlled airspace for aircraft executing instrument approach procedures to Amedee Army Airfield (Amedee AAF), CA.

EFFECTIVE DATE: 0901 Ut.c., January 14, 1988.

FOR FURTHER INFORMATION CONTACT: Frank T. Torikai, Airspace and Procedures Specialist, Airspace and Procedures Branch, AWP-530, Air Traffic Division, Western-Pacific Region, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, California 90261; telephone (213) 297-1648.

SUPPLEMENTARY INFORMATION:

History

On July 21, 1987, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to establish a new transition area at Herlong, CA, (52 FR 27416). Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6C dated January 2, 1987.

BEST COPY AVAILABLE

VOL 52 ISS 194 OCT 7 1987 UMI

The Rule

This amendment to Part 71 of the Federal Aviation Regulations establishes a new transition area at Herlong, CA. This transition area will provide controlled airspace for aircraft executing instrument approach procedures to Amedee AAF, CA.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 25, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

[T.D. 87–125]

Petitioner's Desire To Contest Decision Denying Domestic Interested Party Petition Concerning Classification of Fiber Reinforced Cellulosic Plastic Sausage Casings

AGENCY: Customs Service, Treasury.

ACTION: Notice of petitioner's desire to contest decision on domestic interested party petition.

SUMMARY: This document advises the public of the desire of a domestic interested party to judicially contest Customs decision denying its petition requesting the reclassification of certain imported fiber reinforced cellulosic plastic sausage casings composed of paper, regenerated cellulose and glycerin. Based upon the product's component material in chief value, it has been held that the correct classification of the product is under item 790.47, Tariff Schedules of the United States (TSUS), as sausage casings not specifically provided for, whether or not cut to length, other. The petitioner contests this decision, contending that all cellulosic plastic sausage casings are to be classified under item 790.45, TSUS, as sausage casings, not specifically provided for, whether or not cut to length, of cellulosic plastics materials. This classification would subject the product to a higher rate of duty. The petitioner has advised Customs that it intends to pursue this matter through appropriate court proceedings.

FOR FURTHER INFORMATION CONTACT: Sheila Murphy, Classification and Value Division (202–566–8181).

SUPPLEMENTARY INFORMATION:

Background

In Internal Advice (IA) 162/79, file 061462, dated May 27, 1983, Customs determined that the component materials in certain imported fiber reinforced cellulosic plastic sausage casings were paper, regenerated cellulose and glycerin. In this ruling, Customs described the nine-step process for producing the casings and specified the points in the process at which the value of each of the component materials was to be computed. In accordance with this ruling, Customs determined that the casings were not in chief value of cellulosic plastics materials and were to be classified under item 790.47, Tariff Schedules of the United States (TSUS; 19 U.S.C. 1202), as sausage casings, not specially provided for, whether or not cut to length, other. On January 12, 1984, Customs issued ruling 073604, which reaffirmed the conclusions reached in IA 162/79.

On September 30, 1985, a petition challenging Customs classification of the product was filed with Customs under section 516, Tariff Act of 1930, as amended (19 U.S.C. 1516), and Part 175, Customs Regulations (19 CFR Part 175), on behalf of a domestic company which manufactures and wholesales a product similar to that classified in IA 162/79. A notice of receipt of the petition was published in the **Federal Register** on October 15, 1986 (51 FR 36703), advising the public of the petitioner's contentions and requesting comments on the petition.

Three major arguments were set forth in the petition against Customs classification of the product and in favor of the petitioner's view that the product should be classified under item 790.45, TSUS, as sausage casings, not specially provided for, whether or not cut to length, of cellulosic plastics materials. This classification would subject the product to a higher rate of duty than that of item 790.47, TSUS.

First, it was argued that IA 162/79 was issued in disregard of section 502(b), Tariff Act of 1930, as amended (19 U.S.C. 1502(b)), which bars Customs from reversing or modifying a prior interpretation of the TSUS without the concurrence of the Attorney General or the Court of International Trade. By issuing the 1983 ruling, the petitioner stated, Customs reversed rulings made on October 31, 1975 (038749) and May 12, 1977 (051718), without seeking such concurrence. In those rulings Customs held that fiber reinforced cellulosic plastic sausage casings were classifiable under item 790.45, TSUS. Because Customs did not seek concurrence, the petitioner argued, the IA is void.

The petitioner also argued that the legislative history of the Tariff Schedules Technical Amendments Act of 1965 (Pub. L. 89–241, 79 Stat. 933, amending 19 U.S.C. 1202), reveals a Congressional intent to provide special protection for manufacturers of sausage casings of cellulosic plastic origins

whether or not that material is the component material in chief value.

Finally, the petitioner argued that the method set out in IA 162/79 for determining the component material in chief value of fiber reinforced cellulosic plastic sausage casings was incorrect, and that if correct cost allocations were used, the casings would be classifiable as in chief value of cellulosic plastic materials. The petitioner maintained that certain costs were incorrectly attributed to the paper and to the glycerin rather than to the regenerated cellulose.

Three comments were received in response to the October 15, 1986, notice. As only one of these comments supported the petitioner's viewpoint, and this comment made arguments similar to petitioner's, the following discussion will address these points raised by the petitioner.

Discussion of Comments

It is Customs position that IA 162/79, setting out a new method for determining the component material in chief value of the casings, was not issued in violation of 19 U.S.C. 1502(b). In the principal case construing this section, *Joanna Western Mills Co.* v. *United States*, 64 Cust. Ct. 218, C.D. 3983 (1970), a petitioner under 19 U.S.C. 1516 claimed that a previously issued abstracted decision should have been followed. The Customs Court held that the provisions for the concurrence of the Attorney General in 19 U.S.C. 1502(b) were of a directory nature only, and that failure to comply did not render void the official actions taken. The court also determined that 19 U.S.C. 1502(b) was enacted solely for the protection of the United States, and was not intended to benefit any designated class of persons. The Court further found that the petitioner had ample means available to contest the classification.

In Customs view, the legislative history does not support petitioner's claim that the description of sausage casings to be classified under item 790.45, TSUS, of "Of cellulosic plastics material," should be interpreted to read "Almost wholly of cellulosic plastics materials." Before the enactment of the TSUS, sausage casings not provided for as intestines or other prepared animal parts were classified according to component material in chief value. Both the legislative history and the provision in the TSUS use the term "of," defined as naming a component material in chief value. We find no intent to classify the casings, instead, according to essential character.

Finally, we do not agree with the petitioner's method for determining the component material in chief value of the casings, assuming component material in chief value to be the correct standard We find no justification for breaking down the paper, one of the component materials, into its most basic substances, nor in failing to allocate to the paper the costs of bringing it into a condition where nothing remains to be done to it but to unite it with the other component materials in the finished product. Nor do we agree that the costs of the glycerin, another component material of the casings, should be attributed to the cost of the regenerated cellulose rather than attributed to the glycerin itself. The glycerin in the casings affects both the regenerated cellulose and the paper component materials. It does not become a permanent ingredient in the casings, as it is washed out before the casing is used.

Decision on Petition

After careful analysis of the petition and the comments received in response to the notice, and further review of the matter, including review of materials submitted by importers and the petitioner during the development of our position in IA 162/79, Customs decided to continue to classify the casings under item 790.47, TSUS. Customs determined that IA 162/79 was properly issued, that the casings are properly classifiable according to their component material in chief value, and that the current method of determining the component material in chief value of the casings is correct. The petitioner was informed of this decision by letter to their counsel dated June 8, 1987 (CLA-2 CO:R:CV:G 079612 SM).

Notice of Petitioner's Desire To Contest

In response to Customs decision to deny the petition, on June 29, 1987, the Petitioner filed notice of its intention to judicially contest the decision in accordance with section 516(c), Tariff Act of 1930, as amended (19 U.S.C. 1516(c)), and § 175.23, Customs Regulations (19 CFR 175.23).

Customs has reconsidered the matter in light of the petitioner's letter, but remains of the opinion that its June 8, 1987, decision is correct. That decision will stand in the absence of a contrary judgment by the U.S. Court of International Trade of the U.S. Court of Appeals for the Federal Circuit.

Authority

This notice is published under the authority of section 516(c), Tariff Act of 1930, as amended (19 U.S.C. 1516(c)), and § 175.24, Customs Regulations (19 CFR 175.24).

19 CFR Part 175

[T.D. 87-126]

Decision on Domestic Interested Party Petition Concerning Classification of Orange Juice Concentrate-Based Product

AGENCY: Customs Service, Treasury.

ACTION: Final interpretive rule.

SUMMARY: This document gives notice of a change in the tariff classification of an orange juice concentrate-based product consisting of orange juice concentrated to 65° Brix to which certain ingredients were added. The product was classified under item 183.05, Tariff Schedules of the United States (TSUS), as other edible preparations, not specifically provided for. After review and analysis of comments received in response to publication of a notice of a domestic interested party petition challenging that classification, Customs has determined that the product is properly classifiable as concentrated orange juice or orange juice made from concentrated orange juice under item 165.29, TSUS. The duty rate for item 165.29, TSUS, is higher than the duty rate for item 183.05, TSUS.

EFFECTIVE DATE: This decision will be effective as to merchandise entered, or withdrawn from warehouse, for consumption, on or after November 20, 1987.

FOR FURTHER INFORMATION CONTACT: Thomas L. Lobred, Classification and Value Division, U.S. Customs Service (202-566-8181).

SUPPLEMENTARY INFORMATION:

Background

On July 26, 1984, Customs issued ruling 553167 (C.S.D. 84-117, 18 Cust. B and Dec. No. 49 at 43, December 5, 1984), which stated that a product consisting of 87 percent orange juice concentrate (65° Brix), 10.5 percent orange peel extract, 2.25 percent citrus acid and less than one percent total of sodium benzoate,

VOL
52
ISS
194
OC
7
1987
UMI

orange oil and artificial color, was properly classifiable under the provision for other edible preparations, not specifically provided for, in item 183.05, Tariff Schedules of the United States (TSUS; 19 U.S.C. 1202).

In this ruling, Customs dismissed classification under item 166.40, TSUS, as beverages, not specifically provided for, and item 165.35, TSUS, as any other citrus fruit juice concentrate (now item 165.36, TSUS). Item 166.40, TSUS, was not applicable because Headnote 1, Schedule 1, Part 12, Subpart B, TSUS, indicates that item 166.40, TSUS, only covers products fit for use as beverages, and the subject product is not, in its condition as imported, potable and ready to consume. Classification under item 165.35, TSUS, was precluded because the subject product was not within the common or commercial understanding of orange juice concentrate, having been processed beyond the scope thereof by the addition of significant and substantial "foreign" or excess ingredients.

On October 17, 1985, a petition was submitted on behalf of a domestic interested party representing domestic citrus growers, pursuant to section 516, Tariff Act of 1930, as amended (19 U.S.C. 1516), and Part 175, Customs Regulations (19 CFR Part 175). The petitioner challenged the tariff classification holding in C.S.D. 84–117. The petitioner stated that the tariff provision relating to fruit juices was amended by section 117, Trade and Tariff Act of 1984 (Pub. L. 98–753), to include in new items 165.27 and 165.29, TSUS, an *eo nomine* provision for orange juices, both in natural and in all forms. The duty rates for items 165.27 and 165.29, TSUS, are higher than the duty rate for item 183.05, TSUS.

The petitioner argued that the basic principles of tariff classification require that the subject product be classified under item 165.29, TSUS, because an *eo nomine* designation such as item 165.29, TSUS, without limitation or shown contrary legislative intent, judicial decision or administrative practice, and without proof of commercial designation, will include all forms of the article. The mere fact that there may be some added ingredients does not preclude its classification in the *eo nomine* provision. It argued that the added ingredients do not alter the subject product's essential character as orange juice concentrate.

The petitioner also argued that Customs definition of orange juice, which is adopted from the Food and Drug Administration (FDA's) standards of identity, is questionable inasmuch as FDA regulations (21 CFR Part 146) should not define or determine the common meaning of the term for tariff purposes.

A notice inviting the public to comment on the petition was published in the **Federal Register** on July 30, 1986 (51 FR 27196). The period of time within which comments could be submitted on the petition was extended by notice published in the **Federal Register** on October 2, 1986 (51 FR 35240). Of the nine comments received, seven supported revocation of C.S.D. 84–117 and two favored Customs affirming its decision.

Discussion of Comments

One commenter questioned whether the petitioner qualified as an "interested party" within the meaning of 19 U.S.C. 1677(9) (C), (D), or (E), qualified to submit a petition under 19 U.S.C. 1516.

Under 19 U.S.C. 1677(9)(E), an interested party includes "a trade or business association a majority of whose members manufacture, produce, or wholesale a like product in the United States". This provision, which was promulgated in Title X of the Trade Agreements Act of 1979 (Pub. L. 96–39), represents an expansion of the types of entities which are now eligible to file a domestic interested party petition under 19 U.S.C. 1516. Counsel for petitioners submitted a letter that the petitioner qualified as a domestic interested party and, in the absence of information to the contrary, Customs has no reason to doubt or question this statement.

The substantive comments urging revocation of C.S.D. 84–117 supported the analysis submitted in the petition. In addition, one commenter argued that if an orange juice concentrate-based product with certain additives was entitled to a lower duty rate than concentrated orange juice, importers would be encouraged to include the additives. This would result in the manufacture of more adulterated orange juice products. Another commenter stated that permitting the product with additives to have a lower duty rate could encourage importers of products without additives to claim the product has additives in order to obtain the lower rate. The commenter notes that the presence of added ingredients would be difficult to detect by Customs.

Customs understands and sympathizes with the enforcement and marketing problems inherent in C.S.D. 84–117 that these commenters note. However, the decision on the correct classification must rest on legal analysis of the issues rather than on enforcement or marketing problems that may occur.

The two commenters who believe that Customs should affirm the position in C.S.D. 84–117 set forth the following arguments:

(1) In C.S.D. 84–117, Customs did not use the FDA regulations to limit the provisions for citrus juice and control the classification of orange juice under the TSUS. Customs was correct in accepting the logical proposition that inasmuch as the orange juice concentrate-based product could not be bought or sold in the U.S. as orange juice, it could not be either commercially or commonly known as orange juice in the U.S.

(2) The amendments made by Pub. L. 98–573 with respect to orange juice are of no consequence in the classification of the product at issue. Under General Headnote 10(c)(i), TSUS, a superior heading cannot be enlarged by inferior headings indented under it, but can be limited thereby. The superior heading in this case is citrus juice. Accordingly, if the product could not be classified *eo nomine* as citrus juice, it cannot be classified *eo nomine* as orange juice.

(3) Contrary to the assertions of the petitioner, there are not sufficient amounts of the subject product being imported to seriously disrupt the market for domestic and imported concentrated and unconcentrated orange juice.

Regarding the first argument, the commenter is correct that Customs did not use the FDA regulations to limit the provisions for citrus juice and control the classification of orange juice under the TSUS, but had decided that the product could not be either commercially or commonly known as orange juice in the U.S. However, after careful analysis and review, Customs has concluded that notwithstanding the presence of additives to the orange juice-concentrate based product, the essential character of the product is orange juice concentrate and this product is now covered by the *eo nomine* provision for other orange juice in item 165.29, TSUS.

Regarding the consequences of the amendments to the TSUS made by section 117 of Pub. L. 98–573, Customs has been convinced that the amendments created an *eo nomine* designation in item 165.29, TSUS, under which the subject product falls.

Customs finds support for this view in *Robert Bosch Corp. et al.* v. *United States*, 63 Cust. Ct. 96, 103–104, C.D. 3881 (1969) in which the Court states:

> The principle is well settled that where an article is in character or function something other than as described by a specific statutory provision—either more limited or more diversified—and the difference is significant, it cannot find classification within such provision. . . . By contrast, where the

difference is in the nature of improvement or amplification, and the essential character is preserved or only incidentally altered, the applicable rule is as expressed in *Nootka Packing Co., et al.* v. *United States*, 22 CCPA 464, T.D. 47464 (1935), that an unlimited *eo nomine* statutory designation includes all forms of the article in the absence of a contrary legislative intent or commercial designation. *United States* v. *National Carloading Corp. et al.*, 48 CCPA 70 C.A.D. 767 (1961); *United Carr Fastener Corporation* v. *United States* (Northern Screw Corp., Party in Interest), 54 CCPA 89, C.A.D. 913 (1967).

Regarding the comment concerning the volume of the subject product being imported, any classification or change in classification is not made on the basis of volume of importations, but rather on legal analysis of the issues.

C.S.D. 84–117 Revoked

After careful consideration of all the comments received and further review of the matter, Customs has concluded that C.S.D. 84–117 should be revoked. An orange-juice concentrate-based product consisting of orange juice concentrate to 65° Brix to which certain ingredients were added is to be classified as concentrated orange juice or orange juice made from concentrated orange juice, under item 165.29, TSUS.

Authority

This notice is published under the authority of section 516(b), Tariff Act of 1930, amended (19 U.S.C. 1516(b), and § 175.22, Customs Regulations (19 CFR 175.22).

Drafting Information

The principal author of this document was Harold M. Singer, Regulations Control Branch, U.S. Customs Service. However, personnel from other offices participated in its development.

William von Raab,

Commissioner of Customs.

Approved: September 25, 1987.

BILLING CODE 4820–02–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 178

[Docket No. 86F–0494]

Indirect Food Additives; Adjuvants, Production Aids, and Sanitizers

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the food additive regulations to provide for the safe use of 2-(2*H*-benzotriazol-2-yl)-4,6-bis(1-methyl-1-phenylethyl)phenol as a light stabilizer for polycarbonate resins and polyethylene phthalate polymers. This action responds to a petition filed by Ciba-Geigy Corp.

DATES: Effective October 7, 1987; objections by November 6, 1987.

ADDRESS: Written objections to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Julius Smith, Center for Food Safety and Applied Nutrition (HFF–335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: In a notice published in the **Federal Register** of February 3, 1987 (52 FR 3350), FDA announced that a petition (FAP 7B3976) had been filed by Ciba-Geigy Corp., Three Skyline Dr., Hawthorne, NY 10532, proposing that § 178.2010 *Antioxidants and/or stabilizers for polymers* (21 CFR 178.2010) of the food additive regulations be amended to provide for the safe use of 2-(2*H*-benzotriazol-2-yl)-4,6-bis(1-methyl-1-phenylethyl)phenol as a light stabilizer for polycarbonate resins and polyethylene phthalate polymers complying with 21 CFR 177.1580 and 177.1630, respectively.

FDA has evaluated data in the petition and other relevant material. The agency concludes that the proposed food additive is safe, and that the regulations should be amended in 21 CFR 178.2010(b) as set forth below.

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Center for Food Safety and Applied Nutrition (address above) by appointment with the information contact person listed above. As provided in 21 CFR 171.1(h), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has carefully considered the potential environmental effects of this action and has concluded that the action will not have a significant impact on the human environment and that an environmental impact statement is not required.The agency's finding of no significant impact and the evidence supporting that finding, contained in an environmental assessment, may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday. This action was considered under FDA's final rule implementing the National Environmental Policy Act (21 CFR Part 25).

Any person who will be adversely affected by this regulation may at any time on or before November 6, 1987, file with the Dockets Management Branch (address above) written objections thereto. Each objection shall be separately numbered, and each numbered objection shall specify with particularity the provisions of the regulation to which objection is made and the grounds for the objection. Each numbered objection on which a hearing is requested shall specifically so state. Failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held. Failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 178

Food additives, Food packaging.

Therefore under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Director of the Center for Food Safety and Applied Nutrition, Part 178 is amended as follows:

PART 178—INDIRECT FOOD ADDITIVES: ADJUVANTS, PRODUCTION AIDS, AND SANITIZERS

1. The authority citation for 21 CFR Part 178 continues to read as follows:

Authority: Secs. 201(s), 409, 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 348); 21 CFR 5.10 and 5.61.

2. Section 178.2010 is amended in paragraph (b) by alphabetically inserting a new item under "Substances," to read as follows:

VOL 52 ISS 194 OCT 7 1987 UMI

§ 178.2010 Antioxidants and/or stabilizers for polymers.

* * * * *

(b) * * *

Substances	Limitations
2-(2*H*-benzotriazol-2-yl)-4,6-bis(1-methyl-1-phenylethyl)phenol (CAS Reg. No. 70321-86-7).	For use only at levels not to exceed 0.5 percent by weight of polycarbonate resins complying with § 177.1580 of this chapter and polyethylene phthalate polymers complying with § 177.1630 of this chapter.

BILLING CODE 4160-01-M

21 CFR Parts 610 and 660

[Docket No. 84N-0205]

Additional Standards for Diagnostic Substances for Laboratory Tests; Amendment of Additional Standards for Reagent Red Blood Cells

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending its additional standards for Reagent Red Blood Cells as part of the agency's retrospective review of current regulations. FDA is making the standards more flexible and is revising the regulations to reflect recent scientific knowledge and experience in the use of Reagent Red Blood Cells.

DATES: Effective November 6, 1987, except for § 660.35. Amendments to labeling requirements in § 660.35 become effective October 7, 1988, for all affected products initially delivered for introduction into interstate commerce.

FOR FURTHER INFORMATION CONTACT: Joseph Wilczek, Center for Drugs and Biologics (HFN-362), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-295-8046.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of June 11, 1985 (50 FR 24542), FDA proposed to amend the additional standards for Reagent Red Blood Cells. As defined in the proposal, Reagent Red Blood Cells is a licensed biological product prepared from human red blood cells and is used to detect or identify human blood group antibodies.

Under section 351 of the Public Health Service Act (42 U.S.C. 262), biological products, including Reagent Red Blood Cells, offered for sale in interstate commerce must be licensed and meet certain standards that ensure their continued safety, purity, and potency.

FDA proposed to amend the additional standards in 21 CFR Parts 610 and 660 for Reagent Red Blood Cells to reflect recent experience and scientific knowledge in the use of these products, and to continue an ongoing retrospective review program of FDA regulations. FDA has reviewed the Reagent Red Blood Cell regulations and has proposed amendments to relieve unnecessary regulatory burdens and to increase flexibility in the regulations without compromising consumer protection.

FDA provided interested persons 60 days to submit written comments on the proposal. In response, FDA received seven letters of comment. One letter of comment fully supported the proposed rule. A summary of other comments and FDA's responses follow:

1. One comment on paragraph (b) of proposed § 660.30 *Reagent Red Blood Cells* asked whether or not FDA will require human umbilical cord blood to be tested for hepatitis B surface antigen (HBsAg) and human immunodeficiency virus (HIV) (formerly human T-cell lymphotropic virus type III (HTLV-III)).

FDA believes that testing umbilical cord blood for HBsAg and HIV is an essential procedure for assuring the safety of Reagent Red Blood Cells manufactured from umbilical cord blood. Accordingly, FDA will continue to require that manufacturers specify in their product license applications that HBsAg testing be done on umbilical cord blood. In the **Federal Register** of February 21, 1986 (51 FR 6362), FDA proposed to amend the biologics regulations to require that blood and blood products be tested by a serologic test for HIV. Until the proposed rule becomes final, FDA strongly recommends that HIV testing be added as an amendment to each manufacturer's product license to assure the safety of the Reagent Red Blood Cell product.

2. One comment pointed out that proposed § 660.31 *Suitability of the donor* was incorrectly designated as § 660.331.

FDA agrees with the comment and is correcting this typographical error in the final rule.

3. Four comments were received on proposed § 660.33 *Testing of source material.*

(a) FDA proposed to amend § 660.33 to permit testing of reagent red blood cell source material with a single donor source of specific antibody if approved by the Director, Office of Biologics Research and Review. One comment stated that the Director, Office of Biologics Research and Review, in evaluating a manufacturer's request to use a single donor source of specific antibody, should be guided by the importance and availability of the particular reagent red blood cell antigen.

FDA agrees with the comment and advises that permission to test a Reagent Red Blood Cell product for a specific antigen with a single donor source will likely be granted where only one source of antibody is available.

(b) One comment questioned the requirement in proposed § 660.33 that "any discrepancy between the results of these two tests shall be resolved by testing at least one additional antiserum before concluding that the antigen is present or absent." The comment stated that manufacturers could not meet the proposed requirement in cases where only one or two sources of rare antibody are available. The comment suggested that discrepancies be resolved in accordance with the manufacturer's product license application. If the comment's suggestion were adopted, license applications might provide for the use of alternative methods such as repeat tests with different personnel or for the use of the antiserum in a different manner, e.g., different concentrations in the assay.

FDA agrees with the comment to allow for alternative methods to resolve test discrepancies in situations where fewer than three donor sources of an antibody specificity are available. FDA is amending § 660.33 by inserting the following sentence: "Where fewer than three donor sources of an antibody specificity are available, test discrepancies shall be resolved in accordance with the manufacturer's product license application." This revision will permit manufacturers greater flexibility in testing reagent red blood cell source material when test discrepancies occur.

(c) One comment recommended that the last sentence in proposed § 660.33 be revised to read "shall include at least the following common antigens * * *." The comment suggested the addition of the words "at least" to identify the listed antigens as minimum criteria for evaluating Group O Reagent Red Blood Cells.

FDA agrees with the comment and is amending the final rule to include the words "at least" in the last sentence of § 660.33 to more accurately define the specificity of Group O Reagent Red Blood Cells used in the detection or identification of unexpected antibodies.

(d) One comment on proposed § 660.33 suggested that the phrase "detection and identification" be revised

to read "detection or identification" to be consistent with similar proposed changes in §§ 660.34(b) and 660.35 (e) and (i).

FDA agrees with the comment. In the final rule, FDA is revising § 660.33 as suggested.

4. Two comments were received on proposed § 660.34(a) *Processing method.*

(a) One comment stated that the word "consistently" incorrectly modifies the verb "shown" rather than the words "to yield." The comment also stated that the phrase "throughout the dating period" is similarly misplaced, and should immediately follow the word "detecting."

FDA agrees with the comment and is amending proposed § 660.34(a) as suggested for clarity.

(b) A second comment on proposed § 660.34(a) suggested deleting the word "all" in the phrase "capable of detecting all alloantibodies." The comment pointed out that the word "all" is unnecessary and should be avoided because of its rigid implications.

FDA agrees with the comment and is deleting the word "all" in the final rule from the phrase "capable of detecting all alloantibodies."

5. Three comments were received on proposed § 660.34(b) *Products prepared from pooled red blood cells.*

(a) One comment suggested that products prepared from pooled red blood cells should not be recommended for the identification of unexpected antibodies, except in the case of umbilical cord cells which serve only as an aid in antibody identification. The comment also suggested that the last sentence of the paragraph is misplaced and should immediately follow the first sentence of the paragraph.

FDA agrees with the comment and is revising § 660.34(b) as suggested. As described in detail in paragraph 6 of this preamble, FDA believes that pooled red blood cells may not detect a weakly reacting antibody in the patient's serum sample. Therefore, FDA believes that single donor cell samples should be used in screening a patient's serum.

(b) FDA proposed to remove the requirement in existing § 660.34(b) *Red blood cell concentration* that each lot of final product have a red blood cell concentration of no less than 2 percent. One comment suggested that the current requirement should be retained. The comment indicated that transfusion service personnel may not perceive significant reactions in pretransfusion testing when using Reagent Red Blood Cell products containing less than 2 percent red blood cells, thereby potentially compromising patient care.

FDA disagrees with the comment. As stated in the proposed rule, FDA believes that recent advances in biotechnology, such as changes in testing methodology, may result in the use of Reagent Red Blood Cell products that are safe, reactive, and effective in concentrations of less than 2 percent. Through the licensing requirements of the Public Health Service Act and 21 CFR Parts 600 and 601, FDA will continue to require provisions in manufacturers' license applications that assure the safety, reactivity, and effectiveness of Reagent Red Blood Cells at appropriate concentrations. Accordingly, FDA rejects the comment. For further discussion, see also paragraph 13 of this preamble.

6. One comment on proposed § 660.34(b) objected to the requirement of limiting the use of pooled Reagent Red Blood Cells to tests that do not determine transfusion compatibility. The comment disagreed with the implication of the proposed amendment, namely that individual donor cells will, by the virtue of their individuality, comprise a more sensitive antibody detection system than pooled reagent red blood cells. The comment submitted limited data, performed in-house, that supported the contention that pooled red blood cells are not less sensitive than individual donor cells in detecting antibodies in the serum of a patient who may require a blood transfusion. The comment also pointed out that the proposed requirement would have a significant economic impact on a substantial number of small business entities by affecting every transfusion service in the United States which currently uses pooled Reagent Red Blood Cells for the detection of antibodies in pretransfusion patient sera. The proposed rule would require transfusion services to use paired Reagent Red Blood Cells because commercially available single donor/single vial red blood cell reagents containing all appropriate antigens do not exist. The comment stated that the use of paired instead of pooled Reagent Red Blood Cells would result in additional workload and increased expenses for these transfusion services.

FDA disagrees with the comment. FDA believes that single donor cell samples are preferable to pooled cell preparations for screening the serum of patients when maximum sensitivity is required. Only half of the cells in a pooled cell preparation will contain a given antigen if one of the donors contributing to the pool lacks that antigen. Thus, a pooled cell preparation may not detect a weakly reacting antibody in a patient's serum sample. These weakly reactive antibodies may cause premature destruction of transfused incompatible red cells.

The agency finds that the data submitted are unacceptable because of a design flaw in the experiment. The paired and pooled Reagent Red Blood Cells used in the comparision testing were purchased from different manufacturers with different expiration dates and likely different antigenic compositions. The agency believes that the paired screening cells used in the study should have been tested separately and then pooled and retested to determine if the pooled cells were of comparable sensitivity in detecting weakly reacting antibodies instead of using pooled cells of unspecified composition from a different manufacturer. Accordingly, the agency does not concur with the conclusion base on submitted data.

The agency disagrees with the comment's suggestion that the requirement that pooled reagent red blood cells shall not be recommended for pretransfusion tests done in lieu of a major crossmatch will have a significant economic impact on transfusion services. The antibody screening procedure often replaces the antiglobulin major crossmatch in pretransfusion compatibility tests, and the agency believes that the use of paired cells for the antibody screening procedure is merited to protect patients from potential delayed hemolytic transfusion reactions and will not have a significant economic impact on a substantial number of small businesses. A further discussion of the economic impact of this rule is contained below in the section titled "Environmental and Economic Assessments."

7. Two comments on proposed § 660.34(c) *Absence of antibodies* observed that the new name for anti-human serum products is anti-human globulin.

FDA agrees with the comments and is amending this inadvertent error in the final rule.

8. Two comments on proposed § 660.34(d) *Final container* suggested that empty final containers used to hold Reagent Red Blood Cell products need not be sterile, consistent with the additional standards for Anti-Human Globulin (21 CFR 660.51(b)). The comments stated that Reagent Red Blood Cells and Anti-Human Globulin are similar type in vitro diagnostic reagents, and the final containers for Anti-Human Globulin are required to be "clean," not "sterile."

FDA agrees with the comments and notes that there is no final product

VOL
52
ISS
194
OC
7
1987
UMI

sterility testing requirement for Reagent Red Blood Cell products because there is no practical way to ensure sterility without damaging the product. The final product, however, contains bacteriostatic preservatives such as neomycin and chloramphenicol to reduce the likelihood of significant microbial growth during the storage period. To provide increased assurance that the product is safe and effective at time of use, FDA also requires that blood banks perform checks for reactivity and specificity of Reagent Red Blood Cells on a regularly scheduled basis, under FDA's current good manufacturing practice regulations for blood and blood components (21 CFR 606.65(c)). For these reasons, FDA believes that the use of "clean" final containers will not diminish the safety, purity, or potency of the products and therefore the word "sterile" can be deleted in proposed § 660.34(d) without compromising consumer protection.

9. One comment on proposed § 660.34(d) concerned color coding of final product labels, container caps, and dropper labels of reagent red blood cell products. The comment requested that FDA provide for uniform color coding so that manufacturers would not use different colors for the same reagent.

FDA agrees with the comment that the color-coding for Reagent Red Blood Cell products should be uniform. Because the proposed regulation requires that specific colors be approved by the Director, Office of Biologics Research and Review, FDA believes that no further amendment to this paragraph is needed.

10 One comment on proposed § 660.34(e) *Date of manufacture* asked for a clarification of the word "immediately" used in the preamble of the proposed rule. Section § 660.34(e) would permit indefinite storage of reagent red blood cell source material at −65° C or colder before manufacture into a final product, provided that the cells are immediately frozen after collection. The comment stated that some time delay before freezing should be permitted, depending on factors such as the type of anticoagulant used.

To assure the continued purity, specificity, and effectiveness of the final product, FDA believes that reagent red blood cell source material should be frozen within 6 days of collection at −65° C or colder. This time interval allows a blood collection center enough time to ship the reagent red blood cell source material to an in vitro manufacturer for further processing and freezing of the cells. For clarity, FDA is amending the dating period information in § 610.53(c) to state that reagent red blood cell source material may be stored at −65° C or colder rather than at −65° C as stated in the proposed rule. Because a manufacturer can submit supporting data and request a different period of time to freeze reagent red blood cell source material, FDA believes that the time interval for freezing cells after collection should not be codified in the additional standards, but rather be specified in the manufacturer's product license application.

11. Two comments on proposed § 660.34(f) *Retention samples* requested that retention of samples should be maintained throughout the dating period of the product without reference to § 610.53(c) which lists minimum dating periods for licensed biological products. One comment stated that because some manufacturers have been granted extended dating periods for their products, the wording of the proposed rule would allow retention samples to be discarded before the actual expiration date of the product.

FDA agrees with the comments that the proposed wording is confusing, and is amending the final rule in § 660.34(f) by removing the reference to § 610.53(c).

12. One comment on proposed § 660.35 *Labeling* requested that manufacturers be permitted to identify their products by using a distinctive logo on the container label outside of the main panel. The comment noted that this revision is similar to an existing provision in the additional standards for Anti-Human Globulin in § 660.55(a)(1).

FDA agrees that manufacturers may use a distinctive logo on the container label provided that the logo is placed outside of the main panel and the product complies with all other applicable labeling requirements. Accordingly, in proposed § 660.35, FDA is redesignating paragraph (a) as (a)(2), and adding paragraph(a)(1) to restrict the use of logos or company names to the bottom or end of the label outside the main panel of final container labels for Reagent Red Blood Cells.

13. One comment on proposed § 660.35(c) stated that the proposed removal of the lowest permissible reagent red blood cell concentration of 2 percent in § 660.34(b) of the existing regulations requires that a more narrowly defined concentration range for Reagent Red Blood Cells be given. The comment noted that a variance of ±1 percentage unit would not be appropriate for a product having a declared concentration of 1 percent. The comment also pointed out that accurate measurement of reagent red blood cell concentration is difficult to perform for products containing less than a 2 percent concentration of cells.

FDA agrees with the comment that a more narrowly defined concentration range is needed and believes that a practical limit in determining reagent red blood cell concentration for products containing less than a 2 percent concentration is ±0.5 percentage units. Reagent red blood cell manufacturers should be able to achieve this accuracy in measurement by using a red blood cell counting procedure. Accordingly, FDA is revising § 660.35(c) to include a provision that if the red blood cell concentration is less than 2 percent, the variance in actual cell concentrations must be within 0.5 percentage units of the stated concentration on the container and package labels.

14. One comment on proposed § 660.35(d) stated that the cautionary labeling statement concerning pooled cells is not restrictive enough. The comment asked that the package label or package insert be revised to state that pooled cells shall not be used for pretransfusion tests to detect unexpected antibodies in patients' samples.

The agency agrees with the comments. The agency believes, as stated in paragraph 6 above, the weak antibodies may not be detected with pooled reagent red blood cells. Accordingly, the agency is amending the final rule in accordance with the comment's suggestion by rewording the second sentence to require that the package labeling state that pooled cells are not recommended for pretransfusion tests, done in lieu of a major crossmatch, to detect unexpected antibodies in patients' samples.

15. Four comments on proposed § 660.35(i) objected to the proposed requirement that manufacturers list in the package insert those antigens that are most likely to decrease in reactivity during storage. One comment stated that listing specific "labile" antigens in reagent red blood cell circulars may be confusing and misleading while another comment pointed out that the decrease in reactivity of certain antigens is largly anecdotal and not supported by hard scientific data. One comment also requested that FDA delete the proposed requirement to note in the package insert that the rate at which reactivity (agglutinability) is lost is partially dependent upon individual donor charactistics that are neither controlled nor predicted by the manufacturer. The comment stated that this cautionary statement seemed excessive.

FDA agrees in part with the comments. FDA agrees that listing antigens in the package insert that are likely to decrease in reactivity during

storage may be confusing and misleading to users of the reagents. FDA is therefore removing this proposed requirement from the final rule. FDA disagrees, however, with the suggestion that the cautionary labeling statement concerning potential variation in loss of antigen reactivity be deleted from the package insert. FDA believes that this cautionary labeling statement is informative in alerting users of the product that reagent red blood cell antigens may lose reactivity at variable rates that can be neither controlled nor predicted by the manufacturer. Accordingly, FDA rejects the latter comment.

16. Two comments on proposed § 660.35(k) suggested a more general wording of the cautionary labeling statement directed towards HBsAg testing. The comments asked for more general wording to encompass serological testing for HIV.

FDA agrees with the comments and is revising the cautionary labeling statement as suggested to apply to hepatitis as well as other infectious agents for which the agency may require a warning statement in the future, such as a codified requirement for testing serologically for HIV (see 51 FR 6362). The general wording of § 660.35(k) will eliminate the need for FDA to propose new labeling regulations and the need for blood establishments to revise their product package inserts if FDA requires tests for other infectious agents in the future.

17. Two comments were received on proposed § 660.36 *Samples and protocols*, which would require that manufacturers submit to FDA selected protocols and samples within 30 days after each routine FDA establishment inspection. One comment considered this information confidential and proprietary, and stated that it should not be made available in response to requests under the Freedom of Information Act. The second comment stated that protocol records are available for review during routine inspections and can be reviewed most efficiently by FDA inspectors on-site at a manufacturing facility.

To the extent the information is protected from disclosure under the Freedom of Information Act, FDA agrees with the first comment that proprietary information found in protocol records is not available for public disclosure as specified in 21 CFR 20.61, which precludes disclosure of trade secret or confidential commercial or financial information. FDA disagrees with the second comment that manufacturing protocols can be reviewed most efficiently on-site at the manufacturing facility. An FDA inspector may not have enough time to thoroughly review all manufacturing protocols during an inspection. For this reason, FDA will continue to require the submission to FDA of selected manufacturing protocols and samples after each routine inspection for review and evaluation. Accordingly, the latter comment is rejected.

18. One comment on proposed § 660.36(c) stated that the term "cell panel" does not specify whether the Reagent Red Blood Cells from a new donor are for use in the detection or the identification of unexpected antibodies. The comment assumed that the term "cell panel" referred to Reagent Red Blood Cells intended for the identification of unexpected antibodies.

FDA agrees with the comment and is amending the final rule in § 660.36(c) to clarify that the term "cell panel" refers to those products intended for the identification of unexpected antibodies. The agency is also amending this paragraph to clarify that umbilical cord samples are not subject to the submission requirements stated in this paragraph because umbilical cord cells serve only as an aid in identification of unexpected antibodies.

Accordingly, FDA is amending the additional standards for Reagent Red Blood Cells with the changes described above and other minor clarifying changes.

Environmental and Economic Assessments

The agency has determined under 21 CFR 25.24(c)(10) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

The agency has examined the economic consequences of this rulemaking and has determined that it does not require either a regulatory impact analysis, as specified in Executive Order 12291, or a regulatory flexibility analysis, as defined in the Regulatory Flexibility Act (Pub. L. 96–354). The amendments to the additional standards are expected to benefit manufacturers of Reagent Red Blood Cells because the amendments relieve certain burdens on the industry, such as removing restrictions on color coding of products, allowing use of company logos and trademarks, and removing the requirement that final containers be sterile.

Other amendments to current biologic regulations are intended to allow more flexibility and discretion in marketing manufacturers' products while maintaining the same level of consumer protection. These changes include removing a minimum concentration requirement for Reagent Red Blood Cells and allowing manufacturers the option of listing either the date of manufacture or length of the dating period in the accompanying package insert or constitution matrix for Reagent Red Blood Cell products.

There are five licensed manufacturers of Reagent Red Blood Cells. Very few blood banks and transfusion services will be required to perform any additional testing when determining transfusion compatibility in patients' blood samples. The American Red Cross, the American Association of Blood Banks, and the Council of Community Blood Centers use paired rather than pooled Reagent Red Blood Cells for pretransfusion testing. These blood banking organizations represent an overwhelming majority of the approximately 7,200 transfusion services in the United States. FDA believes that any additional testing by the few transfusion services not affiliated with these organizations is warranted to protect patients from possible transfusion reactions caused by unexpected antibodies. The agency concludes that the rule is not a major rule as defined by Executive Order 12291. Further, the agency certifies that the rule, if implemented, will not have a significant impact on a substantial number of small entities, as defined in the Regulatory Flexibility Act.

Paperwork Reduction Act of 1980

Sections 660.34, 660.35 and 660.36 of this final rule contain collection of information requirements that were submitted for review and approval to the Director of the Office of Management and Budget (OMB), as required by section 3507 of the Paperwork Reduction Act of 1980. The requirements were approved and assigned OMB control number 0910–0073.

Effective Dates

This regulation is effective November 6, 1987, except § 660.35. Labeling requirements in § 660.35 will become effective October 7, 1988 for all affected products initially introduced or initially delivered for introduction into interstate commerce.

List of Subjects

21 CFR Part 610

Biologics, Labeling, Reporting and recordkeeping requirements.

21 CFR Part 660

Biologics, Labeling.

Therefore, under the Public Health Service Act and under authority delegated to the Commissioner of Food and Drugs, Parts 610 and 660 are amended as follows:

PART 610—GENERAL BIOLOGICAL PRODUCTS STANDARDS

1. The authority citation for 21 CFR Part 610 is revised to read as follows:

Authority: Secs. 201, 501, 502, 510, 701, 52 Stat. 1040–1042 as amended, 1049–1051 as amended by 76 Stat. 780, 1055–1056 as amended, 76 Stat. 794 as amended, and sec. 301 of Pub. L. 87–781 (21 U.S.C. 321, 351, 352, 360 and note, 371), the Public Health Service Act (secs. 351 and 361, 58 Stat. 702 and 703 as amended (42 U.S.C. 262 and 264)), and the Administrative Procedure Act (secs. 4 and 10, 60 Stat. 238 and 243, as amended (5 U.S.C. 553, 702, 703, 704)); 21 CFR 5.10 and 5.11.

2. In § 610.53 in the table in paragraph (c) is amended by revising the item "Reagent Red Blood Cells" to read as follows:

§ 610.53 Dating periods for licensed biological products.

* * * * *

(c) * * *

Product	Manufacturer's storage period 1 to 5 °C (unless otherwise stated)	Manufacturer's storage period 0 °C or colder (unless otherwise stated)	Dating period after leaving manufacturer's storage when stored at 2 to 8 °C (unless otherwise stated)
A	B	C	D
Reagent red blood cells	Not applicable	Not applicable	Thirty-five days from earliest date of collection if kept in liquid form (indefinite storage of reagent red blood cell source material at −65 °C or colder).

* * * * *

PART 660—ADDITIONAL STANDARDS FOR DIAGNOSTIC SUBSTANCES FOR LABORATORY TESTS

3. The authority citation for 21 CFR Part 660 continues to read as follows:

Authority: Secs. 215, 351, 58 Stat. 690 as amended, 702 as amended (42 U.S.C. 216, 262); 21 CFR 5.10.

4. In Part 660, by revising Subpart D, consisting of §§ 660.30 through 660.36, to read as follows:

Subpart D—Reagent Red Blood Cells

Sec.
660.30 Reagent Red Blood Cells.
660.31 Suitability of the donor.
660.32 Collection of source material.
660.33 Testing of source material.
660.34 Processing.
660.35 Labeling.
660.36 Samples and protocols.

Subpart D—Reagent Red Blood Cells

§ 660.30 Reagent Red Blood Cells.

(a) *Proper name and definition.* The proper name of the product shall be Reagent Red Blood Cells, which shall consist of a preparation of human red blood cells used to detect or identify human blood-group antibodies.

(b) *Source.* Reagent Red Blood Cells shall be prepared from human peripheral blood meeting the criteria of §§ 660.31 and 660.32, or from umbilical cord cells which shall be collected and prepared according to the manufacturer's product license application.

§ 660.31 Suitability of the donor.

Donors of peripheral blood for Reagent Red Blood Cells shall meet the criteria for donor suitability under § 640.3 of this chapter, except that paragraphs (b)(5) and (6), (d), and (e) of § 640.3 shall not apply.

§ 660.32 Collection of source material.

Blood for Reagent Red Blood Cells from donors of peripheral blood shall be collected as prescribed under § 640.4 of this chapter, except that paragraphs (c), (d), (g), and (h) of § 640.4 shall not apply.

§ 660.33 Testing of source material.

Except as provided in this section, a sample of each blood incorporated into the Reagent Red Blood Cell product shall be individually tested, with no fewer than two donor sources of each antibody specificity employed, to confirm the identification of all blood group antigens specified in the labeling as present or absent. The manufacturer shall perform at least one of the required tests for each factor. The Reagent Red Blood Cell product may be tested with a single donor source of antibody specificity if only one source of antibody is available, and the Director, Office of Biologics Research and Review, has approved the use of a single donor source of antiserum. Each of these tests shall be conducted and interpreted independently, and any discrepancy between the results of these two tests shall be resolved by testing with at least one additional antiserum before concluding that the antigen is present or absent. Where fewer than three donor sources of an antibody specificity are available, test discrepancies shall be resolved in accordance with the manufacturer's product license application. Group O Reagent Red Blood Cells used in the detection or identification of unexpected antibodies shall include at least the following common antigens in each lot of the product: D, C, E, c, e, K, k, Fy^a, Fy^b, Jk^a, Jk^b, Le^a, Le^b, P_1, M, N, S, and s.

§ 660.34 Processing.

(a) *Processing method.* The processing method shall be one that has been shown to yield consistently a product that is capable of detecting, throughout the dating period, alloantibodies corresponding to all required blood group antigens specified in the labeling as present.

(b) *Products prepared from pooled red blood cells.* If the product is recommended for the detection of unexpected antibodies, the pool shall be prepared by combining equal amounts of cells from no more than two donors. Umbilical cord cells are exempt from this requirement. Pooled cells shall not be recommended for pretransfusion tests, done in lieu of a major crossmatch, to detect unexpected antibodies in patients' samples.

(c) *Absence of antibodies.* Each lot of final product shall be free of demonstrable antibodies, including anti-A and anti-B, unless the package insert and container lable include instructions to wash the cells before use. The final product shall also be direct antiglobulin test negative when tested with polyspecific anti-human globulin.

(d) *Final container.* The final containers used for each lot of product shall be clean and shall permit observation of the contents for hemolysis or a change in color. The final container label, container cap, and dropper bulb of a Reagent Red Blood Cell product may be color-coded with a visual match to a specific color approved by the Director, Office of Biologics Research and Review.

(e) *Date of manufacture.* The date of manufacture of the product shall be the date that the blood is withdrawn from the donor or obtained from umbilical cords. The period during which the reagent red blood cell source material is kept by the manufacturer in storage in a frozen state at −65 °C or colder is excluded from the dating period. If the product consists of red blood cells from two or more donors, the date of manufacture of the final product shall be the date of withdrawal of blood from the donor of the oldest constituent blood. When a product consists of more than one container, e.g., cell panel, the date of manufacture of each container of the product shall be the earliest date that blood was withdrawn from a donor for any container of the product.

(f) *Retention samples.* Retention samples shall be maintained as required by § 600.13 of this chapter, except that samples must be retained only throughout the dating period of the product.

(Collection of information requirements approved by the Office of Management and Budget under control number 0910–0073.)

§ 660.35 Labeling.

In addition to the items required by § 809.10 of this chapter and other applicable labeling provisions of this chapter, the following information shall be included in the labeling:

(a)(1) A logo or company name may be placed on the final container label, however, the logo or company name shall be located along the bottom or end of the label, oustide of the main panel.

(2) If washing the cells is required by the manufacturer, the container label shall include appropriate instructions; if the cells should not be washed before use, e.g., if washing will adversely affect the product, the package insert shall explain.

(b) The container label of Group O cells shall state: "FOR USE IN DETECTION OF UNEXPECTED ANTIBODIES" or "FOR USE IN IDENTIFICATION OF UNEXPECTED ANTIBODIES" or "NOT FOR USE IN DETECTION OR IDENTIFICATION OF UNEXPECTED ANTIBODIES".

(c) Except as provided in this section, the container and package labels shall state the percentage of red blood cells in the suspension either as a discrete figure with a variance of more than ±1 percentage unit or as a range the extremes of which differ by no more than 2 percentage units. If the stated red blood cell concentration is less than 2 percent, the variance shall be no more than ±0.5 percentage unit.

(d) The words "pooled cells" shall appear on the container and package labels of products prepared from pooled cells. The package label or package insert shall state that pooled cells are not recommended for pretransfusion tests, done in lieu of a major crossmatch, to detect unexpected antibodies in patients' samples.

(e) The package insert of a pooled product intended for detection of unexpected antibodies shall identify the number of donors contributing to the pool. Products designed exclusively for ABO Serum Grouping and umbilical cord cells need not identify the number of donors in the pool.

(f) When the product is a multicontainer product, e.g., a cell panel, the container label and package label shall be assigned the same identifying lot number, and shall also bear a number or symbol to distinguish one container from another. Such number or symbol shall also appear on the antigenic constitution matrix.

(g) The package label or package insert shall state the blood group antigens that have been tested for and found present or absent on the cells of each donor, or refer to such information in an accompanying antigenic constitution matrix. Cells for ABO Serum Grouping are exempt from this requirement. The package insert or antigen constitution matrix shall list each of the antigens tested with only one source of antibody.

(h) The package label or package insert shall bear the cautionary statement: "The reactivity of the product may decrease during the dating period."

(i) The package insert of a product intended for the detection or identification of unexpected antibodies shall note that the rate at which antigen reactivity (e.g., agglutinability) is lost is partially dependent upon individual donor characteristics that are neither controlled nor predicted by the manufacturer.

(j) The package insert shall provide adequate directions for use.

(k) The package insert shall bear the statement: "CAUTION: ALL BLOOD PRODUCTS SHOULD BE TREATED AS POTENTIALLY INFECTIOUS. SOURCE MATERIAL FROM WHICH THIS PRODUCT WAS DERIVED WAS FOUND NEGATIVE WHEN TESTED IN ACCORDANCE WITH CURRENT FDA REQUIRED TESTS. NO KNOWN TEST METHODS CAN OFFER ASSURANCE THAT PRODUCTS DERIVED FROM HUMAN BLOOD WILL NOT TRANSMIT INFECTIOUS AGENTS."

(l) The package insert or the antigenic constitution matrix for each lot of product shall specify the date of manufacture or the length of the dating period.

(m) Manufacturers shall identify with a permanent donor code in the product labeling each donor of peripheral blood used for detection or identification of unexpected antibodies.

(Collection of information requirements approved by the Office of Management and Budget under control number 0910–0073.)

§ 660.36 Samples and protocols.

(a) The following shall be submitted to the Office of Biologics Research and Review Sample Custodian (ATTN: HFN–895), Bldg. 29A, Rm. 1C02, Food and Drug Administration, 8800 Rockville Pike, Bethesda, MD 20892, within 30 days after each routine establishment inspection by FDA.

(1) From a lot of final product, samples from a cell panel intended for identification of unexpected antibodies. The sample shall be packaged as for distribution and shall have at least 14 days remaining in the dating period when shipped to the Office of Biologics Research and Review.

(2) A protocol which shall include the following:

(i) Complete test records of at least two donors of the samples submitted, including original and confirmation phenotyping records.

(ii) Bleeding records or receipt records which indicate collection date, volume, and HBsAg test results.

(iii) Manufacturing records which document all steps involved in the preparation of the product.

(iv) Test results which verify that the final product meets specifications.

(v) Identity test results.

(b) A copy of the antigenic constitution matrix specifying the antigens present or absent shall be submitted to the Director, Office of Biologics Research and Review, at the time of initial distribution of each lot of Reagent Red Blood Cells for detection or identification of unexpected antibodies. Products designed exclusively to identify Anti-A, Anti-A_1, and Anti-B, as well as products composed entirely of umbilical cord cells, are excluded from this requirement.

(c) Except for umbjlical cord samples, whenever a new donor is used, a sample of red blood cells from each new donor used in a cell panel intended for the identification of unexpected antibodies shall be submitted by the manufacturer to the Director, Office of Biologics Research and Review. The sample should contain a minimum volume of 0.5 milliliter of red blood cells.

(Collection of information requirements approved by the Office of Management and Budget under control number 0910–0073.)

Dated: September 15, 1987.

Richard J. Davis,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

DEPARTMENT OF THE INTERIOR

Minerals Management Service

30 CFR Part 218

Assessments for Incorrect or Late Reports and Failure To Report

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Final rule; correction.

SUMMARY: The Minerals Management Service (MMS) is correcting an error which appeared in the **Federal Register** on July 22, 1987 (52 FR 27545). That **Federal Register** Notice amended 30 CFR 216.40 and 218.40 which provide for assessments against lessees, operators, and other reporters who report incorrectly, late, or fail to report under the MMS Auditing and Financial System (AFS) and the Production Accounting and Auditing System (PAAS).

FOR FURTHER INFORMATION CONTACT: Dennis C. Whitcomb, Chief, Rules and Procedures, (303) 231-3432, Lakewood, Colorado.

SUPPLEMENTARY INFORMATION: The MMS amended 30 CFR 216.40 and 218.40 to provide more flexibility in establishing the amount of assessments against lessees, operators, and other reporters who report incorrectly, late, or fail to report to the AFS and the PAAS. The amendment to § 218.40 contained a clerical error which is corrected by this Notice.

Dated: September 23, 1987.

Jerry D. Hill,

Associate Director for Royalty Management.

The following correction is made to the amendment to 30 CFR 218.40 which was published in the **Federal Register** on July 22, 1987 (52 FR 27545):

§ 218.40 [Corrected]

On page 27547 in the issue of July 22, 1987, in the first column, the designation pargraph "(g)" is corrected to read paragraph "(e)".

[FR Doc. 87-23136 Filed 10-6-87; 8:45 am]

BILLING CODE 4310-MR-M

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 915

Approval of Amendment to Iowa Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Final rule.

SUMMARY: OSMRE is announcing the approval of a proposed amendment to the Iowa permanent regulatory program (hereinafter referred to as the Iowa program) received by OSMRE pursuant to the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendment is a modification of Iowa statute concerning permanent program performance standards. This final rule will allow Iowa to bring its program into conformance with the Federal standards. Iowa will now be able to respond to OSMRE requirements for regulatory reform due to Federal regulation changes under SMCRA promulgated after March 13, 1979. Consistency of State and Federal standards is required by SMCRA.

EFFECTIVE DATE: October 7, 1987.

FOR FURTHER INFORMATION CONTACT: Mr. William J. Kovacic, Director, Kansas City Field Office, Office of Surface Mining Reclamation and Enforcement, 1103 Grand Avenue, Room 502, Kansas City, Missouri 64106; Telephone: (816) 374-5527.

SUPPLEMENTARY INFORMATION:

I. Background of the Iowa Program

On February 28, 1980, the Secretary of the Interior received a proposed regulatory program from the State of Iowa. On April 10, 1981, following a review of the proposed program as outlined in 30 CFR Part 732, the Secretary conditionally approved the Iowa program (46 FR 5885).

Information pertinent to the general background of the permanent program submission, as well as the Secretary's findings, the disposition of comments and explanation of the condition of approval of the Iowa program, can be found in the April 10, 1981 **Federal Register** (46 FR 5885). Subsequent actions concerning the Iowa program are identified in 30 CFR 915.15 and 915.20.

II. Submission of Proposed Amendment

On August 1, 1986, OSMRE notified the State of Iowa that the State needed to remove the phrase "on or before March 13, 1979" from Chapter 83-7 of the Iowa Code, pursuant to 30 CFR 732.17(f)(1). Prior to this amendment, Iowa statute only required that rules should be consistent with the environmental performance standards of SMCRA and the permanent regulations issued pursuant to it on or before March 13, 1979. The above language precluded Iowa from consistency with regulation changes promulgated after March 13, 1979. In order for Iowa to respond to OSMRE requirements for regulatory reform after March 13, 1979, this language had to be revised.

On April 28, 1987, the State of Iowa submitted to OSMRE an amendment to its approved permanent regulatory program. The amendment consisted of signed legislation amending Iowa's Coal Mining Statute, Chapter 83. Section 83.7, Code 1987 is amended by strking the section and inserting the following in its place:

83.7 Environmental Protection Performance Standards

The division shall adopt rules for environmental protection performance standards that are consistent with Federal regulations authorized under the Federal Surface Mining Control and Reclamation Act and amendments to that Act.

On July 9, 1987, the Director announced receipt of the proposed amendment and opened the public comment period (52 FR 25888). Since no one requested a public hearing, none was held.

III. Director's Findings

Set forth below, pursuant to SMCRA and the Federal regulations at 30 CFR 732.17(h)(6), are the Director's findings concerning the proposed amendment.

Because of the language "on or before March 13, 1979" from Chapter 83-7 of the Iowa Code, the State of Iowa could not maintain its regulations in a manner no less effective than the Federal regulations. This is a requirement of 30 CFR 732.17(h)(9), 732.15 (a) and (b) and 730.5 (a) and (b).

Iowa has striken the language "on or before March 13, 1979" from the Iowa statute. The replacement language allows the State of Iowa to keep its environmental protection performance standards consistent with Federal regulations under SMCRA and amendments to SMCRA.

Therefore, the Director finds that the amendment to the Iowa program as proposed is consistent with the Federal requirements.

IV. Public Comment

The Director solicited public comments on the proposed amendment by **Federal Register** notice on July 9,

1987 (52 FR 25888), that specified August 10, 1987, as the closing date of the comment period. No public comments were received. No one made a request to present testimony at a public hearing; therefore, the hearing scheduled for August 3, 1987 was canceled.

Various State and Federal agencies were also invited to comment on the proposed amendment. The Iowa State Historical Department supported adoption of the amendment. The Soil Conservation Service recommended approval of the amendment. The Mine Safety and Health Administration had no objections to the amendment. The U.S. Environmental Protection Agency, Office of Water Enforcement and Permits and the Regional Administrator for Region VII, responded that they had no comment on the amendment.

V. Director's Decision

Based on the findings, the Director is approving the amendment to the Iowa program as submitted April 28, 1987. The Federal regulations at 30 CFR Part 915 are being amended to implement this decision.

VI. Procedural Matters

1. Compliance with the National Environmental Policy Act

The Secretary has determined that, pursuant to section 702(d) of SMCRA 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. Executive Order 12291 and the Regulatory Flexibility Act

On August 28, 1981, the Office of Management and Budget (OMB) granted OSMRE an exemption from sections 3, 4, 7, and 8 of Executive Order 12291 for action directly related to approval or conditional approval of State regulatory programs. Therefore, for this action OSMRE is exempt from the requirement to prepare a Regulatory Impact Analysis, and this action does not require regulatory review by OMB.

The Department of the Interior has determined that this rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

This rule will not impose any new requirements; rather, it will ensure that existing requirements established by SMCRA and the Federal Rules will be met by the State.

3. Paperwork Reduction Act

This rule does not contain information collection requirements which require approval by OMB under 44 U.S.C. 3507.

List of Subjects in 30 CFR Part 915

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Date: September 30, 1987.

Brent Wahlquist,

Acting Deputy Director, Operations and Technical Services, Office of Surface Mining Reclamation and Enforcement.

30 CFR Part 915 is amended as follows:

PART 915—IOWA

1. The authority citation for Part 915 continues to read as follows:

Authority: Pub. L. 95–87, Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 *et seq.*).

2. Section 915.15 is amended by adding paragraph (g) as follows:

§ 915.15 Approval of regulatory program amendments.

* * * * *

(g) The following amendment submitted to OSMRE on April 28, 1987, is approved effective October 7, 1987. Code of Iowa, 1987, Chapter 83, Section 83.7.

[FR Doc. 87–23191 Filed 10–6–87; 8:45 am]
BILLING CODE 4310–05–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[PP 6E3414, 6E3325/R886 (FRL–3272–2)]

Pesticide Tolerances for Paraquat and Benomyl

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This document establishes tolerances for residues of the desiccant, defoliant, and herbicide paraquat and the fungicide benomyl and its metabolites in or on certain raw agricultural commodities (RAC). These rules to establish maximum permissible levels for residues of the pesticides in or on the RAC were requested by the Interregional Research Project No. 4 (IR–4).

DATE: Effective on October 7, 1987.

ADDRESS: Written objections, identified by the document control number [PP 6E3414, 6E3325/R886], may be submitted to: Hearing Clerk (A–110), Environmental Protection Agency, Room 3708, 401 M Street, SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT:
By mail:
Donald R. Stubbs, Emergency Response and Minor Use Section (TS–767C), Registration Division, Environmental Protection Agency, 401 M Street, SW Washington, DC 20460.
Office location and telephone number Room 716B, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202 (703) 557–1806.

SUPPLEMENTARY INFORMATION: EPA issued proposed rules for paraquat and benomyl and its metabolites, published in the **Federal Register** of April 8, 1987 (52 FR 11292 and 11293, respectively), which announced that the Interregional Research Project No. 4, New Jersey Agricultural Experiment Station, P.O Box 231, Rutgers University, New Brunswick, NJ 08903, had submitted pesticide petitions (PP) as follows to EPA on behalf of Dr. Robert H. Kupelian, National Director, IR–4 Project, and the following agricultural experiment stations:

1. *PP 6E3414.* Petition submitted on behalf of Agricultural Experiment Station of New Hampshire for paraquat on tyfon (a cross between Chinese cabbage and turnips that is grown for animal feeding purposes) at 0.05 part per million (ppm).

2. *PP 6E3325.* Petition submitted on behalf of Agricultural Experiment Station of Florida for benomyl and its metabolites on watercress at 10.0 ppm.

There were no comments or requests for referral to an advisory committee received in response to the proposed rules.

The data submitted and relevant information have been evaluated and discussed in the proposed rules. Based on the data and information considered the Agency concludes that the tolerances will protect the public health Therefore, the tolerances are established as set forth below.

Any person adversely affected by this regulation may, within 30 days after the date of publication in the **Federal Register**, file written objections with the Hearing Clerk, Environmental Protection Agency, Rm. M–3708 (A–110), 401 M Street, SW., Washington, DC 20460. Such objections should be submitted in quintuplicate and specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are legally sufficient to justify the relief sought.

The Office of Management and Budget (OMB) has exempted this regulation

from OMB requirements of Executive Order 12291 pursuant to section 8(b) of that Order.

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Recording and recordkeeping requirements.

Dated: September 23, 1987.

Douglas D. Campt,

Director, Office of Pesticide Programs.

Therefore, 40 CFR Part 180 is amended as follows:

PART 180—[AMENDED]

1. The authority citation for Part 180 continues to read as follows:

Authority: 21 U.S.C. 346a.

2. Section 180.205(b) table is amended by adding and alphabetically inserting the raw agricultural commodity tyfon to read as follows:

§ 180.205 Paraquat; tolerances for residues.

* * * * *

(b) * * *

Commodities	Parts per million
* * * * *	
Tyfon	0.05

3. Section 180.294 is amended by designating the current paragraph and list of tolerances as paragraph (a) and adding new paragraph (b), to read as follows:

§ 180.294 Benomyl; tolerances for residues.

(a) * * *

(b) Tolerances with regional registration, as defined in § 180.1(n), are established for residues on the fungicide benomyl (methyl 1-[butylcarbamoyl]-2-benzimidazolecarbamate) and its metabolites containing the benzimidazole moiety (calculated as benomyl) in or on the raw agricultural commodities:

Commodities	Parts per million
Watercress	10.0

BILLING CODE 6560-50-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

42 CFR Parts 466 and 476

[HSQ-145-FC]

Medicare and Medicaid Programs; Entities Performing Quality of Care Review of Services Provided by Risk-Basis Health Maintenance Organizations and Competitive Medical Plans

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Final rule with comment period.

SUMMARY: This final rule provides for review by Utilization and Quality Control Peer Review Organizations (PROs) of the quality of care furnished by risk-basis health maintenance organizations and competitive medical plans under 42 CFR Part 417, Subpart C. It also provides for this same review by non-PRO entities and identifies the requirements that these non-PRO entities must meet. This rule is necessary for the timely implementation of section 1154(a)(4) of the Social Security Act, as amended by section 9353(a)(2) of the Omnibus Budget Reconciliation Act of 1986 (Pub. L. 99-509).

Additionally, this rule corrects a technical error in the PRO regulations governing disclosure of confidential information to State agencies.

DATES: *Effective date:* These regulations are effective on October 7, 1987. They are being issued in final for reasons explained in the Waiver of Proposed Rulemaking section under Supplementary Information below.

Comment period: We will consider any comments we receive at the appropriate address, as provided below, no later than 5:00 p.m. on December 7, 1987, and revise the regulations as necessary.

ADDRESS: Mail comments to the following address: Health Care Financing Administration, Department of Health and Human Services, Attention: HSQ-145-FC, P.O. Box 26676, Baltimore, Maryland 21207.

If you prefer, you may deliver your comments to one of the following addresses:

Room 309-G, Hubert H. Humphrey Building, 200 Independence Ave., SW., Washington, DC, or

Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland.

In commenting, please refer to file code HSQ-145-FC. Comments received timely will be available for public inspection as they are received, generally beginning approximately three weeks after publication of a document, in Room 309-G of the Department's offices at 200 Independence Ave., SW., Washington, DC, on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. (phone: 202-245-7890).

FOR FURTHER INFORMATION CONTACT: Kay Terry, (301) 594-7909.

SUPPLEMENTARY INFORMATION:

I. Background

A. Utilization and Quality Control Peer Review Organizations (PROs): General

The Peer Review Improvement Act of 1982 (Title I, Subtitle C of the Tax Equity and Fiscal Responsibility Act of 1982 (Pub. L. 97-248)) amended Part B of Title XI of the Social Security Act (the Act) to establish the Utilization and Quality Control Peer Review Organization (PRO) program. The 1982 legislation provided that PROs assume the responsibilities that previously had been assigned to Professional Standard Review Organizations. Those responsibilities include the review of health care services funded under Medicare (Title XVIII of the Act) to determine whether those services are medically necessary, are furnished at the appropriate level of care, and are of a quality that meets professionally recognized standards. In addition, PROs monitor and validate a sample of diagnostic and procedural information supplied by providers to fiscal intermediaries regarding prospective payments to hospitals.

To carry out their responsibilities, PROs acquire information from the medical records of patients and from other records maintained by health institutions, practitioners and claims payment agencies. In addition, they generate information regarding the quality and appropriateness of health care services. PROs use this information to develop and review profiles (patterns of utilization and practice) and to assess the quality of care being furnished. PROs transmit their determinations to intermediaries responsible for making payments under the Act.

The PROs legislation contained several provisions affecting data collection and disclosure. Under section 1154(a)(7)(C) of the Act, PROs have the authority to examine pertinent records of any practitioner or provider of health care services for which the PROs has review responsibility. Section 1154(a)(9) of the Act requires that a PRO "collect

such information relevant to its functions and keep and maintain such records, in such form as the Secretary may require to carry out the purposes of this part and shall permit access to and use of any such information and records as the Secretary may require for such purposes, subject to the provisions of section 1160 of the Act." Other relevant language in section 1154(a)(10) of the Act authorizes PROs to exchange information with claims payment agencies, other PROs, and other public or private review organizations as may be appropriate. Section 1160 of the Act contains the majority of a PRO's satutory responsibilities concerning the disclosure of information. This section recognizes both the need to protect the interests of patients, health care practitioners and providers of health care in the confidentiality of their medical records and the need to disclose certain information.

On April 17, 1985, we published in the **Federal Register** several final rules that implemented the PRO program (50 FR 15312–15374). The PRO regulations are located in various parts of title 42 of the CFR (that is, Part 405, 462, 466, 473, 476, 489, and 1004).

B. Quality of Care Review of Risk-Basis HMOs and CMPs

On October 21, 1986, the Omnibus Budget Reconciliation Act of 1986 (Pub. L. 99–509) was enacted. Section 9353(a)(2)(B) of Pub. L. 99–509) added section 1154(a)(4)(B) to the Act to provide that inpatient services and outpatient services furnished to Medicare enrollees by eligible organizations (that is, risk-basis health maintenance organizations (HMOs) and competitive medical plans (CMPs)) in accordance with a contract under section 1876 of the Act be reviewed for the quality of care provided. Based on this review, a determination must be made as to whether the quality of those services meets professionally recognized standards of health care, including whether appropriate health care services have not been provided or have been provided in inappropriate settings. Section 9353(a)(6)(B) of Pub. L. 99–509 specifies that section 9353(a)(2)(B) shall apply to contracts as of April 1, 1987.

Section 9353(a)(2)(D) of Pub. L. 99–509 added section 1154(a)(4)(C) to the Act to require that the Secretary may provide, by contract under competitive procurement procedures on a State-by-State basis in up to 25 States, for the review described above to be performed by either a Utilization and Quality Control Peer Review Organization (PRO) or an organization that is not a PRO but which meets the requirements for PROs set forth in sections 1152 and 1153(b) of the Act.

Section 9353(a)(6)(C) of Pub. L. 99–509 specifies that section 9353(a)(2)(D) shall apply to contracts awarded as of January 1, 1987. On January 5, 1987, we published a notice (52 FR 362) to solicit comments on a tentative list of 25 States in which we intend to provide for competitive contracting for the review of HMO and CMP services.

Section 1154(a)(4)(B) of the Act provides that if an entity other than the current PRO wins the contract to preform quality of care reviews of risk-basis HMOs and CMPs, as allowed under section 1154(a)(4)(C) of the Act, the requirement for such reviews will not apply to affected PROs for affected contract periods.

II. Provisions of the Regulations

Quality of Care Review of Risk-Basis HMOs and CMPs

This interim final rule is necessary to implement section 1154(a)(4) of the Act as established by section 9353(a)(2) of Pub. L. 99–509. The statutory requirements regarding the quality of care review of HMO and CMP services by PROs are sufficiently clear to be self-implementing. The statute is also explicit in its intent to permit entities other than PROs to perform quality of care reviews of services provided by risk-basis HMOs and CMPs. Furthermore, as discussed above, certain PRO statutory requirements are likewise applicable to these other non-PRO entities.

Accordingly, we are amending the introductory sections of Part 466, Subpart C of 42 CFR to incorporate the statutory additions to PRO review responsibilities, and to specify the extent to which the PRO regulations will apply to non-PRO entities that win contracts under section 1154(a)(4)(C) of the Act. In particular, we are adding a new § 466.72, which provides that, under section 1154(a)(4) of the Act, a PRO must determine whether the quality of services (including both inpatient and outpatient services) provided by an HMO or CMP (under a risk-basis contract under section 1876 of the Act) meets professionally recognized standards of health care, including whether appropriate health care services have not been provided or have been provided in inappropriate settings. Section 466.72 also provides that, for purposes of review under that section, non-PRO entities will be subject to the PRO rules regarding acquisition, protection, and disclosure of peer review information (42 CFR Part 476), and the rules regarding sanctions on health care practitioners and providers (42 CFR Part 1004 (formerly designated as Part 474)). Thus, any entity that enters into a contract to perform quality of care reviews of services furnished by risk-basis HMOs and CMPs under 42 CFR Part 417, Subpart C, will be considered to be a PRO for purposes of those reviews, and only for those reviews, and will have the same authorities, protections, and responsibilities as a PRO regarding that limited function. (While the PRO regulations do not address the provisions of section 1157 of the Act regarding limitations on liability of individuals involved in the peer review process, those provisions apply to all contracts made under title XI of the Act, including those with non-PRO entities.)

Without amendment, our regulations governing the review responsibilities of PROs will not apply to any other entities performing reviews. With the amendments, non-PROs that perform these reviews will be governed by requirements comparable to those that apply to PROs.

Technical Correction

Due to a technical oversight on our part, our current regulations at 42 CFR 476.133 and 476.137 require PROs to disclose confidential information only to State agencies responsible for the investigation of fraud and abuse of the Medicare program. Section 1160(b)(1)(A) of the Act provides for the release of confidential information "as may be necessary to assist Federal and State agencies . . . ." This section of the Act does not limit the release of this information to agencies investigating fraud and abuse of the Medicare program. The inclusion of language so limiting release in the current regulation has been confusing and has led to the impression among some parties that release of information to other agencies, such as those that investigate Medicaid fraud and abuse, is prohibited. Therefore, we are revising §§ 476.133 and 476.137 to refer to both the Medicare and Medicaid programs.

III. Regulatory Impact Statement

Executive Order 12291 (E.O.) requires us to prepare and publish a regulatory impact analysis for any regulation that meets one of the E.O. criteria for a "major rule"; that is, that would be likely to result in: an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or

significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. In additon, we generally prepare a regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612), unless the Secretary certifies that the regulation will not have a significant economic impact on a substantial number of small entities. For purposes of the RFA, we treat all PROs and other potential review entities as small entities.

The provisions on review of quality of care of risk-basis HMOs and CMPs merely will ensure that any non-PRO entity that contracts to review risk-basis HMO and CMP services must meet the same review responsibilities that a PRO must meet in performing the same reviews. We are not adding any review requirements beyond those explicit in the statute.

For these reasons, the Secretary has determined that a regulatory impact analysis is not required. Further, we have determined, and the Secretary certifies, that this final rule will not have a significant economic impact on a substantial number of small entities, and we have therefore not prepared a regulatory flexibility analysis.

IV. Waiver of Proposed Rulemaking and 30-Day Delay of Effective Date

A. Proposed Rulemaking Requirement

We generally publish notice of proposed rulemaking in the **Federal Register** and afford prior public comment on proposed rules. Such notice includes a statement of the time, place, and nature of rulemaking proceedings, reference to the legal authority under which the rule is proposed, and the terms or substance of the proposed rule or a description of the subjects and issues involved. However, this procedure can be waived when an agency finds good cause that such a notice-and-comment procedure is impracticable, unnecessary, or contrary to the public interest, and incorporates a statement of finding and its reasons in the rules issued.

The final rule is necessary for the timely implementation of sections 9353(a)(2)(D) and 9353(d) of Pub. L. 99–509. The rule revises the relevant PRO regulations in order to largely reiterate the statutory requirements imposed by these amendments and clarifies which existing PRO statutory provisions and regulations apply to organizations other than PROs that will be conducting the review of HMO and CMP services. (While the PRO regulations do not address the provisions of section 1157 of the Act regarding limitations on liability of individuals involved in the peer review process, those provisions apply to all contracts made under title XI of the Act, including those with non-PRO entities). Peer review of the care provided to Medicare patients by HMOs and CMPs is an essential element in ensuring that the care given to these primarily elderly patients meets professionally recognized standards. Because Congress clearly intended, through the passage of these amendments, to authorize non-PRO organizations to conduct quality of care reviews in certain situations, it is in the public interest to ensure that current regulations are amended as quickly as possible to clarify that the authorities, protections, and responsibilities of those entities are comparable to those of PROs. Furthermore, section 9353(a)(2)(B) of Pub. L. 99–509 applies to contracts as of April 1, 1987, and section 9353(d)(1) is effective for requests for data and information made on or after April 21, 1987. As a result of these statutory deadlines, publising a proposed rule is impracticable. Therefore, we find good cause to waive proposed rulemaking for the implementation of these provisions.

Regarding the correction of our rule concerning disclosure to State Medicaid programs, we have determined that it is not in the public interest to delay publication of this clarification that PROs must disclose to State Medicaid agencies (or other State agencies with appropriate responsibilities concerning State Medicaid programs) peer review information germane to the investigation of fraud and abuse. We therefore find good cause to waive proposed rulemaking for the implementation of these provisions.

B. Requirement for 30-Day Delay of Effective Date

We usually publish our rules not less than 30 days before their effective dates unless we find good cause and publish that rationale with the rule. For the reasons discussed above with reference to waiving the proposed rulemaking requirement, we find that it is impracticable and not in the public interest to provide for a 30-day delay in the effective date of this final rule with comment period. Therefore, we find good cause to waive that delay.

V. Response to Comments

Because of the large number of comments we receive on proposed regulations, we cannot acknowledge or respond to them individually. However, we will consider all comments received timely and, if we decide to change the regulations, we will publish an additional **Federal Register** document and respond to the major issues raised by commenters in the preamble to the subsequent **Federal Register** document.

VI. Collection of Information Requirements

Section 466.71(a) of this final rule contains information collection requirements subject to review by the Office of Management and Budget (OMB) under authority of the Paperwork Reduction Act of 1980. The information collection requirements contained in this section have been previously approved under OMB control number 0938–0445. However, because these requirements now apply to the review of additional organizations, namely risk-basis HMOs and CMPs, we are interested in receiving further public comments. Organizations and individuals desiring to submit comments on the information collection requirements should direct them to the agency official designated for this purpose whose name appears in the preamble and to the Office of Information and Regulatory Affairs, OMB, New Executive Office Building, Room 3208, Washington, DC 20503, ATTN: Allison Herron, Desk Officer for HCFA.

Also, it should be noted that in accordance with the Paperwork Reduction Act of 1980, we will be submitting for OMB review a new package of PRO reporting forms (HCFA Forms 567 through 575). These forms will be used for quality of care reviews of HMOs and CMPs. Notification of the submission of these revisions for OMB approval will be published in the **Federal Register**.

List of Subjects

42 CFR Part 466

Competitive medical plans (CMPs), Grant programs-health, Health care, Health facilities, Health maintenance organizations (HMOs), Health professions, Peer Review Organizations.

42 CFR Part 476

Health care, Health professions, Health records, Peer Review Organizations, Penalties, Privacy.

For the reasons set forth in the preamble, 42 CFR Chapter IV is amended as follows:

A. Part 466, Subpart C is amended to read as follows:

VOL 52 ISS 194 OCT 7 1987 UMI

1. The table of contents for Part 466, Subpart C, is amended to read as follows:

PART—466 UTILIZATION AND QUALITY CONTROL REVIEW

* * * * *

Subpart C—Review Responsibilities of Utilization and Quality Control Peer Review Organizations (PROs)

General Provisions

Sec.

466.70 Statutory bases and applicability.
466.71 PRO review requirements.
466.72 Review of the quality of care of risk-basis HMOs and CMPs.
466.73 Notification of PRO designation and implementation of review.

* * * * *

1a. The authority citation for Part 466 continues to read as follows.

Authority: Sec. 1102, 1154, and 1871 of the Social Security Act (42 U.S.C. 1302, 1320c–3, and 1395hh).

2. Section 466.70 is amended by revising the section heading, paragraphs (a) and (b), and redesignating paragraphs (c), (d) and (e) as paragraphs (a), (b) and (c), respectively, of new § 466.71, which is added to read as follows:

§ 466.70 Statutory bases and applicability.

(a) *Statutory basis.* Sections 1154, 1866(a)(1)(F) and 1886(f)(2) of the Act require that a PRO review those services furnished by physicians, other health care professionals, providers and suppliers as specified in its contract with the Secretary. Section 1154(a)(4) of the Act requires PROs, or, in certain circumstances, non-PRO entities, to perform quality of care reviews of services furnished under risk-basis contracts by health maintenance organizations (HMOs) and competitive medical plans (CMPs) that are covered under Subpart C of Part 417 of this chapter.

(b) *Applicability.* The regulations in this subpart apply to review conducted by a PRO and its subcontractors. Section 466.72 of this part also applies, for purposes of quality of care reviews under section 1154(a)(4) of the Act, to non-PRO entities that enter into contracts to perform reviews of services furnished under risk-basis contracts by HMOs and CMPs under Subpart C of Part 417 of this chapter.

§ 466.71 PRO review requirements.

(a) *Scope of PRO review.* In its review, the PRO must determine (in accordance with the terms of its contract)—

(1) Whether the services are or were reasonable and medically necessary for the diagnosis and treatment of illness or injury or to improve functioning of a malformed body member, or (with respect to pneumococcal vaccine) for prevention of illness or (in the case of hospice care) for the palliation and management of terminal illness;

(2) Whether the quality of the services meets professionally recognized standards of health care;

(3) Whether those services furnished or proposed to be furnished on an inpatient basis could, consistent with the provisions of appropriate medical care, be effectively furnished more economically on an outpatient basis or in an inpatient health care facility of a different type;

(4) Through DRG validation, the validity of diagnostic and procedural information supplied by the hospital;

(5) The completeness, adequacy and quality of hospital care provided;

(6) The medical necessity, reasonableness and appropriateness of hospital admissions and discharges;

(7) The medical necessity, reasonableness and appropriateness of inpatient hospital care for which additional payment is sought under the outlier provisions of §§ 412.82 and 412.84 of this chapter; and

(8) Whether a hospital has misrepresented admission or discharge information or has taken an action that results in—

(i) The unnecessary admission of an individual entitled to benefits under Part A;

(ii) Unnecessary multiple admissions of an individual; or

(iii) Other inappropriate medical or other practices with respect to beneficiaries or billing for services furnished to beneficiaries.

(b) *Payment determinations.* On the basis of the review specified under paragraphs (c) (1), (3), (6), and (7), and (8) of this section, the PRO must determine whether payment may be made for these services. A PRO may grant a period of not more than two days (grace days) for the purpose of arranging post discharge care when the provider did not know or could not reasonably be expected to have known that payment for the service(s) would not be made under the Medicare program as specified in § 405.330(b).

(c) *Other duties and functions.* (1) The PRO must review at least a random sample of hospital discharges each quarter and submit new diagnostic and procedural information to the Medicare fiscal intermediary or carrier if it determines that the information submitted by the hospital was incorrect.

(2) The PRO must also perform other duties, functions, and responsibilities as required by HCFA.

§ 466.72 [Redesignated as § 466.73]

3. Section 466.72 is redesignated as § 466.73.

4. A new § 466.72 is added to read as follows:

§ 466.72 Review of the quality of care of risk-basis health maintenance organizations and competitive medical plans.

(a) (1) For purposes of a review under section 1154(a)(4) of the Act, a PRO must determine whether the quality of services (including both inpatient and outpatient services) provided by an HMO or CMP meets professionally recognized standards of health care, including whether appropriate health care services have not been provided or have been provided in inappropriate settings.

(2) Paragraph (a)(1) of this section will not apply with respect to a contract year if another entity has been awarded a contract to perform those reviews under section 1154(a)(4)(C) of the Act.

(b) For purposes of reviews under this section, non-PRO entities selected to perform these reviews under section 1154(a)(4)(C) of the Act are subject to the requirements of paragraph (a)(1) of this section and—

(1) Part 476 of this chapter regarding acquisition, protection, and disclosure of peer review information; and

(2) Part 1004 of Chapter V regarding a PRO's responsibilities, and sanctions on health care practitioners and providers.

B. Part 476, Subpart B is amended as follows:

1. The table of contents of Part 476 is amended by revising the title of § 476.137 to read as follows:

PART 476—ACQUISITION, PROTECTION, AND DISCLOSURE OF PEER REVIEW INFORMATION

* * * * *

Subpart B—Utilization and Quality Control Peer Review Organizations (PROs)

* * * * *

§ 476.137 Disclosure to Federal and State enforcement agencies responsible for the investigation or identification of fraud or abuse of the Medicare or Medicaid programs.

* * * * *

1a. The authority citation for Part 476 continues to read as follows:

Authority: Sec. 1102 of the Social Security Act (42 U.S.C. 1302). Subpart A is also issued under sec. 150 of Pub. L. 97-248 (42 U.S.C. 1320c note). Subpart B is also issued under secs. 1154(a), 1156(a), and 1160 of the Social Security Act (42 U.S.C. 1320c-3(a), 1320c-5(a), and 1320c-9).

2. In § 476.133, the introductory text of paragraph (a) is republished and paragraph (a)(2)(ii) is revised to read as follows:

§ 476.133 Disclosure of information about practitioners, reviewers and institutions.

(a) *General requirements for disclosure.* Except as specified in paragraph (b) of this section, the following provisions are required of the PRO.

* * * * *

(2) * * *

(ii) *Disclosure to others.*

In accordance with section 1160 of the Act, a PRO must disclose information that displays practice or performance patterns of a practitioner or institution in accordance with the procedures for disclosures specified in §§ 476.137 and 476.138 to—

(A) Federal and State agencies that are responsible for the investigation of fraud and abuse of the Medicare and or Medicaid programs, and

(B) Federal and State agencies that are responsible for licensing and certification of practitioners and providers.

* * * * *

§ 476.137 [Amended]

3. In § 476.137, including the section heading, remove the phrase "Medicare program" and add, in its place, "Medicare or Medicaid programs."

(Catalog of Federal Domestic Assistance Program No. 13.714, Medical Assistance Program; No. 13.773, Medicare—Hospital Insurance Program; and No. 13.774, Medicare—Supplemental Medical Insurance Program)

BILLING CODE 4120-01-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 1

[Gen. Docket No. 86-225; FCC 87-303]

Ex Parte Communications and Presentations in Commission Proceedings

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: FCC adopts a Memorandum Opinion and Order to reconsider and revise certain aspects of Subpart H, Part 1 of the Commission's Rules and Regulations relating to ex parte communications and presentations governing Commission proceedings in order to serve the public interest better.

EFFECTIVE DATE: October 7, 1987.

FOR FURTHER INFORMATION CONTACT: Steve Bailey, Administrative Law Division, Office of General Counsel, Washington, DC 20554, (202) 254-6530.

SUPPLEMENTARY INFORMATION: In the matter of amendment of Subpart H, Part 1 of the Commission's rules and regulations concerning ex parte communications and presentations in Commission proceedings.

This is a summary of the Commission's Memorandum Opinion and Order in Gen. Docket No. 86-225, adopted September 17, 1987, and released October 7, 1987.

The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Summary of Memorandum Opinion and Order

1. On May 22, 1987, the Commission released a Report and Order adopting new ex parte rules to simplify and clarify its policies in this area. FCC 87-94, 2 FCC Rcd 3011, 52 FR 21051 (June 4, 1987). On July 2, 1987, it received a letter from Honorable Edward J. Markey, Chairman of the Subcommittee on Telecommunications and Finance, Committee on Commerce and Energy, House of Representatives, stating that the Commission-imposed Sunshine prohibition should not be applied to members of Congress. Attached to the letter was a memorandum from the General Counsel to the Clerk of the House of Representatives in support of the views expressed by Chairman Markey.

2. The Commission subsequently decided to treat this letter as a petition for reconsideration of the new ex parte rules and stated that it might possibly reconsider other aspects of the rules. Order, FCC 87-228, 2 FCC Rcd 4264 (July 14, 1987). "Comments on Petition for Reconsideration" were received from BellSouth Corporation, South Central Bell Telephone Company, and Southern Bell Telephone and Telegraph Company (BellSouth).

3. In its Report and Order, the Commission retained and clarified the regulatory prohibition against presentations during the "Sunshine Agenda period," which, as revised herein, is now defined as the period from the time that a matter is listed on a Commission meeting agenda until release of the text of a decision or order relating to the matter or release of a notice that the matter has been deleted from the agenda or returned to the staff. In reconsidering the applicability of the prohibition to Congress, the Commission noted that Congress has a special responsibility to ensure that the powers it has entrusted to it are exercised wisely in accordance with its statutory mandate and, therefore, the Commission has an obligation to craft its rules to avoid imposing handicaps that may needlessly interfere with or impede that congressional function. In light of this and other factors, it found that the benefits of the "period of repose" intended by this prohibition are outweighed by the greater overall public interest of flexibility in exchanging information among policy-makers. Hence, the Commission concluded that the Sunshine prohibition should be revised to exempt contacts from members of Congress in non-restricted proceedings and certain otherwise proceedings during the Sunshine period.

4. Similarly, it recognized that other agencies and branches of the Federal Government, even if they do not formally share jurisdiction with this agency, may have relevant information

concerning non-restricted or certain other proceedings otherwise exempt. Because they may not be aware of the pendency of a particular non-restricted or exempt proceeding prior to publication of the Sunshine Notice, they would be precluded from communicating such information to the Commission absent exemption from the Sunshine prohibition. As with Congressional contacts, it found that the need for flexibility conducive to the wide exchange of information at the federal level among policy-makers outweighs the benefits of the Sunshine prohibition. Similarly, it concluded that other federal governmental contacts should be exempted from the Sunshine prohibition in non-restricted and certain other proceedings that are otherwise exempt under the rules.

5. In permitting these exceptions from the Sunshine prohibition, the Commission stated that those presentations that are of substantial significance and clearly intended to affect the ultimate decision would be subject to disclosure by Commission staff or in accordance with the "permit but disclose" procedures set forth in § 1.1206(a). However, it stated that no responses to such statements will ordinarily be accepted during the Sunshine period.

6. In addition, the rules were amended to provide an exemption for information obtained on an ex parte basis in the course of an investigation in order to ensure that the Commission's ability to obtain such information during an investigation is not impaired. The Commission also clarified the rules to provide that waiver or special permission requests that are formally opposed would generally be treated as restricted proceedings unless the Commission specified otherwise. However, waiver requests raised in the context of an individual tariff filing that are part and parcel of the tariff review and screening process would continue to be exempt unless they implicated issues of broader significance and impact.

7. In addition, the rules were clarified to indicate that order to show cause proceedings would be treated as restricted adjudications and that non-restricted ex parte rules will generally be followed in Joint Board proceedings under section 410(c) of the Communications Act unless otherwise stated. The Commission also amended the rules to provide that where a very significant adjudicative decision is perceived by the public as a major statement of Commission policy, the Managing Director is not required to follow the procedures under § 1.1212 (a) through (g) of the Rules with respect to general correspondence received in the proceeding; instead, a public file of such correspondence will be maintained.

8. The Commission also amended the rules to clarify that Bureau staff involved in the routine handling of complaints should not be considered decision-making personnel in a restricted proceeding merely because the person against whom a complaint is filed is also a party to a restricted proceeding. It also declined to eliminate the Sunshine period prohibition as suggested by BellSouth. Other changes, essentially minor in nature, were also made. These changes to the rules are reflected in the Appendix.

9. The Commission adopts these changes to clarify points left ambiguous in its recent rulemaking, and to modify the new rules where warranted, upon further reflection, to best serve the public interest. Because they concern Commission practice and procedure and establish standards of fairness governing Commission proceedings, the Commission finds that good cause exists and, accordingly, the changes herein shall become immediately effective upon publication in the **Federal Register.** See 5 U.S.C. 553 (b) and (d)(3).

10. The rule changes adopted herein have been analyzed with respect to the Paperwork Reduction Act of 1980 and found to impose no new or modified requirements or burdens on the public and, accordingly, their implementation is not subject to approval by the Office of Management and Budget under that Act.

11. Accordingly, it is ordered that the Rules and Regulations of the Federal Communications Commission are amended in the manner indicated below.

12. It is further ordered that the amendments to the Commission's Rules shall become immediately effective upon publication in the **Federal Register.**

13. It is further ordered that this proceeding is terminated.

14. Authority for this action is contained in sections 4(i), 4(j), and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. sections 154(i), 154(j), and 303(r).

List of Subjects in 47 CFR Part 1

Administrative practice and procedure.

Federal Communications Commission.

William J. Tricarico,

Secretary.

Part 1 (Practice and Procedure) of Chapter I of title 47 of the Code of Federal Regulations is amended as follows:

PART 1—[AMENDED]

1. The authority citation for Part 1 continues to read:

Authority: Sections 4, 303, 409, 48 Stat. 1066, 1082, 1096, as amended; 47 U.S.C. 66, 154, 303, 309.

2. The table of contents for Subpart H which was published at 52 FR 21052, June 4, 1987, is corrected by adding "Section 1.1214 Disclosure of Information Concerning Violations of this Subpart." and by changing the section number immediately following the undesignated center heading "SANCTIONS" to read "Section 1.1216".

3. Section 1.1202 is amended by adding a note to paragraph (c), removing the words "as between" in paragraph (d) and replacing them with the word "of"correctly designating paragraphs (f)(i), (ii), and (iii), as paragraphs (f)(1), (2), and (3), and revising paragraph (f)(1) to read as follows:

§ 1.1202 Definitions.

* * * * *

(c) * * *

Note to paragraph(c): The application of this definition under this subpart is not intended to preclude the routine handling by Commission staff of complaints that would otherwise be technically considered ex parte because the person against whom the complaint is directed is also a party in a restricted proceeding.

* * * * *

(f) * * *

(1) Releases the text of a decision or order relating to the matter, or

* * * * *

4. Section 1.1203 is amended by adding a new paragraph (c) with a note to read as follows:

§ 1.1203 Sunshine period prohibition.

* * * * *

(c) The prohibition in § 1.1203(a) above shall not apply to presentations (not otherwise exempted under § 1.1204(b)) made by members of Congress or their staff or by other agencies or branches of the Federal Government or their staff in non-restricted proceedings under § 1.1206(b), exempt proceedings under § 1.1204(a)(2) (not involving the allotment of a channel in the radio broadcast or television broadcast services, or exempt proceedings under § 1.1204(a) (4)–(6).

Note: to paragraph (c): Unless otherwise exempted under § 1.1204, presentations under § 1.1203(c) that are of substantial significance and clearly intended to affect the ultimate decision, shall be placed (if oral, a written summary of the presentation) in the record of the proceeding by Commission staff or in accordance with the procedures set forth in § 1.1206(a)(1)–(3).

5. Section 1.1204 is amended by removing in the note following paragraph (a)(3) the language "§ 1.1204 (a)(1)–(3)" and replacing it with the language § 1.1204(a)(1), (a)(2)(i), or (a)(3)".

6. Section 1.1204 is further amended by adding a new sentence in paragraph (a)(6) after the sentence ending with "unless it has been set for investigation, (*See* § 1.1206(b)(6))" to read as follows:

§ 1.1204 General exemptions.

* * * * *

(a) * * *

(6) * * * This exemption from the ex parte requirements shall also extend to requests for waiver or for special permission directly associated with a particular tariff filing made pursuant to these Sections of the the Act, unless the Commission states otherwise.

* * * * *

7. Section 1.1204 is further amended by adding in the note after paragraph (b)(7), a new sentence after the sentence ending with "record of the proceeding" and before the sentence beginning with "In a non-restricted proceeding," to read "Where the Commission determines that such service of public notice, prior to designation of a matter for hearing, would interfere with the effective conduct of an investigation, it may dispense with such service or public notice" and by adding the language "Except as otherwise provided above," before the word "Any" in the last sentence and changing the capital "A" in "Any" to a small "a".

8. Section 1.1206 is amended by adding a note after paragraph (a)(3) and by adding paragraphs (a)(5), and (b)(10), with a note to read as follows:

§ 1.1206 Non-restricted proceedings; ex parte presentations generally permissible but subject to disclosure.

(a) * * *

(3) * * *

Note: Unless otherwise exempted under § 1.1204, presentations from members of Congress or their staff or from other agencies or branches of the Federal Government or their staff that are of substantial significance and clearly intended to affect the ultimate decision, shall be placed (if oral, a written summary of the presentation) in the record of the proceeding by Commission staff or in accordance with the procedures set forth in § 1.1206(a)(1)–(3).

* * * * *

(5) The procedures outlined above continue in effect (except as otherwise provided under § 1.1204) until the proceeding has been decided by the Commission and is no longer subject to reconsideration by the Commission or review by any court.

(b) * * *

(10) A proceeding before a Joint Board or a proceeding before the Commission involving a recommendation from a Joint Board unless the proceeding is specifically classified as an adjudicative proceeding.

Note: Unless otherwise ordered by the Commission, Joint Boards shall have the authority to modify the *ex parte* rules as necessary in a particular proceeding to promote fair and efficient decisionmaking.

9. Section 1.1208 is amended by:

(a) Redesignating paragraphs (c)(1)(i), (ii) and (iii), as (c)(1)(ii) (A), (B), and (C);

(b) Redesignating paragraphs (c)(1)(iv) (A), (B), and (C), as (c)(1)(i) (A), (B), and (C);

(c) Revising paragraph (c)(1)(i) introductory text;

(d) Adding paragraph (c)(1)(ii) introductory text;

(e) Amending paragraph (c)(1)(ii)(A) by removing the language "special relief or waiver proceedings under the above sections; or cable television special relief or waiver proceedings";

(f) Redesignating paragraph (c)(4) as (c)(5); and

(g) Adding a new paragraph (c)(4).

9a. The revised and added portions of § 1.1208 read as follows:

§ 1.1208 Restricted proceedings.

* * * * *

(c) * * *

(1)(i) Any proceeding specified in paragraph (c)(1)(ii) of this section is restricted from the day on which any of the following has occurred:

* * * * *

(ii) A proceeding is restricted as provided in paragraph (c)(1)(i) of this section if it is:

* * * * *

(D) Any request for an order to show cause, any special relief or waiver proceeding conducted pursuant to or under any of the provisions listed in paragraphs (c)(1)(ii) (A), (B), or (C) of this section or any cable television special relief or waiver proceeding.

Note: See § 1.1204(a)(6) regarding the ex parte treatment of requests for waiver or for special permission made in the context of a particular tariff filing as part of the tariff review process.

* * * * *

(4) A proceeding in which an order to show cause has been released.

* * * * *

10. The undesignated center hearing before § 1.1210 is amended by removing "EX PARTE".

§ 1.1210 [Amended]

11. Section 1.1210 is amended by removing in the caption and in the sentence of that section the words "ex parte".

12. Section 1.1212 is amended by adding a new paragraph (h) as follows:

§ 1.1212 Procedures for handling of prohibited ex parte presentations.

* * * * *

(h) Where a restricted proceeding is perceived by the public as involving a major statement of Commission policy and precipitates a substantial amount of correspondence from the general public, the above procedures with respect to such correspondence will not be following; however, such correspondence and materials related thereto shall be placed in a public file and made available for inspection.

13. The note to § 1.415(d) of the Commission's Rules is revised by removing "1.1201 *et seq.*" and replacing it with "1.1200 *et seq.*".

BILLING CODE 6712-01-M

---

47 CFR Part 73

[MM Docket No. 87-23; RMs-5289; 5458; 5863]

Radio Broadcasting Services; Cazenovia, Manlius, Rome, Schoharie, Voorheesville, NY

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document allocates: (1) Channel 247A to Schoharie, NY, as the commuunity' first local FM service, at the request of Harvest Broadcasting Services; (2) Channel 242A to Voorheesville, New York, as the community's first local FM service, at the request of Peter Morton; and (3) substitutes Channel 239B1 for Channel 237A at Manlius, New York, and substitutes Channel 241B1 for Channel 240A at Rome, New York, at the joint request of AGK Communications and WENY, Inc. This document also modifies the license of AGK Communications, Inc. for Station WAQX–FM at Manlius to specify operation on Channel 239B1 and modifies the license of WENY, Inc. for Station WKAL–FM at Rome to specify operation on Channel 241B1. In addition, the Table of Allotments is amended by deleting Channel 237A from Cazenovia to reflect its use at Manlius. Channel 247A can be allocated to Schoharie in compliance with the Commission's minimum distance separation requirements without a site restriction. Channel 242A at Voorheesville requires

a site restriction of 1.32 kilometers (.82 miles) south to avoid a short-spacing to the construction permit and application of Station WCSF, Channel 244A, Clifton Park, New York. The allotment of Channel 239B1 at Manlius and Channel 241B1 at Rome comply with the Commission's minimum distance separation requirements to all domestic allotments. The short-spacings to Canadian stations at Belleville, Ontario (Station CJBC–1) and Kingston, Ontario (CFMK–FM) have been approved as "specially negotiated" allotments by the Canadian government. With this action, this proceeding is terminated.

DATES: Effective November 13, 1987. The window period for filing applications for Channel 247A at Schoharie and Channel 242A at Voorheesville, will open on November 16, 1987, and close on December 16, 1987.

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order, MM Docket No. 8723, adopted September 9, 1987, and released September 30, 1987. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

47 CFR Part 76

[MM Docket No. 84–1296; FCC 87–306]

Cable Television; Amendment of the Commission's Rules To Implement the Provisions of the Cable Communications Policy Act of 1984

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The U.S. Court of Appeals for the District of Columbia Circuit decision in *American Civil Liberties Union* v. *FCC* vacated certain sections of the Commission's rules implementing the Cable Communications Policy Act of 1984. This Memorandum Opinion and Order resolves the court's objections to our rules concerning the definition of basic cable service, the automatic pass through to subscribers of certain costs, and the requirement for providing lock boxes capable of blocking incoming channels.

EFFECTIVE DATE: November 9, 1987.

FOR FURTHER INFORMATION CONTACT: Judith Herman, Mass Media Bureau, (202) 632–6302.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Memorandum Opinion and Order in MM Docket No. 84–1296, adopted September 17, 1987, and released September 28, 1987. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, Northwest, Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street, Northwest, Suite 140, Washington, DC 20037.

Summary of the Memorandum Opinion and Order

1. The Cable Communications Policy Act of 1984 (Cable Act) instructs the Commission to establish the circumstances and manner in which a local franchising authority may regulate the basic cable service rates of a cable system. Upon review, the U.S. Court of Appeals for the District of Columbia Circuit concluded that, for the most part, the rules adopted by the Commission are reasonable and consistent with the Cable Act. The court did, however, vacate certain portions of the *Report and Order*. In this Memorandum Opinion and Order, the Commission resolves the court's objections to our rules concerning the definition of basic

BEST COPY AVAILABLE

VOL 52 ISS 194 OCT 7 1987 UMI

cable service, the automatic pass through to subscribers of certain costs, and the requirement for providing lock boxes capable of blocking incoming channels.

2. The Cable Act defines basic cable service as "any service tier which includes the retransmission of local television broadcast signals." The Commission adopted a revised definition of basic cable service so as to permit only one service tier of a cable system to be regulated. The court determined that the Commission does not have the discretion to adopt a definition of basic cable service that is at odds with the definition of that term in the Cable Act. The Commission is revising the definition of basic cable service in its rules so that it conforms with the definition in the Cable Act.

3. The Cable Act also specifies that the Commission establish standards by which local franchising authorities may regulate basic cable service rates. In carrying out this mandate, the Commission stated that cable systems will be permitted to automatically pass through any readily identifiable increase in cost which is entirely attributable to the provision of basic service. The court ruled that the Commission exceeded its authority in establishing the cost pass through mechanism. The Commission is eliminating this provision from its rules.

4. The Cable Act also requires that cable operators provide to their subscribers upon request, by sale or lease, a lock box for restricting the viewing of programming which is obscene or indecent. The Commission interpreted this provision to require cable operators to provide lock boxes for only those channels over which they had editorial control. The court stated that the Commission had no basis in the statute or the legislative history upon which to limit the lock box requirement in this way. The Commission is deleting the suggestion that lock boxes need not be capable of blocking selected channels.

5. Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 603, the Commission considered all the alternatives presented in the *Notice*, comments in this proceeding, and the ruling by the court in *ACLU*. After full consideration of all aspects of these issues, the Commission is adopting revised rules consistent with the mandate of the Cable Act as interpreted by the court.

6. The final rules contained herein have been analyzed with respect to the Paperwork Reduction Act of 1980 and found to contain no new or modified forms, information collection and/or recordkeeping, labeling, disclosure or record retention requirements; and will not increase or decrease burden hours on the public.

47 CFR Part 97

[PR Docket No. 86-207; FCC 87-298]

Amateur Radio Service; Emission F8E on Frequency Band 0.35 Meters (1240 MHz) and Above)

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The petitioner believed that the wording of the rule amendment adopted in the Report and Order in this proceeding, which specified the spectrum where emission F8E could be transmitted, might confuse amateur operators. The FCC agreed that the wording of the rule lacked precision and ordered that it be clarified.

EFFECTIVE DATE: December 7, 1987.

ADDRESS: Federal Communications Commission, 1919 M Street NW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Maurice J. DePont, Federal Communications Commission, Washington, DC 20554, (202) 632-4964.

SUPPLEMENTARY INFORMATION:

Memorandum Opinion and Order

Adopted: September 10, 1987.
Released: September 25, 1987.
By the Commission:

1. On January 28, 1987, we adopted a Report and Order (2 FCC Rcd 803 (1987)) authorizing the transmission of emission F8E on all amateur service frequencies "0.35 meters and above." On March 13, 1987, David B. Popkin filed a petition for reconsideration in this proceeding, requesting an editorial change in the rule amended, Section 97.61(c). Popkin is concerned that the wording of the last sentence of the rule, "Emission F8E may be transmitted on all amateur frequencies 0.35 meters and above" is ambiguous as to whether "and above" means longer wavelengths or higher frequencies.

2. The issue is whether the wording might result in confusion among the amateur operators subject to the amateur service rules. Amateur service rule section 97.7 utilizes the term "meter band", expressed in wavelengths, as a means to simplify references to particular frequency bands in other sections in Part 97. Since a higher frequency has a shorter wavelength,[1] it would be more precise to state, ". . . on the 0.35 meter and shorter wavelength amateur service bands."

3. In view of the foregoing, it is ordered, pursuant to the authority contained in 47 U.S.C. 303(r), that Part 97 is amended as set forth in the Appendix below.

4. It is further ordered, pursuant to the authority contained in 47 U.S.C. 154(i), That the petition for reconsideration of David B. Popkin is granted insofar as it is consistent with this Memorandum Opinion and Order and is denied in all other respects.

5. It is further ordered, that the rule amendment shall become effective December 7, 1987.

6. It is further ordered, that this proceeding is terminated.

7. Information in this matter may be obtained by contacting Maurice J. DePont, Private Radio Bureau, Federal Communications Commission (202) 632-4964.

[1] Wavelength in meters is determined by dividing the approximate speed of light (300,000,000 meters per second) by the frequency in hertz.

BILLING CODE 6712-01-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 611 and 672

[Docket No. 61220-7033]

Foreign Fishing; Groundfish of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of inseason adjustment action.

SUMMARY: This action reapportions DAP (domestic annual processing) amounts to JVP (joint venture processing) based on an analysis of DAP needs for the remainder of 1987 by NMFS. This action is intended as a conservation and management measure that provides for full utilization of available groundfish resources off Alaska during 1987.

EFFECTIVE DATE: This notice is effective on October 2, 1987.

FOR FURTHER INFORMATION CONTACT: Janet E. Smoker, National Marine Fisheries Service, 907-586-7229.

SUPPLEMENTARY INFORMATION:

Background

The Regional Director has conducted several analysis of DAP needs during 1987 and has determined, based on these analyses and DAP catch to date, that certain DAP amounts are excess to DAP needs. The issue of how much pollock might be taken in DAP fisheries was reevaluated by the Council at its May 20–22, 1987, meeting and its September 1, 1987, conference call. The Council voted not to reapportion amounts of pollock in the Gulf of Alaska to JVP.

Reapportionment

To the GOA JVP

The Secretary of Commerce (Secretary) disagrees with the Council recommendation not to reapportion pollock to JVP in the Gulf of Alaska. The Secretary has considered the NMFS processor surveys, the DAP pollock catch as of September 19 (11,400 mt), and the likelihood that DAP fishermen would catch and sell 84,000 mt of pollock by the end of the year. He has determined that 16,500 mt of pollock is surplus to DAP needs and apportions that amount to JVP in the Western/Central Area. Should the Secretary's current assessment prove to overestimate the 1987 DAP fishery, he is authorized to reapportion to JVP later in the year any amounts of pollock he finds will not be harvested in the DAP fishery.

The Secretary also apportions amounts of other species unneeded by DAP for bycatch in the JVP pollock fisheries as indicated in Table 1.

TABLE 1.—1987 CURRENT AND REVISED TARGET QUOTA (TQ), DOMESTIC ANNUAL PROCESSING (DAP), JOINT VENTURE PROCESSING (JVP) AND RESERVE IN THE GULF OF ALASKA, IN METRIC TONS

Classification

This action is taken under the authority of 50 CFR 611.92, 611.93, and 672.20 and complies with Executive Order 12291.

The Assistant Administrator for Fisheries finds for good cause that it is impractical and contrary to the public interest to provide prior notice and comment. Immediate effectiveness of this notice is necessary to benefit fishermen who otherwise would have to forego substantial amounts of groundfish species if those amounts remained indefinitely in categories in which these species could not be used and would suffer substantial financial loss if a hiatus occurred in their ongoing fisheries. However, interested persons are invited to submit comments in writing to the address above for 15 days after the effective date of this notice.

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final notice of 1987 initial specifications for groundfish and reapportionment of reserves and domestic annual harvest (DAH).

SUMMARY: NOAA announces 1987 initial specifications and initial apportionments of total allowable catches (TACs) for each category of groundfish in the Bering Sea and Aleutian Islands (BSAI) Areas. The interim initial apportionments and a reserve apportionment were made January 9, 1987 (52 FR 785). Several reapportionments have been made-to-date: See 52 FR 18367, May 15; 52 FR 21958, June 10; 52 FR 24297, June 30; and 52 FR 29021, August 5, 1987. This action also apportions reserves and reapportions DAP (domestic annual processing) amounts to JVP (joint venture processing) and TALFF (total allowable level of foreign fishing), based on recommendations of the North Pacific Fishery Management Council (Council) following its May 20–22, 1987, meeting and its September 1, 1987, conference call. This action is intended as a conservation and management measure that provides for full utilization of available groundfish resources off Alaska during 1987.

EFFECTIVE DATE: This notice is effective on October 2, 1987.

FOR FURTHER INFORMATION CONTACT: Janet E. Smoker Resources Management Specialist, NMFS, 907–586–7229.

SUPPLEMENTARY INFORMATION:

Background

This action establishes 1987 TACs for each groundfish category and apportions available TACs among DAP, JVP, TALFF, and reserves. Procedures for establishing these values were reviewed in an interim notice published in the **Federal Register** on January 9, 1987 (52 FR 785). The interim notice also apportioned part of the BSAI reserve to DAP, JVP, and TALFF. Comments on the interim apportionments of TAC and reserve apportionments among DAP, JVP, and TALFF were requested until January 18, 1987.

One letter of comment was received that pertained to the proposed notice of 1987 initial specifications published on December 2, 1986 (51 FR 43397). The comment on the proposed notice pertained to 70,000 metric tons (mt) of rock sole proposed for a DAP rock sole fishery in the BSAI. It is summarized and responded to below. No comments were received on the January interim notice.

After considering the recommendations of the Council and comments received during the comment periods, the Secretary has approved initial TACs and their apportionments as shown in Table 1. Initial amounts in Table 1 for the BSAI are the same as those shown in the interim notice of January 9, 1987 (52 FR 785).

Reapportionment

The issue of how much pollock, Pacific cod, Greenland turbot and "other flatfish" might be taken in DAP fisheries in the BSAI was reevaluated by the Council at its May 20–22, 1987, meeting and its September 1, 1987, conference call. At the latter, the Council found that certain DAP amounts were excess to DAP needs and recommended that amounts of DAP be reapportioned to JVP. In addition, the Council recommended that the Regional Director reallocate amounts of groundfish to TALFF, taking into account views expressed by the Council during the meeting. The Regional Director finds that certain amounts of groundfish are surplus to the needs of domestic fisheries and are therefore apportioned to TALFF as shown in Table 2.

To the BSAI JVP

The Bering Sea subarea was closed to JVP directed fishing for pollock on June 6 and reopened on September 8 to take the remaining pollock JVP. The BSAI was closed to JVP fishing for yellowfin sole on June 29. These are the two principal JVP fisheries in the Bering Sea area and in 1987 about one hundred U.S. catcher boats participated in them. Only about forty U.S. boats have participated in BSAI joint ventures since June. In order to provide for late summer and fall joint venture operations, the Council recommended that 4,000 mt of Bering Sea pollock which is excess to the needs of DAP fisheries be reapportioned to JVP. Similarly, in the Aleutian Islands area, 50,000 mt of DAP pollock is reapportioned to JVP.

In the Aleutian Islands area, JVP fisheries are continuing to take Atka mackerel and pollock, but the current JVP for Pacific ocean perch (POP) is insufficient to provide necessary by catch for continued fishing. To allow continued JVP fishing in the Aleutian Islands subarea without the wastage of resource which would occur if POP were made a prohibited species, 150 mt of POP is apportioned to JVP from the non-specific reserve.

To the BSAI TALFF

The Council found that the current DAH amounts for Pacific cod and "other flatfish" are in excess of DAH needs for the remainder of the year. It also recommended that in view of their cooperation in various activities beneficial to the U.S. fishing industry in 1987 the Japanese longliners should receive an additional directed fishery tonnage of 6,000 mt of Pacific cod. The Japanese industry has also requested additional amounts of "other flatfish" and Pacific cod for their trawl fisheries in view of their good performance under the "industry-to-industry" cooperative agreement.

The following amounts are apportioned to TALFF: from DAP, 20,000 mt of Pacific cod; and from DAP and JVP, 22,560 mt of "other flatfish". The remaining DAP amount of Pacific cod (91,767 mt) and DAP and JVP amounts of "other flatfish" (17,043 mt and 71,972 mt, respectively) are adequate for those fisheries for the remainder of 1987. To provide bycatch, 20 mt of squid, 2 mt of

Bering Sea area POP, 1,369 mt of arrowtooth flounder and 750 mt of "other species", all amounts excess to DAH needs, are transferred to TALFF from the non-specific reserve.

These apportionments do not result in overfishing of any of the stocks, as the resulting TACs for each species are equal to or less than the original TACs.

Comments and Responses

One letter of comment was received which pertained to the proposed notice; it is summarized and responded to as follows:

Comment: The commentator questioned the appropriateness of permitting the development of a potential 70,000 mt DAP bottom trawl fishery for rock sole in an area that is a known habitat area for king crab, Tanner crab, and halibut. The commentator supported the Council's December 1986 action to recommend that the Secretary use discretionary authority to provide for an additional bycatch of crabs.

Response: The Secretary has approved the Council's recommended DAP apportionment for "other flatfish" of 23,103 mt. This apportionment included the entire amount (14,000 mt) requested by domestic processors for a rock sole fishery. NOAA notes that the commentator's concern about potential effects of bottom trawling on crab and halibut habitat has been addressed by the Council Advisory Panel By catch Subcommittee through reaching an agreement between groundfish fishermen and crab fishermen to allow development of the rock sole fishery if bycatches of king and Tanner crab remain within specific guidelines. That agreement, which was endorsed by the Council, recommended that the Secretary use the discretionary authority contained in Amendment 10 to allow continued fishing after the prohibited species catch (PSC) limits for *C. bairdi* Tanner crab and red king crab in zone 1 are reached. Specifically, for DAP vessels participating in the newly developing fishery for rock sole in Zone 1, the Secretary would allow fishing to continue until an additional catch of 10,000 *C. bairdi* Tanner crabs or 10,000 red king crabs had been taken. Amendment 10 has been approved by the Secretary. Regulations implementing Amendment 10 are at 52 FR 8592 (March 19, 1987) from February 8 to March 3, NMFS monitored the fishery in Zone 1 with the objective of allowing its development consistent with the intent of the Council to conserve king and Tanner crabs. NMFS observers estimated that only 4,573 *C. bairdi* Tanner crabs and 794 red king crabs were taken in the fishery.

Classification

This action is taken under the authority of 50 CFR 611.93(b) and 675.20 and complies with Executive Order 12291.

For the reserve and DAP reapportionment part of this notice, the Assistant Administrator for Fisheries finds for good cause that it is impractical and contrary to the public interest to provided prior notice and comment. Immediate effectiveness of this notice is necessary to benefit fishermen who otherwise would have to forego substantial amounts of groundfish species if those amounts remained indefinitely in categories in which these species could not be used. However, interested persons are invited to submit comments in writing to the address above for 15 days after the effective date of this notice.

BILLING CODE 3510-22

50 CFR Part 663

[Docket No. 70101-7001]

Pacific Coast Groundfish Fishery

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of fishing restrictions and request for comments.

SUMMARY: NOAA issues this notice modifying earlier restrictions to limit the levels of fishing for widow rockfish and trawl-caught sablefish taken in the groundfish fishery off the coasts of Washington, Oregon, and California in 1987, and seeks public comment on these actions. These actions are authorized under regulations implementing the Pacific Coast Groundfish Fishery Management Plan (FMP) and are necessary because biological stress to these stocks has been identified or is expected to occur if landings are not restricted. These actions are intended to further lower fishing rates, reduce or prevent biological stress while allowing for unavoidable incidental catches in other fisheries, and avoid or reduce the probability of a fishery closure before the end of the year. This action modifies the fishing restrictions previously imposed for these species.

DATES: New restrictions for trawl-caught sablefish are effective 0001 hours Pacific Daylight Time (PDT), October 2, 1987, until modified, superseded, or rescinded. Comments will be accepted through October 19, 1987.

ADDRESSES: Submit comments on these actions to Rolland A. Schmitten, Director, Northwest Region, National Marine Fisheries Service, 7600 Sand Point Way N.E., BIN C15700, Seattle, WA 98115; or E.C. Fullerton, Director, Southwest Region, 300 South Ferry Street, Terminal Island, CA 90731.

FOR FURTHER INFORMATION CONTACT: Rolland A. Schmitten at 206-526-6150, E.C. Fullerton at 213-514-6196, or the Pacific Fishery Management Council at 503-221-6352.

SUPPLEMENTARY INFORMATION: This action (1) modifies the fishing restrictions for trawl-caught sablefish imposed at the beginning of 1987 (52 FR 790, January 9, 1987; modified at 52 FR 11473, April 9, 1987); and (2) announces a change to the trip limit for widow rockfish that will be imposed when 95 percent of the optimum yield (OY) quota is reached.

The regulations implementing the FMP at 50 CFR Part 663 allow the Secretary of Commerce (Secretary) to reduce fishing levels if it is determined that continued fishing at current levels would cause biological stress to any species. The Pacific Fishery Management Council (Council) has endorsed the determination of its Groundfish Management Team that if landings of widow rockfish and sablefish are not further restricted, the likelihood of biological stress on those stocks is increased because current fishing mortality rates exceed the rates which would take the acceptable biological catch (ABC) of each species for the calendar year. The ABC for these species is equal to OY in 1987.

At its September 16–18, 1987, meeting, the Council reviewed the latest data presented by the Groundfish Management Team and developed management recommendations intended to further limit landings on trawl-caught sablefish and widow rockfish in 1987, thereby minimizing the likelihood and intensity of biological stress on these stocks, and reducing the probability of having to close fisheries for these species before the end of the year due to premature achievement of their OYs.

In its deliberations, the Council considered advice from its Groundfish Management Team, Scientific and Statistical Committee, the public, and a Groundfish Select Group created by the Council for the purpose of recommending methods of limiting landings with minimal disruption to the fishing industry. The Select Group included representatives from the fishing industry, the Council, and the Groundfish Management Team.

Widow Rockfish

Council Recommendation: In January 1987, a trip limit of 30,000 pounds of widow rockfish was imposed, limited to no more than one landing above 3,000 pounds per week. Landings of less than 3,000 pounds were not limited.

The most recent catch data indicate that 8,869 mt of widow rockfish have been landed through August 8, 1987. If landings are not curtailed further, the OY of 12,500 mt is expected to be reached in mid- to late November. Once the OY is reached, further landings of widow rockfish are prohibited. The Groundfish Management Team estimated that a 20 to 37 percent reduction in landings for the remainder of the year is needed to avoid reaching OY prematurely.

After considering the testimony of its advisory bodies and the public, the Council recommended that the fishery for widow rockfish be extended as long as possible during the year. The Council accepted the recommendation of its Groundfish Select Group that, when 95 percent of OY is reached, a trip limit of 5,000 pounds, limited to no more than one landing a week above 3,000 pounds, be imposed to reduce the probability of premature closure of the fishery. If this action does not sufficiently curtail landings, additional restrictions may be necessary, and if OY is reached, all further landings of widow rockfish will be prohibited until the end of the year. However, the 5,000-pound trip limit is intended to allow most incidental catches to be landed, while greatly reducing target fishing on this species.

Secretarial Action: The Secretary concurs with the Council's recommendation and announces that when 95 percent of the 12,500-mt OY for widow rockfish is projected to be reached, the weekly trip limit will be lowered from 30,000 pounds to 5,000 pounds per vessel per trip. All other provisions of the trip limit for widow rockfish announced at 52 FR 790 and modified at 52 FR 15727 (April 30, 1987), which changes the fishing week from Sunday-Saturday to Wednesday-Tuesday, will remain in effect. This reduction to the trip limit will be announced by a separate notice in the **Federal Register**.

Sablefish

Council Recommendation: In January 1987, the 12,000 mt OY for sablefish was allocated 52 percent (6,200 mt) for trawl gear and 48 percent (5,800 mt) for fixed (nontrawl) gear (52 FR 790, January 9, 1987). The purpose of the allocation provision was to slow the trawl catch of sablefish by minimizing targeted effort on sablefish, thus prolonging the trawl season and avoiding the waste of incidentally caught sablefish which must be discarded after the quota is reached. In contrast with the fixed gear (mostly pot and longline) fishery, which predominantly targets on sablefish with little bycatch, the trawl fishery catches much of its sablefish incidental to other operations.

The most recent catch data, provided by the Groundfish Management Team at the September Council meeting, projected that the trawl quota would be reached between November 2 and December 7 if landings were not lowered by 14 to 34 percent for the rest of the year. Thus, the Council recommended a trip limit on trawl-caught sablefish of 6,000 pounds, or 20 percent of all legal fish on board (including sablefish), whichever is greater, which is intended to lower trawl landings of sablefish by 15 to 20 percent.

In no event may more than 5,000 pounds (round weight) of trawl-caught sablefish smaller than 22 inches (total length) be on board.

Secretarial Action: The Secretary concurs with the Council's recommendation and announces the following restrictions for sablefish caught with trawl gear:

For trawl-caught sablefish no more than 6,000 pounds or 20 percent of all legal fish on board, including sablefish (round weights), whichever is greater, may be taken, retained, possessed or landed per vessel per fishing trip.

Note: Twenty percent of all legal fish on board including sablefish is equivalent to 25 percent of all legal fish on board other than sablefish, in round weights.

All other provisions set forth in the **Federal Register** that pertain to trawl-caught sablefish in 1987 (52 FR 790, January 9, 1987; 52 FR 11473, April 9, 1987), including the prohibition against landing more than 5,000 pounds of trawl-caught sablefish smaller than 22 inches, still apply as long as they are within this limit.

If necessary, the Council may recommend further adjustments to reduce sablefish landings in 1987 in order to avoid overfishing and to extend the landings of sablefish as long as possible throughout the year.

Other Fisheries

These limits apply to vessels of the United States, including those vessels delivering groundfish to foreign processors. Retention of these species by foreign fishing or processing vessels is limited by incidental percentage limits established under 50 CFR 611.70.

U.S. vessels operating under an experimental fishing permit issued under 50 CFR 663.10 also are subject to these restrictions unless otherwise provided in the permit.

Landings of groundfish in the pink shrimp, spot, and ridgeback prawn fisheries are governed by regulations at 50 CFR 663.28. If fishing for groundfish and pink shrimp, spot or ridgeback prawns in the same fishing trip, the groundfish restrictions in this notice apply.

VOL

Classification

The determination to impose these fishing restrictions is based on the most recent data available. The aggregate data upon which the determination is based are available for public inspection at the Office of the Director, Northwest Region (see **ADDRESSES**) during business hours until the end of the comment period.

These actions are taken under the authority of §§ 663.22 and 663.23, and are in compliance with Executive Order 12291. The actions are covered by the Regulatory Flexibility Analysis prepared for the authorizing regulations.

Section 663.23 states that the Secretary will publish a notice of any action reducing fishing levels in proposed form unless he determines that prior notice and public review are impracticable, unnecessary, or contrary to the public interest. If landings of trawl-caught sablefish are not immediately restricted, premature closure of the sablefish trawl fishery will result. Accordingly, further delay of these actions is impracticable and contrary to the public interest, and these actions are published in final form effective October 2, 1987.

The public has had the opportunity to comment on these management measures. The public participated in the Select Group, Groundfish Management Team, and Council meetings in August and September 1987 that generated the management actions endorsed by the Council and the Secretary. Further public comments will be accepted for 15 days after this notice is filed for publication in the **Federal Register**.

Proposed Rules

Federal Register
Vol. 52, No. 194
Wednesday, October 7, 1987

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 17

Financing of Commercial Sales of Agricultural Commodities

AGENCY: Foreign Agricultural Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would amend the regulations applicable to the financing of the sale and exportation of agricultural commodities pursuant to Title I of the Agricultural Trade Development and Assistance Act of 1954, as amended, "Pub. L. 480" (7 U.S.C. 1701 *et seq.*), appearing at Part 17 of Title 7 of the Code of Federal Regulations. The proposed rule would accommodate the financing of commodities moved under intermodal freight contracts. Financing of intermodal movements for Title I, Pub. L. 480 exports is deemed desirable because of the increased use of such movements for agricultural commodities and because such movements could result in lower overall program expenditures.

DATES: Comments on this proposed rule must be received by December 7, 1987, in order to be assured of consideration.

ADDRESS: Comments should be submitted to: Melvin E. Sims, General Sales Manager, Foreign Agricultural Service, Room 4073–South, U.S. Department of Agriculture, Washington, DC 20250.

FOR FURTHER INFORMATION CONTACT: Robert S. Simpson, Director, P.L. 480 Operations Division, Export Credits, Foreign Agricultural Service, U.S. Department of Agriculture, Washington, DC 20250, Telephone: (202) 447–3664.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established in accordance with Executive Order 12291 and Secretary's Memorandum No. 1512–1 and has been classified "not major." It has been determined that this rule will not result in an annual effect on the economy of $100 million or more; will not cause a major increase in costs to consumers, individual industries, Federal, State or local government agencies or geographic regions; and will not have an adverse effect on competition, employment, investment, productivity, innovation, or the ability of U.S. based enterprises to compete with foreign based enterprises in domestic or export markets.

It has been determined that this rule will not have a significant economic impact on a substantial number of small entities. In accordance with the Regulatory Flexibility Act, a copy of this rule has been submitted to the Chief Counsel, Office of Advocacy, U.S. Small Business Administration.

Record keeping requirements and information collection requirements contained in 7 CFR Part 17 have been assigned OMB Control No. 0551–0005.

I. Background

Section 102 of the Agricultural Trade Development and Assistance Act of 1954, as amended ("the Act"), authorizes the Commodity Credit Corporation (CCC) to finance the sale and exportation of agricultural commodities purchased by friendly countries under the authority of Title I of the Act.

The Title I, Pub. L. 480 regulations (7 CFR Part 17) were originally adopted with traditional bulk and break bulk ocean shipping concepts in mind. As a consequence, the regulations have, as a practical matter, precluded the movement of Title I commodities to foreign destinations under intermodal freight contracts. For example, under current regulations, commodity suppliers must submit on-board vessel bills of lading before they are entitled to receive payment for the sales of commodities. This requirement effectively excludes any intermodal shipments because, with intermodal shipments, the commodities are delivered to the custody of an ocean carrier at a point other than the port of export. Such delivery may be at a commodity supplier's plant or bridge-port location. The commodities are then moved to the port of export and to final destination under a single intermodal through export bill of lading.

In recognition of the increased commercial use of intermodal shipments, the successful experience gained in the use of intermodal shipments in the Title II, P.L. 480 donation program, and the possibility that the availability of the intermodal option could result in lower program costs, this Department published in the **Federal Register** on September 13, 1978, 43 FR 40872, an advance notice of proposed rule-making requesting suggestions for changes in the Title I regulations to accommodate a certain type of intermodal movement—i.e., minibridge movements. Comments were received and evaluated, but no further action was taken. On May 29, 1985, a meeting was held in the Department to solicit views from representatives of U.S. flag carriers, associations of U.S. commodity producers and exporters, and U.S. government agencies concerning the desirability of utilizing intermodal movements. Copies of comments received from the advance notice of proposed rule-making and a tape transcript of the above meeting are available for inspection at the address indicated in this preamble.

After considerable review and analysis, it has been determined that the Title I regulations should be amended to accommodate the movement of commodities under intermodal freight contracts because of the increased use of such movements for agricultural commodities and because such movements could result in lower overall program expenditures.

If every provision in the Title I regulations which had to be changed to incorporate the use of intermodal shipments were to be amended, this rule change would be quite extensive. In order to avoid such a rule change, it has been determined that the definition of a number of terms related to the transportation of commodities and used throughout the regulations would be broadened to make them applicable to intermodal shipments. Therefore, it is proposed that the definition of a number of terms in the regulations would be amended to state that terms such as "ocean bill of lading", "delivery", "load port", "vessel approval", "ocean freight" etc. would have specified intermodal interpretations when commodities are moved on an intermodal basis.

II. Changes in Definitions of Terms

The key changes to the regulations involve revising the definitions of "delivery" of commodities and "ocean

VOL
52
ISS
194
OC
7
1987
UMI

bill of lading". The current definition of delivery relates specifically to the transfer of custody and right of possession of the commodity to the importer at U.S. ports or Canadian transshipment points. It is proposed that the definition of "delivery" be expanded to refer to "designated U.S. locations" which would include ports, a supplier's plant, a bridge-port or any location as delineated in the importer's commodity and freight invitation for bids (IFB). The new definition would also state that delivery to an intermodal carrier would be deemed to occur as of the issuance date of the intermodal through export bill of lading. The definition of "ocean bill of lading" would be expanded to include intermodal through export bills of lading. Thus, commodity suppliers would be entitled to receive financing, in the case of intermodal movements, upon receipt of an intermodal through export bill of lading from the ocean carrier.

The Department recognizes that, prior to implementation of this rule change, the Title I, Pub. L. 480 government-to-government agreement format must be changed to complement this new shipment option. Currently, these agreements define delivery as occurring on the on-board vessel date. This definition of delivery in country agreements is significant in that it determines the time period of an importing country's usual marketing, and export limitation obligations, and also determines the time at which interest begins to accrue on the importing country's repayment obligation.

III. IFB Provisions for Intermodal Offers

A. Requirement for Intermodal Offers

It is proposed to amend § 17.6(b)(3) of the regulations to provide that the General Sales Manager can require the importing country to solicit offers which would include intermodal shipments when a purchase authorization permits contracting on an intermodal basis. Without such a requirement, it is believed that some importing countries may be reluctant to utilize the option simply because of its unfamiliarity notwithstanding the potential for cost-savings. On the other hand, there may be valid reasons why an importing country opposes shipping on an intermodal basis, e.g., where container handling facilities are not available in the country of destination. In such circumstances, the importing country would be free to contract solely on traditional shipment terms.

B. Restricted Intermodal Offers

Given the large number of offers that may be received for different grades and types of commodities or products, different coastal ranges, delivery periods, and contract terms, there is concern that it would not be advisable to further complicate the Title I tendering process by permitting intermodal offers at unlimited number of locations. It has been suggested, for example, that intermodal offers could be restricted to railroad locations or bridge-ports thereby excluding deliveries at supplier's plants or elsewhere.

This issue does entail serious operational concerns. The degree to which it may be a problem must, however, await actual experience with the new procedure. Should it be necessary, limitations on intermodal delivery locations could be set forth in the applicable purchase authorization. IFB's must comply with any limitations established in a purchase authorization.

Also, for perishable commodities, the intermodal option may raise valid concerns on the part of importing countries relating to the degree of risk of infestation and timeliness of delivery for the relatively large tonnages normally shipped in the Title I program. Previous comments have indicated the need for re-inspection of intermodal shipments after the railcar or truck leg of shipment or even after containers are stuffed at a supplier's plant because of the extra time during which buyers have risk of loss. Further, under traditional f.a.s. exports, suppliers can spread deliveries of packaged commodities to dockside warehouses over a period of time to accumulate relatively large quantities, e.g. 20–30,000 tons at port. This results in the likelihood that all Title I cargo will be placed on the ocean vessel when it arrives, which is significant considering the large quantities of commodities moving under Title I. The risk of cargo being left behind would be appear to be greater in intermodal movements of this magnitude if a large number of ocean containers, each carrying a relatively small amount of cargo, are involved. Examples of the types of problems that this may entail are described below.

The Department is therefore proposing to authorize the use of intermodal movement in the Title I program but will control its actual use on a procurement-by-procurement basis through the purchase authorizations and the IFB's.

C. Special IFB Provisions for Intermodal Shipments

Although not a part of proposed regulations, it is believed that the following discussion of how the Title I commodity and freight tendering process could be affected by the intermodal option may aid interested parties in formulating comments.

In traditional break bulk shipments, the contract contains the delivery dates at port, and the arrival of the vessel usually creates the obligation of the commodity supplier to make bagged or drummed cargo available for loading at the vessel's call, or at a minimum amount per day per available, workable hatch. For intermodal deliveries, a commodity supplier would be required to deliver the commodities at the intermodal point during a specified period. To prevent commodity suppliers from delaying deliveries until the end of such a delivery period, or bunching deliveries in such a way that the intermodal carrier cannot efficiently deliver the cargo to port, special IFB provisions may be approved which contain a financial disincentive for such actions.

Also, IFB's may contain provisions that specify the carrier's responsibility for detention, demurrage, or carrying charges if the carrier is unable to promptly accept for shipment all cargo arriving at U.S. ports.

Finally, given past problems in the Title II, Pub. L. 480 program with ocean container deliveries being spread over extended periods of time—a practice that could be exacerbated by the increasing practice of relaying containers through foreign transshipment points—the buyer of relatively large quantities of Title I commodities may be protected, for example, by stipulating in the freight contract specific delivery periods that carriers must meet for all containers shipped intermodally.

Further comments focusing on these specific concerns would be welcome.

IV. Release of Bill of Lading

Another proposed change would affect when the supplier of ocean transportation must release the bill of lading to the commodity supplier. A revision of § 17.14(a)(3) would state that through export bills of lading would be issued at the time of delivery of the commodity to the locations designated in the Form 359, "Declaration of Sale", which constitutes the Department's written approval of the sale.

V. Ocean Freight Differential

With respect to ocean freight differential on intermodal shipments, the Department would compute and pay ocean freight differential on the same basis as under current procedures, without distinguishing the type of

movement, i.e., the entire intermodal rate will be deemed to be an ocean freight rate. (It is the Department's intention to separately designate ocean freight differentials paid on intermodal movements when reporting cargo preference information to the Maritime Administration.)

Computing OFD on this basis could have the effect of transferring some internal transport costs from commodity prices to ocean freight rates. Since the Department extends credit to the importing country for commodities, but pays OFD without an obligation from the importing country to reimburse the Department, it may appear that payment of OFD on the basis of an intermodal rate would be disadvantageous to the Department. However, the Department believes that the potential reduction in U.S. flag rates that can be realized by permitting increased competition will reduce overall OFD expenditures substantially. Thus, both commodity financing and OFD expenditures should decline per ton of commodity shipped.

List of Subjects in 7 CFR Part 17

Agricultural commodities, Exports, Finance, Maritime carriers.

Proposed Rule

Accordingly, it is proposed that 7 CFR Part 17, Subpart A, be amended as follows:

PART 17—SALES OF AGRICULTURAL COMMODITIES MADE AVAILABLE UNDER TITLE I OF THE AGRICULTURAL TRADE DEVELOPMENT AND ASSISTANCE ACT OF 1954 AS AMENDED

1. The authority citation for Part 17 reads as follows:

Authority: Secs. 101–115, Pub. L. 480, 83rd Cong., as amended, 68 Stat. 455 (7 U.S.C. 1701, *et seq.*); E.O. 12220, 45 FR 44245.

2. Section 17.1(a) is amended by adding a new sentence at the end thereof to read as follows:

§ 17.1 General.

(a) * * * Participants and potential suppliers are cautioned to carefully read the definitional section of this subpart since certain terms have special meanings applicable to intermodal shipments.

* * * * *

3. In § 17.2(b), the definition of "Ocean bill of lading" and "Ocean transportation" are revised, and new definitional terms "Intermodal shipment," "Load port," "Ocean freight rate," "Through export bill of lading" and "Vessel approval" are added, in appropriate alphabetical order, and in paragraph (c), the definition of "Delivery" is revised as follows:

§ 17.2 Definition of terms.

* * * * *

(b) *Terms relating to ocean transportation.*

* * * * *

Intermodal shipment means a shipment whereby commodities are delivered into the care and custody of the ocean carrier at a location other than the port at which such commodities are loaded into the carrier's ocean going vessel.

Load port or *Loading port* shall mean the location, including inland point, designated for delivery of the commodities to an ocean carrier in the Declaration of Sale Form 359.

* * * * *

Ocean bill of lading means

(1) *In the case of cargo carried on a vessel in other than LASH or Seabee barge:* An "on-board" bill of lading, or a bill of lading with an "on-board" endorsement, which is dated and signed or initialed on behalf of the carrier; or an intermodal through export bill of lading; or

(2) *In the case of cargo carried in a LASH or Seabee barge:* (i) For the purpose of financing the commodity price, an "on-board" barge bill of lading showing the date the commodity was loaded on board barges, which is dated and signed or initialed on behalf of the carrier, or a bill of lading or a LASH or Seabee barge bill of lading with an "on-board barge" endorsement which is dated and signed or initialed on behalf of the carrier.

(ii) For the purpose of financing ocean freight or ocean freight differential or any portion thereof:

(A) an "on-board" bill of lading which is dated and signed or initialed on behalf of the carrier indicating that the barge containing the cargo was placed aboard the vessel named in the Form CCC–106 not later than eight (8) running days after the latest LASH or Seabee barge loading date (contract layday) specified in the Form CCC–106, or

(B) A bill of lading or a LASH or Seabee barge bill of lading with an "on-board ocean vessel" endorsement which is dated and signed or initialed on behalf of the carrier indicating that the barge containing the cargo was placed aboard the vessel named in the Form CCC–106 not later than eight (8) running days after the latest LASH or Seabee barge loading date (contract layday) specified in the Form CCC–106.

(3) Documentary requirements for a copy of an "ocean bill of lading" refer to a non-negotiable copy thereof.

Ocean freight rate is the freight rate charged by an ocean carrier for the carriage of commodities and shall be deemed to include the rate charged for an intermodal shipment.

Ocean transportation means and is interchangeable with the term "ocean freight", and shall be deemed to include transportation from intermodal delivery point to a foreign destination.

* * * * *

Through export bill of lading means an intermodal or other bill of lading that constitutes an ocean carrier's obligation to deliver cargo from a designated point in the United States to a designated foreign destination.

Vessel approval is the approval by CCC of the vessel or vessels to carry the commodities and shall be deemed to include approval of intermodal shipments.

(c) *Other terms.*

* * * * *

Delivery means the transfer to or, for the account of, an importer of custody and right of possession of the commodity at U.S. ports or other designated U.S. locations, or at Canadian transshipment points, in accordance with the delivery terms of the contract and purchase authorization. For purposes of financing, delivery shall be deemed to occur as of the on-board date shown on the ocean bill of lading, or in the case of an intermodal shipment, as of the issuance date on the intermodal through export bill of lading.

* * * * *

4. Section 17.6(b)(3)(vii) is added to read as follows:

§ 17.6 Contracts between commodity suppliers and importers.

* * * * *

(b) * * *

(3) * * *

(vii) Whenever the purchase authorization specifies that commodities may be delivered on an intermodal hasis, the General Sales Manager may require that the IFB invite offers for intermodal shipments in addition to any other terms of delivery.

* * * * *

5. In § 17.14, paragraph (a)(3) is revised to read as follows:

§ 17.14 Ocean transportation.

(a) * * *

(3) The supplier of ocean transportation shall release copies of the ocean bills of lading to the supplier of the commodity promptly upon completion of loading of the vessel, or in the case of intermodal shipments, upon receipt of the commodity at the location

VOL 52 ISS 194 OC 7 1987 UMI

designated in the Declaration of Sale Form CCC–359 or Form FAS–359 and completion of any inspection required by these regulations or the Purchase Authorization.

* * * * *

Signed at Washington, DC, on June 10, 1987.

Melvin E. Sims,

General Sales Manager.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 87–ACE–11]

Proposed Designation of Transition Area; Grinnell, IA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This Notice proposes to designate a 700-foot transition area at Grinnell, Iowa, to provide controlled airspace for aircraft executing a new instrument approach procedure to the Grinnell, Iowa Airport, utilizing the Newton, Iowa VORTAC as a navigational aid. This proposed action will change the airport status from VFR to IFR.

DATES: Comments must be received on or before November 9, 1987.

ADDRESSES: Send comments on the proposal to: Federal Aviation Administration, Manager, Traffic Management and Airspace Branch, Air Traffic Division, ACE–540, 601 East 12th Street, Kansas City, Missouri 64106. Telephone (816) 374–3408.

The official docket may be examined at the Office of the Regional Counsel, Central Region, Federal Aviation Administration, Room 1558, 601 East 12th Street, Kansas City, Missouri.

An informal docket may be examined at the Office of the Manager, Traffic Management and Airspace Branch, Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Lewis G. Earp, Airspace Specialist, Traffic Management and Airspace Branch, Air Traffic Division, ACE–540, FAA, Central Region, 601 East 12th Street, Kansas City, Missouri 64106, Telephone (816) 374–3408.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number, and be submitted in duplicate to the Traffic Management and Airspace Branch, Air Traffic Division, Federal Aviation Administration, 601 East 12th Street, Kansas City, Missouri 64106. All communications received on or before the closing date for comments will be considered before action is taken on the proposed amendment. The proposal contained in this Notice may be changed in light of the comments received. All comments received will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this NPRM by submitting a request to the Federal Aviation Administration, Traffic Management and Airspace Branch, 601 East 12th Street, Kansas City, Missouri 64106, or by calling (816) 374–3408.

Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for further NPRMS should also request a copy of Advisory Circular No. 11–2A which describes the application procedure.

Discussion

The FAA is considering an amendment to Subpart G, § 71.181 of the Federal Aviation Regulations (14 CFR 71.181), by designating a 700-foot transition area at Grinnell, Iowa. To enhance airport usage, a new instrument approach procedure is being developed for the Grinnell, Iowa Airport, utilizing the Newton VORTAC as a navigational aid. This navigational aid will provide new navigational guidance for aircraft utilizing the airport. The establishment of a new instrument approach procedure, based on this navigational aid, entails designation of a transition area at Grinnell, Iowa, at and above 700 feet above ground level within which aircraft are provided air traffic control service. Transition areas are designed to contain IFR operations and controlled airspace during portions of the terminal operation and while transiting between the terminal and enroute environment. The intended effect of this action is to ensure segregation of aircraft using the approach procedure under Instrument Flight Rules (IFR), and other aircraft operating under Visual Flight Rules (VFR). This action will change the airport status from VFR to IFR. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6C, dated January 2, 1987.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition areas.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration (FAA) proposes to amend Part 71 of the FAR (14 CFR Part 71) as follows:

PART 71—[AMENDED]

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

2. By amending § 71.181 as follows:

Grinnell, IA [New]

That airspace extending upward from 700 ft. above the surface within a 5-mile radius of the Grinnell Airport (Lat. 41°42'18" N., Long. 92°43'45" W°); and within 2.5 miles each side of the 105° radial from the Newton VORTAC, extending from the 5-mile radius area to 26 miles east of the VORTAC.

Issued in Kansas City, Missouri on September 23, 1987.

Clarence E. Newbern,

Assistant Manager, Air Traffic Division.

BILLING CODE 4910–13–M

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 240

[Release No. 34–24976; File No. S7–33–87]

Acquisitions of Substantial Amounts of Securities and Related Activities Undertaken During and Following a Tender Offer for Those Securities.

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rules.

SUMMARY: The Securities and Exchange Commission (the "Commission") is publishing for comment proposed rules that would govern certain acquisitions

of securities undertaken during and shortly after a conventional tender offer for securities of the same class and related activities. The proposed rules would require that all purchases, offers to purchase, arrangements or understandings to purchase and solicitations of offers to sell securities undertaken during and shortly after a tender offer that would increase any person's ownership of the class of securities subject to the tender offer by 10 percent or more of the class be made in compliance with the statutory provisions and rules applicable to tender offers. Exceptions would be provided for purchases of blocks which had been reported to the Commission for one year; purchases from the issuer; purchases pursuant to a preexisting written agreement; issuer transactions approved by securityholder vote, including recapitalizations and reorganizations; and purchases in connection with mergers approved by the issuer's securityholders. The provisions would apply to all persons from the formal commencement of a tender offer until 10 business days after the scheduled expiration date. A proposed rule also would subject a bidder to the same requirements from the time it commenced a tender offer by public announcement until it either formally commenced a tender offer by some other means or 30 business days after it made a subsequent public announcement stating that it had determined not to continue with the tender offer.

DATE: Comments should be received on or before December 7, 1987.

ADDRESS: Comments should be submitted in triplicate to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Comment letters should refer to File No. S7–33–87. All comment letters received will be available for public inspection and copying in the Commission's Public Reference Room, 450 Fifth Street NW., Washington, DC 20549.

FOR FURTHER INFORMATION CONTACT: David A. Sirignano (202) 272–3097, Jonathan E. Gottlieb (202) 272–2607, Office of Tender Offers, Division of Corporation Finance, or Larry E. Bergmann (202) 272–2874, Division of Market Regulation, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549.

SUPPLEMENTARY INFORMATION: The Commission is publishing for comment proposed Rules 13e–2 and 14d–11.

I. Executive Summary

The Commission is proposing rules that expressly would include within the scope of its tender offer regulations acquisitions of substantial amounts of securities and related activity undertaken during and for a limited period following the scheduled expiration of a tender offer for that class of securities. The proposal follows a July 31, 1986 Concept Release in which the Commission sought public comment on whether the Williams Act amendments to the Securities Exchange Act of 1934 ("Exchange Act"),[1] Governing corporate tender offers and other major acquisitions of securities, should apply to acquisitions of a substantial percentage of a target's securities during and immediately after a tender offer for those securities.[2] The Commission sought comment on the need to amend the tender offer rules to ensure that the Williams Act protections apply in those circumstances.

As noted in the Concept Release, commencement of a tender offer often results in a concentration of blocks of stock among market professionals and others. Issuers, bidders and others have acquired control or substantial amounts of securities by purchasing stock from such block holders without complying with the Williams Act and rules applicable to tender offers. Securityholders of the target company have thereby been deprived of adequate information deemed necessary under such circumstances and the minimum time needed to act upon such information, and denied withdrawal and proration rights and even the opportunity to participate in the acquisition program. In the absence of Commission rulemaking, the courts that have addressed the issue have been unwilling to apply the procedural and substantive protections of the Williams Act and rules to such acquisition programs.[3]

The Commission solicited comment on a variety of issues relating to this topic, including: (1) Whether securityholders have adequate time and information upon which to act during these acquisition programs; (2) whether some groups of securityholders are unfairly disadvantaged in these transactions because of the speed with which the transactions occur, the lack of adequate information concerning the transaction, or the inability to participate on the same basis as other securityholders; and (3) whether the possibility of an unregulated competing acquisition by the target or a third party deters or disadvantages the initial bidder or encourages initial takeover attempts to proceed other than by way of conventional tender offers.

In the Concept Release, the Commission also outlined one possible approach to applying the protections of the Williams Act to substantial acquisitions undertaken during or shortly after tender offers. Under that approach, the tender offer rules would be amended to provide that substantial acquisitions of a target company's securities by any person after commencement of a tender offer for such securities, and until the expiration of a specified period after termination of the tender offer, would be deemed a "tender offer" required to be made in compliance with the tender offer rules.[4]

Many of the commentators responding to the Concept Release on this issue favored applying Williams Act protections to accumulations of substantial amounts of securities during or shortly after a tender offer.[5] Members

---

[1] Pub. L. No. 91–567, 84 Stat. 1497, 15 U.S.C. 78m(d) and 78m(e), 78n(d)–78n(f).

[2] *See* Release No. 34–23486 (July 31, 1986) [51 FR 28096]. The Concept Release also sought comment as to whether the federal government should regulate "poison pill" plans and whether the Commission should adopt a self-governance exception to tender offer rules. The Commission does not believe that federal regulation of poison pills is appropriate at this time. *See* Testimony of David S. Ruder, Chairman of the Securities and Exchange Commission, Before the Subscommittee on Telecommunications and Finance of the House Committee on Energy and Commerce (September 17, 1987). With regard to the self governance exception to tender offer rules, the Commission is seeking comment on a self-governance approach to the rules proposed herein.

[3] *See Hanson Trust plc* v. *SCM Corp.*, 774 F.2d 47 (2d Cir. 1985) and *SEC* v. *Carter Hawley Hale Stores, Inc.*, 760 F.2d 945 (9th Cir. 1985).

[4] The Commission suggested 10 percent as a possible acquisition threshold under this approach.

[5] Twenty-three commentators responding to the Concept Release addressed this topic. Of the 23, 13 favored application of the Williams Act to substantial acquisitions of securities during or shortly after a tender offer for the class of securities. Two commentators, including the American Bar Association, Section of Corporation, Banking and Business Law, Subcommittee on Proxy Solicitations and Tender Offers, expressed concern regarding the impact of such acquisitions on shareholders, but suggested approaches different from that suggested by the Commission. Two other commentators expressed concern but did not take a specific position. The remaining six commentators, including the United States Department of Justice, Antitrust Division, opposed application of the Williams Act to such acquisitions.

Suggestions regarding the length of a "cooling off" period following termination of a tender offer, during which substantial acquisitions could only take place by tender offer, ranged from 10 days to six months. Suggestions regarding the appropriate level of purchases during the restricted period to which such a rule would apply ranged from a low of two percent of the outstanding class of securities once a purchaser owns 10 percent, to a high of 20 percent regardless of the purchaser's previous

Continued

of Congress also have found a need for Williams Act protections in such situations. Bills have been introduced in Congress that would amend the Exchange Act to prohibit a bidder from terminating a tender offer and immediately acquiring securities of the same class.[6] Since the Concept Release was issued, there have been additional incidents in which parties to a takeover contest and other persons have taken advantage of the market dynamics put into play when a conventional tender offer is commenced, by "sweeping the street" during and immediately after such a tender offer.[7] The Commission believes that such practices will continue and may become more common.

Since market sweeps pose the same investor protection concerns that Congress sought to curb when it enacted the Williams Act, the Commission has viewed such activity as a form of unconventional tender offer subject to the same strictures as other tender offers under the Williams Act and the regulations promulgated thereunder. Yet, two courts have found that the Commission's rules, as currently promulgated,[8] did not afford securityholders the protections of the Williams Act regulatory scheme in the context of substantial acquisitions that occurred during or immediately after termination of a tender offer. Accordingly, the Commission is proposing Rules 13e–2 and 14d–11 to subject these acquisitions and related market activity during or shortly after a tender offer for the same class of securities to the statutory provisions and regulations applicable to all tender offers.

Proposed Rules 13e–2 and 14d–11(a) would require, with certain exceptions compliance with the Williams Act and rules applicable to tender offers from dissemination and publication of a tender offer until the expiration of 10 business days following its scheduled expiration (including any extensions), by any person that seeks to increase its beneficial ownership of the class of securities subject to the tender offer by 10 percent or more of the class or who solicits offers to sell those securities that would increase any person's beneficial ownership by 10 percent of the class or more. Proposed Rule 14d–11(b) would further require, with certain exceptions, that a bidder's acquisition activities with respect to 10 percent or more of the class be conducted in compliance with the Williams Act and rules thereunder from commencement of a tender offer by public announcement until dissemination and publication of the offer or the expiration of 30 business days following withdrawal of the announcement. The proposed rules would provide exceptions for a purchase of a block of securities where the beneficial ownership of the securities had been reported for at least one year; purchases from the issuer; purchases pursuant to a preexisting and binding written agreement; purchases by the issuer pursuant to specific securityholder approval; and purchases in connection with a merger or consolidation of the issuer that had previously been approved by the issuer's securityholders.

II. Discussion

A. Background

When a tender offer is pending, has just expired or has just been terminated, purchases of substantial amounts of securities can have the same effect and present the same investor protection issues as the initial tender offer itself. Accordingly proposed Rules 13e–2 and 14d–11 are intended to insure that investors confronted with the same pressured investment decision engendered by a conventional tender offer are afforded the same protections.

After the bidder or the issuer commences a tender offer, the market reaction is swift and profound. The price of the stock usually jumps to reflect the value of the bid and may rise above that price in anticipation of a possible increase in the bid or a higher competing offer. While many securityholder tender their shares, others sell their holdings to take immediate advantage of the increase in the stock price and to avoid the risks of proration or failure of the bid. Speed is essential since an effective defensive measure or other development may prevent successful completion of the tender offer; in that event, the stock price usually drops immediately and in many cases dramatically.

While some securityholders may sell to realize an immediate profit, others—usually market professionals—buy large amounts of stock in order to secure the higher premium. Once a substantial portion of the class of securities becomes concentrated among a relatively small number of market professionals and others, a person can dramatically increase its ownership with extraordinary speed and ease by acquiring the securities from such holders. The practice of purchasing a sizeable position in a security during or shortly after a tender offer through a series of coordinated, often simultaneous, purchases from holders of recently-acquired blocks of stock is known as a "market sweep." Through a market sweep, a person can quickly obtain control, or at least a blocking position to deter competing bids, while avoiding the competitive risks and financial costs of a formal tender offer.

Bidders, targets and third parties alike can engage in market sweeps. In some instances, bidders have terminated their tender offers prior to the scheduled expiration data and purchased substantial amounts of the same class of securities within hours or even minutes of such termination.[9] Such purchases are made from a relatively small number of securityholders without any of the safeguards of the Williams Act. In such cases, the tender offer process is a vehicle for consolidation of stock distribution, which enables a bidder to purchase the securities eventually without compliance with the Williams Act. The bidder buys securities from a few persons, avoiding the all holders

holdings. The letters of comment, as well as a copy of the summary of the comment letters prepared by the staff, are available for public inspection and copying at the Commission's Public Reference Room (see File No. S7–18–86).

[6] *See* S. 1324, Corporate Takeover and Insider Abuse Reform Act, section 9(a); H.R. 2172, Tender Offer Reform Act of 1987, Section 11; H.R. 2668, Securities Trading Reform Act of 1987, section 105. The proposed statutory amendments are narrower in scope than the rule proposed today, as they apply only to a bidder's termination of its bid. These bills as well as others contain additional provisions that would require all acquisitions above a certain threshold of ownership to proceed by way of conventional tender offer. While these provisions would address the concerns of the proposed rules, they would go far beyond regulating these unconventional tender offers. These bills essentially would alter the thrust of the Williams Act to regulation of transfers of control, regardless of whether a tender offer, conventional or unconventional, is involved. *See, e.g.*, S. 1323, Tender Offer Disclosure and Fairness Act of 1987, section 7(b); S. 1324, *supra*, section 9(a); H.R. 2102, *supra*, section 13. *See also* S. 227, Tender Offer Reform Act of 1987, section 4(a).

[7] For example, in 1986 Campeau Corporation purchased 48 percent of Allied Stores Corporation's stock within minutes after terminating its tender offer for that company, thereby defeating a friendly bid for the company by a third party. In early 1987, Dixons Group plc purchased 60 percent of the subject securities in a single transaction on the day following the expiration of its tender offer for Cyclops Corporation, thereby defeating a competing bid.

[8] *See Hanson Trust, supra*, 774 F.2d at 60 ("Neither the Act nor any SEC rule promulgated thereunder prohibits a former tender offeror from purchasing stock of a target through privately negotiated transactions immediately after a tender offer has been terminated. * * * We believe it would be unwise for courts judicially to usurp that is a legislative or regulatory function by substituting our judgment for that of Congress or the SEC."); *Carter Hawley Hale Stores, supra*, 760 F.2d at 949 ("The regulations do not specify when a repurchase by an issuer amounts to a tender offer governed by Rule 13e–4 rather than 13–1.").

[9] See, e.g., *Hanson Trust*, supra. 770 F.2d 47.

rule (thus alleviating the proration risk of those who sell). The bidder is able to buy immediately, without holding its offer open for the minimum offering period. Securityholders outside this small group of smellers (including securityholders who have tendered into the bid) are denied their proration right and the right to participate assured by the all holders rule. Those whose securities are purchased likewise are compelled to forego informational, best price and withdrawal rights.

In other instances, bidders have made purchases shortly after the scheduled expiration of the offer.[10] Even where tendered shares are purchased, this device deprives tendering securityholders of the right to the best price paid to other securityholders and the right to withdraw their shares in order to sell at the better price.

The potential for abuse may be even greater. Certain securityholders may withhold tendering to avoid prorationing risks and to obtain a higher price outside the offer; where these securityholders hold an amount of stock material to the success of the bid and can count on immediate acquisition by the bidder following expiration of the offer, they can compel an acquiror to buy outside the terms of the conventional bid. If the bidder fails to meet the minimum share condition because of the withholding of shares, the subsequent purchase could be effected without any of the tendering securityholders' shares being bought at all.

Targets of tender offers also have engaged in market sweeps to defeat hostile bids. In one case, while a bidder's tender offer was pending, the target publicly announced a defensive program that included its intention to purchase significant amounts of securities.[11] The terms of the announcement placed the same pressure on securityholders to sell as the tender offer, since securityholders recognized that the defensive program could defeat the bid; that the market price, which had been raised to reflect the premium offered in the tender offer, could fall to prebid levels; and that to obtain a higher price, they had to sell immediately into the market while it was still supported by the target's massive purchases. The pressure was all the greater because the target, avoiding the proration requirements of the Williams Act, could buy on a first-come, first-serve basis and could buy immediately without complying with the minimum offering period. Those selling shares to the target did so without the information required by the Williams Act and without best price protection or withdrawal rights.

The potential for a market sweep is particularly high in the case of competing tender offers. The bidders, target and securityholders must constantly be wary that one of the bidders will abruptly terminate its offer and quickly obtain control in the market, thereby circumventing the tender offer process. A bidder may be prompted to commence a preemptive market sweep in order to prevent competing bidders or the issuer from doing so. Under such circumstances, securityholders who have tendered into one of the offers, rather than selling into the market, lose an opportunity to obtain the premium.

Market sweeps also can be conducted by third parties who have not commenced a tender offer or even disclosed their interest in the target.[12] Such an acquisition has the same effect and poses the same investor protection concerns as market sweeps conducted by issuers and bidders.

Market sweeps are fostered by brokers, dealers and other market professionals assembling blocks of stock, which they then market to bidders, targets and third parties. By soliciting a number of clients or substantial shareholders they can assemble a sufficiently large block of stock which could frustrate a minimum share condition of a tender offer or otherwise affect the success of an offer. Accordingly, they may leave the bidder with no choice but to deal with them.[13] This practice can create tremendous pressure on bidders to terminate their offers in order to purchase the block from the brokers or dealers before the block is sold to the target or another party.

These rapid accumulations or attempts to accumulate a substantial percentage of securities during, or shortly after termination of, a tender offer, but outside the tender offer process, create the same pressures on, and unfair treatment of, shareholders that the Williams Act was adopted to prevent. These acquisition programs differ from a conventional tender offer in purpose and effect only by the absence of the procedures—the dissemination of required information, a minimum offering period to consider the information, and equal treatment of shareholders under the proration, best price and all holders rules—that the Williams Act and related rules mandate for the protection of investors.

The term "tender offer" is not defined by the Williams Act or Commission rules; Congress left to the Commission and the courts the flexibility to define the term in light of ever-evolving tender offer practices.[14] The Commission consistently has interpreted the term to go beyond the conventional tender offer to include acquisition programs that present the type of abuses that Congress intended to eliminate.[15]

To assist in the determination whether certain substantial purchases constitute tender offers, the Commission has suggested, and the Courts have employed, an eight-factor test.[16] The

---

[10] For example, in 1987, Dixons Group plc acquired control of Cyclops Corporation by making purchases within two days after the scheduled expiration of its tender offer. In 1986, Amalgamated Sugar Company acquired sufficient additional shares to give it control of NL Industries, Inc. by making purchases the day after the scheduled expiration of its tender offer.

[11] *See Carter Hawley Hale Stores, supra,* 760 F.2d 945.

[12] For example, on September 8, 1987, a group led by T. Boone Pickens commenced a tender offer for 28 million shares of Newmont Mining Corporation ("Newmont") for $95 per share in cash. On September 21, 1987, Newmont announced a restructuring plan that would result in shareholders receiving a dividend of $33 per share. On the same date, Consolidated Gold Fields PLC ("CGF") announced that it intended to increase its holdings of Newmont stock from 26 percent to just under 50 percent through negotiated and open market purchases. CGF purchased 191,000 shares on September 21, and 15.6 million shares on September 22 mostly through open market purchases at prices ranging from $93 to $99 per share. As of September 22, CGF held 49.67 percent of the outstanding shares of Newmont. As of the date of this release, however, the purchases are the subject of litigation.

In July 1987, Paul Bilzerian attempted to purchase 41 percent of the shares of Pay 'N' Pak Stores, Inc. in one day during a tender offer by a group that included company management. Bilzerian's purchases were cancelled by Morgan Stanley & Company, Inc., however, because it believed that 'the trade raised significant legal questions under the tender offer rules." *The Wall Street Journal,* July 10, 1987, at 2 (Eastern ed.).

[14] *Smallwood v. Pearl Brewing Co.,* 489 F.2d. 579, 598 (5th Cir.), *cert. denied,* 419 U.S. 873 (1974).

[15] Exchange Act Release No. 16385 (Nov. 29, 1979) [44 FR 70349. *See also* SEC briefs filed in *Carter Hawley Hale Stores, supra,* 760 F.2d 945; *Brascan Ltd., v. Edper Equities, Ltd,* 477 F. Supp. 773 (S.D.N.Y. 1979), *Wellman v. Dickinson,* 475 F. Supp. 783 (S.D.N.Y. 1979) *aff'd on other grounds,* 682 F.2d 355 (2d Cir. 1982); *cert. denied,* 460 U.S. 1069 (1983).

[16] *See Wellman, supra,* 475 F. Supp. 783. *See also Carter Hawley Hale Stores, supra,* 760 F.2d at 950–52. Those eight factors are: (1) Active and widespread solicitation of shareholders for the shares of an issuer; (2) solicitation made for a substantial percentage of the issuer's stock; (3) offer to purchase made at a premium over the prevailing market price; (4) terms of the offer are firm rather than negotiable; (5) offer contingent on the tender of a fixed number of shares, often subject to a fixed maximum number to be purchased; (6) offer open only for a limited period of time; (7) offeree subjected to pressure to sell his stock; and (8) public announcement of a purchasing program concerning the target company precedes or accompanies rapid accumulation of a large amount of target company's securities. *Wellman, supra,* 475 F. Supp. at 823–24.

VOL 52 ISS 194 OCT 7 1987 UMI

Commission repeatedly has cautioned that not all eight factors are entitled to equal weight and that neither all, nor even a majority, of the eight factors need be present. As noted in the Commission's brief in *SEC v. Carter Hawley Hale Stores, Inc.* (brief at 39):

> The various factors really serve one ultimate purpose—to identify whether a purchase program places pressure on shareholders to respond hastily before having a chance to consider material information.

Market sweep programs, often for less than all of the target's shares, require securityholders to react immediately without the benefit of information about the bidder and its plans for the target. Securityholders must assess the likelihood of the tender offer's success, an auction developing, or a successful target company defense. Withdrawal rights, which protect the securityholder's ability to react to new information throughout the pendency of a tender offer, are not available. A market sweep defeats all the intended benefits of Williams Act protections; a sweep can change control or defeat a bid without notice, information to the market, time to react, and the opportunity to participate.

In applying the eight-factor test to market sweeps, courts have been troubled by the fact that the pressure on securityholders and other indicia of a tender offer were as much the result of the market forces accompanying the conventional tender offer as any conduct by the purchaser.[17] The charged environment of a tender offer heightens the pressure on securityholders to make rapid investment decisions; the market price of the securities after the conventional bid is made includes a premium; that premium will exist so long as the market perceives that the bid or other acquisition effort is ongoing. The public announcement and offer of a premium provided by the conventional bid serves not only the initial bidder but each person seeking to acquire a substantial block in a short period of time. Securityholders face the same pressures and are in equal need of the Williams Act protections regardless of who initially sets these market forces in motion.[18]

A bidder, target or third party should not be permitted to use the market dynamics resulting from commencement of a tender offer in this manner. Once the dynamic market conditions resulting from a tender offer are in play, persons engaged in contests for corporate control should not be able to treat the Williams Act as an optional set of procedures to be followed only when it is to their advantage to do so. Rather, they should be requried to provide securityholders and the market with the type of information and substantive protections mandated by the Williams Act for tender offers. The rules proposed today are intended to ensure that result.

B. Persons Subject to the Proposed Rules

As noted above, the proposed rules would require acquisition programs involving an increase in beneficial ownership of 10 percent or more of the class during and shortly after a tender offer for securities of the class to proceed in compliance with the Williams Act and rules applicable to tender offers. Under proposed Rules 13e–2 and 14d–11(a), these requirements would apply to all persons once a conventional tender offer has formally commenced.[19] The proposed rules would apply to target, bidder and third party acquisitions because they have the same effect on securityholders.[20]

There is, however, one exception to this uniform application. When a bidder commences a tender offer through a public announcement under Rule 14d–2(b),[21] proposed Rule 14d–11(b) would restrict the activities of that bidder, but not those of the issuer or any other person. However, once a bidder commences a tender offer by any means other than a Rule 14d–2(b) announcement, all persons would be subject to proposed Rules 13e–2 or 14d–11(a).

While a public announcement can have an immediate and significant effect on the market for the subject securities and the target's shareholders, restricting the activities of all persons following the announcement of a tender offer could increase, rather than reduce, the potential for abuse and market disruption. An across-the-board application of the tender offer rules to acquisition activity by any person following a Rule 14d–2(b) announcement could create confusion and make it difficult to administer the proposed rules. Certain announcements may not be immediately identified as a Rule 14d–2(b) announcement. Moreover, since such an announcement can be made by press release, newspaper advertisement or public statement, notice of such an announcement may not be universally available.

Since Rule 13e–4 does not contain a parallel to Rule 14d–2(b), proposed Rule 13e–2 does not include a provision comparable to proposed Rule 14d–11(b). In the past, public announcements by issuers prior to the commencement of a conventional third-party bid have not proven to be a problem.[22] The Commission solicits comment on whether this differential treatment continues to be appropriate.

C. Nature of Activity Affected

The proposed rules would cover offers to purchase, arrangements or understandings to purchase or solicitations of offers to sell, as well as purchases of securities which are the subject of a tender offer. The Commission believes that each of these

---

[17] *See Carter Hawley Hale Stores, supra*, 760 F.2d at 952 ("The shareholder pressure in this case did not result from any untoward action on the part of CHH. Rather, it resulted from market forces, the third-party offer, and the fear that at the expiration of the offer the price of CHH shares would decrease").

[18] *See Carter Hawley Hale Stores, supra*, 760 F.2d at 950; *In re Paine Webber Jackson & Curtis, Inc.*, [1982–83] Fed. Sec. L. Rep. (CCH) para. 83,310 at 85,714 (Dec. 30, 1982) ("[T]he circumstance that the Paine Webber offer occurred in the context of the outstanding (conventional) Cavenham tender offer presents an additional and separate reason for concluding that the Paine Webber offer was a tender offer subject to section 14(d) of the Exchange Act").

[19] Tender offers by affiliates for the issuer's equity securities registered under section 12 of the Exchange Act [15 U.S.C. 781] or otherwise included within Section 14(d) of the Exchange Act [15 U.S.C. 78m(d)], which if successful would result in the affiliate becoming the beneficial owner of more than five percent of the class of such securities, are governed by Regulation 14D [17 CFR 240.14d–1–240.14d–101]. Purchases of those securities by affiliates would therefore be restricted by proposed Rule 14d–11. All other tender offers by affiliates for an issuer's equity securities are governed by Rule 13e–4 [17 CFR 240.13e–4] and purchases of those securities would be subject to proposed Rule 13e–2.

[20] The broad applicability of these proposed rules to all persons also is consistent with the Williams Act principle of neutrality among bidders, target companies and third parties. Senator Williams, in introducing the bill which became the Williams Act, stated: "I have taken extreme care with this legislation to balance the scales to protect the legitimate interests of the corporation, management and shareholders without unduly impeding cash takeover bids." 113 Cong. Rec. 354–55 (1967). *See also* S. Rep. No. 550, 90th Cong., 1st Sess. 3 (1967) and H.R. Rep. No. 1711, 90th Cong., 2d Sess. 4 (1968).

[21] 17 CFR 240.14d–2(b). Under Rule 14d–2(b), a public announcement that includes information on the identity of the bidder and subject company, the amount and class of securities sought and the price or price range, and in which the consideration is cash or securities exempt from registration under the Securities Act of 1933, 15 U.S.C. 77a *et seq.*, is deemed to constitute the commencement of a tender offer.

[22] In any event, an issuer announcing an intention to make a tender offer would be subject to Rule 10b–13 [17 CFR 240.10b–13], and thus prohibited from making any purchases otherwise than through the tender offer until the offer terminates.

activities poses the same investor protection concerns, and failure to include them in the rule would allow easy evasion of the purpose of the proposed rules. When undertaken during or shortly after a tender offer, these activities enable a person to acquire securities, whether such acquisitions are consummated immediately or are delayed until after the proposed rules would cease to apply. The Commission solicits comment as to whether the proposed rules should apply to each of the aforementioned activities, in particular, to solicitations of offers to sell, and whether the proposed rules should apply to any other activities.

With respect to bidders, affiliates and third parties, the proposed rules would apply only to the extent that a person's activity results or would result in an increase in any person's beneficial ownership or securities of the same class which is or was the subject of the tender offer by 10 percent or more of the class. The proposed rules would not turn on the extent of a person's total beneficial ownership of such securities; only the extent to which such beneficial ownership is increased or would be increased during the applicable period is relevant. The proposed rules also would cover solicitations of offers to sell, whether the buyer would be the person conducting the solicitation or another person. Accordingly, the threshold would apply to an increase in anyone's beneficial ownership, not just the person engaged in the solicitation.

Focusing on the increase in ownership avoids interfering with normal brokerage activity during a tender offer. Given the high volume of trading in securities subject to a tender offer, a broker could be considered to have engaged in solicitations of offers to sell more than an aggregate of 10 percent or more of the subject securities during that period.[23] Similarly, dealers and market-makers might otherwise cross the acquisition threshold during the restrictive period. Accordingly, the rule will prohibit only activity that results or would result in any person achieving a net 10 percent or greater increase in its beneficial ownership of the subject class. The Commission solicits comment on whether the ability to offset sales of securities against purchases in determining the net increase in beneficial ownership should be limited to registered broker-dealer firms, or should extend to all bidders, affiliates and third parties as presently proposed.

Rule 131d–3(a)[24] defines "beneficial owner" of a security to include any person who has voting power and/or investment power with respect to the security. Under Rule 13d–3(b),[25] a person is deemed to be a beneficial owner of a security if he has the right to acquire beneficial ownership within 60 days. Thus, the proposed rules would encompass acquisition of the right to acquire beneficial ownership of a security, including options, warrants, rights, exchange or conversion privileges that enable the holder to acquire such securities within 60 days. Comment is requested on whether this 60 day period is too limited and whether the proposed rules should encompass all such related securities.

Proposed Rule 13e–2 does not use the concept of beneficial ownership with respect to issuers. The concept does not lend itself to issuer purchases; for example, an issuer cannot vote treasury shares. Rule 13e–2 therefore focuses instead solely on the amount of securities of the subject class acquired by the issuer during the restricted period.

The 10 percent threshold for application of the proposed rules is intended to minimize their impact on normal arbitrage activity. In the ordinary course of business, an arbitrageur normally does not acquire beneficical ownership of 10 percent or more of a class of securities. For instance, a 10 percent position could require compliance with the reporting requirements of the Hart Scott Rodino Antitrust Improvements Act of 1976.[26] Commentators are requested to address whether 10 percent is an appropriate threshold for permitting normal arbitrage activity to continue. Would the purpose of the rules be equally well served by a threshold of 15 or 20 percent; would a 5 percent level be unduly restrictive?

D. Period of Applicability

As noted above, proposed Rules 13e–2 and 14d–11(a) would apply as soon as an issuer or bidder commences a tender offer, other than by public announcement pursuant to Rule 14d–2(b).[27]

Proposed Rules 13e–2 and 14d–11(a) would apply while the tender offer is pending and until 10 business days after the tender offer is scheduled to expire as set forth by the issuer or bidder in the applicable schedule and any amendments to that schedule filed with the Commission.[28] Thus, upon any voluntary or mandatory extension, a new expiration date would be scheduled and the proposed rules would apply until 10 business days after the extended expiration date. Because the applicable time periods are calculated from the scheduled expiration date, terminating a tender offer prior to the scheduled expiration date would not reduce the applicable time period of Rules 13e–2 or 14d–11(a) to the advantage of the bidder. The proposed Rules thus would apply a uniform period of time regardless of whether a tender offer is terminated prematurely or expires by its terms.

Proposed Rules 13e–2 and 14d–11 would continue to apply for 10 business days after the scheduled expiration date, because the market dynamics created by a tender offer continue for a period of time following the expiration of a tender offer. The proposed rules incorporate the period currently applicable to issuers after the termination of issuer tender offers.[29] The Commission invites comment as to whether 10 business days after the scheduled expiration date is an appropriate cooling off period.[30] Comment is also requested as to whether the cooling off period should be the later of (i) ten business days after the actual termination date; or (ii) the scheduled expiration date. Commentators are requested to provide empirical evidence of the market

---

[23] In agency transactions where the broker does not have discretionary authority, the broker's principal, not the broker, purchases or offers to purchase securities.

[24] 17 CFR 240.13d–3(a).

[25] 17 CFR 240.13d–3(b).

[26] *See* 15 U.S.C. 18a; 16 CFR 802.9.

[27] Since application of the proposed Rule would be triggered by commencement of an tender offer within the meaning of Rule 14d–2 [17 CFR 240.14d–2] or, in the case of issuer tender offers, Rule 13e–4(a)(4) [17 CFR 240.13e–4(a)(4)], other parties, including the target, would not be subject to Rule 13e–2 or 14d–11 as a result of a on-complying unconventional tender offer. The proposed rules do not, however, exempt these tender offers from Section 14(d) of the Exchange Act and Rule 13e–4. *See, e.g., Hoover Co.* v. *Fuqua Industries, Inc.*, [1979–80] Fed. Sec. L. Rep. (CCH) 97,107 (N.D. Ohio 1979); *S.G. Securities, Inc.* v. *Fuqua Industries, Inc.*, 466 F. Supp. 1114 (D. Mass. 1978). Persons engaging in unconventional tender offers without complying with the Williams Act tender offer rules would continue to violate Section 14(d) of the Exchange Act, Regulations 14D and E, or Rule 13e–4.

[28] Rules 13e–4(d) [17 CFR 240.13e–4(d)] and 14d–6(e) [17 CFR 240.14d–6(e)] require that upon commencement, an issuer or a bidder disclose the scheduled date on which the tender offer will expire. The rules require an amendment upon any change in that information. Rule 13e–4(d)(2) and (e)(2) [17 CFR 240.13e–4(d)(2) and (e)(2)]; Rule 14d–4(a) and 14d–6(d) [17 CFR 240.14d4(a) and 14d–6(d)].

[29] Under Rule 13e–4(f)(6) [17 CFR 240.13e–4(f)(6)], the cooling off period runs from the termination date, which may be earlier than the scheduled expiration date.

[30] Commentators responding to the Concept Release suggested cooling off periods ranging from 10 days to six months after termination.

dynamics following termination of a tender offer, including the amount of time necessary for stock distribution to return to normal, and the length of time a person holding a sizeable block would be willing to maintain its position following an expiration of a tender offer in anticipation of an acquisition once the restrictions on purchases cease to apply.

Proposed Rule 14d–11(b) would apply from the time a person makes a public announcement of a tender offer either until that person commences a tender offer by means other than announcement, thereby triggering application of proposed Rule 14d–11(a), or until 30 business days after it withdraws the announcement. Accordingly, the activities of a person who first announces a tender offer and subsequently commences a tender offer by other means, would be restricted from the time the public announcement is made. A person who elects to discontinue a tender offer after a public announcement, and makes a subsequent announcement with-drawing the offer within the five business day period prescribed by Rule 14d–2(b), would be restricted until the expiration of 30 business days after the withdrawal announcement.[31] The person's acquisition activity thus would be affected for a period equal to the 20 business day minimum offering period applicable to tender offers plus the 10 business day cooling off period imposed by proposed Rule 14d–11(a).

E. Exceptions to the Proposed Rules

Proposed Rules 13e–2, 14d–11(a) and 14d–11(b) have three similar exceptions. To the extent that, during the applicable period, any person purchases, offers to purchase, makes any arrangement to purchase or solicits any offer to sell securities subject to the proposed rules under circumstances which fall under any of the exceptions, those securities would be excluded from the calculations as to whether the person exceeded the ten percent threshold during the period. First, for purposes of each of the proposed rules, purchases of, offers to purchase, arrangements or understandings to purchase, or solicitations of offers to sell blocks of more than five percent of the subject class of securities would be excluded from any determination of a person's increase in beneficial ownership, if the seller had reported beneficial ownership of the securities pursuant to section 13(d) or 13(g) of the Exchange Act[32] for at least one year prior to such purchase, offer, arrangement, understanding, or solicitation. Under these circumstances, the block was not assembled as a reaction to or in anticipation of a tender offer, and the transaction would not pose the same investor protection concerns as transactions which are made possible by the reaction of many shareholders to a tender offer. The Commission solicits comments as to whether the requisite reporting period for these exceptions should be one year or whether a shorter period (e.g. nine, six or three months) would be appropriate.

This exception, as well as the others provided by the proposed rules, is relevant only to the operation of Rule 13e–2 and 14d–11, and would not exempt from the Williams Act and other tender offer rules purchases made in a conventional tender offer or an unconventional tender offer. Similarly, purchases subject to an exception from the proposed rules must be conducted in compliance with Rule 10b–13, if applicable.[33]

Second, the proposed rules would not apply to purchases pursuant to a binding contract between the purchaser and owner of the securities entered into prior to the announcement of a tender offer.[34] A contract to purchase securities that was not executed in reaction to a tender offer likewise does not pose the investor protection concerns the proposed rules are intended to address. Significant limitations on the availability of this exception are that the seller must own the subject securities at the time the agreement is entered into and that the terms of the agreement be fixed at that time.

Finally, proposed Rules 14d–11 and 13e–2 would not apply to issuer purchases and related activity where securityholders of the issuer have specifically approved the particular action. This exception would cover, among other transactions, issuer repurchase plans, reorganizations, and recapitalizations not constituting a tender offer. A similar exception is provided in Rules 13e–2 and 14d–11 for third parties and affiliates with respect to mergers and consolidations of the issuer. The process of securing securityholders' approval for a particular purchase affords securityholders many of the same protections that the proposed rules seek to provide. Moreover, the commencement of a tender offer should not interfere with the execution of existing plans which have been duly authorized by securityholders.

Proposed Rule 14d–11 also excludes from its provisions purchases of the subject securities from the issuer. Purchases from an issuer do not have the effect on the market and securityholders caused by a rapid accumulation of a substantial amount of securities in response to a tender offer.

The Commission seeks comment as the appropriateness, adequacy, and scope of the exceptions to the proposed rules.

F. Interaction of the Proposed Rules with Current Rules 10b–13 and 13e–4(f)(6)

Rule 10b–13[35] prohibits an issuer or bidder that has made a tender offer from purchasing or making any arrangement to purchase subject securities except pursuant to the offer during the term of the offer. The rule is intended to prevent transactions which would disadvantage securityholders tendering into the offer. The rule thereby helps to ensure that all tendering securityholders will be treated equally.

Proposed Rules 13e–2 and 14d–11 would supplement Rule 10b–13, by applying similar restrictions on purchases outside the tender offer to persons other than the person making the conventional tender offer. In effect, the proposed rules would extend the proscriptions of Rule 10b–13 to persons who have reached the acquisition threshold level during the restrictive period. Comment is requested as to the advisability of integrating Rule 10b–13 with proposed Rules 13e–2 and 14d–11.

Rule 13e–4(f)(6) currently prohibits an issuer from purchasing the securities subject to its issuer tender offer for 10 business days following termination of the offer. The Commission plans to repeal Rule 13e–4(f)(6), if the proposed rules are adopted. Issuers would thus receive the same treatment as bidders; only substantial acquisitions during the 10 business day period following expiration of the tender offer would be prohibited. Comment is requested on the

[31] If a person neither makes a subsequent announcement discontinuing its tender offer nor formally commences within the five day period, that person would violate section 14(d) and the rules thereunder and would continue to be subject to the restrictions of proposed Rule 14d–11(b) until the expiration of the applicable time periods following an announcement withdrawing the offer or a formal commencement.

[32] 15 U.S.C. 78m(d), 78m(g).

[33] 17 CFR 240.10b–13.

[34] 17 Rule 14d–2(b) would provide interpretive guidance in determining what type of statements constitute an "announcement" for the purposes of this exception. Once an announcement of a tender offer is made by an issuer or third party that indicates the bidder, target, shares sought and price, the exception would not be available for subsequent purchase agreements.

[35] 17 CFR 240.10b–13.

desirability of repealing Rule 13e–4(f)(6).[36]

G. Self Governance Approach [37]

The Commission seeks public comment on the consequences of the proposed rules to shareholders. The effect of the proposed rules on shareholders of an individual corporation may depend on a wide range of legal and economic considerations. These considerations include, but are not limited to, the existence of a fair price provision in the corporate charter, the presence of a poison pill, state law provisions regulating takeover activity, and management's anticipated response to future acquisition proposals. They may also depend on the corporation's historic stock price performance, the expected time lag between a street sweep and a "clean up" acquisition, if any, and the price difference, if any, between the street sweep price and the price paid in the clean up transaction. Accordingly, the effect of the proposed rules on shareholders may vary across corporations and over time as the surrounding legal environment evolves and economic conditions change.

The Commission therefore seeks comment on approaches to the street sweep rule that would increase the probability that the rule is applied only in those instances, if any, where it is most likely to have a beneficial effect. A rule with the ability to distinguish among issuers subject to different legal regimes and economic forces may generate greater benefits than a rule of general application that indiscriminately applies with equal force to all corporations in all circumstances.

One approach that may lead to such an outcome, and on which the Commission specifically seeks comment, relies on the use of an enabling provision similar to those commonly found in state corporation law.[38] Under an enabling approach, proposed Rules 13e–2 and 14d–11 would apply to purchase of a company's securities and related activity if and when those rules are adopted by the affirmative vote of shareholders holding a majority of the outstanding shares (weighted by the number of votes they carry), generally entitled to vote on matters submitted to the company's shareholders for a vote. To be effective, the vote would have to be taken pursuant to the Commission's rules governing solicitation of proxies or written consents, if applicable, and in accordance with state law and the company's charter and bylaws. The vote could be taken pursuant to either a recommendation of the company's board of directors or a shareholder initiative proposed under Rule 14a–8.[39] Once adopted by a company's shareholders, the proposed rules could be retracted in a similar manner. A company would be permitted to adopt both proposed Rules 13e–2 and 14d–11 but would not be permitted to adopt only one.

Variations on this approach, on which comment is also solicited, include: (i) Instead of applying only if adopted through an enabling provision, the proposed rules could take effect immediately upon their adoption by the Commission, and remain in force until retracted by an appropriate vote; (ii) instead of a majority of the outstanding shares being required for approval, a majority of a quorum or the vote required for a charter amendment under state corporate law could be the threshold for adopting or retracting the proposed rules; (iii) shareholder adoption or retraction of the proposed rules could require board concurrence; (iv) shareholder adoption or retraction or the proposed rules could be by class of security, thereby allowing the holders of individual classes to determine the operation of the street sweep rule with respect to their individual class; and (v) a company could adopt some but not all of the provisions of the proposed rules, within parameters to be set forth in the rules.

H. Economic Analysis

Since the stated rationale of the Williams Act is protection of target shareholders, the Commission's economics staff (the Office of the Chief Economist and the Directorate of Economic and Policy Analysis) empirically examined the effect of market sweeps on nonprofessional shareholders who did not sell into the sweep. OCE and DEPA determined that during the past few years there have been only a few cases of market sweeps that might have violated the proposed rules. The table below lists these cases, along with the stock price of the target company 20 business days prior to the first announcement of the offer, the price received by the arbitrageurs or others who sold into the sweep, and the "back-end" price received by other shareholders. In the four cases (SCM, NL Inds., Allied Stores, and Cyclops) where the market sweep was initiated by a hostile bidder, OCE and DEPA found that the back-end price was at least as great as the price received by the arbitrageurs. In addition they found that the back-end price in these four transactions represented premiums of 55% (SCM), 11% (NL Inds.), 41% (Allied Stores), and 43% (Cyclops) over the pre-announcement stock price of the target company. They determined that these premiums compare favorably with average tender offer premiums during the corresponding period; an earlier OCE analysis revealed that average tender offer premiums were 37% in 1985 and 33.6% in 1986. The only case they found in which a market sweep was accompanied by harm to target shareholders was the Carter Hawley Hale case, where target management adopted a series of defensive tactics, including a large repurchase program, in order to defeat a hostile bid. However, OCE and DEPA concluded that even in this case it is not clear whether it was the market sweep, or the other defensive tactics, which caused harm to target shareholders. In short, OCE and DEPA concluded that the evidence indicates that nonprofessional shareholders generally have not been harmed in the few market sweeps that have been initiated by hostile bidders during the past three years. The Commission invites the submission of any additional empirical data on the effects of market

---

[36] Rule 13e–1 [17 CFR 240.13e–1] prohibits an issuer whose equity securities are the subject of a tender offer by another person, from repurchasing any of its equity securities until it has filed with the Commission a statement disclosing the amount of securities to be repurchased, the purpose for the acquisition, and the source of funds. Rule 13e–1 would not be affected by the proposed rules, since the rule applies regardless of whether the repurchases are conducted through privately negotiated transactions, open market purchases, or an issuer tender offer.

[37] This section seeks comments on the concept of an enabling approach to the proposed rules. The Commission does not intend that any request for comments on such an approach be deemed to give notice of a proposed rule using such an enabling approach. Before seeking to adopt such a rule, the Commission would publish the proposal for notice and comment.

[38] In its Concept Release of July 31, 1986, the Commission sought public comment on a rule that would permit stockholders and directors to determine whether certain protections of the Williams Act would apply to their corporation. In particular, the Commission sought comment on a self-governance exemption to the "all holders" rule and to the tender offer rules generally. The comments in response were mixed. Of the 26 commentators that addressed this issue, 20, including the American Bar Association, Section of Corporation, Banking and Business Law, Subcommittee on Proxy Solicitations and Tender Offers, expressed opposition to, or criticism of, the concept of adopting self-governance exemptions to tender offer rules. Four commentators, inlcuding the United States Department of Justice, Antitrust Division, expressed support for the concept. In addition, The Business Roundtable expressed support for the concept of self-governance generally but expressed reservations regarding self-governance exemptions from disclosure provisions of the Williams Act. The National Association of Manufacturers, while failing to express a position on the concept, expressed support for further consideration.

[39] 17 CFR 240.14a–8.

sweeps and solicits comments on the interpretation of the data presented herein.

TABLE 1.—STOCK PRICE 20DAYS BEFORE TENDER OFFER, STOCK PRICE PAID IN OPEN MARKET TRANSACTIONS, AND BACK-END PRICE

[premiums in parentheses]

Target firm	Stock price 20 days before tender offer	Stock price paid in open market	Backend price
SCM	$48.50	$73.50	$75.000 (55%)
NL Inds.	14.25	15.50	[1]15.875 (11%)
Allied stores	49.00	67.00	69.00 (41%)
Cyclops	66.375	95.00	95.00 (43%)
Carter Hawley Hale	21.50	25.88	21.625 (0.63)

[1] Value at the time Simmons took control of NL board of directors.

III. Cost Benefit Analysis

To fully evaluate the costs and benefits that would result from the proposed rules, the Commission invites commentators to provide views and data as to the costs and benefits associated with the proposed rules. One effect of the proposed rules is to require persons to comply with the rules and procedures mandated by sections 13(e) and 14(d) of the Exchange Act. Such compliance may incrase the expenses incurred by a person in making a tender offer. Moreover, as a result of the operation of the proposed rules, persons may find it difficult to sell significant amounts of stock a class during the period that the proposed rules apply. It is anticipated, however, that the proposed rules will provide significant benefits to securityholders and the marketplace by requiring full disclosure by persons involved in activity relating to 10 percent or more of a class of equity securities and by providing procedural and substantive protections for securityholders. The Commission requests comment on how the costs and benefits of the proposed rule would be expected to increase or decrease if the "enabling" approach described above were adopted.

IV. Regulatory Flexibility Analysis

This initial regulatory flexibility analysis concerns proposed Rules 13e–2 and 14d–11 and has been prepared in accordance with the Regulatory Flexibility Act ("FRA").[40]

A. Objectives of the Proposal

The proposed rules would require certain substantial acquisitions of a target company's securities that are the subject of a tender offer to proceed in compliance with the statute and rules governing tender offers to ensure that shareholders receive the protections of those provisions regardless of whether their shares are purchased by a person conducting the initial tender offer, the issuer or another party.

B. Statutory Authority

The Commission is proposing to adopt proposed Rules 13e–2 and 14d–11 pursuant to sections 3(b), 13(e), 14(d), 14(e), 15(c), 20(b) and 23(a) of the Exchange Act.

Small Entities Subject to the Rules

If the proposed rules were adopted, certain small entities would become subject to their requirements. When used with reference to an "issuer" or a "person" other than an investment company, the term "small business" or "small organization" is defined by Rule 0–10(a) under the Exchange Act [41] to mean an issuer or person that on the last day of its most recent fiscal year had total assets of $5 million or less. When used with reference to an "issuer" or a "person" that is an investment company, the term "small business" is defined by Rule 0–10(b) under the Exchange Act[42] to mean an investment company with net assets of $50 million or less as of the end of its most recent fiscal year.

When used with reference to a broker or dealer, the term "small business" is defined by Rule 0–10(c) of the Exchange Act [43] to mean a broker or dealer that had total capital of less than $500,000 on the last business day of the preceding fiscal year and is not affiliated with any person (other than a natural person) that is not a small business or small organization as defined by Rule 0–10. As many as 5,000 brokers and dealers may be considered small entities under this definition.

Proposed Rule 13e–2 would require, subject to certain exceptions, all issuers with a class of securities registered under Section 12 of the Exchange Act or which are required to file reports with the Commission pursuant to section 15(d), to conduct any purchases of 10 percent or more of its equity securities during the shortly after a tender offer for those securities, in compliance with Rule 13e–4 governing issuer tender offers. These issuers include companies who have publicly traded securities not registered with the Commission as well as issuers whose securities are not publicly traded. An unknow portion of these classes of issuers are small entities.

Proposed Rule 14d–11 would require, subject to certain exceptions, all persons who seek to engage in conduct which would increase any person's beneficial ownership of equity securities subject to a tender offer during that period by 10 percent or more of the class, to comply with the tender offer rules, if those securities are registered under section 12 of the Act, are issued by an insurance company which wuld have been required to be registered but for the section 12(g)(2)(G) exception, or are issued by a closed-end registered investment company. An unknown portion of these persons could be small entities.

At this time the Commission is unable to determine the costs to small entities of compliance with the proposed rules. The Commission estimates, however, that because the proposed rules are limited in application to transactions occurring during and shortly after a tender offer for the subject securities, and because the rules only apply to extraordinary transactions which would increase a person's beneficial ownership by 10 percent or more of the class, the rules would not affect a significant number of small entities.

C. Reporting, Recordkeeping and other Compliance Requirements

Persons engaging in activities subject to the rules would be required to comply with existing Commission rules governing tender offers. These rules require filing and dissemination of information, a minimum offering period, and other procedural requirements.

D. Overlapping or Conflicting Federal Rules

If adopted, Proposed Rule 13e-2 would overlap with Rule 13e-4(f)(6) in that both would restrict purchases of securities by an issuer during ten business days following termination of an issuer tender offer for the securities. The Commission plans to repeal Rule 13e-4(f)(6) if the Proposed rules are adopted. The Commission does not believe that the proposed rules duplicate, overlap or

[40] 5 U.S.C. 601 *et seq.*
[41] 17 CFR 240.0–10(a).
[42] 17 CFR 240.0–10(b).
[43] 17 CFR 240.0–10(c).

conflict with any other existing rule provisions.

E. Significant Alternatives

Alternatives to the rule proposals under consideration by the Commission include the use of different threshold levels and different periods of applicability. The proposed rule also could be limited in applicability to securities registered under section 12 of the Act. The Commission is soliciting comment on these alternatives. The proposals as formulated are presently considered to be the least intrusive means of serving the Commission's mandate of investor protection with respect to market sweeps.

F. Solicitation of Comments

The Commission encourages the submission of written comments with respect to any aspect of this initial regulatory flexibility analysis. Such written comments will be considered in the preparation of the final regulatory flexibility analysis if the proposal is adopted. Persons wishing to submit written comments should file them with Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. All submissions should refer to File No. S7–33–87 and will be available for public inspection and copying at the Commission's Public Reference Room.

V. Requests for Comments

Any interested person wishing to submit written comments on the proposed revisions to the tender offer rules, as well as on other matters that might have an impact on the proposals contained herein are requested to do so. The Commission also encourages the submission of written comments with respect to any aspect of the initial regulatory flexibility analysis. Such written comments will be considered in the preparation of the final regulatory flexibility analysis, if the proposed rules are adopted.

The Commission also requests comments on whether the proposals and alternatives, if adopted, would have an adverse effect on competition that is neither necessary nor appropriate in furthering the purposes of the Exchange Act. Comments on this inquiry will be considered by the Commission in complying with its responsibilities under section 23(a) of the Exchange Act.[44]

VI. Statutory Basis

The rules are being proposed pursuant to section 3(b), 13(e), 14(d), 14(e), 15(c), 20(b) and 23(a) of the Securities Exchange Act of 1934.[45]

Reporting and recordkeeping requirements, Securities.

VII. Test of Proposals

In accordance with the foregoing, Title 17, Chapter II of the Code of Federal Regulations is proposed to be amended as follows:

PART 420—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

1. The authority citation for Part 240 is amended by adding the following citations: [Citations before * * * indicate general rulemaking authority].

Authority: Sec. 23, 48 Stat. 901, as amended (15 U.S.C. 78W) * * * Section 240.13e-2 and 240.14d–11 also issued under sec. 15 U.S.C. 78c(b), 78m(e), 78n(d), 78n(e), 78o)c), 78t(b) and 78w(a).

2. By adding § 240.13e-2 to read as follows:

§ 240.13e-2 Acquisitions and related activities by an issuer involving substantial amounts of securities during or following a tender offer.

(a) Acquisitions and related activities by the issuer after commencement of a tender offer. Upon commencement of an issuer tender offer pursuant to Rule 13e-4(a)(4) [§ 240.13e-4(a)(4)] or tender offer by a bidder pursuant to Rule 14d-2 [§ 240.14d-2] (other than commencement solely by public announcement pursuant to Rule 14d-2(b) [§ 240.14d-2(b)]) until the expiration of ten business days after the scheduled expiration date of such tender offer, including any extensions thereof, the issuer shall not, directly or indirectly, purchase, offer to purchase, make any arrangement or understanding to purchase, or solicit any offer to sell either an aggregate of ten percent or more of securities of a class that is or was subject to such tender offer or securities of a class which are convertible into, exchangable for, or otherwise give any right or privilege to, an aggregate of ten percent or more of securities of a class that is or was subject to such tender offer unless the purchase, offer to purchase, arrangement or understanding to purchase or solicitation of any offer to sell is made pursuant to Rule 13e-4 [§ 240.13e-4].

(b) *Acquisitions and related activities by any affiliate of the issuer after commencement of a tender offer.* Upon commencement of an issuer tender offer pursuant to Rule 13e–4(a)(4) [§ 240.13e–4(a)(4)] or tender offer by a bidder pursuant to Rule 14d–2 [§ 240.14d–2] (other than commencement solely by public announcement pursuant to Rule 14d–2(b) [§ 240.14d–2(b)]) until the expiration of ten business days after the scheduled expiration date of such tender offer, including any extensions thereof, no affiliate of the issuer shall, directly or indirectly, purchase, offer to purchase, make any arrangement or understanding to purchase, or solicit any offer to sell any security that would increase any person's beneficial ownership of securities of a class that is or was subject to the tender offer by an aggregate of ten percent or more of that class, unless the purchase, offer to purchase, arrangement or understanding to purchase or solicitation of any offer to sell is made pursuant to Rule 13e–4 [§ 240.13e–4].

(c) *Acquisitions and related activities not subject to this section.* This section shall not apply to any purchase, offer to purchase, arrangement or understanding to purchase or solicitation of any offer to sell that:

(1) Is undertaken by the issuer and is specifically approved in advance by the holders of the requisite number of securities of the issuer entitled to vote for such action under the bylaws of the issuer and in accordance with the applicable laws of the state or other jurisdiction in which the issuer is incorporated;

(2) Is undertaken by an affiliate and relates to a merger or consolidation of the issuer with or into the affiliate that has been approved by the holders of the requisite number of securities of the issuer entitled to vote for such action under the bylaws of the issuer and in accordance with the applicable laws of the state or other jurisdiction in which the issuer is incorporated;

(3) Relates to more than five percent of such class of securities held by a person who has reported beneficial ownership thereof pursuant to sections 13(d) or 13(g) of the Act for at least one year preceding any such purchase, offer to purchase, arrangement or understanding to purchase or solicitation of offer to sell such securities; or

(4) Is undertaken pursuant to a written agreement to purchase such securities entered into before the earlier of either the public announcement of information specified in Rule 14d–2(c) [§ 240.14d–2(c)] or the occurrence of any of the events specified in Rule 14d–2(a) [§ 240.14d–2(a)] which agreement is with a person or persons who, at the time, own the securities to be sold, provided

[44] 15 U.S.C. 78w(a)

[45] 15 U.S.C. 78c(b), 78m(e), 78n(d), 78n(d), 78o(c), 78t(b) and 78w(a).

BEST COPY AVAILABLE

that the agreement, at the time entered into, constituted a binding obligation of all parties and specified the exact price and amount of securities to be sold.

3. By adding § 240.14d–11 to read as follows:

§ 240.14d–11 Acquisitions and related activities involving substantial amounts of securities during or following a tender offer.

(a) *Acquisitions and related activities by any person after commencement of a tender offer.* Upon commencement of an issuer tender offer pursuant to Rule 13e–4(a)(4) [§ 240.13e–4(a)(4)] or tender offer by a bidder pursuant to Rule 14d–2 [§ 240.14d–2] (other than commencement solely by public announcement pursuant to Rule 14d–2(b) [§ 240.14d–2(b)]) until the expiration of ten business days after the scheduled expiration date of such tender offer, including any extension thereof, no person shall, directly or indirectly, purchase, offer to purchase, make any arrangement or understanding to purchase, or solicit any offer to sell any security that would increase any person's beneficial ownership of securities of a class that is or was subject to the tender offer by an aggregate of ten percent or more of that class, unless the purchase, offer to purchase, arrangement or understanding to purchase or solicitation of any offer to sell is made pursuant to section 14(d) of the Act and the rules promulgated thereunder.

(b) *Acquisitions and related activities by the bidder after commencement of a tender offer by public announcement.* Upon commencement of a tender offer by public announcement pursuant to Rule 14d–2(b) [§ 240.14d–2(b)] and until either—

(1) The bidder commences the tender offer by means other than such public announcement or

(2) The expiration of 30 business days after the date that the bidder makes a public announcement pursuant to Rule 14d–2(b)(1) [§ 240.14d–2(b)(1)] that it will not continue with such tender offer, whichever occurs first, the bidder shall not, directly or indirectly, purchase, offer to purchase, make any arrangement or understanding to purchase, or solicit any offer to sell any security that would increase any person's beneficial ownership of securities of a class that is or was subject to the tender offer by an aggregate of ten percent or more of that class, unless the purchase, offer to purchase, arrangement or understanding to purchase or solicitation of any offer to sell is made pursuant to section 14(d) of the Act and the rules promulgated thereunder.

(c) *Acquisitions and related activities not subject to this section.* This section shall not apply to any purchase, offer to purchase, arrangement or understanding to purchase or solicitation of any offer to sell that:

(1) Relates to a purchase or potential purchase from the issuer;

(2) Relates to a merger or consolidation of the issuer with or into such person or an affiliate of such person that has been approved by the holders of the requisite number of securities entitled to vote for such action under the bylaws of the issuer and in accordance with the applicable laws of the state or other jurisdiction in which the issuer is incorporated;

(3) Relates to more than five percent of such class of securities held by a person who has reported beneficial ownership thereof pursuant to sections 13(d) or 13(g) of the Act for at least one year preceding any such purchase, offer to purchase, arrangement or understanding to purchase or solicitation of offer to sell such securities; or

(4) Is undertaken pursuant to a written agreement to purchase such securities entered into before the earlier of either the public announcement of information specified in Rule 14d–2(c) [§ 240.14d–2(c)] or the occurrence of any of the events specified in Rule 14d–2(a) [§ 240.14d–2(a)] which agreement is with a person or persons who, at the time, own the securities to be sold, provided that the agreement, at the time entered into, constituted a binding obligation of all parties and specified the exact price and amount of securities to be sold.

By the Commission.
October 1, 1987.

Shirley E. Hollis,

Assistant Secretary.

Separate Statement of Commissioner Grundfest

I write separately to describe specific rule language that would implement the enabling approach described in the Commission's release.[1] To implement the enabling approach described in the Commission's release, a new subsection (d) could be added to proposed Rules 13e–2 and 14d–11, to read as set forth below. In the interest of brevity, I set forth language for Rule 13e–2 only. The changes necessary for application of this proposal in Rule 14d–11 parallel the changes to 13e–2 and are apparent from the context. An amendment to Form 8–K to require prompt reporting of shareholder action may also be appropriate. Persons who respond to the Commission's request for comments regarding an enabling approach may further wish to address the specific rule language of this proposal.

"(d) *Adoption by shareholder vote.* (1) This section shall be effective with respect to any purchase of securities of an issuer, and/or offer to purchase, arrangement or understanding to purchase or solicitation of any offer to sell such securities, that takes place on or after the first business day after the following steps have been completed:

(i) The holders of voting securities representing a majority of the votes entitled to be cast by the holders of all outstanding voting securities of the issuer entitled to vote generally on matters submitted to holders of the issuer's voting securities for a vote, voting together as a single class, shall have approved a proposal to adopt this section and Rule 14d–11;

(ii) Such approval shall have been solicited or otherwise obtained in compliance with Regulation 14A or 14C, if applicable, and with any procedures for shareholder action prescribed by the law of the issuer's jurisdiction of incorporation, and the issuer's certificate of incorporation, bylaws, or other governing documents; and

(iii) The issuer shall have reported such action to the Commission on Form 8–K or any other appropriate form.

(2) Notwithstanding subsection (d)(1), this section shall cease to be effective with respect to any purchase of securities of an issuer, and/or offer to purchase, arrangement or understanding to purchase or solicitation of any offer to sell such securities, that takes place on or after the first business day after the following steps have been completed:

(i) The holders of voting securities representing a majority of the votes entitled to be cast by the holders of all outstanding voting securities of the issuer entitled to vote generally on matters submitted to holders of the issuer's voting securities for a vote, voting together as a single class, shall have approved a proposal to rescind the adoption of this section and Rule 14d–11;

(ii) Such approval shall have been solicited or otherwise obtained in compliance with Regulation 14A or 14C, if applicable, and with any procedures for shareholder action prescribed by the law of the issuer's jurisdiction of incorporation and the issuer's certificate of incorporation, bylaws or other governing documents; and

[1] The Commission seeks comment on an enabling approach in section II.G of the accompanying release.

(iii) The issuer shall have reported such action to the Commission on Form 8–K or any other appropriate form."

BILLING CODE 8010–01–M

DEPARTMENT OF AGRICULTURE

Forest Service

36 CFR Part 222

Grazing Fees on National Forests in the 16 Western States

AGENCY: Forest Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule outlines the formula for annually determining fees for livestock grazing and use on National Forest and Land Utilization Project lands in the 16 Western States after 1987. The proposal would adopt the fee formula prescribed in Executive Order No. 12548 of February 14, 1986, and, in most respects, is the same grazing fee formula as that enacted by Congress in 1978 under the Public Rangelands Improvement Act. Under the proposed rule, grazing fees would be based on a rate per head month starting in 1988.

DATES: Public comment on adoption of the proposed formula is encouraged. Comments must be received in writing November 23, 1987.

ADDRESSES: Send written comments to F. Dale Robertson, Chief, (2200) Forest Service, USDA, P.O. Box 96090, Washington, DC 20090–6090.

The public may inspect comments received on this proposed rule in the office of the Director, Range Management Staff, Room 601, Rosslyn Plaza East, 1621 North Kent Street, Arlington, Virginia, between the hours of 8:30 a.m. and 4:30 p.m. Copies of the environmental assessment accompanying the rule may also be obtained from this office.

In addition, the public may review the environmental assessment on this rulemaking at the following Forest Service Regional Offices:

Northern Region, Federal Building, Missoula, MT 59807
Southwestern Region, Federal Building, 517 Gold Avenue, Albuquerque, NM 87102
Pacific Southwest Region, 630 Sansome Street, San Francisco, CA 94111
Southern Region, 1720 Peachtree Road NW., Atlanta, GA 30367
Rocky Mountain Region, 11177 West Eight Avenue, Lakewood, CO 80225
Intermountain Region, Federal Building, 324 25th Street, Ogden, UT 84401
Pacific Northwest Region, 319 SW Pine Street, Portland, OR 97208
Eastern Region, 310 West Wisconsin Avenue, Milwaukee, WI 53203.

FOR FURTHER INFORMATION CONTACT: Robert M. Williamson, Director, (703) 235–8139, or Edward R. Frandsen, Range Economist (703) 235–8139.

SUPPLEMENTARY INFORMATION:

Background

Except in limited circumstances, fees are charged for all livestock grazing use or occupancy of National Forest System lands, or other lands under the control of the Forest Service. In 1978, with enactment of the Public Rangelands Improvement Act (PRIA), 43 U.S.C. 1752—1753, 1901, 1908; U.S.C. 1333(b), Congress created a new grazing fee formula to be used on a trial basis. The formula sought to base public land grazing fees on the cost of livestock production and the public land grazer's ability to pay. The objective was to prevent crippling economic impacts on the public land grazer and dependent rural communities in the Western States. The Act required the Secretaries of Agriculture and the Interior to present to Congress an evaluation of the trial formula as well as an analysis of alternative grazing fee systems.

Pursuant to the sunset provisions in the Act, the trial grazing fee formula expired on December 31, 1985. Shortly before expiration of the formula, Congressional delegations from many of the Western states appealed to the President to extend the PRIA fee formula. On February 14, 1986, in the absence of Congressional action to establish a grazing fee system for 1986 and subsequent grazing years, the President, through Executive Order No. 12548, extended the PRIA fee formula indefinitely. The Executive Order also directed how the formula indexes would be calculated by specifying that: (1) The Forage Value Index shall be based on 11 Western States data, and use "the weighted average estimate of the annual rental charge per head per month", rather than "animal unit month"; (2) the Beef Cattle Price Index "means the weighted average annual selling price for beef cattle (excluding calves) in the 11 Western States", and (3) the Prices Paid Index would reflect selected livestock production costs in 13 Western States. In addition, the Executive Order specified that the fee "shall not be less than $1.35 per Animal Unit Month." The Executive Order retained the PRIA formula provision that annual adjustments would not exceed plus or minus 25 percent of the previous year's grazing fee. Accordingly, the Secretaries of the Interior and Agriculture calculated the 1986 and 1987 grazing fee, using 11 Western States data, for application to the public lands in the 16 Western States using the formula prescribed in the Executive Order.

In 1986, in *Natural Resources Defense Council, et.al.*, v. *Lyng, Hodel*, plaintiffs filed suit in the United States District Court for the Eastern District of California, Civil No. 86–0548, alleging that the Secretaries of Agriculture and the Interior lacked statutory and regulatory authority to implement the prescribed fee formula, and, further, they had failed to engage in the formal rulemaking requirements of the Administrative Procedures Act (APA) (5 U.S.C. 553) and, in the case of the Secretary of Agriculture, the public participation requirements of the National Forest Management Act (NFMA) (16 U.S.C. 1621(A)). On August 13, 1987, the Court issued a bench opinion. It determined, first, that both Secretaries had discretion under their respective governing statutes to consider factors other than market value in determining a grazing fee. Second, it determined that the affected Departments had not complied with the APA and the public participation requirements of NFMA and other applicable statutes in establishing the grazing fee formula. The Court ordered the agencies to follow formal APA rulemaking procedures to establish a fee formula with full opportunity for public participation.

Proposed Rule

In compliance with the District Court ruling, the Department of Agriculture proposes to amend its rules governing grazing fees at 36 CFR 222.50 and .51 to establish the fee formula prescribed by Executive Order No. 12548. Under the proposed rule, the fee for grazing livestock on National Forest and Land Utilization Project lands in the 16 Western States would be calculated annually for 1988 and subsequent grazing years. The formula would apply to designated lands in the 16 contiguous Western States of Arizona, California, Colorado, Idaho, Kansas, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Utah, Washington, and Wyoming. National Grasslands are excluded.

The proposed rule is consistent with Congressional policy for grazing fees on Federal rangelands established in the Public Rangelands Improvement Act. This policy was designed to prevent economic disruption and harm to the public lands sector of the western

livestock industry. Toward that end, Congress deemed it in the public interest to charge a fee for livestock grazing permits on National Forest lands in the 16 Western States based on a formula reflecting annual changes in the costs of production and livestock prices.

Under the proposed rule, the annual grazing fee represents the economic value of the use of the land to the user rather than market value or value in exchange. The annual calculated fee equals the $1.23 base value established by the 1966 Western Livestock Grazing Survey, multiplied by the result of the Forage Value Index (FVI), added to the Beef Cattle Price Index (BCPI), less the Prices Paid Index (PPI) or the cost of livestock production index, and divided by 100. However, the proposed rule provides that the annual increase or decrease in such fee for any given year shall be limited to not more than plus or minus 25 percent of the previous year's fee, and that the fee shall not be less than $1.35 per Head Month.

In equation format the formula would be:

$$\text{Economic value per head month} = \$1.23 \times \frac{\text{FVI} + \text{BCPI} - \text{PPI}}{100}$$

The $1.23 in the formula is the base fair market value in 1966. This value is based on the principle that the value of public range forage used for grazing is equal to the rental value of private rangelands leased for grazing after adjusting for differences in the costs of services routinely provided on private lands that are not provided on public rangelands.

"Forage Value Index" means the weighted average estimate of the annual rental charge per head per month for pasturing cattle on private rangelands in the 11 Western States (Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, and California) (computed by the Statistical Reporting Service (now National Agricultural Statistics Service) from the June Enumerative Survey) divided by $3.65 per Head Month and multiplied by 100;

"Beef Cattle Price Index" means the weighted average annual selling price for beef cattle (excluding calves) in the 11 Western States (Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, and California) for November through October (computed by the Statistical Reporting Service (now National Agricultural Statistics Service) divided by $22.04 per hundred weight and multiplied by 100;

"Prices Paid Index" means the following selected components from the Statistical Reporting Service's (now National Agricultural Statistics Service) Annual National Index of Prices Paid by Farmers for Goods and Services adjusted by the weights indicated in parentheses to reflect livestock production costs in the Western States: 1. Fuels and Energy (14.5), 2. Farm and Motor Supplies (12.0), 3. Autos and Trucks (4.5), 4. Tractors and Self-Propelled Machinery (4.5); 5. Other Machinery (12.0), 6. Building and Fencing Materials (14.5), 7. Interest (6.0), 8. Farm Wage Rates (14.0), 9. Farm Services (18.0).

As set forth at § 222.50, the Forest Service shall charge a monthly grazing fee for each head of livestock grazing use, or occupancy by one adult animal. The grazing fee, then, is equal to the use fee per Head Month multiplied by the number of months the grazing animal will be on National Forest or Land Utilization Project (LUP) ranges during the grazing fee year.

Regulatory Impact

This proposed rule has been reviewed under USDA procedures and Executive Order 12291 and has been determined not to be a major rule. While there will be a monetary difference between the market value of public land grazing and the rate per head under the concept of the economic value in use or value to the user, the actual monetary difference will be available for direct expenditure by the grazing permittee in local, rural communities throughout the Western States. Thus, little or no effect on the National economy will result from this regulation. The Department of Agriculture has further determined that this proposed rulemaking will not have a negative impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). The provisions of this proposed rulemaking are applicable to all persons or entities who possess a grazing permit on National Forest or LUP lands in the 16 Western States, without regard to the size of the operation.

An environmental analysis has been conducted on this proposed rulemaking. The analysis addresses issues discussed in the Grazing Fee Review and Evaluation: A Report From the Secretary of Agriculture and the Secretary of the Interior, February, 1986, Washington, DC, 99 pp., and specifically addresses the following:

1. Questions concerning the formula's methodology;
2. Effects on government revenues for range improvements;
3. Cost of the grazing program;
4. Equitability between permittees and nonpermittees; and
5. Potential environmental effects.

Based on the environmental assessment, it has been determined that the proposed rule will not have a significant effect on the human environment; therefore, an environmental impact statement will not be prepared. Copies of the environmental assessment ("Environmental Assessment, Grazing Fee Formula for Livestock Grazing, National Forests in the 16 Western States"), and Finding of No Significant Impact are available as indicated at the addresses listed.

Information Collection Requirements

There are no additional information collection requirements because of the proposed rulemaking.

List of Subjects in 36 CFR Part 222

Grazing lands, Livestock, National forests, Range management, Wildlife.

Therefore, for the reasons set forth above, it is proposed to amend Title 36 of the Code of Federal Regulations, Part 222, Subpart C—Grazing Fees, as follows:

1. Revise the authority citation for Subpart C to read as follows:

Authority: 16 U.S.C. 551; 31 U.S.C. 483A; 43 U.S.C. 1901; E.O. 12548, 51 FR 1986 Comp., p. 188.

2. Revise paragraph (c) of § 222.50 to read as follows:

§ 222.50 General procedures.

* * * * *

(c) A grazing fee shall be charged for each head month of livestock grazing or use. A head month is a month's use and

occupancy of range by one animal, except for sheep or goats. A full head month's fee is charged for a month of grazing by adult animals; if the grazing animal is weaned or 6 months of age or older at the time of entering National Forest System lands; or will become 12 months of age during the permitted period of use. For fee purposes 5 sheep or goats, weaned or adult, are equivalent to one cow, bull, steer, heifer, horse, or mule.

3. Amend § 222.51 by removing paragraph (c) and revising paragraph (b) to read as follows:

§ 222.51 National Forests in 16 Western States.

* * * * *

(b) Notwithstanding the provisions of § 222.50, paragraph (b), the calculated grazing fee represents the economic value of the use of the land to the user and is the product of multiplying $1.23 by the result of the annual Forage Value Index, added to the sum of the Beef Cattle Price Index minus the Prices Paid Index and divided by 100; provided, that the annual increase or decrease in such fee for any given year shall be limited to not more than plus or minus 25 percent of the previous year's fee, and provided further, that the fee shall not be less than $1.35 per head per month. The indexes used in this formula are as follows:

(1) Forage Value Index means the weighted average estimate of the annual rental charge per head per month for pasturing cattle on private rangelands in the 11 Western States (Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, and California) (computed by the National Agricultural Statistics Service) from the June Enumerative Survey) divided by $3.65 per head month and multiplied by 100;

(2) Beef Cattle Price Index means the weighted average annual selling price for beef cattle (excluding calves) in the 11 Western States (Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, and California) for November through October (computed by the National Agricultural Statistics Service) divided by $22.04 per hundred weight and multiplied by 100; and

(3) Prices Paid Index means the following selected components from the National Agricultural Statistics Service "Annual National Index of Prices Paid by Farmers for Goods and Services" adjusted by the weights indicated in parentheses to reflect livestock production costs in the Western States: 1. Fuels and Energy (14.5), 2. Farm and Motor Supplies (12.0), 3. Autos and Trucks (4.5), 4. Tractors and Self-Propelled Machinery (4.5); 5. Other Machinery (12.0), 6. Building and Fencing Materials (14.5), 7. Interest (6.0), 8. Farm Wage Rates (14.0), 9. Farm Services (18.0).

Date: September 30, 1987.

George S. Dunlop,

Assistant Secretary, Natural Resources and Environment.

[FR Doc. 87-23125 Filed 10-6-87; 8:45 am]

BILLING CODE 3410-11-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Part 4100

[AA-220-87-4322-02]

Grazing Administration—Exclusive of Alaska; Grazing Fees

AGENCY: Bureau of Land Management, Interior.

ACTION: Proposed rulemaking.

SUMMARY: This proposed rulemaking would amend the existing regulations in 43 CFR Part 4100 Subpart 4130.7 by providing that fees for grazing domestic livestock on public land administered by the Bureau of Land Management (BLM) for 1988 and subsequent years would be determined by a formula that consists of a base value of grazing on public land adjusted by indexes reflecting current year land lease rates, cost of production, and beef cattle prices. Because the formula for establishing grazing fees is being incorporated into the regulations, fees established under the formula for years after 1988 will be published as a **Federal Register** notice.

Publication of the proposed rulemaking with an opportunity for public comment meets the requirement for public participation in the establishment of grazing fees required by the decision of the United States Court for the Eastern District of California in the case of *Natural Resources Defense Council, Inc. (NRDC)* v. *Lyng, Hodel.* Prior to preparation of the proposed rulemaking, an environmental analysis was prepared which determined that the rulemaking would not have a significant impact on the environment.

DATE: The public is invited to comment on the proposed rulemaking. Comments should be submitted by November 23, 1987. Comments postmarked or received after the above date may not be considered in the decisionmaking process for the development of a final rulemaking.

ADDRESS: Comments should be sent to: Director (140), Bureau of Land Management, Room 5555, Main Interior Bldg., 1800 C Street NW., Washington, DC. 20240.

Comments will be available for public review in Room 5555 of the above address during regular business hours (7:45 a.m. to 4:15 p.m.), Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Billy R. Templeton or Donald Waite. (202) 653-9193.

SUPPLEMENTARY INFORMATION: Fees to graze domestic livestock on public land administered by the BLM are paid by an animal unit month (AUM) measure. For billing purposes, an AUM is the forage consumed by one adult cow or horse or five adult sheep or goats for 1 month. Any animal over 6 months of age is considered an adult animal for billing purposes. The grazing fee, therefore, is equal to the value as computed by the formula described herein per AUM times the number of months the animals will be on public land during the grazing fee year. The Bureau of Land Management determines grazing fees under the authorities granted by the Taylor Grazing Act (TGA) of 1934 (43 U.S.C. 315 *et seq.*), the Federal Land Policy and Management Act (FLPMA) of 1976 (43 U.S.C. 1701 *et seq.*), and the Public Rangelands Improvement Act (PRIA) of 1978 (43 U.S.C. 1901 *et seq.*). The Taylor Grazing Act provided for "use of the range, upon the payment annually of reasonable fees in each case to be fixed or determined from time to time" by the Secretary of the Interior. The Federal Land Policy and Management Act amended the Taylor Grazing Act to state that fees should be established "in accordance with governing law." Finally, the Public Rangelands Improvement Act set forth the policy that the grazing fee should be based on a formula which prevents economic disruption and harm to the western livestock industry, reflects annual changes in the costs of production and is equitable.

From 1979 to 1986, the fee, per AUM, was computed by a formula adopted in the Public Rangelands Improvement Act (PRIA) of 1978 (43 U.S.C. 1901 *et seq.*). The provision in PRIA setting forth the formula terminated in 1985.

The Congress, in the Public Rangelands Improvement Act, called for a study to evaluate the performance of the formula and to explore alternative fee systems by the end of 1985. The study was produced too late for

VOL
52
ISS
194
OC
7
1987
UMI

deliberation by the Congress in 1985. Therefore, to establish a fee for the 1986 grazing season and to give the Congress adequate time to consider the fee issue, the President of the United States, acting on advice from the affected Federal agencies and a number of Members of Congress, issued Executive Order 12548 on February 14, 1986.

The Executive Order (12548) directed the Secretaries of Agriculture and the Interior to exercise their authority, to the extent permitted by law under the various statues they administer, to estabish a fee for domestic livestock grazing on the public rangelands which annually equals the $1.23 base established by the 1966 Western Livestock Grazing Survey multiplied by the result of the Forage Value Index (computed annually from data supplied by the National Agricultural Statistics Service) added to the Combined Index (Beef Cattle Price Index minus the Prices Paid Index) and divided by 100; and provided that the annual increase or decrease in such fee for any given year shall be limited to not more than plus or minus 25 percent of the previous year's fee, and provided further, that the fee shall not be less than $1.35 per animal unit month.

The Executive Order defined the terms used in this manner:

(a) "Public rangelands" has the same meaning as in the Public Rangelands Improvement Act of 1978 (Pub. L. 95–514);

(b) "Forage Value Index" means the weighted average estimate of the annual rental charge per head per month for pasturing cattle on private rangelands in the 11 Western States (Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, and California) (compared by the Statistical Reporting Service from the June Enumerative Survey) divided by $3.65 and multiplied by 100;

(c) "Beef Cattle Price Index" means the weighted average annual selling price for beef cattle (excluding calves) in the 11 Western States (Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, and California) for November through October (computed by the Statistical Reporting Service) divided by $22.04 per hundred weight and multiplied by 100; and "(d) "Prices Paid Index" means the following selected components from the Statistical Reporting Service's Annual National Index of Prices Paid by Farmers for Goods and Services adjusted by the weights indicated in parentheses to reflect livestock production costs in the Western States: 1. Fuels and Energy (14.5); 2. Farm and Motor Supplies (12.0) 3. Autos and Trucks (4.5); 4. Tractors and Self-Propelled Machinery (4.5); 5. Other Machinery (12.0); 6. Building and Fencing Materials (14.5); 7. Interest (6.0); 8. Farm Wage Rates (14.0); 9. Farm Services (18.0).

The calculation of fees under the Executive Order differs from the procedure that has been followed in recent years in that it provides that the Forage Value Index shall be based on the weighted average estimate of the annual rental charge per head per month for pasturing animals on private rangeland in the 11 western states, rather than on the AUM's.

In 1986, the Natural Resources Defense Council (NRDC) in the case *NRDC* v. *Lyng, Hodel,* sued in the United States Court for the Eastern District of California, challenging the authority of the Secretaries of the Interior and Agriculture to use the formula and the procedures followed to establish the 1986 grazing fee. On August 13, 1987, the court issued a ruling from the bench on motions for summary judgment. The court held that the fee formula was within the scope of discretion accorded to the Secretary of the Interior under the Public Rangelands Improvement Act, Federal Land Policy and Management Act and Taylor Grazing Act, noting that these authorities contemplated the consideration of factors other than market value in the establishment of fees. However, the court decided that the agencies had not complied with rulemaking provisions of the Administrative Procedures Act (APA) (5 U.S.C. 553) and other pertinent public participation statutes. The court also stated that implementation of Executive Order 12548 through a rulemaking process, with the opportunity for public participation, would constitute compliance with the APA and the other pertinent statutes.

An environmental analysis (EA) has been prepared on the effects of the rulemaking. The issues discussed include: the methodology of the formula as compared to other fee alternatives; the impact of the fee on revenue to the government and associated appropriations for range improvements; the effect of the fee on public land grazing levels; the equity of the fee to ranchers who graze on public rangelands and those grazing only on private land; the impacts of fee changes on permittee asset values; the effects of fee changes on state and county payments; and the impact of the fee on state personal income and employment. These issues have been analyzed previously in the Grazing Fee Review and Evaluation Study issued in 1986. It was determined in the EA that there were no adverse socio-economic impacts. BLM also determined that the grazing fee has little effect on grazing levels on public land and a negligible effect on the public rangelands. Grazing fees determine the cost of resource use, but not the amount of resources used. Levels of resource use are established by BLM on the basis of resource conditions and mangement objectives. Copies of this EA and the Grazing Fee Review and Evaluation Study may be reviewed by the public in the BLM Division of Rangeland Resources, Room 909—Premier Building, 1725 I Street NW., Washington, DC.

The purpose of this proposed rulemaking is to meet the policy objectives set forth in the Taylor Grazing Act, the Federal Land Policy and Management Act, and the Public Rangelands Improvement Act, which remain vital. The objectives include achieving a fee level that is reasonable and promotes stability in the western livestock industry. The fee is intended to reflect annual changes in costs of production and to be equitable to both grazing permit holders and to the government. Finally, the fee formula is intended to have no negative environmental impacts.

This proposed rulemaking would provide that the fee for grazing livestock on public rangeland would be calculated for the grazing fee year 1988, and subsequent years, by the formula set out by the President of the United States in Executive Order 12548 of February 14, 1986. Unless the formula established by the rulemaking is changed, no additional rulemaking will be needed or published to establish the grazing fee for years subsequent to 1988 because this rulemaking addresses that matter. However, the amount of the fee will be announced each year in a **Federal Register** notice published in advance of the grazing fee year.

The principal author of this proposed rulemaking is Billy R. Templeton, Chief, Division of Rangeland Resources, Bureau of Land Management, assisted by staff of the Division of Legislation and Regulatory Management, Bureau of Land Management.

Based upon an environmental assessment and a finding of no significant impact, it is hereby determined that the publication of this proposed rulemaking is not a major Federal action significantly affecting the quality of the human environment and that a detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4322(2)(C)) is not required.

The Department of the Interior has determined that this document is not a major rule under Executive Order 12291 and no Regulatory Impact Analysis is required. The Department of the Interior has further determined that this

proposed rulemaking will not have a negative impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 60 *et seq.*). The provisions of this proposed rulemaking are applicable to anyone who possesses a grazing permit or lease on the public lands, without regard to the size of the operation.

This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*

Under the authority of the Taylor Grazing Act of 1934, as amended (43 U.S.C. 315 *et seq.),* the Federal Land Policy and Management Act of 1976, as amended (43 U.S.C. 1701 *et seq.*), the Public Rangelands Improvement Act of 1978 (43 U.S.C. 1901 *et seq.),* and Executive Order 12548 of February 1986, it is proposed to amend Section 4130.7, Part 4100, Group 4100, Subchapter D, Chapter II of Title 43 of the Code of Federal Regulations as set forth below:

List of Subjects in 43 CFR Part 4100

Administrative practice and procedure, Livestock, Penalties, Range management.

PART 4100—[AMENDED]

1. The authority citation for 43 CFR Part 4100 continues to read as follows:

Authority: 43 U.S.C. 315, 315a–315r, 1701 *et seq.,* 1181d, and 98 Stat. 1837.

2. Section 4130.7–1 is amended by adding paragraphs (a)(1), (a)(2) and (a)(3) to read as follows:

§ 4130.7–1 Payment of fees.

(a) * * *

(1) Except as provided in paragraphs (a)(2 and (a)(3) of this section, the calculated fee or grazing fee shall be equal to the $1.23 base established by the 1966 Western Livestock Grazing Survey multiplied by the result of the Forage Value Index (computed annually from data supplied by the National Agricultural Statistics Service) added to the Combined Index (Beef Cattle Price Index minus the Prices Paid Index) and divided by 100; as follows:

$$CF = \$1.23 \times \frac{FVI + BCPI - PPI}{100}$$

CF = Calculated Fee (grazing fee) is the estimated economic value of livestock grazing, defined by the Congress as fair market value (FMV) of the forage.

$1.23 = The base economic value of grazing on public rangeland established by the 1966 Western Livestock Grazing Survey.

FVI = "Forage Value Index" means the weighted average estimate of the annual rental charge per head per month for pasturing cattle on private rangelands in the 11 Western States (Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, and California) (computed by the Statistical Reporting Service from the June Enumerative Survey) divided by $3.65 and multiplied by 100;

BCPI = "Beef Cattle Price Index" means the weighted average annual selling price for beef cattle (excluding calves) in the 11 Western States (Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, and California) for November through October (computed by the Statistical Reporting Service) divided by $22.04 per hundred weight and multiplied by 100; and

PPI = "Prices Paid Index" means the following selected components from the Statistical Reporting Service's Annual National Index of Prices Paid by Farmers for Goods and Services adjusted by the weights indicated in parentheses to reflect livestock production costs in the Western States: 1. Fuels and Energy (14.5); 2. Farm and Motor Supplies (12.0); 3. Autos and Trucks (4.5); 4. Tractors and Self-Propelled Machinery (4.5); 5. Other Machinery (12.0); 6. Building and Fencing Materials (14.5); 7. Interest (6.0); 8. Farm Wage Rates (14.0); 9. Farm Services (18.0).

(2) Any annual increase or decrease in the grazing fee for any given year shall be limited to not more than plus or minus 25 percent of the previous year's fee.

(3) The grazing fee for any year shall not be less than $1.35 per animal unit month.

* * * * *

October 1, 1987.

J. Steven Griles,

Assistant Secretary of the Interior.

BILLING CODE 4310–84–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 650

Atlantic Sea Scallop Fishery

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Modification of notice of availability of an amendment to the fishery management plan.

SUMMARY: NOAA announces that Amendment 2 to the Fishery Management Plan for Atlantic Sea Scallops (FMP) has been returned by the Secretary of Commerce to the New England Fishery Management Council, because it did not meet all legal requirements of the Magnuson Fishery Conservation and Management Act, as amended. If the Council resubmits the amendment, another notice of availability will be published and the public will be given 30 days to comment.

DATE: Amendment 2 was returned on September 29, 1987. The Council may resubmit this amendment at any time.

ADDRESS: A copy of Amendment 2 and its proposed regulations may be requested from Douglas G. Marshall, Executive Director, New England Fishery Management Council, Sontaug Office Park, 5 Broadway (Route 1), Saugus, MA 01906. Comments should be sent to the same address.

FOR FURTHER INFORMATION CONTACT: Peter Colosi, Atlantic Sea Scallop FMP Coordinator, 617–281–3600.

SUPPLEMENTARY INFORMATION: The Council submitted Amendment 2 to the Secretary on September 15, 1987. It was returned on September 29, 1987, because it did not meet all legal requirements of the Magnuson Act. The Council may revise and resubmit this amendment at any time.

NOAA published a notice of availability (52 FR 35464, September 21, 1987) which outlined the purpose of the amendment, i.e., to provide for adjusting the meat count standard for Atlantic sea scallops during October through January to allow for weight loss during their spawning period. The public is invited to comment to the Council while it is revising Amendment 2. When the amendment is resubmitted, another notice of availability of the amendment will be published (followed within two weeks by its proposed implementing regulations). Under section 304(b)(3)(B)(ii) of the Magnuson Act, the public will have only 30 days to obtain and comment on the resubmitted amendment.

(16 U.S.C. 1801 *et seq.*)

Dated: October 2, 1987.

Bill Powell,

Executive Director, National Marine Fisheries Service.

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

October 2, 1987.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) title of the information collection; (3) form number(s), if applicable; (4) how often the information is requested; (5) who will be required or asked to report; (6) an estimate of the number of responses; (7) an estimate of the total number of hours needed to provide the information; (8) an indication of whether section 3504(h) of Pub. L. 96–511 applies; (9) name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Department Clearance Officer, USDA, OIRM, Room 404-W, Admin. Bldg., Washington, DC 20250, (202) 447–2118.

Comments on any of the items listed should be submitted directly to: Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, Attn: Desk Officer for USDA.

If you anticipate commenting on a submission but find that preparation time will prevent you from doing so promptly, you should advise the OMB Desk Officer of your intent as early as possible.

Articles of Quota Cheese; Quarterly Determination and Listing of Foreign Government Subsidies

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Publication of quarterly update of foreign government subsidies on articles of quota cheese.

SUMMARY: The Department of Commerce, in consultation with the Secretary of Agriculture, has prepared a quarterly update to its annual list of foreign government subsidies on articles of quota cheese. We are publishing the current listing of those subsidies that we have determined exist.

EFFECTIVE DATE: October 1, 1987.

FOR FURTHER INFORMATION CONTACT: Patricia W. Stroup or Paul J. McGarr, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230, telephone: (202) 377–2786.

SUPPLEMENTARY INFORMATION:

Section 702(a) of the Trade Agreements Act of 1979 ("the TAA") require the Department of Commerce ("the Department") to determine, in consultation with the Secretary of Agriculture, whether any foreign government is providing a subsidy with respect to any article of quota cheese, as defined in section 701(c)(1) of the TAA, and to publish an annual list and quarterly updates of the type and amount of those subsidies.

The Department has developed, in consultation with the Department of Agriculture, information on subsidies (as defined in section 702(h)(2) of the TAA) being provided either directly or indirectly by foreign governments on articles of quota cheese.

In the current quarter the Department has determined that the subsidy amounts have changed for each of the countries for which subsidies were identified in our July 1, 1987 quarterly update to our annual subsidy list. The appendix to this notice lists the country, the subsidy program or programs, and the gross and net amount of each subsidy on which information is currently available.

The Department will incorporate additional programs which are found to constitute subsidies, and additional information on the subsidy programs listed, as the information is developed.

The Department encourages any person having information on foreign government subsidy programs which benefit articles of quota cheese to submit such information in writing to the Deputy Assistant Secretary for Import Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

This determination and notice are in accordance with section 702(a) of the TAA (19 U.S.C. 1202 note).

Gilbert B. Kaplan,

Deputy Assistant Secretary, Import Administration.

Date: October 1, 1987.

APPENDIX.—QUOTA CHEESE SUBSIDY PROGRAMS

Country	Program(s)	Gross [1] subsidy (cents per pound)	Net [2] subsidy (cents per pound)
Belgium	European Community (EC) Restitution Payments	21.4	21.4
Canada	Export Assistance on Certain Types of Cheese	26.3	26.3
Denmark	EC Restitution Payments	25.0	25 0
Finland	Export Subsidy	103.9	103.9
	Indirect Subsides	18.9	18.9
France	EC Restitution Payments	122.8	122.8
Ireland	EC Restitution Payments	20.1	20.1
Italy	EC Restitution Payments	17.1	17.1
Netherlands	EC Restitution Payments	43.4	43.4
Luxembourg	EC Restitution Payments	14.8	14.8
Norway	Indirect (Milk) Subsidy	21.4	21.4
	Consumer Subsidy	18.2.3	18.2
		40.3	40.3
Spain	EC Restitution Payments	58.5	58.5
Switzerland	Deficiency Payments	17.3	17.3
U.K.	EC Restitution Payments	96.1	96.1
W. Germany	EC Restitution Payments	17.7	17.7
		17.0	17.0

Postponement of Preliminary Countervailing Duty Determinations; Certain Granite Products From Italy and Spain

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: Based upon the request of petitioner, the Ad Hoc Granite Trade Group, the Department of Commerce is postponing its preliminary determinations in the countervailing duty investigations of certain granite products from Italy and Spain. The preliminary determinations will be made on or before November 12, 1987.

EFFECTIVE DATE: October 7, 1987.

FOR FURTHER INFORMATION CONTACT: Loc Nguyen, Lori Cooper or Barbara Tillman, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 377-0167, 377-8320 or 377-2438.

SUPPLEMENTARY INFORMATION: On August 17, 1987, the Department initiated countervailing duty investigations on certain granite products from Italy and Spain. In our notices of initiation we stated that we would issue our preliminary determinations on or before October 21, 1987 (52 FR 31651-31653, August 21, 1987).

On September 23, 1987, the petitioner filed a request that the preliminary determinations in these investigations be postponed for 21 days.

Section 703(c)(1)(A) of the Tariff Act of 1930, as amended (the Act), provides that the preliminary determination in a countervailing duty investigation may be postponed where the petitioner has made a timely request for such a postponement. Pursuant to this provision, and the timely request by petitioner in these investigations, the Department is postponing its preliminary determinations to no later than November 12, 1987.

This notice is published pursuant to section 703(c)(2) of the Act.

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

October 1, 1987.

BILLING CODE 3510-DS-M

National Oceanic and Atmospheric Administration

Caribbean Fishery Management Council; Atlantic Billfish Public Hearings

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of public hearings and request for comments.

SUMMARY: The Caribbean Fishery Management Council (Council) will hold public hearings and provide a comment period to solicit public input into the development of a Fishery Management Plan for Billfish. This plan is being developed jointly between the South Atlantic, New England, Gulf of Mexico, Mid-Atlantic and the Caribbean Fishery Management Councils. Interested persons are invited to attend the hearings and participate. Copies of documents pertaining to the hearings will be available from the Council upon request.

DATE: Written comments on the proposed plan must be received on or before November 2, 1987. The hearings are scheduled as follows:

U.S. Virgin Islands

1. Wednesday, October 14, 1987, 7:30 p.m., Christiansted, St. Croix.

VOL 52 ISS 194 OCT 7 1987 UMI

2. Thursday, October 15, 1987, 7:30 p.m., Charlotte Amalie, St. Thomas.

Puerto Rico

3. Tuesday, October 20, 1987, 7:30 p.m., Hato Rey, Puerto Rico.

4. Wednesday, October 21, 1987, 2:00 p.m., Lajas, Puerto Rico.

ADDRESSES: Written comments should be mailed or delivered to the Caribbean Fishery Management Council, Suite 1108, Banco de Ponce Building, Hato Rey, Puerto Rico 00918. The hearings will be held at the following locations:

U.S. Virgin Islands

1. Christiansted—Conference Room, Legislature Building, Christiansted, St. Croix.

2. Charlotte Amalie—Conference Room, Legislature Building, Charlotte Amalie, St. Thomas.

Puerto Rico

3. Hato Rey—Colegio de Ingenieros y Agrimensores, Roosevelt Development, Hato Rey, Puerto Rico.

4. Lajas—La Parguera Hotel, La Parguera, Lajas, Puerto Rico.

FOR FURTHER INFORMATION CONTACT: Omar Munoz-Roure, Executive Director, Caribbean Fishery Management Council, 809–753–4926.

Dated: October 2, 1987.

Richard H. Schaefer,

Acting Director for Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–M

Deep Seabed Mining; Proposed Revisions to Mine Site Areas

AGENCY: National Oceanic and Atmospheric Administration; Commerce.

ACTION: Notice of proposed amendments to Deep Seabed Mining Exploration Licenses and request for comments.

SUMMARY: Pursuant to the Deep Seabed Hard Mineral Resources Act (Pub. L. 96–283) and 15 CFR Part 970, the National Oceanic and Atmospheric Administration (NOAA) published notice on September 13, 1984, at 49 FR 35973, of issuance of licenses to Ocean Minerals Company (OMCO), Ocean Management, Inc. (OMI), and Ocean Mining Associates (OMA), to engage in deep seabed mining exploration activities, subject to terms, conditions, and restrictions. These license sites, designated USA–1, USA–2 and USA–3, respectively, are located in the Clarion-Clipperton Fracture Zone of the North-eastern Equatorial Pacific Ocean. At the request of the deep seabed mining consortia, and pursuant to 15 CFR 970.902(d)(5), NOAA published the precise locations of the licensed areas on November 13 and 30, 1984, at 49 FR 44938 and 49 FR 47081, December 11, 1984, at 49 FR 48205, and January 8, 1985 at 50 FR 994.

The above U.S. licensees have sgreed recently to several small adjustments to their respective boundaries in order to resole conflicts with foreign mining interests. Each of these licensees has requested that NOAA approve proposed modifications to its exploration are and otherwise revise its license in order to carry out the conflict resolution. Under the provisions of 15 CFR 970.512 through 970.514, NOAA has determined, as to each license, that the proposed modifications are not significant changes and that the procedures in 15 CFR 970.514(b) apply. Accordingly, NOAA gives notice of its intention to accommodate these area adjustments by means of modifications of license terms, conditions and restrictions (TCRs), as well as relinquishment and revision as appropriate.

Each proposed exploration plan revision conists of boundary changes. Exploration strategies, the proposed schedule of activities, and other basic plan elements generally are not affected. The revision to license USA–1 includes the addition of new area to compensate for agreed-to adjustments in the original area. The revision to license USA–2 includes relinquishment of a small area which is proposed to be added to the area covered by the license designated USA–1. NOAA proposes to accomplish other area adjustments by means of modification of license TCRs to restrict exploration actiities in area to be used by another operator, and to establish measures to oversee, and to provide for contingencies relating to, implementation of conflict resolution. All existing license TCRs would remain in effect.

USA–1, Issued to Ocean Minearals Company

The license would be amended, resulting in a change in operating area from approximately 165,533 square kilometers to approximately 168.841 square kilometers; an addition of approximately 3,308 square kilometers.

USA–2, Issued to Ocean Management, Inc.

The license would be amended, resulting in a change in operating area from approximately 135,100 square kilometers to aproximately 112,500 squate kilometers; a reduction of approximately 22,600 square kilometers.

USA–3 Issued to Ocean Mining Associates.

The license would be amended, resulting in a change in operating area from approximately 156,060 square kilometers to approximately 150,310 square kilometers; a reduction of approximately 5,750 square kilometers.

Subject to 15 CFR 970.902, which excludes confidential information from public disclosure, interested persons are permitted to examine the materials relevant to these revisions. Comments on this notice should be received on or before December 7, 1987.

FOR FURTHER INFORMATION CONTACT: John W. Padan, Ocean Minerals and Energy Division, Ofice of Ocean and Coastal Resource Management, National Ocean Servcie, NOAA, 1825 Connecticut Avenue, NW., Suite 710, Washington, DC. 20235. (202) 673–5117.

Dated: October 1, 1987.

James P. Lawless,

Acting Director, Office of Ocean and Coastal Resource Management.

BILLING CODE 3510–12–M

Public Meeting on Final Management Plan For the Proposed Waquoit Bay National Estuarine Research Reserve

AGENCY: Marine and Estuarine Management Division, Office of Ocean and Coastal Resource Management, National Ocean Service, National Oceanic and Atmospheric Administration, Commerce.

ACTION: Public meeting notice.

SUMMARY: Notice is hereby given that the Department of Environmental Management, Executive Office of Environmental Affairs of the Commonwealth of Massachusetts, will hold a public meeting to present and discuss the proposed final management plan for the proposed Waquoit Bay National Estuarine Research Reserve. The purpose of the meeting is to receive the views of interested parties on the final management plan.

As part of the procedures leading to the designation of the reserve, the State of Massachusetts must submit the proposed final management plan to NOAA for its review and approval. Copies of the plan will be made

available for review before the meeting by Friday, October 2, 1987 at the East Falmouth Library, the Mashpee Library, and the Mashpee and Falmouth Town Halls.

The meeting will be held on Thursday, October 8, 1987 at 8:00 p.m. in the Falmouth High School Auditorium, Gifford Street, Falmouth, Massachusetts.

FOR FURTHER INFORMATION CONTACT: Art Jeffers, Marine and Estuarine Management Division, Office of Ocean and Coastal Resource Management, NOS/NOAA, 1825 Connecticut Avenue NW., Washington, DC, 202/673–5126.

(Federal Domestic Assistance Catalog Number 11.420 National Estuarine Reserve Research System)

Date: September 30, 1987.

James P. Blizzard,

Acting Director, Office of Ocean and Coastal Resource Management.

BILLING CODE 3510–08–M

Western Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The Western Pacific Fishery Management Council's Crustacean Plan Monitoring Team will convene a public meeting, October 9, 1987, at 10:30 a.m., at 1164 Bishop Street, Room 602, Honolulu, HI. The public meeting will focus on the fishery management plan for spiny lobsters in the Western Pacific Region. Topics of discussion are: (1) Preliminary results of this year's stock assessment cruise, (2) reports 3 and 4 from Phase I research of the Northwestern Hawaiian Islands (NWHI) lobster fishery, (3) how different management measures affect the NWHI lobster fishery, (4) year-to-date catch, effort, and activity data, (5) the status of Amendment 5, and (6) an informational workshop for fishermen on how different management measures will affect the NWHI lobster fishery.

For further information contact Kitty Simonds, Executive Director, Western Pacific Fishery Management Council, 1164 Bishop Street, Room 1405, Honolulu, HI 96813; telephone: (808) 523–1368.

Date: October 2, 1987.

Richard H. Schaefer,

Acting Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

BILLING CODE 3510–22–M

DEPARTMENT OF DEFENSE

Department of the Army

Availability of the Final Supplemental Environmental Impact Statement for Binary Chemical Munitions Project, QL and DC Production Facilities

AGENCY: Department of the Army, DOD.

ACTION: Notice of Availability of the Final Supplemental Environmental Impact Statement for the Binary Chemical Munitions Project, QL and DC Production Facilities. QL is a nonlethal chemical component used in the VX2 family of binary munitions. DC is a feedstock chemical used to manufacture DF. DF is a nonlethal chemical component used in the G-agent family of binary munitions.

1. Summary: The Original Notice of Intent (51 FR 26291–26292, July 17, 1986) provided notice that the Army, pursuant to the National Environmental Policy Act (NEPA), and its implementing regulations, was to prepare a Supplemental Environmental Impact Statement (SEIS) tiered to the Final Programmatic Environmental Impact Statement, Binary Chemical Munitions Program (47 FR 6318). The SEIS analyzes the potential environmental impacts associated with alternatives for providing production facilities to manufacture phosphorus chemical precursors for binary chemical munitions. A combined acquisition strategy is being pursued in support of the Department of Defense's Binary Munitions Project. This includes production of QL, a nonlethal binary precursor chemical, and DC, a feedstock intermediate chemical used to manufacture DF, another nonlethal binary precursor chemical.

2. The draft SEIS covered five sites under consideration as production alternatives for the intermediate chemical DC. The draft SEIS was published in 52 FR 15366. The sites are the U.S. Army Newport Army Ammunition Plant, Newport, Indiana; U.S. Army Pine Bluff Arsenal, Pine Bluff, Arkansas; U.S. Army Phosphate Development Works, Muscle Shoals, Alabama; a commercial site in West Helena, Arkansas; and a commercial site in Lake Charles, Louisiana. Three of the sites, Newport Army Ammunition Plant, Pine Bluff Arsenal, and West Helena, are also under consideration as production alternatives for the precursor chemical, QL, and as candidates for dual QL and DC production.

3. The Draft SEIS combined the analysis for QL and DC in one document and supersedes prior notices 50 FR 12853 (QL) and 50 FR 21916 (DC) which announced separate analyses for the production of these chemicals.

4. The FSEIS designates Pine Bluff Arsenal as the preferred alternative for the production of DC and QL.

5. The Final SEIS for the Binary Munitions Project, QL and DC Production Facilities, is available for public review and comment. A copy of the document may be obtained from the Office of the Program Manager by contacting Ms. Marilyn Tischbin at commercial telephone (301) 671–3629, or by writing to the following address: Office of the Program Manager for Binary Munitions, ATTN: AMCPM, Aberdeen Proving Ground, MD 21010–5410. Written comments and any request for a public meeting should be submitted to the same address.

6. The time period for providing written comments on preparing the final SEIS will end 30 days from the date the Environmental Protection Agency publishes this Notice of Availability in the **Federal Register.**

Lewis D. Walker,

Deputy for Environment, Safety and Occupational Health OASA (I&L).

BILLING CODE 3710–08–M

Availability of the Draft Supplemental Environmental Impact Statement for the Johnston Atoll Chemical Agent Disposal System (JACADS)

October 2, 1987.

AGENCY: Department of the Army, DOD.

ACTION: Notice of Availability of the Draft Supplemental Environmental Impact Statement (DSEIS) covering the disposal of process wastes generated from the operation of the Johnston Atoll Chemical Agent Disposal System (JACADS).

1. In 1983, the Army issued a Final EIS for the JACADS project. The Final EIS identified the process (incineration) and the location on Johnston Island for the JACADS facility, which will demilitarize obsolete/unserviceable chemical munitions containing the chemical agents VX, GB, and HD, beginning in 1989. The ultimate disposition of JACADS process wastes was not determined in 1983, pending further study. These process wastes contain no chemical agent.

2. The DEIS explores alternatives for final disposition of JACADS process wastes. This DSEIS does not indicate a Preferred Alternative for waste disposal. The analysis of public comments will

aid in selecting the preferred disposal alternative.

3. Waste disposition alternatives that are considered in the DSEIS for JACADS process wastes include the following:

(a) Liquid scrubber waste disposal—
(1) Ocean discharge of brine by surface vessel
(2) Ocean discharge of brine through an outfall
(3) Dry the brine to salts, drum, store temporarily at Johnston Atoll (JA) and ship to US landfill
(4) Dry the brine to salts and store at JA (no action)

(b) Solid waste disposal—
(1) Off-island shipment and/or sale of scrap metal
(2) Ocean disposal of scrap metal
(3) Land filling of scrap metal
(4) On-island use of encapsulated waste
(5) Ocean disposal of encapsulated waste
(6) Shipment of ash, fiberglass, and non-saleable metal/mixed waste to a US landfill
(7) On-site storage of ash, fiberglass, and non-saleable metal/mixed waste (no action)

4. The DSEIS is now available for comment. Copies can be obtained by writing (1) Program Executive Officer-Program Manager for Chemical Demilitarization, ATTN: SAPEO-CDT-A/Mr. Richard Rife, Building E4585, Aberdeen Proving Ground, MD 21010–5401, or (2) Commander, U.S. Army Engineer Division, Pacific Ocean, ATTN: PODED-PV, Ft. Shafter, HI 96858–5440. Comments for consideration by the Army in the final document should be provided in writing to Mr. Richard Rife, at the first address given above. The DSEIS will have a 60 day comment period.

5. The Environmental Protection Agency (EPA) will also publish a Notice of Availability for this Draft Supplemental Environmental Impact Statement in the **Federal Register**.

Lewis D. Walker,

Deputy for Environment, Safety and Occupational Health OASA (I&L).

BILLING CODE 3710–08–M

Defense Logistics Agency

Privacy Act of 1974; New System of Records Established for Computer Matching Purposes to Implement Debt Collection Actions Under the Debt Collection Act of 1982; Republication

[**Editorial Note**: The following document was originaly published at page 36606 in the issue of Wednesday, September 30, 1987. The document is being republished in its entirety to correct footnotes 1 and 2.]

AGENCY: Defense Manpower Data Center (DMDC), Defense Logistics Agency, DoD.

ACTION: This action constitutes notice for public comment of a new system of records established for computer matching purposes by interagency agreement to assist Federal creditor agencies implement debt collection actions under the Debt Collection Act of 1982.

SUMMARY: The Defense Manpower Data Center, Defense Logistics Agency, Department of Defense, is proposing a new record system established under an interagency agreement, devoted exclusively for debt collection efforts under the Debt Collection Act of 1982, in order to conduct computer matching with Federal creditor agencies for the purpose of identifying and locating individuals receiving Federal salaries or other Federal benefit payments and indebted to the U.S. Government. This new record system will identify delinquent debtors and allow Federal creditor agencies to initiate prompt collection action by contacting the debtors for voluntary repayment or pursue involuntary offset procedures against the employees' wages.

DATES: This proposed action shall be effective on or before October 30, 1987, unless comments are received that would result in a contrary determination.

ADDRESS: Send any comments to Mr. Aurelio Nepa, Jr., Staff Director, Defense Privacy Office, Room 205, 400 Army Navy Drive, Arlington, VA 22202. Telephone: (202) 694–3027, Autovon: 224–3027.

SUPPLEMENTARY INFORMATION: The establishment of this new system of records was accomplished after study, planning and coordination of an interagency working group and resulted in an interagency agreement for the Federal Salary Offset Initiative to improve and implement debt collection efforts by Federal agencies. The interagency agreement, with attachments, is published in full text below and proposes a central location for records to be matched. This central focus on the use of computer matching techniques as a tool will permit any Federal creditor agency that may wish to avail itself of this opportunity in its efforts on collection of delinquent debts. Federal creditor agencies interested in participating should contact the record system manager reflected in the system notice and should strictly follow the guidelines set forth in the attachments of the interagency agreement.

The Defense Logistics Agency systems of records notices subject to the Privacy Act of 1974 (5 U.S.C. 552a) have been published in the **Federal Register** as follows:

FR Doc. 85–10237 (50 FR 22897) May 29, 1985 (Compilation)
FR Doc. 85–30123 (50 FR 51898) December 20, 1985
FR Doc. 86–17259 (51 FR 27443) July 31, 1986
FR Doc. 86–19035 (51 FR 30104) August 22, 1986
FR Doc. 87–21654 (52 FR 35304) September 18, 1987

A new system report, as required by 5 U.S.C. 552a(o) of the Privacy Act of 1974 was submitted on September 18, 1987 to the Administrator, Office of Information and Regulatory Affairs, OMB, the President of the Senate, and the Speaker of the House of Representatives, pursuant to paragraph 4b of Appendix I to OMB Circular No. A–130, "Federal Agency Responsibilities for Maintaining Records About Individuals," dated December 12, 1985 (50 FR 52730, December 24, 1985) and paragraph 5.f.(1) of the OMB "Revised Supplemental Guidance for Conducting Matching Programs," dated May 11, 1982 (47 FR 21656, May 19, 1982).

Patricia H. Means,

OSD Federal Register Liaison Officer, Department of Defense.

September 24, 1987.

Interagency Agreement for Federal Salary Offset Initiative Implementation of the Debt Collection Act of 1982

The Office of Management and Budget (OMB) has established an Interagency Working Group for the Federal Employee Salary Offset Initiative. It is to assist Federal agencies in identifying Federal employees and others receiving Federal compensation who are delinquent debtors to such agencies. It has been established as a mechanism to enforce the provisions of the Debt Collection Act of 1982.

The Interagency Working Group shall consist of the following agencies: The Financial Management Service, the Office of Management and Budget, the Department of Defense (DoD), and the Office of Personnel Management (OPM). The Department of the Treasury shall serve as lead agency.

The OPM shall provide the DoD with current automated files on all personnel employed or compensated by the Federal Government. The Department of Transportation and the U.S. Postal Service may in the near future provide DoD with similar files of all employed

personnel at the U.S. Coast Guard and the Postal Service.

The DoD, Defense Manpower Data Center (DMDC) shall use the above separate data bases on Federal employment and Federally compensated persons. They shall establish and maintain the capability to respond to inquiries from Federal creditor agencies about identifying data about persons who are delinquent in a debt to the Federal Government.

The agencies who are members of the Group in coordination with OMB, shall develop and publish operating procedures. These procedures will include strict compliance with the Debt Collection Act of 1982 and the Privacy Act of 1974.

When the Working Group becomes operational, all creditor agencies will be requested to submit to the Group names of persons against whom they have determined to have a clear valid claim.

Interagency Agreement for Federal Salary Offset Initiative

Background

The Debt Collection Act of 1982, (Pub. L. 97–365), provided an administrative mechanism for Federal Agencies to collect delinquent debts owed by individuals receiving salary or similar compensation from the Federal Government. Delinquent debts can be collected via an involuntary offset to salaries and pensions of fifteen percent disposable income. It is clearly the policy of the Administration that Federal employees should honor their just debts and that the provisions of the Debt Collection Act be used where voluntary compliance is not forthcoming. The utilization of computer matching programs is key to the ability of various Federal agencies to identify and locate delinquent debtors receiving offsetable payments from various Federal sources. Efforts to date under the Debt Collection Act have for the most part been bilateral between selected agencies having delinquent debtors and other agencies having records on large numbers of individals receiving various forms of Federal compensation.

Purpose

The purpose of this agreement is to bring a central focus on the use of computer matching techniques as a tool for the collection of delinquent debts. While it is clearly preferable to receive voluntary repayment of such debts from individuals who may be identified through computer matching, it is recognized that involuntary offset procedures under the provisions of the Debt Collection Act will be utilized when voluntary repayment is not forthcoming. The Office of Management and Budget (OMB) has designated the Department of the Treasury, Financial Management Service, as the Lead Agency to coordinate and monitor the implementation of the government's Federal Salary Offset program.

This agreement, restricted exclusively to the implementation of the Debt Collection Act, is intended to establish an Interagency Working Group to facilitate computer matching and subsequent salary offset throughout the Federal government under the auspices and oversight of the Office of Management and Budget (OMB). The Interagency Working Group will be chaired by Treasury and will consist of those agencies having records on individuals receiving Federal compensation offsetable under the Debt Collection Act. At the outset, the members of the Interagency Working Group will consist of the Department of Treasury, Office of Personnel Management (OMB), and the Department of Defense (DoD).

Objectives

It is recognized at the outset that computer matching can be conducted most efficiently if there is central location for records to be matched. Such centralization will eliminate duplication in data processing, in the negotiation of required Memoranda of Understanding between agencies, and in the publication of various announcements in the **Federal Register** which are required by the Privacy Act of 1974, as amended, and by the OMB Guidelines on Computer Matching. It is further recognized and agreed upon that no data base will be used for any other purposes other than that authorized by the Debt Collection Act. No single agency (e.g. DoD) maintaining the data bases as the matching agency shall have sole responsibility for determining what other uses shall be made of records in its custody received from another source agency. These activities shall be controlled as a policy matter by the Interagency Working Group, with each of the member agencies retaining control of the uses made of its own records.

An additional objective of this agreement is to establish procedures for sharing the work load and financial burden associated with computer matching subsequent salary offset among those members of the Interagency Working Group as well as among those other Federal creditor agencies who will utilize the resources of the Interagency Working Group to recover funds owed them. Attachment A, Roles and Responsibilities, and Attachment B, Example of Interagency Memorandum of Understanding (MOU) to Perform a Debt Collection Computer Matching Program, establish the procedures to be utilized to ensure a sharing of this burden.

It is a basic tenant of this effort that all matching activities, access to and disclosure of records, and efforts to recover funds owed will be undertaken in strict compliance with the Privacy Act, the OMB publications "Revised Supplemental Guidance for Conducting Matching Programs" and "Guidelines on the Relationship Between the Privacy Act of 1974 and the Debt Collection Act of 1982," and the due process and other provisions of the Debt Collection Act and applicable regulations.

Reporting Relationships

In its role as both the designated Lead Agency and the Chair of the Interagency Working Group, the Department of the Treasury will be responsible for establishing reporting requirements for the Interagency Working Group, for those Federal agencies which utilize the services of the group, and also, for reporting periodically to OMB on progress made and problems encountered in administering this program.

Agency roles and responsibilities are as follows:

Treasury Financial Management Service (FMS), lead agency, will

coordinate and monitor the implementation of the government's Federal Salary Offset program. FMS will:

- Chair the Interagency Working Group.
- Establish reporting requirements for the Interagency Working Group, agencies submitting delinquent debtor files for matching, and employing agencies.
- Report periodically to OMB and Treasury management regarding the progress of this initiative.
- Coordinate with participating agencies processing for all phases of the matching and offset procedures to ensure timely completion.
- Assist OMB in monitoring compliance with Privacy Act requirements and OMB published guidance.
- Assure agency compliance with reporting requirements on collection activity.
- Assist agencies in resolving any problems which might otherwise impede implementation of this initiative.

The Department of Defense (DoD) will:

- Negotiate the Memoranda of Understanding (example shown as Attachment B) for the matches with each agency providing the delinquent debtor file. DOD will receive and approve a Memorandum of Understanding from each creditor agency for the conduct of the match. It is in these agreements that specifics for reimbursement of DoD for costs related to the match will be contained.
- Publish a notice to match in the **Federal Register** on or about the time of the match in conformance with OMB matching guidelines.
- Perform the computer matching runs as matching agency, utilizing delinquent debtor files provided by, but not limited to, the Departments of Agriculture, Education, Housing and Urban Development, and by the Veterans Administration and Small Business Administration. DoD will match these files against civilian and retired employment files provided by the Office of Personnel Management, as well as, DoD civilian and active, retired and reserve military personnel files.
- Report the volume and dollar total of raw hits for each creditor agency match by employing agency of record to the Financial Management Service, Department of the Treasury.
- Provide a quarterly schedule of when creditor agencies are to be matched to the agencies providing the employment files.

The Office of Personnel Management will provide updated active and retired employment files on a recurring basis for matching in accordance with its agreed upon schedule with DoD.

The Office of Management and Budget will monitor privacy act compliance as a part of its ongoing oversight review responsibility.

Each creditor agency participating in the salary offset program and providing files for matching will:

- Enter into a reimbursable agreement with DoD for matching. The Agencies will draft Memorandum of Understanding for DoD approval.
- Transmit to DoD only the delinquent debtor file to be matched containing the agreed upon record fields to be matched, accompanied by format specifications enabling the match.

Each agency will designate a primary and alternate point of contact for this initiative.

Attachment B.—Example of Inter-Agency Memorandum of Understanding (MOU) To Perform a Debt Collection Computer Matching Program

Purpose

The purpose of this Memorandum of Understanding (MOU) is to establish, before any matching takes place, administrative procedures and assign responsibility for a government-wide debt collection computer matching program. The matches will be performed at the Defense Manpower Data Center (DMDC) utilizing employment records provided by the Department of Defense and the Office of Personnel Management. The employment records will be matched with records of individuals delinquent in their debt to the Federal government as supplied by the signatory creditor agency to this MOU.

General

Under authority of the Debt Collection Act of 1982, and other applicable regulations, the head of a Federal agency may request that deductions be made from the pay of an employee or member delinquent in his/her debt to the United States. This matching program will facilitate the identification of the delinquent debtor employees and members by the employment records at one location (DMDC). The matches will be performed to allow the creditor agency to receive a current home or work address in order to issue the required due process notice. The creditor agency will be responsible for sending the request for offset to the employing agency. These procedures are expected to shorten the collection agency timeframes and reduce confusion due to utilizing standard formats and procedures.

Responsibilities

Defense Manpower Data Center shall:

- Establish and maintain a system of records (S322.11 DLA–LZ, Federal Creditor Agency Debt Collection Data Base) devoted exclusively for Federal debt collection efforts containing, at the onset, a data bank record of DoD active and retired military members, including the Reserve, National Guard, and the OPM Government-wide Federal civilian and retired civilian records for computer matching purposes with any Federal creditor agency that may wish to avail itself of this opportunity to utilize this resource.
- Assure before any matching takes place that the participating creditor agency has published a system of records notice in the **Federal Register** with an adequate routine use permitting disclosure of delinquent debtor records for computer matching purposes and that DMDC publishes a proper notice of the proposed match for public comment, including the starting date, as required by the OMB Computer Matching Guidelines.
- Provide name, social security number, demographic information and current address based on a match of social security number to the creditor agency within thirty (30) days of the start of the match.
- Bill the creditor agency for match reimbursement.

The Federal Creditor Agency shall:

- Provide to DMDC before any matching occurs a copy of the full text notice of the record system(s), and any amendments thereto, originally published in the **Federal Register** (not from Privacy Act Issuances Compilation) containing an appropriate routine use authorizing the disclosure of debtor records to DMDC(DoD) for the purpose of conducting a computer matching program.[1]
- Provide only delinquent debtor records to DMDC in an agreed upon format with any specific instructions as to the control and final disposition of the creditor agency records upon completion of the match.[2]

---

[1] *Model "Routine Use" for record system notice of creditor agency to disclose records of debtors to DMDC for conducting computer matching programs.*

To the Defense Manpower Data Center, Department of Defense, to conduct computer matching programs for the purpose of identifying and locating individuals who are receiving Federal salaries or benefit payments and delinquent in their repayment of debts owed to the U.S. Government under certain programs administered by the * * * (insert Federal creditor agency name) * * * in order to collect the debts under the provisions of the Debt Collection Act of 1982, (Pub. L. 97–365) by voluntary repayment, or by administrative or salary offset procedures.

[2] *Procedures for participation in matching program.*

General

All computer matches are performed at the Defense Manpower Data Center (DMDC) in Monterey, CA using an IBM computer system located at the Naval Postgraduate School (NPS) in Monterey, CA. Computer files of Active Duty, Retired and Reserve members, Federal Civil Service employees and retirees are maintained at the NPS Computer Center and are updated on a quarterly (for DoD files) or semiannual (for other files) basis. All file matching is performed using the full nine (9) digit social security number as the determinate.

Participation and Contract Point

All Federal agencies are eligible to participate in the matching program after entering into a written memorandum of understanding (MOU) with DMDC. A sample MOU is included in this notice. Signed agreements should be sent to: Kenneth C. Scheflen, Director, Defense Manpower Data Center, 1600 N. Wilson Blvd., Suite 400, Arlington, VA 22209–2593, Telephone (202) 696–5816.

Technical inquiries can be directed to Debt Collection Project Leader, Stewart Reiman, telephone (408) 646–2951.

Legal or policy questions can be directed to Don Rouse, Treasury FMS—telephone (202) 634–2031.

Data Information

All data submitted for a match must consist only of delinquent debts of individuals indebted under a Federal Program. At a minimum, the data must contain: Social Security Number, Name of Debtor (Last, First, MI), Amount of Delinquent Debt.

—The matching agency will provide to the creditor agency summary totals and dollar amounts of raw hits.

—Matching will be on SSN, and validated using the name. The natching agency will identify for the

Continued

• Assure by proper certification or statement that due process has been, or shall be, given upon locating the debtor prior to requesting any administrative or salary offset procedures according to the Debt Collection Act of 1982, 4 CFR Chapter II, 5 CFR 550.1101–.1108, and any other applicable regulations of the creditor agency.

• Provide quarterly reports to DMDC on collection activity resulting from hits of the matches in a format and content as agreed upon jointly by DMDC and the creditor agency.

• Assure that proper reimbursement is made to DoD in accordance with schedule of charges.

• Designate a primary and an alternate contact point with full name, title, address and telephone number.

Reimbursement for Match

Costs of the file maintenance, computer time and staff time for the matching effort will be reimbursed by the creditor agency to DMDC according to the following schedule of charges:

Schedule of Charges

$500 flat fee per match plus $.25 per "hit" record.

Data Security

Both the creditor agency and DMDC will safeguard individual data as required by the Privacy Act of 1974 and the OMB computer matching guidelines. Data security extends to non-hit records which will not be used for any purpose. Hard copy records will be stored in lockable desks or file cabinets and automated records will be stored in limited access computer facilities.

Duration of Agreement

This MOU will remain in force unless notified or terminated in writing by both agencies.

For
(Creditor Agency)

creditor agency invalid hits because of garbled data, incorrect SSN, same SSN, different name, etc.

—The matching agency will transmit to the creditor agency the matched records containing the following data elements from the employment records:

—Agency where employed and location.

—Address of employment and home address or latest address of record.

—The matching agency, within 30 days after the match, will as standard practice either erase or return to the creditor agency the file of delinquent debt records unless contrary specific instructions are furnished by the creditor agency.

—The creditor agency will reimburse the matching agency for the cost of operations according to a schedule of charges set forth in the MOU.

Tape Specifications

IBM compatible, unlabled, 6250 (or 1600) BPI, fixed block, 9 track, odd parity, EBCDIC, character data. Tape(s) should be sent to: Defense Manpower Data Center, ATTN: Debt Collection Project, 550 Camino El Estero, Suite 200, Monterey, CA 93940–3231.

S322.11 DLA–LZ

SYSTEM NAME:

Federal Creditor Agency Debt Collection Data Base.

SYSTEM LOCATION:

Primary location: W.R. Church Computer Center, Naval Postgraduate School, Monterey, CA 93943–5000 Decentralized segments: Military and civilian payment and personnel centers of the military services, the Office of Personnel Management, and Federal creditor agencies. Backup location: Defense Manpower Data Center, 550 Camino El Estero, Monterey, CA 93940–3231

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Department of Defense officers and enlisted personnel, members of reserve and guard components, retired military personnel. All Federal-wide civilian employees and retirees. Individuals identified by Federal creditor agencies as delinquent in repayment of debts owed to the U.S. Government.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name, Social Security Account Number, debt principal amount, interest and penalty amount, if any, debt reason, debt status, demographic information such as grade or rank, sex, date of birth, duty and home address, and various dates identifying the status changes occurring in the debt collection process.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 5514 "Installment deduction of indebtedness"; 5 U.S.C. 552a "Privacy Act of 1974"; 10 U.S.C. 136; 4 CFR Chapter II "Federal Claims Collection Standards"; 5 CFR 550.1101–.1108 "Collection by Offset from Indebted Government Employees"; Office of Management and Budget, "Revised Supplemental Guidance for Conducting Matching Programs," May 11, 1982 (47 FR 21656, May 19, 1982) and "Guidelines on the Relationship Between the Privacy Act of 1974 and the Debt Collection Act of 1982," March 30, 1983 (48 FR 15556, April 11, 1983); the Interagency Agreement for Federal Salary Offset Initiative (Office of Management and Budget, Department of the Treasury, Office of Personnel Management and the Department of Defense, April 1987).

PURPOSE(S):

The primary purpose for the establishment of this system of records is to maintain a computer data base permitting computer matching to assist and implement debt collection efforts by Federal creditor agencies under the Debt Collection Act of 1982 to identify and locate individual debtors. To increase the efficiency of U.S. Government-wide efforts to collect debts owed the U.S. Government. To provide a centralized Federal data bank for computer matching of Federal employment records with delinquent debt records furnished by Federal creditor agencies under an interagency agreement sponsored and monitored by the Department of the Treasury and the Office of Management and Budget. To identify and locate employees or beneficiaries who are receiving Federal salaries or other benefit payments and indebted to the creditor agency in order to recoup the debt either through voluntary repayment or by administrative or salary offset procedures established by law.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEMS, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Individual's name, SSN, Federal agency or military service, category of employee, Federal salary or benefit payments, records of debts and current work or home address and any other appropriate demographic data to a Federal creditor agency for the purpose contacting the debtor to obtain voluntary repayment and, if necessary, to initiate any administrative or salary offset measures to recover the debt.

The DoD Blanket Routine Uses do not apply to this record system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are stored on magnetic computer tape.

RETRIEVABILITY:

Records are retrieved by social security number and name from a computerized index.

SAFEGUARDS:

Primary location at the W.R. Church Computer Center, Monterey, CA, tapes are stored in a controlled access area; tapes can be physically accessed only by computer center personnel and can be mounted for processing only if the appropriate security code is provided.

At the back-up location in Monterey, CA tapes are stored in rooms protected with cypher locks, the building is locked up after hours, and only property cleared and authorized personnel have access.

RETENTION AND DISPOSAL:

Records are erased within six months after each match cycle.

SYSTEM MANAGER AND ADDRESS:

Deputy Director, Defense Manpower Data Center (DMDC), 550 Camino El Estero, Monterey, CA 93940–3231

NOTIFICATION PROCEDURE:

Information may be obtained from the system manager.

RECORDS ACCESS PROCEDURE:

Requests from individuals should be addressed to the system manager. Written requests for information should contain the full name, social security number, current address and telephone number of the individual requesting information.

CONTESTING RECORD PROCEDURES:

The agency's rules for access to records and for contesting contents and appealing initial determinations may be obtained from the system manager and are contained in Defense Logistics Agency Regulation 5400.21 (32 CFR Part 1286).

RECORD SOURCE CATEGORIES:

Federal creditor agencies, the Office of Personnel Management and DoD personnel and finance centers.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

Department of The Navy

Performance of Commercial Activities; Announcement of Program Cost Studies

The Department of the Navy intends to conduct OMB Circular A–76 (48 FR 37110, August 16, 1983) cost studies of various functions at the listed activities, commencing September 14, 1987. The cost study process is a rigorous, time-consuming procedure and, depending upon the size of the functions involved, can take several months to several years to complete. Since the studies have not yet begun, specifications have not yet been prepared. When bids/proposals are desired, appropriate advertisements will be placed. No consolidated bidders' list is being maintained since the solicitations will be processed by various contracting offices throughout the U.S.

DEPARTMENT OF EDUCATION

[CFDA No. 84.133C]

Notice Inviting Applications for Innovation Grants Under the National Institute on Disability and Rehabilitation Research for Fiscal Year 1988

PURPOSE: Provides support to public and private agencies and organizations, including institutions of higher education and Indian tribes and tribal organizations, to support timely and innovative research, demonstrations, evaluations of techniques or devices, or unique methods to disseminate the results of research that will improve the rehabilitation of individuals with disabilities. Historically Black Colleges and Universities are encouraged to apply. NIDRR may fund projects from time to time during the year.

DEALINE FOR TRANSMITTAL OF APPLICATIONS: June 1, 1988.

APPLICATIONS AVAILABLE: November 9, 1987.

AVAILABLE FUNDS: $1,000,000.

ESTIMATED RANGE OF AWARDS: Awards are limited to $50,000 by statute.

ESTIMATED AVERAGE SIZE OF AWARDS: $50,000.

PROJECT PERIOD: 12 months.

APPLICABLE REGULATIONS: (a) Education Department General Administrative Regulations, 34 CFR Parts 74, 75, 77, and 78, and (b) National Institute on Disability and Rehabilitation Research Regulations, 34 CFR Parts 350 and 358.

FOR APPLICATIONS OR INFORMATION CONTACT: National Institute on Disability and Rehabilitation Research, U.S. Department of Education, 400 Maryland Avenue SW, Switzer Building, Room 3070, Washington, DC 20202. Telephone: (202) 732–1207; deaf and hearing impaired individuals may call (202) 732–1198 for TDD services.

Program Authority: 29 U.S.C. 760–762.

Dated: October 2, 1987.

Madeleine Will,

Assistant Secretary for Special Education and Rehabilitative Services.

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Atomic Energy Agreements; Proposed Subsequent Arrangements; EURATOM and Austria

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of proposed "subsequent arrangements" under the Additional Agreement for Cooperation between the Government of the United States of America and the European Atomic Energy Community (EURATOM) concerning Peaceful Uses of Atomic Energy, as amended, and the Agreement for Cooperation between the Government of the United States of America and the Government of Austria concerning Civil Uses of Atomic Energy, as amended.

The subsequent arrangements to be carried out under the above-mentioned agreements involve approval of the following retransfers: RTD/AT(EU)-66, for the transfer from the Federal Republic of Germany to Austria of silicide fuel elements containing 37 kilograms of uranium, enriched to 19.95 percent in the isotope uranium-235 for use in the ASTRA research reactor. RTD/AT(EU)-67, for the transfer from the Federal Republic of Germany to Austria of 5 fuel spheres containing 29.8 grams of uranium enriched to 16.8 percent in the isotope uranium-235 for nuclide inventory measurements.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that these subsequent arrangements will not be inimical to the common defense and security.

These subsequent arrangements will take effect no sooner than fifteen days after the date of publication of this notice.

For the Department of Energy.

Date: September 30, 1987.

George J. Bradley, Jr.,

Principal Deputy Assistant Secretary for International Affairs and Energy Emergencies.

BILLING CODE 6450–01–M

Cooperative Agreements; Industrial Heat Pump Design and Installation

September 29, 1987.

AGENCY: Department of Energy.

ACTION: Solicitation for Cooperative Agreement Porposals (SCAP) No. DE–SC07–87ID12706 for the development of an industrial heat pump design and installation.

SUMMARY: The Idaho Operations Office of the U.S. Department of Energy is seeking support for the design and installation of heat pumps in industrial processes for heat recovery (industrial refrigeration and space heating are excluded). It is intended that projects include three phases: (I) Heat pump/process assessment, (II) implementation, and (III) operation. About $650,000 is now available for Phase I, and multiple awards are anticipated. It is intended that the Phase I heat pump and process assessment will involve thermodynamically consistent methods of analyzing processes to determine the optimum heat pump placement, the type of heat pump, the size and lift of the heat pump, the effect of the heat pump on the overall process, and the economics of the proposed heat pump installation. The analyses in Phase I must be for specific operating industrial process plants, into which the heat pump will be installed during Phase II. Phase II will involve final design of the heat pump, final design of any required process modifications, modification of the process, and installation of the heat pump. During Phase III, the heat pump will be operated. Operating characteristics of the heat pump and overall impact of the heat pump on the process will be measured and reported. Proposers will be expected to have the capability to complete the entire project from design through operation, as well as to be able to obtain, during Phase I, a commitment from the industrial plant operator responsible for the process into which the heat pump will actually be installed. Cost-type cooperative agreements are anticipate, and Phase I is expected to take approximately one year.

DATES: SCAP No. DE–SC07–87ID12706 is expected to be issued during early November 1987 with a closing date approximately 45 days from the issue date.

CONTACTS: Potential proposers desiring to receive a copy of the SCAP should request it in writing within 10 calendar days from the date of this notice from: Dallas L. Hoffer, Contracts Management Division, U.S. Department of energy, Idaho Operations Office 785 DOE Place, Idaho Falls, ID 83402, Telephone No.: (208) 526–0014.

Issued at Idaho Falls, Idaho, on September 29, 1987.

H. Brent Clark,

Director, Contracts Management Division.

BILLING CODE 6450–01–M

National Petroleum Council; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770), notice is hereby given of the following meeting:

Name: National Petroleum Council.

Date: October 28, 1987—9:00 a.m.

Place: Madison Hotel, Dolley Madison Ballroom, Fifteenth and M Streets, NW., Washington, DC.

Contact: Margie D. Biggerstaff, U.S. Department of Energy, Office of Fossil Energy (FE–1), Washington, DC 20585, Telephone: 202/586–4695.

Purpose: To provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and gas or the oil and gas industry.

Tentative Agenda:

Call to order by Edwin L. Cox, Chairman, National Petroleum Council.

Remarks by the Honorable John S. Herrington, Secretary of Energy.

Guest speaker.

Progress report on the NPC Committee on Petroleum Storage & Transportation.

Consideration of administrative matters.

Discussion of any other business properly brought before the National Petroleum Council.

Public comment (10-minute rule).

Adjournment.

Public Participation: The meeting is open to the public. The chairperson of the Council is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Council will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Margie D. Biggerstaff at the address or telephone number listed above. Requests must be received at

VOL 52 ISS 194 OCT 7 1987 UMI

least five days prior to the meeting and reasonable provision will be made to include the presentation on the agenda.

Transcripts: Available for public review and copying at the Public Reading Room, Room 1E–190, Forrestal Building, 1000 Independence Avenue SW., Washington, DC, between 9:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC, on October 2, 1987.

J. Robert Franklin,

Deputy Advisory Committee Management Officer.

BILLING CODE 6450–01–M

Economic Regulatory Administration

[ERA Docket No. 87–48–NG]

Application to Export Natural Gas to Canada; Victoria Gas Corp.

AGENCY: Economic Regulatory Administation, DOE.

ACTION: Notice of application for blanket authorization to export natural gas to Canada.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of receipt on August 31, 1987, of an application; from Victoria Gas Corporation (Victoria) for blanket authorization to export natural gas to Canada for sale to spot market purchasers, including gas distribution companies, and industrial and commerical end users.

Authorization is requested to export up to 100 MMcf of United States natural gas per day and a maximum of 72 Bcf of natural gas over a two-year period beginning on the date of first delivery. Victoria is a corporation registered in the State of Texas and operates solely as a natural gas marketing company.

Victoria intends to use existing facilities at the border and within the United States for the transportation of the proposed exports. Victoria will advise the ERA of the date of first delivery of the export and submit quarterly reports giving details of individual transactions.The application is filed with the ERA pursuant to section 3 of the Natural Gas Act and DOE Delegation Order No. 0204–111. Protests, motions to intervene, notices of intervention and written comments are invited.

DATE: Protests, motions to intervene, or notices of intervention, as applicable, and written comments are to be filed no later than November 6, 1987.

FOR FURTHER INFORMATION CONTACT:

Frank Duchaine, Natural Gas Division, Economic Regulatory Administration, Forrestal Building, Room GA–076, 1000 Independence SW., Washington, DC 20585, (202) 586–8233, or

Diane J. Stubbs, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, Room 6E–042, 1000 Independence Ave SW., Washington, DC 20585, (202) 586–6667.

SUPPLEMENTARY INFORMATION: This export application will be reviewed pursuant to Section 3 of the Natural Gas Act and the authority contained in DOE Delegation Order No. 0204–111. The decision on whether the export of natural gas is in the public interest will be based upon the domestic need for the gas and on whether the arrangement is consistent with the DOE policy of promoting competition in the natural gas marketplace by allowing parties to freely negotiate their own trade arrangements. The applicant asserts that the requested authorization would promote competition and, in light of the continuing "gas bubble", would benefit the public interest. Parties especially those that may oppose this application, should comment in their responses on these matters.

All parties should be aware that if the EPA approves this requested blanket export, it may designate a total amount of authorized volumes for the term rather than a daily or annual limit, in order to provide the applicant with maximum flexibility of operation.

Public Comment Procedures:

In responses to his notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate procedural action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specfied by the regulations in 10 CFR Part 590. They should be filed with the Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Room GA–076, RG–23, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–9478. They must be filed no later than 4:30 p.m. e.d.t., November 6, 1987.

The Administrator intends to develop a decisional record on the application through responses to this notice by parties, including the parties written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or a trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, the ERA will provide notice to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of Victoria's application is available for inspection and copying in the Natural Gas Division Docket Room, GA–076–A, at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, September 30, 1987.

Constance L. Buckley,

Director, Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration.

[FR Doc. 87–23227 Filed 10–6–87; 8:45 am]

BILLING CODE 6450–01–M

Proposed Remedial Order; Tampimex Oil International, Ltd.

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of proposed remedial order to Tampimex Oil International, Ltd.

SUMMARY: Pursuant to 10 CFR 205.192(c), the Economic Regulatory Administration (ERA) of the Department of Energy hereby gives notice of a Proposed Remedial Order which was issued to Tampimex Oil International, Ltd. (Tampimex), c/o 4100 One Shell Square, New Orleans, Louisiana 70139. This Proposed Remedial Order alleges violations of 10 CFR 212.186, 210.62(c) and 205.202 of the petroleum price regulations during the period January 1979 through December 1980 in the amount of $3,669,009.81. The effect of the alleged violations is nationwide.

A copy of the Proposed Remedial Order, with confidential information deleted, may be obtained from: Office of Freedom of Information Reading Room, United States Department of Energy, Forrestal Building, Room 1E–190, 1000 Independence Avenue, SW., Washington, DC 20585.

Within fifteen (15) days of publication of this Notice, any aggrieved person may file a Notice of Objection with the Office of Hearings and Appeals, United States Department of Energy, Forrestal Building, Room 6F–078, 1000 Independence Avenue, SW., Washington, DC 20585, in accordance with 10 CFR 205.193. The notice shall be filed in duplicate, shall briefly describe how the person would be aggreived by issuance of the Proposed Remedial Order as a final order and shall state the person's intention to file a Statement of Objections. A person who fails to file a Notice of Objection shall be deemed to have admitted the findings of fact and conclusions of law stated in the PRO. If a Notice of Objection is not filed in accordance with § 205.193, the PRO may be issued as a final Remedial Order by the Office of Hearings and Appeals.

Issued in Washington, DC, on the 24th day of September, 1987.

Marshall Staunton,

Administrator, Economic Regulatory Administration.

[FR Doc. 87–23126 Filed 10–6–87; 8:45 am]

BILLING CODE 6450–01–M

Office of Energy Research

Energy Research Advisory Board, Research & Technology Utilization Panel; Meeting

Notice is hereby given of the following meeting:

Name: Research and Technology Utilization Panel of the Energy Research Advisory Board (ERAB).

Date and Time: October 21, 1987—8:30 am–5:00 pm; October 22, 1987—8:30 am–12:00 Noon.

Place: Department of Energy, 1000 Independence Ave. SW., Room 4A–110, Washington, DC 20585.

Contact: Charles E. Cathey, Department of Energy, 1000 Independence Ave. SW., Washington, DC 20585, (202) 586–2263.

Purpose of the Parent Board: To advise the Department of Energy (DOE) on the overall research and development conducted in DOE and to provide long-range guidance in these areas to the Department.

Purpose of the Panel: The Research and Technology Utilization Panel is a subgroup of ERAB and reports to the parent Board. The Research and Technology Utilization Panel will: Review the process and effectiveness of the movement of scientific research and technology from DOE and its contractors to industry, universities, and state and local governments; review the technology transfer objectives and efforts of the major Departmental programs; evaluate the significance of past activities in this area; and make recommendations to improve the activities.

Tentative Agenda: The agenda for this meeting will be to hear presentations from DOE multiprogram and single program laboratories. These will include presentations from Oak Ridge National Laboratory, Fermi National Accelerator Laboratory, and Stanford Linear Accelerator Center, among others.

Public Comment (10 minute rule).

Public Participation: The meeting is open to the public. Written statements may be filed with the Panel either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Charles Cathey at the address or telephone number listed above. Requests must be received 5 days prior to the meeting and reasonable provisions will be made to include the presentation on the agenda. The Chairperson of the Panel is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Minutes of the Meeting: Available for public review and copying at the Freedom of Information Public Reading Room, 1E–190, Forrestal Building, 1000 Independence Ave. SW., Washington, DC, between 9:00 am and 4:00 pm, Monday through Friday, except Federal holidays.

Issued at Washington, DC, on September 30, 1987.

Charles E. Cathey,

Deputy Director, Science & Technology Affairs, Office of Energy Research.

[FR Doc. 87–23127 Filed 10–6–87; 8:45 am]

BILLING CODE 6450–01–M

Grants; University Research Instrumentation Program

AGENCY: Department of Energy.

ACTION: Program solicitation announcement.

SUMMARY: The purpose of this notice is to announce the availability of the University Research Instrumentation (URI) program solicitation, and to inform potential applicants of the closing date and location for transmittal of applications for awards under this program. For more detailed background information about the URI solicitation, please refer to the following related documents: (1) DOE request for public comment on the URI program, June 7, 1983 (48 FR 26328–26331), (2) October 18, 1983, DOE changes to the program (48 FR 48277–48281); and (3) December 15, 1983, DOE program solicitation announcement (48 FR 55774–55775).

FOR FURTHER INFORMATION CONTACT: All communications or questions regarding this program solicitation should be directed to: Ms. Susan G. Hiser, Procurement and Contracts Division, Oak Ridge Operations Office, Department of Energy, Oak Ridge, TN 37831, Telephone Number: (615) 576–6367.

SUPPLEMENTARY INFORMATION:

Background

The purpose of the University Research Instrumentation program is to assist university and college scientists in strengthening their capabilities to conduct long-range research in specific energy research and development areas of direct interest to DOE through the acquisition of specialized research instrumentation. This program is consistent with, and part of, a government-wide effort to increase the availability of advanced research instrumentation in universities and colleges. Although no final congressional action for Fiscal Year 1988 has yet been approved for this program, the Presidential budget request to Congress for this program for FY 1988 is $5.0 million. In anticipation of Congressional support for the program, DOE invites all qualified universities to write for a copy of its University Research Instrumentation program solicitation, DOE–ER–0184/3, Notice of Program Announcement Number DE–PS01–87ER75385. Selection for award under this solicitation is subject to the availability of funds.

Principal Research Areas

While all areas of energy research are eligible, in FY 1988 the URI program's funds will be concerned primarily with capital equipment (costing $100,000 or more) needed for on-campus research in one of five specific energy areas (listed below in alphabetical order). In order to indicate the potential breadth of the research in each area, a number of examples of related research topics are given. Within each topic area no

preference is given to any of the examples.

1. Biological Energy Conversion

a. Early events in photosynthesis; b. biochemical and enzymatic reactions involved in key metabolic steps in carbon compound conversions in plants and microbes, and in the characterization of micro-organisms involved in carbon compound conversion to fuels; c. structures of protein, carbohydrates and lipids involved in recognition and catalytic, regulatory or storage functions; d. physiological control of growth and development of plants under optimal or suboptimal condition; e. measurement and control systems for experimental research of biological effects of carbon dioxide, including those from coal fired power plants; f. studies of energy conversion in microalgal systems; g. research on biological coal conversion and coal cleaning.

2. Biomedical and Environmental Research

a. Nuclear Medicine: (1) Research on the applications of radiation, radioisotopes and stable isotopes in the diagnosis and treatment of human diseases; (2) production of radionuclides, new radiopharmaceuticals, automated chemical synthesis systems, studies of biodistribution and pharmacokinetics of radiolabeled compounds; (3) improvement of biomedical imaging techniques (SPECT, PET, and NMR spectroscopy) for physiologic and metabolic studies; (4) development of optimal antibody species for cancer screening, detection, localization, monitoring, and therapy; (5) development of boronated compounds with higher selectivity for tumor tissue to ascertain clinical merit of boron neutron capture therapy.

b. Molecular Genetics/Structural Biology: (1) Characterization of genetic structure ranging from chromosomes to DNA structure; (2) characterization of damage to DNA and other biological macromolecules by radiation and energy-related chemicals; (3) separation of biological macromolecules and organelles; (4) characterization of protein and other macromolecules fine structure and correlation of structure with biological function; (5) computer networks, data acquisition and analysis of molecular biological and structural data.

c. Environmental Processes and Effects: (1) Subsurface characterization of biota, contaminants, and factors affecting mobility of mixed wastes in soils and subsurface systems, including those from emerging coal technologies; (2) determination of the movement and fate of materials introduced along U.S. ocean margins; (3) influence of environmental factors on gene expression and regulation in plants; (4) development of integrated ecological studies, focusing on water relations in arid lands and large-scale ecosystem experiments that will contribute to global research activities.

3. Energy Resource Geoscience

a. Fluid Interaction with the Natural Environment: (1) Rockwater interactions in fractured hosts; (2) mineral-hydrocarbon surface reactions; (3) hydrogeology.

b. Generation and Migration of Petroleum: (1) Control of source rock; (2) time-temperature reaction paths; (3) multiphase flow; (4) reservoir dynamics.

c. Remote Sensing: (1) Of the solid earth through enhanced seismic studies; (2) of the earth's surface through interpretation of high altitude data; (3) of strain both at laboratory and earth scales; (4) geological interpretation of satellite data.

d. Fracture Processes: (1) In natural media, particularly shales, sandstones, limestones, tuffs, and granite; (2) on the crustal scale; (3) in heterogeneous media.

4. Nuclear Physics

Understanding of the interactions, properties, and structure of atomic nuclei using probes of light ions, heavy ions, electrons, and other nuclear particles for research in:

a. Nuclear collision dynamics via detection of nuclear reaction products;
b. Polarization effects in the collision of nuclear systems;
c. Nuclear structure and nuclear spectroscopy;
d. Giant resonances and other mechanisms of gamma-ray emission;
e. Probing fundamental symmetries and interactions;
f. Neutron scattering physics;
g. Radiative capture reactions; and
h. Properties of hot nuclear matter.

5. Photochemical Energy Conversion

a. Inorganic and organic photochemistry;
b. Excited-state electron transfer;
c. Photoelectrochemistry;
d. Photo-induced charge separation in microheterogenous environments;
e. Artificial photosynthesis; and
f. Picosecond spectroscopy;
g. Synthesis and catalysis as it relates to the photoconversion of various substrates into fuels and chemicals.

While the equipment requested will be equally suitable and may be used for research on other energy-related topics, the need for the instrument(s) must be justified (and the application will be reviewed) in terms of its value and ability to enhance the institution's capabilities in the principal designated energy-related research area specified on the cover sheet. The instrument's utility is advancing other areas of scientific or technical research is of peripheral interest during the application's review procedure.

Eligibility and Limitations

Participation in the URI program is limited to U.S. universities and colleges that currently have active, ongoing DOE-funded research support (including subcontracts) totalling at least $150,000 in value in the specific area for which the equipment is requested during the past two fiscal years (October 1, 1985, to September 30, 1987).

DOE is establishing this limitation to ensure that the instrumentation acquired with these grants will significantly expand the research capability of institutions which have already demonstrated the capability to perform long-range energy research. The Office of Energy Research believes that restricting eligibility to institutions which have performed $150,000 of DOE supported research over a two-year period will limit eligibility in this grant program to those institutions which, becuse of their existing commitment to energy research, are best able to incorporate advanced instrumentation into their research programs. Special consideration will be given to Historically Black Colleges and Universities (HBCU's) which meet the institutional eligibility criteria, and have significant research capabilities in the selected research area.

DOE will consider only requests for larger instruments, costing about $100,000 or more, which are required to advance research in the designated area. Smaller research instruments (less than $100,000 each) will not be eligible for consideration in this program. General purpose computing equipment is also not eligible under this program. However, laboratory computers and associated peripherals dedicated for use directly with the instrument(s) requested (or for use with existing research instrument(s) in the selected area) may be considered.

Application Forms

Program solicitations are expected to be ready for mailing by October 9, 1987. Applications must be prepared and submitted in accordance with the instruments and forms included in the

program solicitation. Copies may be obtained by writing to: Division of University and Industry Programs, Office of Field Operations Management, Office of Energy Research, Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585; Telephone Number: (202)586–8910.

Closing Date for Transmittal of Applications

To be eligible, applications must be received by the Oak Ridge Operations Office by 4:30 p.m., December 11, 1987.

Authority for the University Research Instrumentation Program is contained in section 31(a) and (b) of the Atomic Energy Act of 1954 (42 U.S.C. 2051) and section 209 of the Department of Energy Organization Act (42 U.S.C. 7139).

(Catalog of Federal Domestic Assistance No. 81.077, University Research Instrumentation Program)

Issued in Washington, DC, on September 30, 1987.

David B. Nelson,

Executive Director, Office of Energy Research.

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

[Docket Nos. ER87–519–000, et al.]

Electric rate and Corporate Regulation Filings; Commonwealth Edison Co. et al.

September 30, 1987.

Take notice that the following filings have been made with the Commission:

1. Commonwealth Edison Company

[Docket No. ER87–519–000]

Take notice that on September 24, 1987, Commonwealth Edison Company (Edison) tendered for filing additional information with respect to Amendment No. 5 to the Interconnection Agreement between Edison and Wisconsin Power and Light Company (Wisconsin Power).

This amended filing is in response to a request by the Federal Energy Regulatory Commission to provide an explanation of the circumstances which led to the agreement, Amendment No. 5, to return the $739,710 paid by Wisconsin Power over the last ten years.

Copies of the filing were served upon Wisconsin Power and Light Company, Madison, Wisconsin, the Illinois Commerce Commission, Springfield, Illinois, and the Public Service Commission of Wisconsin, Madison, Wisconsin.

Comment date: October 14, 1987, in accordance with Standard Paragraph E at the end of this notice.

2. Glen Park Associates Limited Partnership

[Docket No. ER87–668–000]

Take notice that on September 24, 1987, Glen Park Associates Limited Partnership (Glen Park), a New York limited partnership, tendered for filing a power sale agreement pursuant to which Glen Park is to Niagara Mohawk Power Corporation all of the power and energy to be produced at the 32.6 MW Glen Park Project (FERC Project No. 4769). The rates set forth in the power sale agreement have been negotiated, and the agreement has been approved by the New York Public Service Commission. Glen Park requests waiver of the Commission's Regulations with respect to the filing of cost support information and with respect to all or a portion of the Commission's accounting, reporting, securities, property transfer, interlocking director and annual charge regulation. Glen Park requested that the filing be allowed to become effective on September 1, 1987, the date on which the power production capacity of the project first exceeded 30 MW.

Comment date: October 14, 1987, in accordance with Standard Paragraph E at the end of this notice.

3. Gulf States Utilities Company

[Docket No. ER87–667–000]

Take notice that on September 24, 1987, Gulf States Utilities Company (GSU) tendered for filing a contract for purchases of economic energy by Jacksonville Electric Authority from GSU.

GSU requests an effective date of September 23, 1987, for the contract.

Comment date: October 14, 1987, in accordance with Standard Paragraph E at the end of this notice.

4. Kansas Power and Light Company

[Docket No. ER87–666–000]

Take notice that on September 24, 1987, Kansas Power and Light Company (KPL) tendered for filing a newly executed renewal contract dated September 1, 1987, with the City of St. Marys, St. Marys, Kansas for wholesale service to that community. KPL states that this contract permits the City of St. Marys to receive service under rate schedule WSM–12/83 designated Supplement No. 9 to R.S. FERC No. 195. The proposed effective date is November 1, 1987. The proposed contract change provides essentially for the ten year extension of the original terms of the presently approved contract. In addition, KPL states that copies of the contract have been mailed to the City of St. Marys and the State Corporate Commission.

Comment date: October 14, 1987, in accordance with Standard Paragraph E at the end of this notice.

5. Northern States Power Company

[Docket No. ER87–669–000]

Take notice that on September 24, 1987, Northern States Power Company (Minnesota) tendered for filing the Transmission Service Agreement and Supplement Nos. 1 and 2 between Northern States Power Company and the City of Sauk Centre.

The Transmission Service Agreement and Supplement Nos. 1 and 2 supersede the Municipal Resale Transmission and Transformation Service Agreement, FERC Rate Schedule No. 389, between Northern States Power Company and the City of Sauk Centre, which expires by its own terms on October 20, 1987.

The Transmission Service Agreement and Supplement Nos. 1 and 2 essentially provide transmission service associated with the delivery of power and energy purchased by Sauk Centre from the Western Area Power Administration and other power suppliers. The rates and charges for this service are on file with the Commission for similar agreements with other municipalities.

Northern States Power Company requests that the filing have an effective date of October 20, 1987, and therefore, requests waiver of the Commission's notice requirements.

Comment date: October 14, 1987, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the

BEST COPY AVAILABLE

Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 87-23219 Filed 10-6-87; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA88-1-20-000]

Proposed Change in FERC Gas Tariff; Algonquin Gas Transmission Co.

September 30, 1987.

Take notice that Algonquin Gas Transmission Company ("Algonquin") on September 25, 1987, tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, six (6) copies each of the following tariff sheets:

Twenty-second Revised Sheet No. 201
Twenty-second Revised Sheet No. 203
Fifteenth Revised Sheet No. 204
Fifteenth Revised Sheet No. 205
Substitute Fifteenth Revised Sheet No. 204

Algonquin states that above-mentioned tariff sheets are being filed pursuant to the provisions of its tariff to flow through its rates the approved ACA unit surcharges imposed upon Algonquin by its upstream pipeline suppliers, Consolidated Gas Transmission Corporation, National Fuel Gas Supply Corporation, Texas Eastern Transmission Corporation and Transcontinental Gas Pipe Line Corporation as established by Commission Order No. 472 in Docket No. RM87-3-000.

The proposed effective date of the above-mentioned tariff sheets is October 1, 1987.

Algonquin notes that a copy of this filing is being served upon each affected party and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 7, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 87-23131 Filed 10-6-87; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA87-3-48-009]

PGA Rate Change Filing; ANR Pipeline Co.

September 30, 1987.

Take notice that on September 25, 1987, ANR Pipeline Company ("ANR"), pursuant to section 15 of the General Terms and Conditions of its F.E.R.C. Gas Tariff, Original Volume No. 1, tendered for filing with the Federal Energy Regulatory Commission ("Commission") the following tariff sheets:

Substitute Tenth Revised Sheet No. 18
Substitute Alternate Twelfth Revised Sheet No. 18

Substitute Tenth Revised Sheet No. 18 and Substitute Alternate Twelfth Revised Sheet No. 18 reflect a 13.64¢ per dekatherm ("dth") increase in the gas cost component of the commodity rate of ANR's CD-1 and MC-1 Rate Schedules, a decrease of $0.682 in the monthly demand rate of CD-1 and MC-1 Rate Schedules and an increase in ANR's one-part rates applicable to Rate Schedules SGS-1 and LVS-1 of 2.82¢ and 10.36¢ respectively, per dth.

In this tariff filing, ANR is revising its demand and commodity rates to reflect cost functionalization and classification consistent with Opinion Nos. 256 and 256A with respect to ANR's Canadian gas costs. ANR has designed its rates based upon its existing Atlantic Seaboard rate design methodology.

ANR states that copies of the filing were served upon all of its jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 7, 1987. Protects will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ST87-3449-000, et al.]

Self-Implementing Transactions; ANR Pipeline Co., et al.

September 30, 1987.

Take notice that the following transactions have been reported to the Commission as being implemented pursuant to Part 284 of the Commission's Regulations, and sections 311 and 312 of the Natural Gas Policy Act of 1978 (NGPA).[1]

The "Recipient" column in the following table indicates the entity receiving or purchasing the natural gas in each transaction.

The "Part 284 Subpart" column in the following table indicates the type of transaction. A "B" indicates transportation by an interstate pipeline on behalf of an intrastate pipeline or a local distribution company pursuant to § 284.102 of the Commission's Regulations and section 311(a)(1) of the NGPA.

A "C" indicates transportation by an intrastate pipeline on behalf of an interstate pipeline or a local distribution company served by an interstate pipeline pursuant to § 284.122 of the Commission's Regulations and section 311(a)(2) of the NGPA. In those cases where Commission approval of a transportation rate is sought pursuant to § 284.123(b)(2), the table lists the proposed rate and the expiration date of the 150-day period for staff action. Any person seeking to participate in the proceeding to approve a rate listed in the table should file a petition to intervene with the Secretary of the Commission.

A "D" indicates a sale by an intrastate pipeline to an interstate pipeline or a local distribution company served by an interstate pipeline pursuant to § 284.142 of the Commission's Regulations and section 311(b) of the NGPA. Any interested person may file a complaint concerning such sales pursuant to § 284.147(d) of the Commission's Regulations.

An "E" indicates an assignment by an intrastate pipeline to any interstate

---

[1] Notice of transaction does not constitute a determination that the terms and conditions of the proposed service will be approved or that the noticed filing is in compliance with the Commission's Regulations.

pipeline or local distribution company pursuant to § 284.163 of the Commission's Regulations and section 312 of the NGPA.

A "G" indicates transportation by an interstate pipeline on behalf of another interstate pipeline pursuant to § 284.222 and a blanket certificate issued under § 284.221 of the Commission's Regulations.

A "G–S" indicates transportation by an interstate pipeline company on behalf of any shipper pursuant to a § 284.223 and a blanket certificate issued under § 284.221 of the Commission's Regulations.

A "G(LT)" or "G(LS)" indicates transportation, sales or assignments by a local distribution company on behalf of or to an interstate pipeline or local distribution company pursuant to a blanket certificate issued under § 284.222 of the Commission's Regulations.

A "G(HT)" or "G(HS)" indicates transportation, sales or assignments by a Hinshaw Pipeline pursuant to a blanket certificate issued under § 284.222 of the Commission's Regulations.

Any person desiring to be heard or to make any protest with reference to a transaction reflected in this notice should on or before October 21, 1987, file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants party to a proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[1] Notice of transactions does not constitute a determination that filings comply with commission regulations in accordance with Order No. 436 (final rule and notice requesting supplemental comments, 50 FR 42372, October 18, 1985).

[2] The intrastate Pipeline has sought commission approval of its transportation rate pursuant to § 284.123(B)(2) of the Commission's regulations (18 CFR 284.123(b)(2)). Such rates are deemed fair and equitable if the Commission does not take action by the date indicated.

BILLING CODE 6717-01-M

Oil Pipeline Tentative Valuation

October 2, 1987.

The Federal Energy Regulatory Commission by order issued February 10, 1987, established an Oil Pipeline Board and delegated to the Board its functions with respect to the issuance of valuation reports pursuant to section 19a of the Interstate Commerce Act.

Notice is hereby given that tentative valuations are under consideration for the common carrier by pipeline listed below:

1982, 1983 Consolidated Reports Valuation Docket No. PV-1475-000 Sonat Oil Transmission Inc., P.O. Box 2563, Birmingham, Alabama 35202

On or before November 9, 1987, persons other than those specifically designated in section 19a(h) of the Interstate Commerce Act having an interest in these valuations may file, pursuant to rule 214 of the Federal Energy Regulatory Commission's "Rules of Practice and Procedure" (18 CFR 385.214), an original and three copies of a petition for leave to intervene in these proceedings.

If the petition for leave to intervene is granted the party may thus come within the category of "additional parties as the FERC may prescribe" under section 19a(h) of the Act, thereby enabling it to file a protest. The petition to intervene must be served on the individual company at its address shown above and an appropriate certificate of service must be attached to the petition. Persons specifically designated in section 19a(h) of the Act need not file a petition; they are entitled to file a protest as a matter of right under the statute.

Francis J. Connor,

Administrative Officer, Oil Pipeline Board.

BILLING CODE 6717-01-M

Western Area Power Administration

Central Valley Project; Proposed Power and Transmission Rates Adjustments, Revenue Adjustment Clause Evidentiary Hearing

AGENCY: Western Area Power Administration, DOE.

ACTION: Notice of Hearing Procedures on Revenue Adjustment Clause, Western File No. 1988 CVP RAC Hearing; and Extension of the Consultation and Comment Period for the Central Valley Project Proposed Power and Transmission Rates Adjustments.

SUMMARY: On August 4, 1987 (52 FR 28864), the Western Area Power Administration (Western) proposed a power rate decrease and a transmission rate increase for the Central Valley Project (CVP), a multipurpose Federal water project located in northern California. The CVP power rates are set as low as practicable consistent with sound business principles and must, by law, also be sufficient to recover the annual power expenses plus repay the power and certain nonpower investments of the CVP within the prescribed time periods.

Unlike other Western projects, the CVP power marketing program is significantly supported by power purchases made from various sources including utilities in the Pacific Northwest and the Pacific Gas and Electric Company.

As part of the proposed CVP rates for firm power sales, Western has proposed the use of a revenue adjustment clause (RAC) that would periodically adjust for differences between estimated and actual purchased power expenses and, at the same time, adjust for differences between estimated and actual revenue from capacity and energy sales. The net result of these adjustments would be surcharged or credited to the CVP customers' subsequent bills. Adjustments would occur on a 6-month cycle. The limit to any 6-month adjustment would be $15 million overall.

In addition to the basic RAC, Western is proposing an automatic capacity rate adjustment provision. This provision is proposed as a subsection of the RAC and would provide for a specific adjustment to the adopted CVP capacity rate for each megawatt of contract dependable capacity credit received or lost (pursuant to Western's Integration Agreement with the Pacific Gas and Electric Company) for firm power purchases made by Western; provided that such credit had not already been considered in the development of the adopted capacity rate.

The CVP annually sells over 500 million kilowatthours of electric energy for purposes other than resale. Because of the CVP's volume of this type of sale, Western is required to comply with certain provisions of the Public Utility Regulatory Policies Act (PURPA), 16 U.S.C. sections 2601-2645. PURPA sections 2623 and 2625(e) require the nonregulated electric utility to give public notice and conduct an evidentiary hearing, in accordance with the Administrative Procedure Act (APA), 5 U.S.C. sections 500-576, prior to adopting any PURPA standard such as the RAC.

Western will conduct a hearing under PURPA section 2602(6)(B) and the APA, 5 U.S.C. sections 554 and 556-557, in establishing the RAC. Opportunities will be available for interested persons to review the proposed RAC, to participate in the hearing, and to submit written testimony. During the development of the record for the RAC, the Hearing Officer will evaluate all written and oral testimony submitted during the hearing. The Hearing Officer will issue findings of fact and law after all testimony and briefs are submitted.

The document titled "Western Area Power Administration United States Department of Energy Rules of Procedure Governing Public Utility Regulatory Policies Act Hearing" (Procedures) has been prepared specifically for this RAC evidentiary hearing and has been mailed to all CVP customers. A copy of the Procedures will be provided to anyone upon request directed to the Area Manager or the General Counsel listed below.

ADDRESS: All notices of participation or intervention, motions, written testimony, comments, data requests, briefs, letters, or other documents related to the hearing should be addressed to: Hearing Officer, Western Area Power Administration, 1825 Bell Street, Suite 105, Sacramento, CA 95825.

Western requests that all comments and documents submitted as part of the Official Record compiled in the process of developing the revenue adjustment clause contain the file number designation: 1988 CVP RAC Hearing.

FOR FURTHER INFORMATION CONTACT:

Mr. David G. Coleman, Area Manager, Sacramento Area Office, Western Area Power Administration, 1825 Bell Street, Suite 105, Sacramento, CA 95825, (916) 978-4418

or

Mr. Michael S. Hacskaylo, General Counsel, Western Area Power Administration, P.O. Box 3402, Golden, CO 80401, (303) 231-1534.

DATES: A prehearing conference to organize the hearing presentations will be held at 9 a.m. on November 4, 1987, at the Sacramento Area Office, 1825 Bell Street, Suite 105, Sacramento,

California. Registration for the prehearing conference will begin at 8:30 a.m. The evidentiary hearing will be held at 10 a.m. on November 10, 1987, at the same location.

Evidentiary Hearing: A verbatim transcript will be made of both the prehearing conference and the evidentiary hearing.

The discovery period will begin with the issuance of this notice and end on November 6, 1987. Any CVP customer or interested person may make a written request for data from Western in accordance with section 8(a) of the Procedures. Pursuant to the Procedures, Western will provide the requested data within 5 working days.

Notices of participation must be received by the Hearing Officer at or before the prehearing conference on November 4, 1987. Participants may make oral comments at the evidentiary hearing and/or submit written comments. Such written comments must be submitted at or before the date of the evidentiary hearing, to be assured of consideration in the findings of facts and law. Any person filing comments at or before the prehearing conference on November 4, 1987, shall be deemed a participant whether or not such person has filed a notice of participation.

All persons desiring to be a party with full procedural rights at the evidentiary hearing (right to cross-examine, etc.), must file a notice of intervention which must be received by the Hearing Officer at or before the prehearing conference on November 4, 1987. Any person filing a notice of intervention who does not file timely written testimony shall be deemed to be a participant. All parties must file written testimony which must be received by the Hearing Officer at or before the prehearing conference on November 4, 1987.

Western's written testimony on the RAC will be available on or before October 14, 1987, to all CVP customers, previously identified parties, and such other interested parties who request such testimony from the Area Manager, Sacramento Area Office at the address shown above during the discovery period.

When the evidentiary hearing has concluded, parties will be allowed to submit briefs to the Hearing Officer. Briefs should be submitted on or before November 20, 1987, to be considered in the findings of fact and law. Briefs on the RAC shall be based on the written testimony and on the record of the evidentiary hearing.

The Hearing Officer will issue a findings of fact and law on or before December 10, 1987.

Rate Adjustment Consultation and Comment Period: Upon publication of the **Federal Register** notice on August 4, 1987, the consultation and comment period for the CVP proposed power and transmission rates adjustments began, and would end November 2, 1987. However, in order to incorporate the activities associated with the revenue adjustment clause evidentiary hearing, the end of the consultation and comment period has been extended to November 25, 1987.

Schedule of Events

Discovery period begins—October 7, 1987

Sacramento Area Office testimony becomes available—October 14, 1987**

Prehearing conference—November 4, 1987

Notice of participation—November 4, 1987*

Filing of a notice of intervention—November 4, 1987*

Filing of written testimony—November 4, 1987*

Discovery period ends—November 6, 1987

Evidentiary hearing—November 10, 1987

Submittal of briefs—November 20, 1987**

CVP rate adjustment consultation and comment period ends—November 25, 1987

Finding of fact and law issued by the Hearing Officer—December 10, 1987**

*At or before the prehearing conference.
** On or before.

SUPPLEMENTARY INFORMATION: Under section 553(b)(3)(A) of the APA, rules of agency organization, procedure, or practice are exempt from notice and comment rulemaking procedures (5 U.S.C. 553(b)(3)(A)). In *Southern California Edison* v. *FERC*, 770 F. 2d 779 (9th Cir. 1985), the court held that the procedural rules of agency organization, procedure, or practice are exempt from the notice and comment requirement of the APA. Western finds that these rules are procedural, and therefore are exempt from notice and comment rulemaking procedures. Accordingly, the procedures are effective upon publication of this notice.

Issued in Golden, Colorado, September 29, 1987.

William H. Clagett,

Administrator.

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPP-30000/49A; FRL-3273-9]

Preliminary Determination To Cancel Certain Registrations of Tributyltin Products Used as Antifoulants; Availability of Technical Support Document and Draft Notice of Intent To Cancel

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of preliminary determination.

SUMMARY: EPA issued a Notice of Initiation of a Special Review of Certain Pesticide Products Containing Tributyltins (TBT) Used as Antifoulants. This Notice sets forth EPA's preliminary determination regarding the continued registration of these products and EPA's assessment of the risks and benefits associated with the use of tributyltin antifouling paint products, and announces EPA's proposed decision to allow continued registration of TBT pesticide products only if registrants modify certain terms and conditions of registration as noted herein. This Notice also announces availability of the Tributyltin Special Review Technical Support Document and a Draft Notice of Intent to Cancel. The Technical Support Document and accompanying scientific reviews constitute the technical documents in support of the action.

DATE: Written comments must be received on or before January 5, 1988.

ADDRESS: Submit three copies of written comments, bearing the document control number "OPP-30000/49A" by mail to.

Information Services Section, Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460

In person bring comments to: Rm. 236, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted in any comment concerning this Notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment with the CBI portions deleted must be submitted for inclusion in the public record. Information not marked CBI may be publicly disclosed by EPA without prior notice to the submitter. The tributyltin public docket, which contains all non-

CBI written comments and the correspondence index, will be available for public inspection and copying in Rm. 236 at the Virginia address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT:

By Mail: Janet L. Andersen, Special Review Branch, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 1006F, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–0276).

Copies of the Tributyltin Technical Support Document and draft Notice of Intent to Cancel are available from the contact person at the address given above. To request information pertaining to the Tributyltin Special Review public docket or indices to the Tributyltin Special Review public docket, contact Bruce Hoak (703–557–2805).

SUPPLEMENTARY INFORMATION: This Notice is organized in the following units. Unit I provides the background on tributyltin (TBT) and the initiation of the Special Review. Unit II provides the legal background. Unit III provides a summary of the risk and benefit determinations and proposed regulatory actions. Unit IV sets forth procedural matters. Unit V discusses the opportunity for public comment. Unit VI includes information on the public docket.

I. Background

There are nine TBT compounds registered for use as antifoulants. These are: bis(tributyltin) adipate, bis(tributyltin) dodecenyl succinate, bis(tributyltin) oxide, bis(tributyltin) sulfide, tributyltin acetate, tributyltin acrylate, tributyltin fluoride, tributyltin methacrylate, and tributyltin resinate.

TBT compounds are registered for use in paint formulations as antifoulants on vessel hulls and other marine structures to inhibit the growth of certain aquatic organisms such as barnacles and algae which cause fouling. The major use of TBT paints is on ship and boat hulls with less than four percent of the use on docks, buoys, crab pots, fish nets, etc. Approximately 624,000 gallons of TBT antifouling paint are sold annually which uses approximately one million pounds of TBT compounds. When the TBT Special Review was initiated in 1986, there were a total of 61 registrants with 364 registered TBT antifouling paints and 20 formulating intermediate products.

The Special Review of TBT antifouling paints was published in the **Federal Register** of January 8, 1986 (51 FR 778) because the pesticidal use of TBT antifouling paints met or exceeded EPA's then applicable adverse effects to nontarget organisms criterion under 40 CFR 162.11. Subsequently, the risk criteria in 40 CFR 162.11 were superseded by new criteria set forth in 40 CFR 154.7(a)(3). EPA has determined that TBT compounds used in antifouling paints exceed the new criterion for exposure of nontarget aquatic organisms to concentrations which are acutely or chronically toxic to such organisms.

At the initiation of the TBT Special Review, the Agency determined that it needed certain additional data for use in characterizing the toxicity, exposure, and benefits of TBT antifouling paints. EPA, using its authority under section 3(c)(2)(B) of FIFRA, issued a Data Call In Notice (DCI) to all registrants of TBT antifouling paints and the producers of the TBT active ingredients. The DCI required product chemistry data, ecological effects data, environmental fate data, TBT paint release rate and cumulative release rate data, worker exposure data, quantitative usage and application data, and efficacy data. Ecological effects data are due into the Agency in one to four years; environmental fate data are due in one to two years; worker exposure data are due in early 1988; and other data have already been submitted to the Agency or the registrant has been suspended or requested a suspension hearing.

Based on information received in public comments to the initiation of the TBT Special Review, the data submitted to the Agency in response to the DCI, and on additional analyses performed since the initiation of the TBT Special Review, EPA has made a preliminary determination to propose (1) cancellation of TBT antifouling paint products with short term cumulative release (first 14 days of release) exceeding 168 μg organotin (calculated as TBT cation)/cm^2 or average daily release rates exceeding 4 μg organotin (calculated as TBT cation)/cm^2/day; (2) prohibition of use of TBT antifouling paints on non-aluminum hulled vessels less than 65 feet in length; (3) classification of TBT antifouling paints as restricted use pesticides and restriction of their sale to certified commercial applicators and their use to persons under the direct supervision of an on-site certified commercial applicator; and (4) require compliance with certain requirements pertaining to removal and disposal of old paint prior to application of new paints, and/or application of new TBT paints. EPA's position and a summary of the rationale underlying that position are set forth in summary in this Notice. The basis for EPA's proposed action is explained more fully in the Tributyltin Antifouling Paint Technical Support Document. Copies of the Technical Support Document are available upon request from the contact person listed at the beginning of this Notice.

In accordance with the Federal Insecticide, Fungicide and Rodenticide Act, EPA is sending a copy of this Notice, the Technical Support Document, and the draft Notice of Intent to Cancel to the Secretary of Agriculture and the Scientific Advisory Panel for the required 30-day review. EPA is also providing a 90-day public comment period on these documents. After reviewing any comments received within the applicable time limits, EPA will determine what final regulatory actions are appropriate.

II. Legal Background

A. The Statute

A pesticide product may be sold or distributed in the United States only if it is registered or exempt from registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (7 U.S.C. 136 et seq.). Before a product can be registered it must be shown that it can be used without "unreasonable adverse effects on the environment" (FIFRA section 3(c)(5)), that is, without causing "any unreasonable risk to man or the environment, taking into account the economic, social, and environmental costs and benefits of the use of the pesticide" (FIFRA section 2 (bb)). The burden of proving that a pesticide meets this standard for registration is, at all times, on the proponent of initial or continued registration. If at any time EPA determines that a pesticide no longer meets this standard for registration, then the Administrator may cancel this registration under section 6 of FIFRA.

B. The Special Review Process

The Special Review process, formerly called the Rebuttable Presumption Against Registration (RPAR), is a mechanism by which EPA collects information on the risks and benefits associated with the uses of pesticides to determine whether any use causes unreasonable adverse effects to human health or the environment. The Special Review process is currently governed by 40 CFR Part 154.

Through the Special Review process EPA: (1) Announces and describes the Agency's findings that use of a pesticide meets one or more of the risk criteria, (2) establishes a public docket, (3) solicits

VOL
52
ISS
194
OC
7
1987
UMI

comments from the public and, under certain circumstances, from the Secretary of Agriculture and the Scientific Advisory Panel regarding the Agency's analysis and proposed regulatory decisions; (4) reviews and responds to all significant comments submitted in a timely manner; and (5) makes a final regulatory decision based on a balancing of risks and benefits associated with a pesticide's use.

Issuance of this Notice means that EPA has assessed the potential adverse effects and benefits associated with the use of antifouling paints containing TBT and that EPA has preliminarily determined that, unless the terms and conditions of registration are modified as proposed in this Notice, the risks from TBT exposure outweigh the benefits of its use. The Agency proposes that the terms and conditions of TBT registration be modified so that (1) all TBT antifouling paint products with short term release (first 14 days) exceeding 168 μg organotin/cm² or with average daily release rates exceeding 4 μg/cm²/day will be cancelled, (2) no TBT antifouling paint may be used on a non-aluminum vessel under 65 feet in length, and (3) TBT antifouling paints will be classified as restricted use pesticides, their sales will be restricted to certified commercial applicators, their use to persons under the direct supervision of an on-site certified commercial applicator, and that users comply with certain requirements pertaining to removal and disposal of old paint prior to application of new paints, and/or application of new TBT paints.

As noted in the section of this Notice entitled **FOR FURTHER INFORMATION CONTACT**, a document entitled "Tributyltin Technical Support Document" (Technical Support Document) has been developed and is available to the public. The Technical Support Document provides a detailed explanation of the basis for EPA's preliminary decision and also contains references, background information, and other information pertinent to the registration of antifouling paints containing TBT.

In addition, copies of a draft Notice of Intent to Cancel TBT products are also available from the contact person listed above. Preparation of the draft Notice of Intent to Cancel is required by 40 CFR 154.31(b)(1). This draft Notice is being forwarded to the Scientific Advisory Panel (SAP) and the Secretary of Agriculture to permit their review of EPA's action. The draft Notice of Intent to Cancel, along with the Tributyltin Technical Support Document and this Notice prepared pursuant to 40 CFR 154.31 are being sent to all registrants and applicants for registration of antifouling paints containing TBT. The draft Notice contains the draft provisions regarding disposition of existing stocks and procedures for requesting a cancellation or denial hearing after issuance of a final notice of intent to cancel.

III. Summary of Risk and Benefit Determinations and Proposed Regulatory Actions

A. Determinations on Risk

Laboratory testing and field trials have established that TBT can be toxic at low levels to fish (0.2 ppb), bivalves (0.02 to 0.05 ppb), gastropods (0.002 to 0.02 ppb, lowest value an extrapolation), crustaceans (0.09 to 0.14 ppb), and algae (0.1 to 0.35 ppb). TBT concentrations at or above 0.02 ppb have been reported for at least 30 sites in the United States, predominantly in areas with heavy boating and shipping activity.

Harbors and boating activity are usually concentrated in relatively shallow (< 30 ft) coastal waters. These areas also coincide with many estuaries or ecologically dynamic environments that tend to support larage fisheries populations and are important nursery areas. The toxicity of TBT to nontraget aquatic organisms reportedly has caused adverse population effects in France and England. While there are limited reports of TBT effects in the U.S., actual impacts have been observed in Coos Bay, Oregon.

1. *Toxicity to nontarget aquatic organisms.* The full extent of the risks of TBT to nontarget aquatic organisms is unknown at this time. While observable effects under field conditions have not been determined for many aquatic species, TBT toxicity studies have been conducted on algae, fish, crustaceans, and molluscs (both bivalves and gastropods). Although short term acute studies have demonstrated that TBT is highly toxic to certain aquatic organisms (LC_{50} >0.1 ppb), larger chronic testing revealed a degree of toxicity effects that were one to three orders of magnitude greater (>0.002 ppb extrapolated value). For most organisms, the process of development from fertilized eggs through various larval stages is most sensitive to TBT toxicity. In addition to reproductive effects, the sublethal toxicity of TBT may be of sufficient magnitude to gradually alter aquatic populations by changing their size or composition (individual year class strength), metabolism (TBT is a membrane effector), behavior (competition abilities, defense mechanisms, feeding strategies), and/or result in deterioration of environmental conditions through physical, chemical, or biotic factors.

The Agency's Office of Water plans to issue its draft Tributyltin Water Quality Advisory in the near future. The Advisory will be a guideline to EPA Regional Offices suggesting maximum TBT concentrations which would protect fresh and salt water organisms. The values in the Advisory are subject to change depending upon new scientific data made available to the Agency. Further data have been required of TBT registrants; however, thte data are not expected to be submitted to the Agency for one to four years. In the meantime, there are sufficient laboratory and field data to indicate that certain harbor and estuarine areas have TBT residues above levels which may be safe to certain aquatic organisms. The Agency has determined that some action is necessary at this time to protect nontarget aquatic organisms from the adverse effects of TBT contamination.

a. *Fish.* Acute toxicity to both fresh and marine fish species have been reported with values as low as 1.5 ppb, 96-hour LC_{50} for chinook salmon *(Oncorhynchus tshawytscha).* Researchers at the Alaskan National Marine Fisheries Service have observed several incidents of high mortality after transfer of juvenile salmon to newly TBT-treated marine net pens.

Chronic exposure of TBT to fish has been found to result in physiological alterations in growth rate and in histological damage to rainbow trout *(Salmo gairdneri)* at concentrations as low as 0.2 ppb TBT. Prolonged exposure to sublethal doses of TBT could result in growth retardation or lowered disease resistance. Chronic exposure of parent sheepshead minnow *(Cyprinodon variegatus)* to TBT for over 121 days at 0.24 ppb resulted in a high progeny morality.

Bioaccumulation (accumulation in the body of an organism of concentrations higher than in surrounding water) of TBT has been reported for sheepshead minnow where an equilibrium was not reached during a 58-day test period. With exposures of 0.96 to 2.07 ppb, residues were as high as 4.19 ppb in the whole body. When transferred to clean water, depuration (loss of the toxicant from the organism) was rapid for the first 7 days, but slowed over the next 21 days. Also chinook salmon were reported to bioaccumulate TBT by a factor 200 to 4300 times greater than the TBT concentration in the water column.

b. *Bivalves.* Larval stages are more sensitive to TBT than adults. Acute

toxicity to bivalve larvae (48-hour LC_{50}) has been reported to be 1.6 ppb for Pacific oyster larvae *(Crassostrea gigas)* and 0.1 to 2.3 ppb for mussel larvae *(Mytilus edulis)*.

Chronic effects of TBT exposure are reported to cause growth retardation at 0.02 to 0.05 ppb in European oyster *(Ostrea edulis)* and clams *(Venerupis decussata)*, shell thickening at 0.15 ppb in Pacific oyster, and reproductive aberrations (predominance of males in the hermaphroditic European oyster) at 0.24 ppb.

Bivalves rapidly bioaccumulate and slowly depurate TBT. Bioaccumulation factors of 2000- to 6000-fold for Pacific oyster and 1000- to 1500-fold for European oyster have been recorded. In mussels, TBT accumulates in lipid-rich tissue, especially in gonadal tissue.

c. *Gastropods.* Mud snails (specifically *Nassarius obsoletus* and *Nucella lapillus)* are reported to develop a condition termed "imposex" as a result of TBT exposure. Imposex is the superimposition of male characters (penis and vas deferens) on female organisms. A high frequency of imposex has been observed in areas with heavy boating and shipping activities and high levels of TBT in the water column. Imposex is infrequent in more pristine areas. Also a relationship with TBT antifouling paints has been demonstrated in the laboratory at 0.02 ppb for 120 days (extrapolation of data has been used to predict effects at 0.002 ppb).

d. *Crustaceans.* Acute toxicity of TBT to tested crustacean species ranges from 0.42 ppb for a 96-hour LC_{50} for juvenile mysid shrimp *(Acanthomysis sculpta)* to 41 ppb for a 96-hour LC_{50} for adult shrimp *(Crangon crangon)*.

The sublethal chronic effects of TBT to crustaceans have involved growth retardation in mysid shrimp (0.31 to 0.45 ppb), delayed metamorphosis in mysid shrimp (10 to 20 ppb), delayed limb regeneration in fiddler crabs *(Uca pugilator)* (0.5 ppb), reproductive effects in adult female mysid shrimp (0.25 ppb), and behavioral changes in daphnids *(Daphnia magna)* (0.5 ppb).

e. *Algae.* A limited number of marine diatoms and fresh water algae have been examined for toxic effects from TBT compounds. In laboratory studies, an EC_{50} for growth inhibition of the marine diatoms *Skeletonema costatum* and *Thalassiosira pseudonana* was observed after 75 hours exposure at 0.33 ppb and 1.33 ppb, respectively. Growth reduction was reported for *S. costatum, Pavlova lutheri,* and *Dunaliella tertiolecta* at 0.1 ppb and death at 5 ppb after 2 days.

2. *Comparative toxicities of tributyltin, triphenyltin, and copper.* Copper based antifouling paints are the major alternative to TBT paints. Although copper can be highly toxic to aquatic organisms, it appears to be less toxic than TBT by one to three orders of magnitude. Copper toxicity and bioavailability are reduced in the marine environment because the toxicity unit, the free cupric ion, is absorbed by and forms complexes with organic and inorganic ligands.

Also, triphenyltin (TPT) could be used as a substitute antifouling compound in paints. Therefore, the use of TPT could be expected to increase. The Agency has a limited set of data on TPT (based on nominal concentrations) which indicates that TPT causes chronic effects on fish at 2.0 ppb and effects on crustaceans at >0.27 ppb. TBT effect levels for these organisms are >0.2 ppb and 0.09 ppb, respectively. The Agency issued a DCI on TPT antifoulant uses on August 26, 1987, which will require ecological effects data along with other data. The information obtained from this DCI will be useful to the Agency in assessing the risks of TPT to nontarget aquatic organisms.

3. *International reports of TBT contamination and population effects*—a. *France.* In France, a correlation has been found between TBT residual levels in certain estuaries and gross malformations in Pacific oysters grown in commercial oyster *(C. gigas)* beds in and adjacent to areas of heavy boating activity. These deformities are characterized by the production of a series of cavities within the shell causing extreme thickening of the valves. The oyster tissue has a higher proportion of amino acids such as threonine, but a smaller amount of serine, glycine, and asparatic acid compared to normal unaffected oysters. Environmental concentrations of organotin in the water column were measured at 0.2 to 0.3 ppb in Arcachon Bay during 1982 and appeared to have caused shell deformities in seventy to 100 percent of the 2-year old oysters. Following a ban on TBT antifouling paints on vessels less than 25 meters (82 feet) in length, the degree of shell deformities has decreased and the regeneration rate of juvenile oysters (spat) has improved.

b. *England.* In England similar shell deformities were found for Pacific oysters (*C. gigas*) exposed to 0.15 ppb TBT. Reproductive abnormalities (imposex) have been observed in a type of mud snail called dogwelk snails (*Nucella lapillus*) and may be responsible for the observed decline in the snail populations. Researchers established that this reproductive failure can occur in snails when TBT tissue concentrations exceed 0.1 ppb. Laboratory testing demonstrated that tissue levels of 1.65 ppb have been found to induce imposex after snails were exposed to 0.02 ppb TBT for four months. Therefore, researchers extrapolated that imposex could occur after a longer period of exposure to 0.002 ppb TBT because the effects had been seen at tissue concentrations an order of magnitude (0.1 ppb) below that observed in the laboratory (1.65 ppb).

c. *Canada.* In Canada, organotin residues have been found in several fresh water locations including lakes, rivers, and harbors. Several sample stations had TBT levels (0.22 to 2.34 ppb) that were comparable to the chronic level (>0.2 ppb) associated with growth retardation in rainbow trout larvae. High levels of TBT residues at these sample stations were associated with heavy boating or shipping activity.

d. *United States.* Reports on the effects of TBT on aquatic populations in the United States have been limited because the environmental impact of tin-based antifoulant paints has only been studied for a few years. However, from the information that is available, it appears that adverse effects to nontarget aquatic organisms may have occurred. Insufficient data are available to define the full extent of the problem.

The Department of Fish and Wildlife of Oregon recently found shell deformities in oysters from Coos Bay, and have attributed these abnormalities to TBT residues from paint chips coming from a nearby shipyard. Researchers at California Department of Fish and Game demonstrated that oysters (*C. gigas*) and mussels (*M. edulis* and *M. californianus*) transplanted along a known gradient of TBT concentations in San Diego Bay exhibited shell thickening and growth effects similar to laboratory and field findings documented in France and England. The observed shell thickening and decreased growth correspond to increased concentrations of TBT in the water column. These values were comparable to environmental concentrations observed in France and England (0.24 ppb). Imposex in female mud snails has been reported in the U.S. along the East Coast and in California in close proximity to yacht harbors and marinas. In marinas and areas of high boating activity of the southern Chesapeake Bay TBT concentrations are reported to be at 0.014 to 0.1 ppb, levels that laboratory tests indicate cause reproductive effects in molluscs and snails.

4. *Endangered species.* There are approximately 90 endangered species in fresh water lakes and streams and in marine estuaries and harbors of the U.S. There are no available organotin toxicity data for these species; however, EPA has asked the Office of Endangered Species of the Fish and Wildlife Service, Department of the Interior and the Marine and Estuaries Fisheries Service in the Department of Commerce to determine if organotin compounds would jeopardize any endangered species.

5. *Exposure*—a. Environmental fate. The environmental chemistry and fate of tributyltin in estuaries are complex and not completely understood. Studies indicate that photolysis and microbial action are potential mechanisms of degradation from tri- to di- to monobutyltin and finally to inorganic tin. Studies indicate the half-life of TBT may be 116 days in aerobic soils, 815 days in anaerobic soils, 6 to 12 days in seawater, and up to 238 days in fresh water. TBT is readily sorbed to soils and sediments. Sediment-water partition coefficients of 300 and 700 μg/kg/mg/L have been reported for sediment loadings of 10 and 100,000 mg/kg, respectively. Thus, newly deposited sediments would have TBT concentration when the solid concentration was 10 mg/L in the water column. As the amount of solid in the water column increased, the difference between the ambient water column concentrations and the sediment concentration would decrease. Data from monitoring studies has consistently indicated that TBT and its di- and monobutyltin degradates concentrate in bottom sediments. Sediment-bound residues appear to contain proportionally higher concentrations of the degradates than is found in the water column. The means of TBT deposition in the sediments and the relative strength of TBT adsorption versus adsorption of the degradates are not known. The overall partitioning of TBT among water, biota, sediment, surface microlayer, and atmosphere has not been experimentally investigated.

b. *Bioavailability.* Although a small amount of dissolved TBT appears to be bound to suspended particulate, TBT does accumulate in sediment at levels that are one to four orders of magnitude greater than the concentration found in the respective water column. This amassing of toxicant can have serious consequences for organisms living and feeding in the benthos (bottom of the body of water). For example, it has been found in laboratory experiments and field trials that TBT in combination with sediment can affect growth in Pacific oyster (*C. gigas*) at 0.15 ppb. In addition, the results of a laboratory study indicate that mud crabs (*Rhithropanopeus harrissi*) accumulate TBT from food as well as water exposure.

In estuarine environments, 95 percent of the particulate-bound TBT may be associated with bacterial cell walls (dead and alive cells). The adsorption of TBT to bacteria is a significant exposure component that can affect aquatic organisms that feed on detritus (organic matter) and suspended particulate. These organisms include species of polychaetes, snails, amphipods, sponges, bivalve molluscs, and arthropods.

c. *Environmental monitoring.* Monitoring studies have been carried out to determine the extent of TBT contamination in the water column of marine and fresh waters. Sampling was designed to compare levels of contamination in areas of varying boating activity (recreational and commercial). The seasonal, tidal, and spatial flux of TBT and its degradates were examined in some cases. Limited analyses of sediment and aquatic biota also have been performed.

TBT levels in tested areas of the Chesapeake Bay and San Diego Bay ranged from ND (nondetectable, meaning below the level of detection for the analytical method used) to 0.8 ppb and ND to 1 ppb, respectively. Other reported water column concentrations were: San Francisco Bay ND to 0.16 ppb, Honolulu Harbor 0.045 to 0.27 ppb, Los Angeles/Long Beach Harbor ND to 0.12 ppb, Narragansett Bay ND to 0.13 ppb, Thames River (CT) ND to 0.009 ppb, and Mayport, Florida ND to 0.016 ppb. Fresh water samples from 265 locations across Canada were analyzed for TBT. In 10 percent of the water samples, TBT was found at levels >0.2 ppb. Consistently, TBT concentrations were highest in areas of heavy boating activity. A montoring study in the Chesapeake Bay during the summer of 1986 showed a strong correlation between boat density and observed TBT concentrations in four harbors.

TBT concentrations have been shown to vary seasonally. In areas of moderate to high TBT loading, the water column levels of TBT appear to correlate to seasonal boating activity and boat maintenance activities. Seasonal variation in temperature may also influence the leaching of TBT from paints and/or the mobility and persistence of TBT in the marine environment.

Tidal flow and other hydrolic activities also have been shown to influence TBT concentrations. Flushing has a major impact on TBT concentrations. Sites with a fresh water influx into a large body of seawater and no significant backwater areas or recirculating currents, generally have very low concentrations of TBT regardless of loading rates. In areas where water residence times are relatively long, TBT levels increase in proportion to the loading. Accumulation of TBT degradates have been oberved in locations where water movement is very slow (i.e., southern end of San Diego Bay).

d. *Environmental modeling.* The Agency is engaged in modeling Norfolk Harbor in Virginia. Norfolk Harbor is a major fishery with large populations of hard clams and Eastern oyster and is a nursery for spot, Atlantic crocker, Atlantic menhaden, striped bass, black sea bass, and summer flounder. The area is also an active boating and shipping area with recreational, commercial, and military use and contains large and small boat/shipyards. The Agency model will examine environmental concentrations under several loading levels and attempt to estimate the impact of possible regulatory approaches on TBT concentrations. The information may be useful to the Agency in making future regulatory decisions.

6. *Risk assessment summary.* As explained in the Technical Support Document, laboratory and field studies have demonstrated that low concentrations of TBT can cause irreversible chronic effects to a broad spectrum of nontarget aquatic organisms. At a concentration of approximately 0.02 ppb, TBT has caused a reduction in growth to commercially important bivalves and imposex in ecologically significant gastropods in laboratory studies. Monitoring studies which are further discussed in the Technical Support Document have demonstrated that TBT is moderately persistent in the marine environment and that the observed levels of TBT in the water column in and adjacent to marinas, dry dock areas, and poorly flushed harbors exceed concentrations that have been demonstrated to cause adverse effects in molluscs, gastropods, and other nontarget aquatic organisms. TBT levels in the water column are strongly influenced by currents and tides. It is believed that biologically significant levels of TBT may be transported to sensitive ecologically productive areas. The Agency also is concerned about the potential accumulation of TBT in aquatic sediments and in the tissue of aquatic

organisms; however, insufficient data are available to determine the extent and significance of these events.

C. Determination of Benefits

The benefits of TBT antifouling paints were analyzed for the boat and shipyard industry and three user groups: recreational, commercial, and military. As explained in the Technical Support Document, analysis was performed for three possible regulatory options: (1) Total ban of TBT antifouling paints, (2) restriction of TBT paints by release rate, and (3) restriction by release rate, size of vessel, and classification as a restricted use pesticide. Other regulatory options were not analyzed because it was determined that they were not feasible options to reduce the risks from TBT exposure to nontarget aquatic organisms.

Comparisons were made for TBT copolymer/ablative, TBT free association, copper conventional, and copper ablative paint systems. For each user group and each paint system, the impact of regulation was determined by subtracting the cost of hull maintenance using a particular paint system from the operational benefits gained from that system (i.e., fuel efficiency, time between dry dockings). The different paint systems were then compared for each user group. Hull preparation costs are lower when ablative paints are used, and vessel operators also can achieve extended dry docking intervals; the longer a vessel can stay in service between dry dockings or hull cleanings, the less expensive a vessel is to operate. The Navy plans to convert its entire fleet to certain organotin copolymer/ablative paints which it expects will enable it to operate vessels on a 5 to 7 year dry docking schedule.

The major currently available alternatives to TBT antifouling paints are copper compounds, chiefly cuprous oxide. There are copper ablatives which like TBT copolymer/ablatives do not require hull cleaning or frequent dry docking. There are currently only three registered copper ablative paints. More years of testing are needed to determine if they can give the 5 to 7 years of service noted for certain TBT copolymer/ablative paints. Testing now being conducted indicates copper ablatives give acceptable control of fouling for 3 to 4 years. The conventional copper paints require frequent hull cleanings (every 9 to 18 months) to remove fouling organisms and the layer of insoluble copper compounds that precipitate near the paint surface and block release of the toxicant. However, there is published research indicating the copper conventional paints may last over three years with several hull cleanings. The major disadvantage of copper is that it may cause galvanic corrosion to aluminum vessel hulls. Even with high quality anticorrosive primers, there may be small flaws in the primer coat that could allow copper corrosion to an aluminum hull, especially on vessels with long dry docking intervals.

Commercial vessels use approximately 60 percent of the TBT antifouling paints. For ocean going vessels, long periods between dry dockings and reduced fuel consumption are important considerations. Although many commercial vessels are dry docked and inspected every two years, TBT copolymer/ablative paints provide an estimated $318 million per year savings to U.S. commercial vessels over copper conventional paints and an estimated $143 million savings over copper ablative paints.

There are approximately 5 million recreational vessels in the U.S. Most recreational vessels are removed from the water after every use and do not antifouling paint. However, 14 percent of these vessels use some type of antifouling paint, of which about 30 percent use organotin antifouling paints (approximately 208,000 recreational vessels). It is estimated that 60,000 recreational vessels are painted with TBT copolymer/ablative paints, but of these, only some 21 percent of those using TBT copolymer/ablative paints take advantage of the extended dry docking intervals that can be achieved through use of these paints. The loss of TBT paints would cost recreational boaters currently using TBT copolymer/ablative paints an estimated $0.85 million per year. Recreational vessel owners who currently use free association TBT paints would incur an estimated additional cost of $0.28 million per year over using less expensive copper based paints which will give one to two seasons of protection. Therefore, in terms of antifouling use, there appears to be an economic benefit only to recreational boat owners using TBT copolymer/ablative paints who take advantage of the extended dry docking intervals. However, TBT compounds are colorless and offer recreational boat owners more choice of paint colors than copper based paints.

The impact of a total ban of TBT antifouling paints was calculated for the U.S. Coast Guard, Navy Sealift Command, and U.S. Navy assuming implementation of the proposed Navy fleetwide conversion to organotin antifouling paints. The estimated average annual net benefit of using TBT copolymer/ablative paints versus copper ablative paints is $35.3 million and $142 million over using copper conventional paints. Estimates for loss of fleet readiness were not quantified.

The total annual benefits (including commercial and recreational vessels) of an estimated $179 million would be lost if all users of TBT paints switched to copper based paints (copper ablatives substituted for TBT copolymer/ablative and conventional coppers substituted for TBT free association paints). If all users substituted conventional copper paints for all TBT paint use, the loss would be an estimated $460.8 million annually.

The foregone benefit (i.e., additional expense) of using copper ablatives may be reduced if copper ablatives can be shown to have service lives comparable to TBT copolymer/ablative paints. Since it has been shown that existing copper ablative paint formulations have in-service lives of at least 3 years, dry docking on a three year schedule was used for all copper ablative paint calculations.

There are approximately 6000 boat and shipyards in the U.S., 44 percent of which use antifouling paint. Approximately 48 percent of the antifouling paints used by these firms are TBT products; this accounts for about 70 percent of the gallons of TBT antifouling paints used in boat/shipyards. U.S. shipyards compete with foreign countries as well as domestically for business. Many U.S. flag (ocean going) vessels are currently docked and painted abroad because foreign labor and materials in this sector are generally less expensive despite a substantial ad valorem tax on these services. A ban on the use of TBT paints would encourage more vessels to be painted abroad, possibly having a substantial impact on domestic shipyards. However, boat and shipyards serving vessels too small to go abroad may have more business if conventional copper paint systems are used that require frequent hull cleaning and more frequent painting than TBT copolymer/ablative paints.

Under the option to restrict release rates, there would be TBT paints (both copolymer/ablative and free association) available for all user groups and for aluminum hulled vessels as well. An initial short supply of acceptable paints is likely and prices may be elevated in the short term until new paints with acceptable release rates are formulated or paints with unacceptably high release rates are reformulated and registered.

VOL
52
ISS
194
OC
7
1987
UMI

The last option included the following elements: (1) Release rate restrictions, (2) limiting the size of vessel treated, and (3) classifying TBT antifouling paints as restricted use pesticides. Restricting the size of vessel to be treated with TBT should have a minor economic impact on users because most non-aluminum hulled vessels under 65 feet in length do not gain an economic benefit from the use of TBT antifouling paints because vessels are painted frequently and there are effective alternatives. Making TBT antifouling paint a restricted use pesticide would cost users an estimated $600,000 in lost opportunity costs the first year and $150,000 in subsequent years. There would also be an estimated cost of $25,000 to $30,000 incurred by affected states each year to establish and maintain the required training programs. Estimated cost of required compliance with application, removal, and/or disposal directions is unknown at this time.

New technologies for controlling antifouling may be implemented that could reduce the impact of TBT restrictions. For example, the U.S. Navy is testing fluorocarbon coatings that contain no toxicant. The coating surface must be cleaned regularly (once a month in the summer and once every 3 months in the winter). A tug boat painted with the fluorocarbon coating has reformed well since 1977 without repainting. Also the antibiotic terramycin has recently been registered as an additive to antifouling paints; it must be incorporated with paints containing other toxicants and cannot be considered a direct substitute. Control of fouling organisms is an active area of research, especially in the U.S. Navy which conducts testing of promising new compounds for their overall performance.

In conclusion, it appears that the major benefits from the use of TBT antifouling paints are gained by those vessels taking advantage of the extended dry docking intervals. Because of the higher costs of TBT paints versus copper paints, most recreational boaters appear to lose money by using TBT paints, because they do not take advantage of the extended dry docking intervals. The U.S. Navy claims that the use of TBT paints will provide improved fleet readiness in addition to economic benefits. TBT antifouling paints appear to give large economic benefits to commercial vessel owners who take advantage of the extended dry docking schedule. Copper based paints are the major alternatives to TBT paints and for some users the copper ablative paints may prove to be equally effective. Further research is being conducted on other alternatives.

D. Analysis of Release Rates

The Tributyltin Data Call In Notice (TBT DCI) required all registrants of TBT antifouling paints to measure TBT release from registered paints following a test method developed in cooperation with the American Society for Testing and Materials (ASTM). In addition, each laboratory conducting the TBT release test was required to test a standard copolymer test paint provided by EPA as a means of assuring that the test method was consistent among testing facilities.

Results for the standard test paint varied substantially. All data were reviewed by the Agency and a value of 90 $\mu g/cm^2$ was assigned to the short term cumulative release (cumulative for the first 14 days of the test) and a value of 5 $\mu g/cm^2$/day was assigned to the average daily release rate (average of weeks 3 to 5 of the test) for the standard test paint. Each laboratory's standard test paint data were normalized to these assigned values. This enabled the Agency to make comparable adjustments in the test results of the various TBT paints as noted below.

Release rate data were reviewed for the 96 TBT antifouling paint products submitting data to the Agency. It was determined that at least 57 of the tests were conducted satisfactorily and all data were normalized according to adjustments made to the standard test paint results. Details of release rate data are available in the Tributyltin Technical Support Document.

Generally the release rates start high and gradually decrease over the course of the test period. Some paints with a high percentage of TBT have a much higher short term cumulative release rate than other paints tested. It was concluded that while there was a strong statistical correlation between the percent active ingredient and the average daily release rate, the data points were too scattered (rather than concentrated around the regression line) for the data to be useful for regulating TBT paints. The scattered data points indicated that other factors, such as the type and quality of the inert ingredients (resins, rosins, binders, etc.) may be important in determining the release rate of a paint and that regulating on percent active ingredient would not necessarily reduce environmental loading of TBT.

Results of the release rate tests show that some TBT ablative and free association paints have lower release rates than many TBT copolymer paints. Using the normalized data for the satisfactory release rate tests, it was found that neither the type of TBT paint formulation (free association or copolymer) nor the percentage of TBT in the formulation could be used to predict the average release rate. Average release rates from TBT free association paints were not consistently higher or lower than release rate from the TBT copolymer paints; however, generally paints with a high percentage of TBT in the formulation had higher average release rates than paints with low TBT content.

An estimate of the average daily release rate prior to the initiation of the Special Review was made using all available release rate data. Based on the type of TBT compound(s), the percent active ingredient in each paint, and the release rates of similar paints, an estimated release rate was calculated for each paint where the release rate was unknown (data not submitted to the Agency). Then using the release rate data on hand and the estimated release rates, a mean of all release rates was determined. This mean was 19.7 or about $\mu g/cm^2$/day.

E. Risk/Benefit Analysis

FIFRA requires EPA to weigh the risks against the benefits of the use of pesticides to determine whether continued registration would cause unreasonable adverse effects on man and the environment. This section reviews EPA's conclusions concerning the risks and benefits of TBT antifoulants and their alternatives in order to determine whether continued registration of TBT antifoulants is appropriate. The Agency has determined that with current label restrictions, the risks posed to nontarget organisms from the use of TBT antifouling paints outweigh its benefits. Detailed discussion of the risk/benefit analysis appear in the Technical Support Document.

TBT has been shown to be highly toxic to aquatic organisms at or near 0.20 ppb. In particular, TBT has been shown to be somewhat persistent in the environment and may bioaccumulate in animal and plant tissue without complete degradation. Potential exposure to nontarget organisms is high in areas of boating and shipping activity, and TBT may be transferred to sensitive ecologically productive areas via currents and tides. TBT binding to sediments and particulate, suggests the potential for bioavailability to filter and deposit feeding organisms. TBT residues have been found in U.S. waters at levels comparable to the values that have

caused population effects in Europe and comparable to the values that have been shown to cause effects to nontarget organisms during laboratory experiments. Recent reports in the U.S. link TBT exposure to adversely affected oyster beds in Coos Bay, Oregon. The Agency believes that there is adequate information available to propose the set of regulatory actions designed to reduce environmental loading of TBT as presented here and in the Technical Support Document.

The total annual benefits of TBT antifoulant use are estimated to be $179 million compared with using the next best alternative, either copper ablative or copper conventional paint depending upon what the user is currently applying. However, the benefits are highest for those users taking advantage of the extended dry docking schedule offered by TBT copolymer/ablative paints. In most cases, recreational boat owners using TBT paints incur an additional cost from which they appear not to benefit compared to using less expensive copper based paints, because they generally do not take advantage of the extended dry docking schedule.

The Agency believes the risks posed from the use of TBT antifouling paints can be reduced without losing benefits for most commercial and military users through the use of TBT antifouling paints which release less TBT into the aquatic environment, while complying with the other elements of the proposed action. It is believed that many recreational vessel owners will save money by use of non-TBT alternatives. While there will be costs to states for training certified applicators and costs to user groups who must become certified under restricted use and comply with certain application, disposal, and removal requirements, the Agency believes that the benefits of reducing the environmental loading of TBT outweigh the costs.

F. Development of Regulatory Options

This section identifies the regulatory options available to EPA to reduce the risks from TBT antifoulants. Each option has been evaluated for its impact on the risks and benefits of TBT as antifoulants and the most appropriate regulatory options have been proposed.

The Agency considered three regulatory options: continued registration without changes, continued registration with modifications of the conditions of registration, and cancellation of all registrations.

1. *Continued registration without changes.* The Agency has concluded that, although further data will be used to refine our assessment of the risks posed by the use of TBT antifouling paints, there are sufficient data to conclude that some action should be taken to reduce the environmental loading of TBT in order to protect nontarget aquatic organisms from adverse effects due to exposure to residues from TBT antifoulants.

2. *Continuation of registration with changes.* The Agency believes that the risks posed by the use of TBT antifouling paints can be lowered by modifying the terms and conditions of registration. Although it is unknown at this time if such modifications will be adequate to reduce the risks to acceptable levels, the Agency is proposing a number of actions at this time designed to reduce environmental loading of TBT. Any action included in the Agency's final decision will be reviewed when the Agency receives additional data. The following actions were considered by the Agency:

a. *Limitation on percent active ingredient.* The Agency considered restricting the concentration of TBT in antifouling paints as done by Great Britain. However, from information obtained from the release rate testing, the Agency has determined that restrictions on the percent active ingredient would not assure a lowering of TBT environmental loading because the type and quality of the inert ingredients (resins, rosins, binders, etc.) are also important in determining the release rate of a paint. The inert ingredients could be changed by a registrant so as to alter the release rate of the paint product, without altering the percentage of active ingredient.

By regulating on release rate rather than on percent active ingredient, the Agency can be better assured that the environmental levels of TBT will be reduced.

b. *Regulation by paint formulation.* Another option considered by the Agency was to regulate by type of paint formulation. Early in the Special Review process, it was suspected that copolymer paints released TBT at a much slower rate than other formulations. However, as the release rate data became available to the Agency, it became obvious that there were free association paints with release rates both higher and lower than those of copolymer paints.

The complication of having free association paints with both lower and higher release rates than copolymer paints makes it difficult to regulate on the basis of paint formulation.

c. *Release rate restrictions.* The Agency considered an option requiring that TBT paints meet both the maximum short term cumulative release and the average daily release rate and examined the role that a dual rate restriction would have on protecting the shell fish beds and fish nursery grounds in shallow estuarine water where vessels are typically moored. A maximum short term cumulative release rate would be designed to limit TBT release from large vessels which are moored in estuary water after painting while additional maintenance is being done. For most paint formulations, freshly painted surfaces release TBT at much faster rates that surfaces seasoned for even three or four weeks in the water.

A maximum average daily release rate will help reduce the environmental loading of TBT by removing paints with high release rates from the market. The long term use of paints with medium or high average daily release rates could result in levels of TBT in the water column over time at chronic effects levels. Concentrations at such levels have been reported for at least thirty sites around the U.S. Therefore, regulatory measures are needed to reduce those concentrations and to prevent such concentrations in other areas.

This option provides that no TBT antifouling paint can be sold or distributed which exceeds either a short term cumulative release (cumulatively released over the first 14 days of the test) of 168 μg organotin (calculated as TBT cation) /cm^2 or an average daily release rate (average of weeks 3 to 5) of 4.0 μg organotin (calculated as TBT cation)/cm^2/day. The proposed average daily release rate would be a five-fold reduction over the estimated 20 μg/cm^2/day average daily release rate prior to initiation of the Special Review and would allow formulations to remain on the market which provide extended periods between dry dockings and high fuel efficiency. For a full discussion of release rates see the Technical Support Document.

Of the 57 registered products with satisfactory release rate test data, 29 products would meet the proposed standard. Assuming those paints remained marketed, there would be paint products available for all market sectors. In the future, the Agency may register additional products with acceptable release rates.

Cancellation of high release rate paints would initially decrease the supply of TBT antifouling paint products (less than 30 percent of the current market has acceptable release rates), which may result in a temporary increase in the price of antifouling paints. As users switched to non-TBT alternatives, or as more paints with

acceptable release rates enter the market (either through increased production, new products, or reformulated old products), the price should steadily approach the current price structure.

d. *Prohibition of use on certain vessels.* This option provides for a label restriction prohibiting the use of TBT antifouling paints on non-aluminum hulled vessels less than 65 feet in length. Copper paints may cause galvanic corrosion, even with the use of high quality primers and frequent repainting. The size limit of 65 feet was chosen because: (i) This size distinguishes between most vessels which the Agency believes either gain an economic benefit from the use of TBT antifouling paints or do not gain a benefit from the use of these paints; and (ii) most vessels of less than 65 feet in length are predominantly used in ecologically important, shallow estuary waters.

Approximately 37 percent of current TBT antifouling paint use would be eliminated under this option, primarily by recreational users. Vessels in this size class tend to be used as well as moored in shallow waters. Additionally, these craft are often painted yearly in the spring which is believed to result in elevated TBT levels during the reproductive period of many nontarget organisms. Therefore, the Agency believes that elimination of TBT paints from these numerous craft would significantly reduce the loading and concentration of TBT into these aquatic environments, and, in particular, into the most sensitive shallow waters.

e. *Restricted use.* This option includes classification of the TBT antifouling paints as restricted use pesticides. Under this option, TBT antifouling paint products would only be sold to certified commercial applicators and would only be applied, removed, and disposed of by these applicators or persons working in their physical presence. Certified applicators would be trained in proper application and disposal techniques in the aquatic pest control category of 40 CFR 171.3(b)(5). Practicing proper application, removal, and disposal techniques should significantly reduce the volume of TBT waste residues entering aquatic environments. Also, certified commercial applicators will be in position to assure compliance with any vessel size restriction.

TBT contamination has been found to occur around marinas, shipyards, and dry docks due to paint chips and dust being washed into the water. Labels would require compliance with the following directions for use: (1) During and after paint removal and/or application of new TBT paint, employ methods designed to prevent introduction of TBT paints into the aquatic environment; and (2) following removal of TBT paint and/or application of new TBT paint, all paint chips and spent abrasives, paint containers, unused paint, and any other waste products from paint removal or application must be disposed of in a sanitary landfill.

3. *Cancellation of registration.* A total ban would cost users an estimated $179 million a year as well as adversely affect shipyards servicing at least the large vessels. Even if EPA cancelled the registrations of TBT antifouling paints, ships treated in foreign countries which come into U.S. waters would release TBT into U.S. marine environments. Full cancellation of TBT antifouling paints is not being proposed at this time, because on the basis of what the Agency knows now, it does not appear warranted. The Agency believes it can accomplish reductions in environmental loading of TBT by means short of a full ban. The Agency may determine later, following receipt of new data or upon showing that any restrictions which are implemented do not adequately protect nontarget aquatic organisms, that cancellation of all TBT antifouling paints may need to be considered.

G. Proposed Regulatory Decision

In order to reduce the concentrations of TBT in the aquatic environment, the Agency proposes to (1) cancel all TBT antifouling paint registrations which exceed a short term cumulative release of 168 μg organotin/cm^2 14 days or exceed an average daily release rate of 4.0 μg organotin/cm^2 day; (2) prohibit the use of TBT antifouling paints on all non-aluminum vessels under 65 feet in length and require appropriate label language; (3) classify TBT antifouling paints as restricted use pesticides, restrict their sale to certified commercial applicators and their use to persons under the direct supervision of an on-site certified commercial applicator, and (4) require compliance with the following directions for use: (a) During and after paint removal and/or application of new TBT paint, employ methods designed to prevent introduction of TBT paints into aquatic environments; and (b) following removal of TBT paint and/or application of new TBT paint, all paint chips and spent abrasives, paint containers, unused paint, and any other waste products from paint removal or application must be disposed of in a sanitary landfill. The Agency proposes that TBT antifouling paint product labels include language requiring compliance with these actions as part of proper use of the TBT antifoulant product.

IV. Procedural Matters

A. Referral to the Secretary of Agriculture and the Scientific Advisory Panel

As required by FIFRA sections 6(b) and 25(d), and 40 CFR 154.31(b), EPA will transmit copies of this Notice, a draft Notice of Intent to Cancel and the support document, to the Secretary of Agriculture and the Scientific Advisory Panel for comment. If either the Secretary or the Panel comments in writing on EPA's proposed action within 30 days of receipt of the draft Notice and support documents, the Agency must publish any comments received from the Secretary or the Panel, and EPA's responses, in the Notice of Final Determination.

B. Procedures for Responding to Notice of Final Determination

1. *Hearing request.* Registrants, applicants, and other interested parties who would be adversely affected by any decision to cancel or deny applications for the registration of TBT antifouling paint products would be entitled to request a hearing in which to contest EPA's final decision to cancel registrations and deny applications for failure to comply with the modifications to registration listed in any final Notice of Intent to Cancel. Under FIFRA, such persons must submit their requests for a hearing within 30 days either following receipt of any final Notice of Intent to Cancel or Notice of Denial or following its publication in the **Federal Register**, whichever is later. As EPA will explain in detail in any final Notice of Intent to Cancel or Notice of Denial, a hearing request must contain information concerning the basis of the request. If a timely, properly formulated hearing request is submitted and a hearing is initiated, the product registrations which are the subject of the request will remain in effect during the cancellation hearing. Similarly, applications for registration with respect to which valid and timely hearing requests have been filed remain pending unless and until they are denied or granted by order of the Administrator at the conclusion of the hearing.

If a proper and timely hearing request is not submitted for a product, registration of that product would be cancelled. A final cancellation or denial would have the effect of prohibiting further sale and distribution, except as specified in any existing stocks provision included in the final notice.

2. *Amendment of registration or application.* Registrants who would be affected by any final decision to cancel the registrations of TBT antifouling paint products unless the terms and conditions of the registrations are modified may avoid cancellation, without requesting a hearing, by filing an application for an amended registration that contains release rate levels, which comply with the release rate standard detailed in any final Notice of Intent to Cancel, and the label modifications detailed in the Notice of Intent to Cancel. This application must be filed within 30 days of receipt of the final notice, or within 30 days of publication of the final notice, whichever occurs later. Similarly, applicants for a registration that would be subject to the final notice would have to file an amended application for registration within the applicable 30-day period to avoid denial of the application.

Applications which conform to the terms and conditions included in the Notice of Intent to Cancel which are found by the Agency to be acceptable will be granted conditional registrations. A condition of such registration will be that acceptable studies using the ASTM/EPA release rate method supporting the release rate included in the application will be submitted to the Agency within 120 days of the grant of conditional registration. The Agency believes this time period for submitting the supporting data is reasonable, particularly since the registrants are now on notice, well in advance of such a deadline.

It should be noted that registrants (and applicants) are not required to request a hearing or to amend their registrations (or applications) at this time in order to be allowed to continue to sell and distribute their products within this period.

V. Public Comment Opportunity

The Agency is providing a 90-day period to comment on this Notice and on the TBT Technical Support Document. The Agency is particularly soliciting comments on the issues discussed in Unit III above. Comments must be submitted by January 5, 1988. All comments and information should be submitted in triplicate to the address given in this Notice under ADDRESS, to facilitate the work of EPA and others interested in inspecting them. The comments and information should bear the identifying notation OPP–30000/49A. All comments, information, and analyses which come to the attention of EPA may serve as a basis for final determination of regulatory action during the Special Review.

During the comment period, interested members of the public or registrants may request a meeting to discuss factual information available to the Agency, to present any factual information, to respond to presentations by other persons, or to discuss what regulatory actions should be taken regarding TBT antifouling paint products. Persons interested in arranging such meetings should contact the Review Manager listed in this Notice under **FOR FURTHER INFORMATION CONTACT.**

VI. Public Docket

Pursuant to 40 CFR 154.15, the Agency, has established a public docket (OPP–30000/49A) for the Tributyltin Special Review. The public docket includes (1) this Notice; (2) any other notices pertinent to the TBT Special Review; (3) non-CBI documents and copies of written comments or other materials submitted to the Agency in response to this Notice, and any other Notice, regarding TBT submitted at any time during the Special Review process by any person outside government; (4) a transcript of any public meeting held by the Agency for the purpose of gathering information on TBT; (5) memoranda describing each meeting held during the Special Review process between Agency personnel and any person outside government pertaining to TBT; and (6) a current index of materials in the TBT public docket.

On a monthly basis, the Agency will distribute a compendium of indices for newly received comments and documents that have been placed in the public docket for this Special Review. This compendium will be distributed by mail to those members of the public who have specifically requested such material for this Special Review, pursuant to 40 CFR 154.15(f)(3).

Dated: September 30, 1987.

John A. Moore,

Assistant Administrator for Pesticides and Toxic Substances.

FR Doc. 87–23177 Filed 10–6–87; 8:45 am]

BILLING CODE 6560–50–M

[FRL–3273–7]

Sole Source Designation of the North Florence Dunal Aquifer Lane County, OR

AGENCY: Environmental Protection Agency.

ACTION: Final determination.

SUMMARY: Pursuant to section 1424(e) of the Safe Drinking Water Act, the Administrator of the U.S. Environmental Protection Agency has determined that the North Florence Dunal Aquifer in Lane County, Oregon is the sole source of drinking water for the Florence area and that the aquifer, if contaminated, would create a significant hazard to public health. As a result of this action, federal financially-assisted projects constructed in the designated area will be subject to EPA review to ensure that these projects are designed and constructed so that they do not create a significant hazard to public health.

EFFECTIVE DATE: This determination shall be promulgated for purposes of judicial review at 1:00 p.m. Eastern time on October 21, 1987.

ADDRESSES: The data upon which these findings are based are available to the public and may be inspected during normal business hours at the Siuslaw Public Library, 250 Highway 101, North Florence, Oregon; Eugene Public Library, 100 W. 13th Avenue; EPA Oregon Operations Office, 811 SW. Sixth Avenue, Portland, Oregon; and EPA Region 10 Library, 1200 Sixth Avenue, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Jonathan Williams at (206) 442–1541 or FTS 399–1541.

SUPPLEMENTARY INFORMATION: Notice is hereby given that pursuant to section 1424(e) of the Safe Drinking Water Act [42 U.S.C. 300f, 300h–3(e), Pub. L. 93–523] the Administrator of the U.S. Environmental Protection Agency has determined that the North Florence Dunal Aquifer located in Lane County, Oregon is a sole or principal source of drinking water for much of the aquifer service area. Pursuant to section 1424(e), federal financially-assisted projects constructed in this designated area will be subject to EPA review.

I. Background

Section 1424(e) of the Safe Drinking Water Act states: "If the Administrator determines, on his own initiative or upon petition, that an area has an aquifer which is the sole or principal drinking water source for the area and which, if contaminated, would create a significant hazard to public health, he shall publish notice of that determination in the **Federal Register.** After the publication of such notice, no commitment for federal financial assistance [through a grant, contract, loan guarantee, or otherwise] may be entered into for any project which the Administrator determines may contaminate such aquifer through a recharge zone so as to create a significant hazard to public health, but a commitment for federal financial assistance may, if authorized under

another provision of the law, be entered into to plan or designate the project to assure that it will not so contaminate the aquifer."

On June 2, 1985, Shirlee J. Gardinier of Florence, Oregon submitted a petition requesting that the Administrator of EPA designate the aquifer underlying the City of Florence and the Heceta Water District service area as the sole drinking water source for the area. Notice of this petition and a request for public comment was published in the **Federal Register** on November 13, 1985. Another **Federal Register** notice was published on March 3, 1986, stating the (1) The EPA Regional Office was proposing to recommend to the Administrator that the North Florence Dunal Aquifer be designated as a sole source aquifer, (2) a support document summarizing the bases for this recommendation was available for review, (3) public comments were being requested, and (4) a hearing was to be held if interest was expressed by the public. The hearing was cancelled because of insufficient public interest. The public comment period remained open until August 1, 1986.

Further technical evaluation resulted in adjusting the proposed designated area boundaries to coincide with published information which characterizes the geology and hydrology of the area. Accordingly, EPA prepared a revised document entitled *Resource Document for Consideration of the North Florence Dunal Aquifer as a Sole Source Aquifer*. Legal notices, announcing distribution of the document and requesting public comment until September 21, 1987, were printed in the Siuslaw News on August 26, 1987, and the Eugene Register Guard on August 27, 1987. Legal notices were sent to area post offices on August 21, 1987, and the Region 10 office issued a press release on August 25, 1987.

II. Basis for Determination

Among the determinations which the Administrator must make in connection with the designation of an area under section 1424(e) are: (1) Whether the aquifer is the sole or principal source of drinking water in the area, and (2) whether, if contaminated, a significant hazard to public health would result.

Based on the information available to this Agency, the Administrator has made the following findings, which are the bases for the determination noted above:

1. The North Florence Dunal Aquifer directly supplies 68 percent of the drinking water used in the area. Furthermore, the aquifer partly recharges Clear Lake, the only supply of surface water presently used for drinking water in the area.

2. No economically feasible alternative drinking water sources exist within the area or nearby.

3. Ground-water contamination can be difficult or impossible to reverse. Therefore, since the aquifer system represents the sole source of drinking water for the area, contamination of the aquifer would pose a significant hazard to public health.

III. Description of the North Florence Dunal Aquifer

[Information in this section represents an unfootnoted summary of material from: *Support Document for Designation of the North Florence Dunal Aquifer as a Sole Source Aquifer*, published in September of 1987 by the Region 10 Office of Ground Water.]

The North Florence Dunal Aquifer represents a hydrologically isolated portion of an extensive dunal aquifer located along the south-central Oregon coastline. The entire dunal aquifer, whose width ranges from less than one mile to over three miles, extends almost 60 miles from Coos Bay north to Heceta Head. The dunal area north of the Siuslaw River, referred to as the North Florence Dunal Aquifer, represents about 15 percent of the total aquifer length and covers roughly 19 square miles.

The area originally petitioned for sole source aquifer status included only the unconsolidated sand deposits between the Siuslaw River and Sutton Creek. However, available information suggests that the sand dune area north of Sutton Creek is not hydrologically separate from the rest of the aquifer. Also, part of the bedrock surface east of the dunes supplies runoff into lakes which are hydrologically connected to the aquifer. Therefore, these areas have also been included in the sole source aquifer area.

The North Floence Dunal Aquifer encompasses the entire continuous body of sand located north of the Siuslaw River and east of the Pacific Ocean. The surface contact between bedrock and the unconsolidated sand forms the northern and eastern boundary of the designated area as far south as Mercer Lake. The boundary between bedrock and the dunal aquifer has been drawn on the basis of a surface geological map published in 1974 by the Oregon Department of Geology and Mineral Industries. In addition to the dunal sand area itself, steep drainage areas east of Collard, Clear, Ackerley, and Munsel Lakes have been included in the designated area because published information strongly suggests that those lakes are hydrologically connected to the aquifer. Therefore, the surface drainage divided located just east of the lakes forms the eastern boundary of the designated area from Mercer Lake south to the Siuslaw River.

Rainfall in the area averages 65 inches per year, and approximately 85 percent of the rain which falls upon the sand-covered surface percolates into the water table. Locally, discontinuous buried soil layers and peat beds, both partly cemented by iron oxides, act to retard vertical movement. However, on a large scale, ground water moves rapidly and almost uniformly towards a discharge point. In fact, tritium age dating indicates that water in the aquifer replaces itself at least every 30 years.

The North Florence Dunal Aquifer discharges principally into the Pacific Ocean and Siuslaw River. Multiple seeps and springs occur along the coastline and riverbank, although areas of quicksand indicate that the aquifer discharges mostly as underflow. The water table slopes westward at about 10 feet per 1,000 feet and southward at about 5 feet per 1,000 feet from its highest portion, located west of Mercer, Collard, and Clear Lakes. Munsel Creek intercepts some of the ground water flowing towards the Siuslaw River. Likewise, Sutton Creek and Berry Creek intercept some of the westward moving ground water before it discharges into the Pacific.

The string of lakes along the eastern boundary of the acquifer are a minor discharge area. However, the aquifer supplies a significant amount of water to the lakes, especially during the summer months when surface water inflow decreases and withdrawals from Clear Lake are increased. Hydrographs comparing lake levels with aquifer levels strongly suggest a hydrologic connection between the surface and ground water supplies. More refined studies estimate that the aquifer supplies at least 27 percent of Clear Lake's annual water supply and a much higher proportion during the dry season.

Few streams cross the dunal area since most rainfall quickly infiltrates to the water table. Those streams which do flow across the area (Munsel Creek, Sutton Creek, and Berry Creek) originate in upland ares of relatively impermeable bedrock. Where streams flow across the sand they are hydrologically connected with the ground-water system. In fact, effluent ground water provides most of the flow of Sutton and Munsel Creeks at their points of discharge.

From a human health standpoint, the aquifer provides water of good quality.

However, naturally high concentrations of dissolved iron require treating the water for aesthetic reasons. The naturally high dissolved iron content apparently results from weakly acidic ground water (pH of 5.6 to 6.2) reacting with the iron-rich minerals found in some sand grains.

Rapid infiltration rates into the sand cover combined with a shallow water table make the North Florence Dunal Aquifer highly susceptible to contamination from surface activity. Despite the relatively rapid flow of ground water through the aquifer, water soluble contaminants introduced near the surface may remain in the ground water system for nearly 60 years. Immiscible contaminants, such as petroleum distillates, would spread rapidly if spilled onto the permeable sand cover but would resist flushing by natural ground water flow.

Possible sources of aquifer contamination include fuel storage tank failure, accidental spills of hazardous material transported across the aquifer, improper storing or handling of hazardous materials, spetic tank effluent, storm runoff, pesticides, and chemical fertilizers. The lakes located along the eastern margin of the dunal area would suffer from any contaminants introduced into that portion of the aquifer which recharges the lakes. Direct leaching from septic tanks located in sand-covered areas adjacent to the lakes could seriously downgrade the quality of Clear Lake—the only surface source of drinking water presently used in the area.

Localized overpumping of the aquifer near the ocean could result in saltwater intrusion. However, population projections by the Lane County Planning Staff suggest that such overdrafts are unlikely.

Drinking water for the proposed sole source area comes almost exclusively from two water districts. The City of Florence serves areas within the city limits whereas the Heceta Water District serves residents outside of Florence. Florence produces most of the water it consumes from two city owned and operated wells. A treatment plant near the wells precipitates and filters out the iron in additon to providing chlorination. The city purchases supplemental water from the Heceta Water District during seasonal periods of increased demand. The Heceta Water District pumps water from Clear Lake and distributes it after chlorination. As of 1985, withdrawals from Clear Lake by the water district accounted for about 18 percent of annual outflow from the lake. Although the Heceta Water District has only a few hundred connections fewer than Florence, a much higher percentage of its customers are seasonal residents. Accordingly, annual production by the Heceta Water District averages less thanb half that of the City of Florence.

Locally available surface water cannot qualify as a truly alternative source because of the hydrologic connection between surface water and ground water across the dunal surface. For instance, aquifer recharge to Clear Lake during the summer months, when surface inflow drops sharply and water consumption raises dramatically, already represents a significant part of the lake's inflow. Therefore, additional pumping from Clear Lake would, in essence, simply represent additional pumping from the aquifer.

Coastal lakes south of the Siuslaw River, such as Woahink Lake, have been suggested as an alternative water source. However, installing pumping stations, filtration equimpment, storage facilities, and transmission lines would significantly increase consumer costs. Furthermore, the coastal lakes south of the Siuslaw River are hydrologically connected to a dunal aquifer which is just as vulnerable to contamination as the North Florence Dunal Aquifer.

Streams which originate in the bedrock uplands east of the aquifer lack the year-around flow needed to meet water consumption in the area. Original studies of the dunal acquifer at Florence were conducted over 25 years ago because surface streams and wells drilled into bedrock could not meet the growing water needs of the area. Any reservoir construction projects designed to provide a steady supply of surface water would face serious obstacles which include: (1) Steep topography susceptible to landslides; (2) bedrock units which present engineering difficulties; and (3) silting problems associated with runoff from heavily logged slopes. These obstacles alone would raise costs to prohibitive levels.

IV. Project Review

When the EPA Administrator publishes this determination for a sole or principal drinking water source, the consequence is that no commitment for federal financial assistance may be made if the Administrator finds that the federal financially-assisted project may contaminate the aquifer through a recharge zone so as to create a significant hazard to public health [Safe Drinking Water Act section 1424(e), 42 U.S.C. 300h(e)]. In many cases, these federal financially-assisted projects may also be analyzed in a National Environmental Policy Act (NEPA) document, 42 U.S.C. 4332 (2)(c). All NEPA documents, as well as any other proposed federal actions affecting an EPA program or responsibility, are required by federal law to be reviewed and commented upon by the EPA Administrator.

To streamline EPA's review of the possible environmental impacts upon designated aquifers, when an action is analyzed in a NEPA document, the two reviews will be consolidated, and both authorities will be cited. The EPA review under the Safe Drinking Water Act of federal financially-assisted projects potentially affecting sole or principal source aquifers will be included in the EPA review of any NEPA document accompanying the same federal financially-assisted project. The letter transmitting EPA's comments on the final Environmental Impact Statement to the lead agency will be the vehicle for informing the lead agency of EPA's actions under section 1424(e).

V. Discussion of Public Comment

Most of the comments received from the public were supportive of the designation. However, one commenter requested additional information; one commenter requested an emergency determination for designation of the aquifer as a sole source aquifer; one commenter suggested Woahink Lake as an alternative source of drinking water; and several commenters felt EPA project review would create another layer of government that wasn't needed.

In review and response to the public comments, EPA believes it to be inappropriate to designate the aquifer under emergency powers because it has not been demonstrated that a threat of "an imminent and substantial endangerment to the health of persons" is present. Woahink Lake cannot be considered an alternative source of drinking water for the following reasons: (1) 100 percent of allowable withdrawals are reserved for Dunes City municipal use by the Oregon Water Resources Commission; (2) installing a water treatment plant, pumping stations, storage facilities, and transmission lines would significantly increase consumer costs; and (3) the lakes south of the Siuslaw River are hydrologically connected to a dunal aquifer which is as vulnerable to contamination as the North Florence Dunal Aquifer.

EPA project review will be streamlined and will not result in government redundancy. To date, no federal financially-assisted projects within a Region 10 designated sole source aquifer have required cancellation. The proponents of projects which were determined to represent a threat to the aquifer have either

BEST COPY AVAILABLE

willingly modified their plans to minimize the danger of aquifer contamination or sought a private source of financial backing.

VI. Summary

Today's action only affects the North Florence Dunal Aquifer in Lane County, Oregon. This action provides a review process to ensure that necessary ground-water protection measures are incorporated into federal financially-assisted projects.

Date: September 28, 1987.

Robie G. Russell,

Regional Administrator.

BILLING CODE 6560-50-M

[OW-FRL-3274-6]

Water Quality Act Steering Committee; Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of reschedule of public meeting.

SUMMARY: This notice is a revision to the notice of public meeting of the Water Quality Act Steering Committee which appeared in the September 10, 1987 **Federal Register** under the heading "Water Quality Act Steering Commitee: Meeting." (52 FR 34294) The date and location of this meeting have been changed. The meeting is now scheduled to be held at Hall of the States, 444 North Capitol Street, NW., Washington, DC 20001, in Room 237-239 beginning at 10:00 a.m. on October 22, 1987 and ending at about 4:00 p.m. on the same day (with a break for lunch). All other information on this meeting which was provided in the September 10, 1987 notice of public meeting mentioned above is accuracte.

SUPPLEMENTARY INFORMATION: In a related activity to the Water Quality Act Meeting, the Environmental Protection Agency Management Advisory Group (MAG) is holding a public meeting on October 15 and 16 at Loew's L'Enfant Plaza, 480 L'Enfant Plaza, SW., Washington, DC 20024. A notice of the MAG meeting appeared in the **Federal Register** on September 29, 1987. The Draft State Water Pollution Revolving Fund (SRF) Guidance will be a major topic of discussion at this meeting.

The Draft SRF Guidance will, however, be one of several topics of discussion at the Water Quality Act Steering Committee Meeting which this notice addresses. Individuals interested in more than a cursory discussion of the Draft SRF Guidance should therefore attend the MAG meeting on October 15 and 16.

Dated: October 5, 1987.

Lawrence J. Jensen,

Assistant Administrator for Water.

[FR Doc. 87-23342 Filed 10-6-87; 8:45 am]

FEDERAL RESERVE SYSTEM

Agency Forms Under Review

October 1, 1987.

Background: Notice is hereby given of the submission of proposed information collection(s) to the Office of Management and Budget (OMB) for its review and approval under the Paperwork Reduction Act (Title 44 U.S.C. Chapter 35) and under OMB regulations on Controlling Paperwork Burdens on the Public (5 CFR Part 1320). A copy of the proposed information collection(s) and supporting documents is available from the agency clearance officer listed in the notice. Any comments on the proposal should be sent to the OMB desk officer listed in the notice. OMB's usual practice is not to take any action on a proposed information collection until at least ten working days after notice in the **Federal Register**, but occasionally the public interest requires more rapid action.

For Further Information Contact:

Federal Reserve Board Clearance Officer—Nancy Steele—Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, DC 20551 (202-452-3822)

OMB Desk Officer—Robert Fishman—Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3208, Washington, DC 20503 (202-395-7340).

Request for OMB Approval To Extend Without Revision

1. Report title: Quarterly Country Exposure Report for U.S. Branches and Agencies of Foreign Banks
Agency form number: FFIEC 019
OMB Docket number: 7100-0213
Frequency: Quarterly
Reporters: U.S. branches and agencies of foreign banks
Annual reporting hours: 14,400
Small businesses are not affected.
General description of report: This information collection is mandatory [12 U.S.C. 248] and is given confidential treatment [5 U.S.C. 552(b)(4) and (b)(8)], except for one item, i.e., column 4, line 1, "Total adjusted claims" on home country.

Each quarter, every U.S. branch or agency (of a foreign bank) with more than $30 million in total direct claims on foreign residents is required to report information on its exposure to its home country and to the five other countries to which its exposure is largest and is at least $5 million for an individual country. The data are used for supervisory and regulatory purposes.

Board of Governors of the Federal Reserve System, October 1, 1987.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-M

Agency Forms Under Review

October 1, 1987.

Background: Notice is hereby given of final approval of proposed information collection(s) by the Board of Governors of the Federal Reserve System (Board) under OMB delegated authority, as per 5 CFR 1320.9 (OMB Regulations on Controlling Paperwork Burdens on the Public).

For Further Information Contact:

Federal Reserve Board Clearance Officer—Nancy Steele—Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, DC 20551 (202-452-3822)

OMB Desk Officer—Robert Fishman—Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3228, Washington, DC 20503 (202-395-7340)

Proposal to Approve Under OMB Delegated Authority the Extension, Without Revision, of the Following Reports

1. Report title: Officer's Questionnaire
Agency form number: FR 2410
OMB Docket number: 7100-0050
Frequency: On occasion
Reporters: State member banks
Annual reporting hours: 70
Small businesses are affected.
General description of report: This information collection is mandatory [12 U.S.C. 325] and is given confidential treatment [5 U.S.C. 552(b)(8)].

The Federal Reserve requests a senior bank officer to complete this questionnaire, which provides information regarding past, present, and potential lawsuits in which the bank has been or may become involved concerning consumer credit compliance.

2. Report title: Consumer Satisfaction Questionnaire
Agency form number: FR 1379
OMB Docket number: 7100–0135
Frequency: On occasion
Reporters: Consumers who have filed consumer complaints concerning state member banks
Annual reporting hours: 9
Small businesses are affected.
General description of report: This information collection is voluntary [15 U.S.C. 57(a)(f)(1)] and is not given confidential treatment.

This questionnaire is sent by the Federal Reserve system to people who have filed a consumer complaint with a Federal Reserve Bank concerning a state member bank. Ccmplainants are requested to answer questions voluntarily about the effectiveness of the Reserve Bank's effort in handling the consumer complaint.

3. Report title: Uniform Form for Registration as a Transfer Agent and for Amendment to Registration
Agency form number: FR TA–1
OMB Docket number: 7100–0099
Frequency: On occasion
Reporters: State member banks, bank holding companies, and nondeposit trust company subsidiaries of bank holding companies.
Annual reporting hours: 80
Significant effect on small businesses is not expected.
General description of report: This information collection is mandatory [Section 17A(c) of the Securities Exchange Act of 1934; and 12 CFR 208.8(f)(2)] and is not given confidential treatment.

This interagency form fulfills the statutory registration requirements for entities acting as transfer agents and enables certain basic information changes concerning the transfer agents to become known by the supervisory agencies.

4. Report title: Notice Claiming Status as an Exempt Transfer Agent
Agency form number: FR 4013
OMB Docket number: 7100–0137
Frequency: On occasion
Reporters: Banks, bank holding companies, and trust companies
Annual reporting hours: 16
Significant effect on small businesses is not expected.
General description of report: This information collection is mandatory [15 U.S.C. 78q–1(c)(1)] and is not given confidential treatment.

This notice provides a method for banks, bank holding companies, and trust companies who are subject to Federal Reserve Board supervision and who are engaged as a transfer agent on behalf of an issuer of securities to claim exemption from several of the Securities and Exchange Commission's rules applicable to registered transfer agents.

Board of Governors of the Federal Reserve System, October 1, 1987.
William W. Wiles,
Secretary of the Board.
[FR Doc. 87–23157 Filed 10–6–87; 8:45 am]
BILLING CODE 6210–01–M

Agency Forms Under Review

October 1, 1987.

Background: Notice is hereby given of final approval of proposed information collection(s) by the Board of Governors of the Federal Reserve System (Board) under OMB delegated authority, as per 5 CFR 1320.9 (OMB Regulations on Controlling Paperwork Burdens on the Public).

For Further Information Contact:

Proposal to Approve Under OMB Delegated Authority the Extension, With Revision, of the Following Reports

1. Report title: Applications for Membership in the Federal Reserve System
Agency form number: FR 2083, 2083A–2083E
OMB Docket number: 7100–0046
Frequency: On occasion
Reporters: Commercial banks and certain mutual savings banks
Annual reporting hours: 3,071
Significant effect on small businesses is not expected.
General description of the report: This application provides managerial, financial and structural data necessary for the Federal Reserve Board to evaluate a new or existing bank's application for admission to the Federal Reserve System pursuant to criteria established by statute and regulation (Regulation H). The revisions would standardize the format of certain information and request certain additional information usually developed in the normal course of business in opening a new bank.

This information collection is authorized by law [12 U.S.C. 321–328]. Parts may be given confidential treatment at applicant's request [5 U.S.C. 552(b)(4)].

2. Report title: Report of Selected Deposits in Foreign Branches Held by U.S. Addressees
Agency form number: FR 2050
OMB Docket number: 7100–0068
Frequency: Weekly
Reporters: Foreign branches of U.S. banks and of Edge and Agreement corporations
Annual reporting hours: 9009
Small businesses are not affected.
General description of report: This information collection is authorized by law [12 U.S.C 248(a), 355, 461. Individual respondent data are exempt from disclosure under the Freedom of Information Act [5 U.S.C. 552 (b)(4), (b)(8)].

This report collects data from a selection of foreign branches of U.S. banks on overnight Eurodollar deposits held by U.S. nonbank residents. Data are used in construction of the monetary aggregates and analysis of liability management. A revision in the panel selection criteria will reduce the size of the panel by approximately 18 percent.

3. Report title: Monthly Report of Large International Banking Facility Accounts
Agency form number: FR 2072
OMB Docket number: 7100–0158
Frequency: Monthly
Reporters: International Banking Facilities (IBFs) of large U.S.-chartered banks and large U.S. branches and agencies of foreign banks
Reporting hours: 1187
Small businesses are not affected.
General description of report: This information collection is required by law [12 U.S.C. 248(a), 602, 625, and 3105(b)]. Individual respondent data are given confidential treatment [5 U.S.C. 552(b)(4)].

This report collects data on assets and liabilities of International Banking Facility (IBF) accounts. Data are used to assist in interpreting the monetary aggregates and to monitor IBF activities. The revisions include an increase in the reporting threshold which would reduce the panel; minor changes in report items; and a change in report date to the last day of the month.

4. Report title: Monthly Report of Foreign Branch Assets and Liabilities
Agency form number: FR 2502
OMB Docket number: 7100–0078
Frequency: Monthly
Reporters: Foreign branches of U.S. banks and of Edge and Agreement corporations

Reporting hours: 15,756
Small businesses are not affected.
General description of report: This report is required by law [12 U.S.C. 248(a)(2), 353 et seq., 602 and 625]. Individual respondent data are given confidential treatment [5 U.S.C. 552(b)(8)].

This report provides a breakdown of foreign branch assets and liabilities by category of customer and between dollars and foreign currencies. Data are used for supervisory purposes, in construction of the monetary aggregates, and to monitor U.S. banks' foreign activities. The revisions include minor changes in reporting instructions and in form items.

5. Report title: Quarterly Report of Foreign Branch Assets and Liabilities
Agency form number: FR 2502S
OMB Docket number: 7100–0079
Frequency: Quarterly
Reporters: Foreign branches of U.S. banks and Edge and Agreement corporations
Reporting hours: 7070
Small businesses are not affected.
General description of report: This report is required by law [12 U.S.C. 248(a)(2), 353 et seq., 602 and 625]. Individual respondent data are given confidential treatment [5 U.S.C. 552(b)(8)].

This report provides a geographic breakdown of assets and liabilities of foreign branch offices of U.S. banks. It is used to monitor U.S. banks' claims on and liabilities to individual foreign countries by particular branch offices and to monitor countries' indebtedness to U.S. banks. The revisions include minor changes in instructions and country names on the form.

6. Report title: Community Reinvestment Act Questionnaire
Agency form number: FR 1283
OMB Docket number: 7100–0052
Frequency: On occasion
Reporters: State member banks
Annual reporting hours: 521
Small businesses are affected.
General description of report: This information collection is mandatory [12 U.S.C. 325 and 12 U.S.C. 2901(b) and is given confidential treatment [5 U.S.C. 552(b)(8)].

The Federal Reserve requests a senior bank officer to complete this form, which is called the Community Reinvestment Act Questionnaire. The form provides information needed to make an assessment, as mandated by the Community Reinvestment Act, regarding the bank's effort to serve the credit needs of its local community. The revisions are minor wording changes to clarify the information being requested.

Board of Governors of the Federal Reserve System, October 1, 1987.
William W. Wiles,
Secretary of the Board.

BILLING CODE 6210–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Interest Rate on Overdue Debts

Section 30.13 of the Department of Health and Human Service's claims collection regulations (45 CFR Part 30) provides that the Secretary shall charge an annual rate of interest as fixed by the Secretary of the Treasury after taking into consideration private consumer rates of interest prevailing on the date that HHS becomes entitled to recovery. The rate generally cannot be lower than the Department of the Treasury's current value of funds rate or the applicable rate determined from the "Schedule of Certified Interest Rates with Range of Maturities." This rate may be revised quarterly by the Secretary of the Treasury and shall be published quarterly by the Department of Health and Human Services in the **Federal Register**.

The Secretary of the Treasury has certified a rate of 14.25% for the quarter ended September 30, 1987. This interest rate will remain in effect until such time as the Secretary of the Treasury notifies HHS of any change.

Date: October 2, 1987.
Dennis J. Fischer,
Deputy Assistant Secretary, Finance.

BILLING CODE 4150–04–M

Food and Drug Administration

[Docket No. 87F–0300]

Betz Laboratories, Inc.; Filing of Food Additive Petition

AGENCY: Food and Drug Administration.
ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Betz Laboratories, Inc., has filed a petition proposing that the food additive regulations be amended to provide for the safe use of hydroquinone as an additive in boilers producing steam that may come in contact with food.

FOR FURTHER INFORMATION CONTACT: Eric Flamm, Center for Food Safety and Applied Nutrition (HFF–334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–426–5487.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786 (21 U.S.C. 348(b)(5))), notice is given that a petition (FAP 7A4031) has been filed by Betz Laboratories, Inc., 4636 Somerton Rd., Trevose, PA 19047, proposing that § 173.310 *Boiler water additives* (21 CFR 173.310) be amended to provide for the safe use of hydroquinone as an additive in boilers producing steam that may come in contact with food.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Reister** in accordance with 21 CFR 25.40(c).

Dated: September 30, 1987.
Richard J. Ronk,
Acting Director, Center for Food Safety and Applied Nutrition.

E.I. du Pont De Nemours & Co.; Filing of Food Additive Petition

AGENCY: Food and Drug Administration.
ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that E.I. du Pont de Nemours & Co. has filed a petition proposing that the food additive regulations be amended to provide for the safe use of a polymer manufactured by the condensation of hexamethylenediamine, terephthalic acid, and isophthalic acid for contact with all types of food, except beverages containing more than 8 percent alcohol.

FOR FURTHER INFORMATION CONTACT: Edward J. Machuga, Center for Food Safety and Applied Nutrition (HFF–335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786 (21 U.S.C. 348(b)(5))), notice is given that a petition (FAB 7B4001) has been filed by E.I. du Pont de Nemours & Co., Wilmington, DE 19898, proposing that § 177.1500 *Nylon resins* (21 CFR 177.1500) be amended to provide for the safe use of a polymer manufactured by the condensation of hexamethylenediamine, terephthalic

acid, and sophthaic acid for contact with all types of food, except beverages containing more than 8 percent alcohol.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c).

Dated: September 30, 1987.

[Docket No. 87N-0337]

Drug Export; Carbicarb Injection

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that International Medication Systems, Ltd. (IMS), has filed an application requesting approval for the export of the human drug Carbicarb Injection to Canada and the United Kingdom.

ADDRESS: Relevant information on this application may be directed to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, and to the contact person identified below. Any future inquiries concerning the export of human drugs under the Drug Export Amendments Act of 1986 should also be directed to the contact person.

FOR FURTHER INFORMATION CONTACT: Rudolf Apodaca, Center for Drugs and Biologics (HFN-310), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-295-8063.

SUPPLEMENTARY INFORMATION: The Drug Export Amendments Act of 1986 (Pub. L. 99-660) (section 802 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 382)) provides that FDA may approve applications for the export of drugs that are not currently approved in the United States. The approval process is governed by section 802(b) of the act. Section 802(b)(3)(B) of the act sets forth the requirements that must be met in an application for approval. Section 802(b)(3)(C) of the act requires that the agency review the application within 30 days of its filing to determine whether the requirements of section 802(b)(3)(B) have been satisfied. Section 802(b)(3)(A) of the act requires that they agency publish a notice in the **Federal Register** within 10 days of the filing of an application for export to facilitate public participation in its review of the application. To meet this requirement, the agency is providing notice that International Medication Systems, Ltd. (IMS), 1886 Santa Anita Ave., South El Monte, CA 91733, has filed an application requesting approval for the export of the drug Carbicarb Injection to Canada and the United Kingdom. This drug is indicated for use when correction of the pH is required in conditions of metabolic acidosis such as that related to cardiopulmonary bypass, renal disease, circulation insufficiency due to shock or dehydration, cardiac arrest and primary lactic acidosis. The application was received and filed in the Center for Drugs and Biologics on September 17, 1987, which shall be considered the filing date for purposes of the act.

Interested persons may submit relevant information on the application to the Dockets Management Branch (address above) in two copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. These submissions may be seen in the Dockets Management Branch between 9 a.m. and 4.pm., Monday through Friday.

The agency encourages any person who submits relevant information on the application to do so by October 19, 1987, and to provide an additional copy of the submission directly to the contact person identified above, to facilitate consideration of the information during the 30-day review period.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 802, Pub. L. 99-660 (21 U.S.C. 382)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Center for Drugs and Biologics (21 CFR 5.44).

Dated: September 25, 1987.

Daniel L. Michels,

Director, Office of Compliance, Center for Drugs and Biologics.

BILLING CODE 4160-01-M

Health Care Financing Administration

[BPO-070-GNC]

Medicare Program; Criteria and Standards for Evaluating Intermediary and Carrier Performance During Fiscal Year 1988

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: General notice With comment period.

SUMMARY: This notice describes the criteria and standards to be used for evaluating the performance of fiscal intermediaries and carriers in the administration of the Medicare program for the fiscal year beginning October 1, 1987. The results of these evaluations are considered whenever we enter into, renew, or terminate an intermediary or carrier contract or take other contract actions; assign or reassign providers of services to an intermediary; or designate regional or national intermediaries. In addition, this notice describes the methodology used for identifying contractors for competitive replacement under section 2326 of the Deficit Reduction Act of 1984.

This notice is published in accordance with sections 1816(f) and 1842(b)(2) of the Social Security Act, which requires us to publish for public comment in the **Federal Register**, those criteria and standards against which we evaluate intermediaries and carriers.

DATE: The criteria and standards are effective October 1, 1987. We will consider revising the criteria and standards based on public comments. To assure consideration, comments must be sent to the appropriate address and received by December 7, 1987.

ADDRESSES: Address comments in writing to: Health Care Financing Administration, Department of Health and Human Services, Attention: BPO-070-GNC, P.O. Box 26676, Baltimore, Maryland.

In commenting, please refer to file code BPO-070-GNC.

If you prefer, you may deliver your comments to Room 309-G Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC or to Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland.

Comments will be available for public inspection as they are received, generally beginning approximately three weeks after publication, in Room 309–G of the Department's office at 200 Independence Avenue, SW., Washington, DC 20201, on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. (202–245–7890).

Because of the large number of comments we receive, we cannot acknowledge or respond to them individually. We will, however, accept the timely comments, consider them, and publish the comments and our responses to them in a subsequent Federal Register if we modify the FY 1988 criteria and standards as announced.

FOR FURTHER INFORMATION CONTACT: John Barton, (301) 594–8502.

SUPPLEMENTARY INFORMATION:

A. Background

Under section 1816 of the Social Security Act (the Act), public or private organizations and agencies participate in the administration of Part A (Hospital Insurance) of the Medicare program under agreements with the Secretary of Health and Human Services. These agencies or organizations are known as fiscal intermediaries, and they perform bill processing and benefit payment functions for the Medicare program. Most providers of services (such as hospitals, skilled nursing facilities (SNFs), and home health agencies (HHAs)) submit bills to these intermediaries, which determine whether the services are covered under Medicare and determine correct payment amounts. The intermediaries then make payments to the providers on behalf of the beneficiaries.

Under section 1842 of the Act, we are authorized to enter into contracts with carriers to fulfill various functions in the administration of Part B (Supplementary Medical Insurance) of the Medicare program. Beneficiaries, physicians and suppliers of services submit claims to these carriers. The carriers determine whether the services are covered under Medicare and the reimbursable amount (usually on the basis of reasonable charges) for the services or supplies and then make payment to the appropriate party.

Under section 1816(f) of the Act, we are required to develop criteria, standards, and procedures to evaluate an intermediary's performance of its functions under its agreement with us. We evaluate intermediary performance through the Contractor Performance Evaluation Program (CPEP). Our regulations at 42 CFR 421.120 provide for publication of **Federal Register** notices to announce criteria and standards applicable during each fiscal year.

Under section 1842(b)(2) of the Act allows us to evaluate the performance of Medicare carriers. Since 1981, we have evaluated carrier performance under CPEP using criteria and standards similar to those used for intermediaries. When a fiscal intermediary exercises functions which are Part B functions, technically it does so as a Part B carrier under section 1842 of the Act. Under section 1842(a) of the Act, the Secretary is authorized to enter into contracts with carriers, including carriers with which agreements under section 1816 are in effect, to perform some or all of the Medicare Part B functions.

As a result of section 2326(c) of Pub. L. 98–369, the Deficit Reduction Act of 1984 (DEFRA), we publish in the **Federal Register** the criteria and standards used to evaluate both intermediaries and carriers in order to allow the public an opportunity to comment before implementing them. This notice announces the FY 1988 criteria and standards to be used to measure the effectiveness and efficiency of both intermediaries and carriers.

In addition, section 2326(a) of DEFRA, as amended by Section 9321 of the Omnibus Budget Reconciliation Act of 1986, Pub. L. 99–509, established the Secretary's statutory authority to replace up to two Part A and up to two Part B contractors which, over a period of time, have been in the lowest 20th percentile of Medicare contractors, as measured by performance criteria and standards. The contractor community has played a significant role in developing the DEFRA methodology and the ongoing revisions necessitated each year since legislated. However, this is the first time that the methodology for applying the DEFRA requirements is being published for comment in the **Federal Register**. It is HCFA's intention to afford this formal comment opportunity each year in the notice which conveys the performance criteria and standards. The ongoing exchange of ideas and comments which occurs through interaction between HCFA and its contractors will also continue, as in the past.

B. Fiscal Year 1988 Criteria and Standards—General

For FY 1988, we have redesigned CPEP to focus on more results- and output-oriented measures in an effort to create a more enhanced measurement tool. This redesign was accomplished as a result of a joint effort on the part of HCFA and representatives of the contractor community.

In redesignating CPEP we first identified the main functional responsibilities which are performed by the intermediaries and carriers (e.g., claims processing, medical review/utilization review, financial management, etc.) and these responsibilities have been termed "Functional Criteria." For intermediaries, we identified eleven separate criteria and, for carriers, we have identified ten. Next we identified how to measure performance for each criterion. We decided that appropriate measurement should fall into three basic key indicators or categories; cost, quality (accuracy), and timeliness. As appropriate, each key indicator contains one or more standards which measures contractor performance for that indicator within the functional criterion. Please note that not all three of the performance indicators may be necessarily appropriate to a functional criterion. That is, some functional criteria may only contain standards which measure one or two of the performance indicators.

The primary difference between the 1988 CPEP and the program for 1987 is the scoring and weighting structure. The actual performance standards/measurements used for the two years are very similar. Where differences exist in the standards from FY 1987 they are due to our intention that the FY 1988 CPEP be more results- and output-oriented. The FY 1988 CPEP's scoring and weighting structure moves away from the FY 1987 approach of equally weighted criteria and using uniform weights of 5, 3, or 1 for the standards within the criteria. To more effectively recognize the differences in the relative importance of functional requirements, the FY 1988 CPEP assigns points ranging from 60 to 160 to each functional criterion and, similarly, assigns points ranging from one to 100 to each standard within a functional criterion. This new weighting scheme provides HCFA with greater flexibility and contractor management with a clearer understanding of program emphases for the evaluation period. The scoring system for FY 1988 is discussed in greater detail in Section C of this notice. We are implementing, on a test basis, a standard to measure a carrier's timeliness in completion of hearings.

Action Based on Performance Evaluations

We may, as in previous years, initiate administrative actions as a result of the evaluation of intermediary and carrier performance based on these performance criteria and standards.

VOL 52 ISS 194 OCT 7 1987 UMI

Under sections 1816 and 1842 of the Social Security Act, we consider the results of the evaluation in our determination on:

1. Entering into, renewing, or terminating agreements with contractors; and

2. Decisions concerning other contract actions for intermediaries and carriers (such as deletion of an automatic renewal clause). These are made on a case-by-case basis and depend primarily on the nature and degree of performance. More specifically, they depend on:

a. Relative overall performance compared to other contractors;

b. Number of standards in which superior, average, or deficient performance occurs;

c. Extent of each failure; and

d. Relative significance of the standards for which superior or deficient performance occurs within the overall CPEP.

In addition, we consider the results of intermediary evaluation in determinations we make concerning assignment or reassignment of providers and designation of regional or national intermediaries for classes of providers.

We make individuals contract action decisions after considering these factors in terms of their reactive significance and impact on the efficient administration of the Medicare Program.

Replacement of Contractors Through Competitive Bidding

Section 2326(a) of Pub. L. 98–369 (DEFRA) allows HCFA to use competitive bidding to replace a contractor whose performance over a period of time has been in the lowest 20th percentile as measured by performance criteria and standards. In FY 1985 and FY 1986, section 2326(a) of DEFRA authorized HCFA to enter into two intermediary agreements and two carrier contracts based on competitive bidding, without regard to provider nomination rights, in order to replace poor performing intermediaries and carriers. The authority to replace poor performers under provisions of section 2326(a) was extended through the end of FY 1989 by section 9321(b) of Pub. L. 99–509. Section F of this notice outlines the methodology for complying with section 2326(a) of DEFRA for FY 1988.

C. Scoring System

For both intermediaries and carriers, the maximum score attainable is 1000 points. Each of the CPEP's functional criterion is assigned a given portion of the 1000 available points. There are two requirements for passing CPEP. One of the requirements is that 70 percent of the available points for each criterion must be attained. Each functional criterion contains one or more standards categorized as either a cost, quality, or timeliness measure. Each of the standards is assigned a portion of the total points for that functional criterion. Each standard has a method of evaluation that is used to calculate a rating based on a contractor's performance in that standard. The second requirement for passing CPEP is that 70 percent of the total available points for each category of standards, i.e., cost, quality/accuracy, and timeliness, must also be attained.

A contractor's performance is evaluated against each applicable standard. In general, if a contractor exactly meets the requirements for a standard, it achieves 70 percent of the points allocated to that standard, to which we refer as the threshold score. Any rating below that threshold (i.e., less than 70 percent) constitutes a deficiency requiring correction or improvement.

D. Criteria and Standards for Intermediaries

We will use 11 criteria to evaluate the overall performance of an intermediary in FY 1988. They are: (1) Unit Cost; (2) Process Claims; (3) Auditing; (4) Medical Review; (5) Medicare Secondary Payer; (6) Financial Management; (7) Beneficiary and Provider Services; (8) Reporting; (9) Fraud and Abuse; (10) Reimbursement; and (11) Management of Change. The eleven criteria contain a total of 60 standards. There are two for unit cost, nine for process claims, seven for auditing, three for medical review, one for Medicare secondary payer, five for financial management, four for beneficiary and provider services, 15 for reporting, three for fraud and abuse, six for reimbursement, and five for management of change.

1. Unit Cost Criterion (Total Points=95)

An intermediary must process all bills at an acceptable unit cost.

- Process bills at an acceptable unit cost (Standard 1=75 points) (Cost).
- Process appeals at an acceptable unit cost (Standard 2=20 points) (Cost).

2. Process Claims Criterion (Total Points=135)

An intermediary must properly control and process bills from providers, and transmit accurate bill information to HCFA. The intermediary is required to meet the following standards:

- Pay clean non-Periodic Interim Payment (PIP) bills within mandated timeframes (Standard 1=35 points) (Timeliness).
- Pay all bills within 60 days (Standard 2=5 points) (Timeliness).
- Pay all bills within 90 days (Standard 3=5 points) (Timeliness).
- Control payment of interest on clean bills (Standard 4=15 points) (Timeliness).
- Process adjustment records timely, and return the adjusted records to the PRO (Standard 5=10 points) (Timeliness).
- Assure that all Part A bills pass HCFA utilization and consistency edits (Standard 6=10 points) (Quality).
- Process Returns to Intermediaries (RTIs) in a timely manner (Standard 7=7 points) (Timeliness).
- Process Returns to Intermediaries (RTIs) accurately (Standard 8=3 points) (Quality).
- Process bills accurately (Standard 9=45 points) (Quality).

3. Auditing Criterion (Total Points=100)

An intermediary must administer the program in a manner that achieves maximum savings and cost avoidance for Medicare trust funds. We will use the standards below to evaluate the criterion for FY 1988. The intermediary is required to:

- Administer a cost-effective provider audit program (Standard 1=36 points) Cost).
- Perform properly when reviewing, auditing, adjusting, settling, and completing cost reports/statements (Standard 2=34 points) (Quality).
- Settle Hospital Cost reports timely (Standard 3=9 points) (Timeliness).
- Settle cost reports with malpractice and labor delivery room adjustments timely (Standard 4=9 points), (Timeliness).
- Issue Notices of Program Reimbursement (NPRs) on freestanding Home Health Agencies (HHA) cost reports timely (Standard 5=3 points) (Timeliness).
- Issue Notices of Program Reimbursement (NPRs) on freestanding SNF cost reports timely (Standard 6=3 points) (Timeliness).
- Complete Special Situations Audits timely (Standard 7=6 points) (Timeliness).

4. Medical Review Criterion (Total Points=125)

- An intermediary must perform medical review activities as required by HCFA instructions in a timely, accurate and cost effective manner. We will use the following standards to evalute this criterion in FY 1988. The intermediary is required to:

- Make accurate coverage determinations (Standard 1=75 points) (Quality).
- Administer a cost effective Medical Review (MR) program (Standard 2=25 points) (Cost).
- Apply appropriate HCFA MR policies (Standard 3=25 points) (Quality).

5. Medicare Secondary Payer Criterion (Total Points=80)

- An intermediary must administer the program in a manner which achieves maximum savings and cost avoidance to the Medicare trust funds. We will use the standard below to evaluate an intermediary's administration of the Medicare Secondary Payer provisions. The intermediary is required to:
- Achieve the Medicare Secondary Payer (MSP) savings goal (Standard 1=80 points) (Cost).

6. Financial Management Criterion (Total Points=65)

- An intermediary must take measures to trust the Medicare program and the public interest. It must manage Federal funds for both benefit payments and cost of administration in accordance with its agreement with the Secretary, the Federal Acquisition Regulations (Title 48, Chapter 1), the HHS Acquisition Regulations (Title 48, Chapter 3), and HCFA instructions. We will use the standards below to evaluate the criterion in FY 1988. The intermediary is required to:
- Ensure that costs are allowable, allocations are consistent (provide reasonable assurance that comparable transactions are treated alike) and chargeable to a particular cost objective in accordance with the relative benefits received or other equitable relationships (Standard 1=15 points) (Quality).
- Control administrative funds drawn to the quarterly limit on the Notice of Budget Approval (NOBA) and in line with actual expenditures (Standard 2=15 points) (Quality).
- Control actual expenditures to the latest approved budget (Standard 3=13 points) (Quality).
- Manage the benefit and time accounts properly and in accordance with the Medicare bank agreement (Standard 4=8 points) (Quality).
- Ensure proper expenditure of Payment Safeguards Funds (Standard 5=14 points) (Quality).

7. Beneficiary and Provider Services Criterion (Total Points=100)

An intermediary must ensure that, in Medicare matters, beneficiaries and providers are treated according to law, regulations, and general instructions covering such areas as responding to correspondence and processing reconsiderations timely and accurately. We will use the standards below to evaluate beneficiary and provider services for FY 1988. The intermediary is required to:

- Process reconsiderations accurately (Standard 1=25 points) (Quality).
- Process reconsiderations timely (Standard 2=15 points) (Timeliness).
- Process correspondence accurately (Standard 3=40 points) (Quality).
- Process correspondence timely (Standard 4=20 points) (Timeliness).

8. Reporting Criterion (Total Points=60)

An intermediary must manage Federal funds for both program payments and cost of administration in accordance with its agreement with HHS and HCFA. We will use the standards below to evaluate an intermediary's reporting function in FY 1988. The intermediary is required to:

- Submit accurate Plan of Expenditure Reports (POEs) and Variance Analyses (Standard 1=6 points) (Quality).
- Submit timely Plan of Expenditure Reports (POEs) and Variance Analyses (Standard 2=6 points) (Timeliness).
